

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE

An Autonomous Institution
(As per UGC - 2018 Regulations, Affiliated to Pondicherry University)

PUDUCHERRY – 605107

B.TECH.

**ARTIFICIAL INTELLIGENCE AND DATA SCIENCE
ACADEMIC REGULATIONS 2020
(R-2020)**

CURRICULUM AND SYLLABI

B.Tech. – Artificial Intelligence and Data Science

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting-edge technologies with best practices.

M2: Research and Innovation:

To foster value- based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill-based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT VISION AND MISSION

Vision

Incorporating the Data Science skills and applying the acquired analytical knowledge in the heterogeneous domains through Artificial Intelligence

Mission

M1: Understand Data Science:

Amalgamation of Programming Knowledge, Mathematical Skill Set and Knowledge of Business Domains to face the challenges of the real-world requirement

M2: Applying the Acquired Knowledge:

Inculcating the spirit of applying the acquired knowledge, innovation and creativity among students to work in heterogeneous domains

M3: Capstone Project:

Providing forum to carry out a capstone project through collaborations with the industries

M4: Be socially beneficial and other moral concerns:

Inspiring the educational experience in the field of application development and ensure the design, principle and ethic to be followed in the society.

M5: Continuous Learning for keen Initiative:

Affording continuous learning in the field of current trends in Artificial Intelligence and Data Science for keen initiative and enterprise focused.

B.Tech. – Artificial Intelligence and Data Science

PROGRAMME OUTCOMES (POs)**PO1: Engineering knowledge:**

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**PEO1: Acquiring the data:**

To create an essential knowledge for extracting data from heterogeneous domains.

PEO2: Information Inferring and Knowledge representation:

To equip the student with knowledge, through different programming skills and creating a knowledge representation for the inferred data, so that it can be applied in the real time scenario.

PEO3: Design method:

To enable the student as a Data Analyst by designing a right Machine Learning algorithm and seamless programming skill to solve any sort of application.

PEO4: Systematic Enhancement:

To provide them with a keen knowledge on current trends and to enhance its impact periodically on the existing applications to meet the future scenario.

PROGRAM SPECIFIC OBJECTIVES (PSOs)**PSO 1: Mathematical Foundation and Data Procuring:**

To utilize the knowledge of Mathematical concept in procured Data from various Data sources.

PSO 2: Intellect Applications and Research Technologies:

To utilize the technical concepts, ideas, methodologies and the new emerging technologies in Artificial Intelligence and use this knowledge in their analytic skill to solving the current and future Data Analytics real time applications.

PSO 3: Developments of Real Time Applications:

To utilize the knowledge acquired and create a forum to carry out a capstone project through collaborations with the industries

STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

| Sl.No | Course Category | Breakdown of Credits |
|--------------|---|----------------------|
| 1 | Humanities and Social Sciences (HS) | 7 |
| 2 | Basic Sciences (BS) | 16 |
| 3 | Engineering Sciences (ES) | 35 |
| 4 | Professional Core (PC) | 67 |
| 5 | Professional Electives (PE) | 18 |
| 6 | Open Electives (OE) | 9 |
| 7 | Project Work and Internship | 12 |
| 8 | Employability Enhancement Courses (EEC) | - |
| 9 | Mandatory courses (MC) | - |
| Total | | 164 |

SCHEME OF CREDIT DISTRIBUTION – SUMMARY

| Sl.No | Course Category | Credits per Semester | | | | | | | | Total Credits |
|--------------|--|----------------------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|---------------|
| | | I | II | III | IV | V | VI | VII | VIII | |
| 1 | Humanities and Social Sciences (HS) | - | - | 1 | 1 | - | 3 | 1 | 1 | 07 |
| 2 | Basic Sciences (BS) | 3 | 3 | 4 | 3 | 3 | - | - | - | 16 |
| 3 | Engineering Sciences (ES) | 11 | 14 | 10 | - | - | - | - | - | 35 |
| 4 | Professional Core (PC) | 4 | 4 | 8 | 12 | 12 | 15 | 9 | 3 | 67 |
| 5 | Professional Electives (PE) | - | - | - | 3 | 3 | 3 | 3 | 6 | 18 |
| 6 | Open Electives (OE) | - | - | - | 3 | 3 | - | 3 | - | 9 |
| 7 | Project Work (PW) | - | - | - | - | - | - | 2 | 8 | 10 |
| 8 | Internship (PW) | - | - | - | - | - | - | 2 | - | 02 |
| 9 | Employability Enhancement Courses (EEC)* | - | - | - | - | - | - | - | - | - |
| 10 | Mandatory Courses (MC)* | - | - | - | - | - | - | - | - | - |
| Total | | 18 | 21 | 23 | 22 | 21 | 21 | 20 | 18 | 164 |

** EEC and MC course Credits are not included for CGPA calculation

ANNEXURE - I

PROFESSIONAL ELECTIVE COURSES (18 CREDITS)

| Sl. No. | Course Code | Course Title |
|--|-------------|---|
| Professional Elective – I (Offered in Semester IV) | | |
| 1 | U20ADE401 | Automata and Compiler Design |
| 2 | U20ADE402 | Principles of Data Analytics |
| 3 | U20ADE403 | Soft Computing |
| 4 | U20ADE404 | GPU Computing |
| 5 | U20ADE405 | Microprocessors and Microcontrollers |
| Professional Elective – II (Offered in Semester V) * | | |
| 1 | U20ADE506 | Business Intelligence and Analytics |
| 2 | U20ADE507 | Exploratory Data Analysis |
| 3 | U20ADE508 | Digital Image Processing |
| 4 | U20ADE509 | Regression Analysis |
| 5 | U20ADE510 | Cognitive Systems |
| Professional Elective – III (Offered in Semester VI) * | | |
| 1 | U20ADE611 | Text Analytics |
| 2 | U20ADE612 | Social Network Analysis |
| 3 | U20ADE613 | Cloud Computing |
| 4 | U20ADE614 | Speech Recognition |
| 5 | U20ADE615 | Mobile Application Development |
| Professional Elective – IV (Offered in Semester VII) * | | |
| 1 | U20ADE716 | Image and Video Analytics |
| 2 | U20ADE717 | Business Analytics |
| 3 | U20ADE718 | Time Series Analysis and Forecasting |

ANNEXURE - II

OPEN ELECTIVE COURSES (12 CREDITS)

| S. No | Course Code | Course Title | Offering Department | Permitted Departments |
|---|-------------|---|---------------------|--|
| Open Elective – I (Offered in Semester IV) | | | | |
| 1 | U20EEO401 | Solar Photovoltaic Fundamental and applications | EEE | ECE, ICE, MECH, CIVIL, Mechatronics, CCE |
| 2 | U20EEO402 | Electrical Safety | EEE | ECE, ICE, MECH, CIVIL, Mechatronics, CCE, BME, IT, CSE, FT |
| 3 | U20ECO401 | Engineering Computation with MATLAB | ECE | EEE, ICE, MECH, CIVIL, CCE, BME, AI&DS, Mechatronics |
| 4 | U20ECO402 | Consumer Electronics | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics, FT |
| 5 | U20CSO401 | Web Development | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics |
| 6 | U20CSO402 | Analysis of Algorithms | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics |
| 7 | U20ITO401 | Database System: Design & Development | IT | EEE, ECE, ICE, CCE, BME |
| 8 | U20ITO402 | R programming | IT | EEE, ECE, ICE, CCE, BME, MECH, Mechatronics |
| 9 | U20ICO401 | Sensors and Transducers | ICE | ECE, CSE, IT, MECH, CIVIL, CCE, AI&DS, FT |
| 10 | U20ICO402 | Control System Engineering | ICE | CSE, IT, MECH, CCE, AI&DS |
| 11 | U20MEO401 | Rapid Prototyping | MECH | EEE, ECE, ICE, CIVIL, BME, FT |
| 12 | U20MEO402 | Material Handling System | MECH | EEE, ICE, CIVIL, Mechatronics |
| 13 | U20MEO403 | Industrial Engineering for Textile | MECH | FT |
| 14 | U20CEO401 | Energy and Environment | CIVIL | EEE, ECE, MECH, BME, IT, Mechatronics, FT |
| 15 | U20CEO402 | Building Science and Engineering | CIVIL | EEE, MECH, BME |
| 16 | U20BMO401 | Medical Electronics | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, Mechatronics, AI&DS |

| | | | | |
|--|-------------------------|--|-------|---|
| 17 | U20BMO402 | Telemedicine | BME | EEE, ECE, CSE, IT, ICE, CCE, AI&DS |
| 18 | U20CCO401 | Basic DBMS | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 19 | U20CCO402 | Introduction to Communication Systems | CCE | EEE, CSE, IT, MECH, CIVIL, ICE, Mechatronics |
| 20 | U20ADO401 | Knowledge Representation and Reasoning | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| 21 | U20ADO402 | Introduction to Data Science | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| Open Elective – II / Open Elective – III | | | | |
| 1 | U20HSO501/ U20HSO601 | Product Development and Design | MBA | Common to B. Tech (Offered in Semester V for EEE, ECE, ICE, CIVIL, BME, CCE, FT) (Offered in Semester VI for CSE, IT, MECH, Mechatronics, AI&DS) |
| 2 | U20HSO502/ U20HSO602 | Intellectual Property and Rights | MBA | |
| 3 | U20HSO503/ U20HSO603 | Marketing Management and Research | MBA | |
| 4 | U20HSO504/ U20HSO604 | Project Management for Engineers | MBA | |
| 5 | U20HSO505/ U20HSO605 | Finance for Engineers | MBA | |
| Open Elective – II / Open Elective – III (Offered in Semester V for CSE, IT, MECH, Mechatronics, AI&DS) (Offered in Semester VI for EEE, ECE, ICE, CIVIL, BME, CCE, FT) | | | | |
| 1 | U20EEO503/ U20EEO603 | Conventional and Non-Conventional Energy Sources | EEE | ECE, ICE, MECH, CIVIL, BME, Mechatronics, CCE, AI&DS, FT |
| 2 | U20EEO504/ U20EEO604 | Industrial Drives and Control | EEE | ECE, ICE, MECH, Mechatronics, AI&DS |
| 3 | U20ECO503/ U20ECO603 | Electronic Product Design and Packaging | ECE | EEE, CSE, IT, ICE, MECH, CCE, BME, Mechatronics |
| 4 | U20ECO504/ U20ECO604 | Automotive Electronics | ECE | EEE, ECE, ICE, MECH |
| 5 | U20CSO503/ U20CSO603 | Platform Technology | CSE | EEE, ECE, ICE, MECH, CIVIL, CCE, BME, AI&DS |
| 6 | U20CSO504/ U20CSO604 | Graphics Designing | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, FT |
| 7 | U20ITO503/ U20ITO603 | Essentials of Data Science | IT | EEE, ECE, ICE, MECH, CIVIL, BME |
| 8 | U20ITO504/ U20ITO604 | Mobile App Development | IT | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics, AI&DS |

| | | | | |
|---|-------------------------|---|--------------|---|
| 9 | U20ICO503/ U20ICO603 | Fuzzy logic and neural networks | ICE | CSE, IT, CIVIL, BME, AI&DS |
| 10 | U20ICO504/ U20ICO604 | Measurement and Instrumentation | ICE | ECE, Mechatronics |
| 11 | U20MEO504/ U20MEO604 | Heating, ventilation and air conditioning system (HVAC) | MECH | EEE, ECE, ICE, CIVIL |
| 12 | U20MEO505/ U20MEO605 | Creativity Innovation and New Product Development | MECH | EEE, ECE, ICE, CIVIL, BME, Mechatronics |
| 13 | U20CEO503/ U20CEO603 | Disaster Management | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 14 | U20CEO504/ U20CEO604 | Air Pollution and Solid Waste Management | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 15 | U20BMO503/ U20BMO603 | Biometric Systems | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, Mechatronics |
| 16 | U20BMO504/ U20BMO604 | Medical Robotics | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, CIVIL, Mechatronics |
| 17 | U20CCO503/ U20CCO603 | Network Essentials | CCE | EEE, MECH, CIVIL, ICE, Mechatronics, BME |
| 18 | U20CCO504/ U20CCO604 | Web Programming | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 19 | U20ADO503/ U20ADO603 | Principle of Artificial Intelligence and Machine Learning | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE |
| 20 | U20ADO504/ U20ADO604 | Data science Application of Vision | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| 21 | U20MCO501/ U20MCO601 | Industrial Automation for Textile | Mechatronics | FT |
| Open Elective – IV (Offered in Semester VII) | | | | |
| 1 | U20EEO705 | Hybrid and Electrical Vehicle | EEE | ECE, Mechatronics, MECH |
| 2 | U20EEO706 | Electrical Energy Conservation and auditing | EEE | ECE, ICE, MECH, CIVIL, BME, Mechatronics, CCE, AI&DS |
| 3 | U20ECO705 | IoT and its Applications | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, FT |
| 4 | U20ECO706 | Cellular and Mobile Communications | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics |
| 5 | U20CSO705 | Artificial Intelligence | CSE | EEE, ICE, CIVIL, CCE, MECH, FT |

| | | | | |
|----|-----------|---|--------------|--|
| 6 | U20CSO706 | Cloud Technology and its Applications | CSE | EEE, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| 7 | U20ITO705 | Automation Techniques & Tools- DevOps | IT | EEE, ECE, ICE, CSE, MECH, CIVIL, CCE, BME, Mechatronics, AI&DS |
| 8 | U20ITO706 | Augmented and Virtual Reality | IT | EEE, ICE, MECH, CIVIL, CCE, BME, AI&DS |
| 9 | U20ICO705 | Process Automation | ICE | EEE, ECE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics |
| 10 | U20ICO706 | Virtual Instrumentation | ICE | EEE, ECE, MECH, Mechatronics |
| 11 | U20MEO706 | Principles of Hydraulic and Pneumatic System | MECH | EEE, ECE, ICE, CIVIL |
| 12 | U20MEO707 | Supply Chain Management | MECH | EEE, ECE, CIVIL, Mechatronics |
| 13 | U20CEO705 | Energy Efficient Buildings | CIVIL | EEE, ECE, MECH |
| 14 | U20CEO706 | Global Warming and Climate Change | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 15 | U20MCO702 | Building Automation | Mechatronics | MECH, CIVIL |
| 16 | U20MCO703 | Automation in Manufacturing Systems | Mechatronics | MECH, CIVIL |
| 17 | U20BMO705 | Internet of Things for Healthcare | BME | EEE, ECE, ICE, CCE |
| 18 | U20BMO706 | Telehealth Technology | BME | EEE, ECE, ICE, CCE |
| 19 | U20CCO705 | Data Science using python | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 20 | U20CCO706 | Mobile Applications Development using Android | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 21 | U20ADO705 | Data Science Application of NLP | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics. |
| 22 | U20ADO706 | Artificial Intelligence Applications | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME |
| 23 | U20HSO706 | Industrial Safety and Human Resource Management | MBA | FT |
| 24 | U20HSO707 | Operation Research in Textile Industry | MBA | FT |

| | | | | |
|----|-----------|--|-----|----|
| 25 | U20HSO708 | Global marketing and Sourcing Strategies | MBA | FT |
| 26 | U20HSO709 | Fashion Advertising and sales promotions | MBA | FT |
| 27 | U20HSO710 | Luxury Brand management | MBA | FT |
| 28 | U20HSO711 | Fashion Retail Store Operations | MBA | FT |

ANNEXURE - III**EMPLOYABILITY ENHANCEMENT COURSES-(A) CERTIFICATION COURSES**

| Sl. No. | Course Code | Course Title |
|---------|-------------|---|
| 1 | U20ADCX01 | 3ds Max |
| 2 | U20ADCX02 | Advance Structural Analysis of Building using ETABS |
| 3 | U20ADCX03 | Advanced Java Programming |
| 4 | U20ADCX04 | Advanced Python Programming |
| 5 | U20ADCX05 | Analog System Lab Kit |

B.Tech. – Artificial Intelligence and Data Science

U20BST101

ENGINEERING MATHEMATICS - I
CALCULUS AND LINEAR ALGEBRA
 (Common to EEE, ECE, CSE, IT, ICE, Mech., Civil, BME,
 Mechatronics, CCE, AI&DS, FT)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To familiarize the concept of matrices.
- To introduce mathematical tools to solve first order differential equations.
- To learn linear differential equations of higher order with constant coefficients.
- To understand the concept of partial differentiation.
- To introduce the concepts of curl, divergence and integration of vectors in vector calculus.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Able to Understand the Eigen values and Eigen vectors, diagonalization of a matrix. (K2)

CO2 – Solve differential equations. (K3)

CO3 – Solve higher order differential equations. (K3)

CO4 – Solve different types of partial differential equation. (K3)

CO5 – Understand the use of vector calculus. (K2)

UNIT I MATRICES

(12 Hrs)

Rank of a Matrix- Consistency of system of equations. Eigen values and Eigen vectors of a real matrix - Characteristic equation - Properties of Eigen values and Eigen vectors. Cayley-Hamilton Theorem -Diagonalization of matrices.

UNIT II DIFFERENTIAL EQUATIONS

(12 Hrs)

Exact equations, First order linear equations, Bernoulli's equation, Equations not of first degree: equations solvable for p, equations solvable for y, equations solvable for x and Clairaut's type.

UNIT III DIFFERENTIAL EQUATIONS (HIGHER ORDER)

(12 Hrs)

Linear differential equations of higher order with constant coefficients, the operator D, Euler's linear equation of higher order with variable coefficients, Solution by variation of parameter method.

UNIT IV PARTIAL DIFFERENTIAL EQUATIONS

(12 Hrs)

Partial derivatives, Total derivatives, Differentiation of implicit functions, Maxima and Minima of two variables. Partial differential equations of higher order with constant coefficients.

UNIT V VECTOR CALCULUS

(12 Hrs)

Gradient, divergence and curl - Directional derivative- Irrotational and Solenoidal vector fields - Gauss Divergence Theorem and Stoke's Theorem.

|-----------|--|---|---|---|-----|
| | L | T | P | C | |
| | 3 | 0 | 0 | 3 | 45 |

(Common to Mech., Civil, FT, AI&DS)

Course Objectives

- To introduce fundamental concepts, various laws and principles associated with electrical circuits and its analysis.
- To provide knowledge about the various factors in AC circuits and resonance condition.
- To introduce the concept of electrical safety, power system and working of transformers and motors.
- To understand the characteristics and applications of semiconductor devices
- To provide the basic knowledge in analog electronics
- To understand the purpose of communication and acquire knowledge on different communication systems.

Course Outcomes*After completion of the course, the students will be able to***CO1** – Analyze the basic concepts, various laws and theorems used in DC circuits. **(K3)****CO2** – Analyze and solve the AC circuits and develop resonance circuits for transmitter and receiver. **(K4)****CO3** – Gain the knowledge of power system, importance of electrical safety measures and application of transformers and motors in real time. **(K2)****CO4** – Understand the operation of semiconductor diode and its applications. **(K2)****CO5** – Distinguish the characteristics and operation of BJT and FET. **(K2)****CO6** – Introduce about different Communication Systems. **(K2)****PART A - ELECTRICAL ENGINEERING****UNIT I D.C CIRCUITS AND NETWORK THEOREMS****(8 Hrs)**

Concept of Potential difference, voltage, current, work, Power, Energy, Electric networks, voltage source and current sources, linear passive and active elements, current-voltage relation, ideal and practical sources, concept of dependent and independent sources, Kirchhoff's laws and applications to network solutions using mesh and nodal analysis, Simplifications of networks using series-parallel, Star/Delta transformation. Network Theorem – Superposition, Thevenin's, Norton's and Maximum Power Transfer.

UNIT II AC CIRCUITS**(8 Hrs)**

AC waveform- definitions, form factor, peak factor, study of R-L, R-C,RLC series circuit, R-L-C parallel circuit, phasor representation in Polar and rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, Resonance in series and parallel circuits, bandwidth and quality factors, 3 phase Balanced AC Circuits (Y- Δ and Y-Y) – power Measurement – two Wattmeter method.

UNIT III ELECTRICAL SAFETY AND ELECTRICAL MACHINES**(7 Hrs)**

Layout of electrical power system and its functions, Safety devices and systems, Types of domestic wiring, Wiring Accessories, Necessity of earthing, insulators, cables, fuse and circuit breakers - Sensors and its types.

Law of Electromagnetic induction, Auto transformer, Single phase transformer- load test – Open Circuit and Short Circuit test, Fleming's Right and Left hand rule – construction, principle, load test and performance characteristics of rotating machines – DC Motor and DC Generator - single phase/three phase induction motor, Alternator and synchronous motor (Qualitative approach only).

PART B - ELECTRONICS ENGINEERING**UNIT IV SEMICONDUCTOR DIODES AND APPLICATIONS****(7 Hrs)**

Introduction semiconductor materials-Doping-Intrinsic and Extrinsic Semiconductor – PN junction diode, structure, characteristics-diffusion and depletion capacitance-Rectifier, Half wave and Full wave rectifier-zener diode characteristics-zener diode as regulator – Light Emitting Diode(LED) – Solar Panel.

UNIT V TRANSISTORS**(7 Hrs)**

Bipolar Junction Transistor-construction-operation-Common Base, Common Emitter, Common collector Configuration-characteristics – Biasing – numerical application – Junction Field Effect Transistor(JFET), Metal

B.Tech. – Artificial Intelligence and Data Science

oxide semiconductor Field Effect Transistor, EMOSFET-DMOSFET operation characteristics-Numerical applications.

UNIT VI COMMUNICATION SYSTEMS

(8 Hrs)

Need for Modulation – Block diagram of analog communication System – AM, FM, PM Definitions and Waveforms – Comparison of digital and analog communication system – Block diagram of digital communication system – Electromagnetic Spectrum. Wired and wireless Channel – Block diagram of communication systems – satellite communication – Cellular Mobile Communication – Fibre Optical Communication System.

DIGITAL SYSTEM DESIGN

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To Gain knowledge on Boolean algebra and various simplifications of Boolean functions.
- To acquire the ability to develop any combinational logic functions and design combinational circuit.
- To understand the behavior of sequential circuits.
- To gain the knowledge of memory and other reconfiguration circuits.
- To design the both combinational and sequential circuits using VHDL.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Review the knowledge of Number systems and simplifications of Boolean functions. **(K2)**

CO2 – Design and understand the various combinational logic circuits. **(K2)**

CO3 – Design and understand the various sequential circuits. **(K2)**

CO4 – Analyze and design the reconfiguration circuits. **(K3)**

CO5 – Experimental with the VHDL. **(K3)**

UNIT I REVIEW OF NUMBER SYSTEMS**(9 Hrs)**

Review of Number systems – Conversion of Number systems – Binary addition and subtractions – Binary representation: Signed magnitude representation and Complement representations – Binary codes – Boolean Algebra – Boolean functions – canonical forms.

UNIT II BOOLEAN FUNCTION AND COMBINATIONAL LOGIC DESIGN**(9 Hrs)**

Simplifications of Boolean function: Theorems and laws – K-Map and QuineMcCluskey method – Introduction to combinational circuits – Design procedures of Combinational circuits – Adders - Subtractors – Binary parallel Adder – Decoder – Encoder – Priority Encoder. Multiplexer – Demultiplexer.

UNIT III SEQUENTIAL LOGIC DESIGN**(9 Hrs)**

Introduction to Sequential Circuits – Latches – Types of Latches: SR Latch and D Latch – Flip-Flop – Types of Flip-Flops: RS, JK, D, and T Flip-Flops – Excitation table of Flip-Flops. Counters: Asynchronous Counters – Synchronous counters – Mod counters. Shift registers – Types of Shift registers.

UNIT IV RECONFIGURATION DIGITAL CIRCUITS**(9 Hrs)**

Introduction to Reconfiguration Digital Circuits – Memory – Hierarchy of Memory – RAM – Types of Ram – Memory Decoding of RAM – ROM. Programmable Logic Devices: Programmable Logic Array – Programmable Array Logic – Implementation of combinational circuits using RAM, ROM, PLA and PAL.

UNIT V VHDL**(9 Hrs)**

Introduction to Hardware Description Language and VHDL – Design flow – Entity, architecture, process, configuration and package declarations – Signals and data types.

**COMPUTER PROGRAMMING – I
(PROGRAMMING IN C)**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand the Fundamentals of Computers and introduction to C language.
- To study the Decision Making, Looping and arrays
- To learn about Searching and Sorting.
- To understand the concepts of Functions and Pointers.
- To study about Structure and File Management Operations in C.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Develop simple applications in C using basic constructs. **(K2)**
CO2 – Make use of sequential, selection and repetition of control structures and arrays into program. **(K2)**
CO3 – Develop simple programs using Searching and Sorting. **(K3)**
CO4 – Design and develop programs using Functions and Pointers. **(K3)**
CO5 – Apply the File management Operations and Pre-processor Directives. **(K3)**

UNIT I INTRODUCTION TO C**(9 Hrs)**

C programming: Overview of C – Constants – Compiling a C Program – Variables and Data Types – C Tokens – Types of C Qualifiers and Format Specifiers – Operators and Expressions – Operators Precedence – Type Conversion – Input-Output Statements – Storage Classes.

UNIT II DECISION MAKING, LOOPING AND ARRAYS**(9 Hrs)**

Decision Making and Branching: if – if else – if else if – nested if – Switch-case. Looping: while – do while – for – break – continue – nested loop. Arrays: One Dimensional Array – Two-Dimensional Array – Multi-Dimensional Array – Dynamic arrays. String – String Library Functions.

UNIT III SEARCHING AND SORTING**(9 Hrs)**

Searching: Linear Search – Binary Search Techniques. Sorting: Bubble Sort – Selection Sort – Insertion Sort – Shell Sort – Radix Sort.

UNIT IV FUNCTIONS AND POINTERS**(9 Hrs)**

Functions: Introduction - Definition – Declaration – Categories of Functions – Nesting of Functions – Recursive functions – Passing Arrays to Functions. Pointers: Introduction – Declaring Pointer Variables – Initialization of Pointer Variables – Accessing the address of a variable – Accessing a variable through Pointer – Chain of Pointers – Pointer Expressions – Pointers and arrays – Pointers and Functions – Call by Value – Call by Reference – Pointers and Character strings – Array of Pointers.

UNIT V STRUCTURES, FILE MANAGEMENT AND PREPROCESSOR**(9 Hrs)**

User Defined data types: Introduction – Structure – Definition – Declaration – Array of Structures – Nested Structures – Passing Structures to Functions – Union – Enumeration and Typedef. Introduction to File Handling in C – Input and Output operations on a file – Error Handling – Random access to files – Command Line Arguments. Introduction to Pre-processor – Macro Substitution Directives – File Inclusion Directives – Conditional Compilation Directives – Miscellaneous Directives.

U20ADT101

FUNDAMENTAL OF DATA SCIENCE

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand the concepts of Real world data representations.
- To learn the various Excel function to solve Data Science.
- To understand the Mathematical Knowledge for Data Science.
- To gain knowledge in Data Science Tools.
- To expose the different opportunities in Industries.

Course outcomes

After completion of the course, the students will be able to

CO1 – Infer the Real world data and information. **(K2)**

CO2 – Applying Data Science using Excel. **(K3)**

CO3 – Make use of Mathematical Knowledge for problem solving. **(K2)**

CO4 – Interpret the various Tools and its advantage. **(K3)**

CO5 – Illustrate the different opportunities in Industries. **(K2)**

UNIT I INTRODUCTION TO DATA SCIENCE**(9 Hrs)**

Introduction to Data Science – History of Data Science – Relationship between Data Warehouse – Big Data and Data Science – Scope of Data Science – Data Science with other Fields – Relationship between Data Science and Information Science. Data: Data types – Structured vs Unstructured data – Quantitative vs Qualitative data – The four levels of data – Data Collection – Data Preprocessing.

UNIT II DATA SCIENCE IN EXCEL**(9 Hrs)**

Introduction to Excel basic functions – Data Collection and Preparation – Importing Data into Excel from Different Data Sources – Data Cleaning and Preliminary Data Analysis – Correlation and Importance of Variables Technical Requirements. Data Visualization in Excel – Pivot Tables and Charts – VLOOKUP – Dashboard in Excel.

UNIT III MATHEMATICAL PRELIMINARIES**(9 Hrs)**

Probability: Probability vs. Statistics – Compound Events and Independence – Conditional Probability – Probability Distribution. Descriptive Statistics: Centrality Measures – Variability Measures – Interpreting Variance – Characterizing Distributions. Correlation Analysis: Correlation Coefficient – The Power and Significance – Detection Periodicities. Logarithms: Logarithms and Multiplying Probabilities – Logarithms and Ratios – Logarithms and Normalizing Skewed Distributions.

UNIT IV DATA SCIENCE TOOLS**(9 Hrs)**

Introduction to Data Science Tool – Data Cleaning Tools – Data Munging and Modelling Tools – Data Visualization Tools – Tools for Data Science.

UNIT V INDUSTRIALIZATION, OPPURTUNITIES AND APPLICATIONS**(9 Hrs)**

Data Economy and Industrialization – Introduction: Data Economy – Data Industry – Data Services – Data Science Application: Introduction – General Application Guidance – Different Domain – Advertising – Aerospace and Astronomy – Arts – Creative Design and Humanities – Bioinformatics – Consulting Services – Ecology and Environment – Ecommerce and Retail – Education – Engineering – Finance and Economy – Gaming.

DIGITAL SYSTEM DESIGN LABORATORY

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To provide the basic operation and applications of electronic devices.
- To design and implementations of the digital combinational circuits.
- To design and implementations of the digital sequential circuits.
- To implement the concept of Multiplexer and De-multiplexer Circuits.
- To design and implement Encoders and Decoders.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Familiar about electronic components and able to apply in rectifier and amplifiers circuits. **(K2)**

CO2 – Analyze and construct the combinational logic circuits. **(K3)**

CO3 – Analyze and construct the sequential logic circuits. **(K3)**

CO4 – Construct the Multiplexer and De-multiplexer Circuits. **(K3)**

CO5 – Design the Encoders and Decoders. **(K3)**

List of Experiments

1. Verification of Kirchhoff's Laws and Network Theorems (Hardware and simulation).
2. Characteristics of PN junction diode and Half and Full wave Rectifier.
3. Characteristics of Zener diode, design and implementation of Zener diode voltage regulator.
4. Characteristics of BJT.
5. Characteristics of FET.
6. Frequency Response of RC Coupled Amplifiers.
7. Simplification of Boolean expression using Karnaugh map and QuineMcCluskey Methods.
8. Design and Implementation of Adder and Subtractor using Logic Gates.
9. Design and Implementation of Code Converters.
10. Design and Implementation of 3 bit odd/even parity generator/checker.
11. Design and Implementation of Multiplexer and De-multiplexer Circuits.
12. Design and Implementation of Encoders and Decoders.
13. Study of Flip-Flops.
14. Design and implementations of Shift Registers.

U20ESP128

**COMPUTER PROGRAMMING – I
LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To study and understand the use of Basic Input / Output statements.
- To learn and apply branching and looping statements.
- To understand how to write various programs using C Language.
- To learn and implement sorting and searching concepts.
- To implement programs using pointers.

Course outcomes

After completion of the course, the students will be able to

CO1 – Describe the uses of Basic Input / Output statements. (K2)

CO2 – Experiment with branching and looping statements. (K2)

CO3 – Ability to develop own programs using C language. (K2)

CO4 – Implement programs using sorting and searching. (K3)

CO5 – Implement pointer programs. (K3)

List of Experiments

1. To find the total and average percentage obtained by a student for 6 subjects.
2. To read a 3 digit number and output as 1 hundreds 7 tens 2 units for 172 and print the reverse of the number.
3. To find the greatest among two numbers using if else and ternary operator.
4. To generating Prime Numbers between a given ranges.
5. To check whether a given character is vowel or not using Switch – Case.
6. To find the sum of "n" numbers using for, while and do – while statements.
7. To perform various string handling functions: strlen, strcpy, strcat, strcmp.
8. To remove all characters in a string except alphabets.
9. To find the smallest and largest element in an array.
10. To perform Matrix Addition, Subtraction and Multiplication.
11. To search a given number using linear and binary search.
12. To arrange the given set of numbers using Bubble sort, Selection sort and Insertion sort.
13. To find the factorial of a given number using Function and Recursion.
14. To swap two numbers using call by value and call by reference.
15. To find the sum of an integer array using pointers.
16. To find the Maximum element in an integer array using pointers.
17. To generate salary slip of employees using structures and pointers.
18. To create student details using Structures.
19. To display the contents of the file on the monitor screen.
20. To find the number of characters, words and lines of given text file.
21. To insert, update, delete and append telephone details of an individual or a company into a telephone directory using random access file.
22. To pass the parameter using Commands Line Arguments.

**FUNDAMENTAL OF DATA SCIENCE
LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To develop basic knowledge in Excel.
- To expose the various function in Excel.
- To extend the skill to use Data Visualization.
- To analysis the real time data sets.
- To develop Pivot tables and VLOOKUP functions.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Describe common Excel functionality and features used for data science. (K2)

CO2 – Analyze and construct the Data Visualization. (K3)

CO3 – Configure the programming environment. (K2)

CO4 – Analyze real time data set. (K3)

CO5 – Implement Pivot tables and VLOOKUP functions. (K3)

List of Experiments

1. Study of basic Function in Excel.
2. Working with Range Names and Tables.
3. Cleaning Data with Text Functions.
4. Cleaning data containing Data Values.
5. Working with VLOOKUP functions.
6. Demonstration of Data Visualization.
7. Importing Data from external source into Excel.
8. Creating a Data Model.
9. Exploring Data with PivotTables and Charts.
10. Create a Dash board for a given requirement.
11. Implement a data analytics for the real time data set.

CERTIFICATION COURSE-I

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 4 | 0 | 50 |

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

U20ADM101

INDUCTION PROGRAM

Induction program for students to be offered right at the start of the first year

| Duration of the Program | 3 Weeks |
|-------------------------|--|
| Induction program | <ul style="list-style-type: none"> • Physical Activity • Creative Arts and Culture • Mentoring and Universal Human Values • Familiarization with College, Dept./Branch • Literary Activity • Proficiency Modules • Lectures and Workshops by Eminent People • Visits in Local Area • Extra-Curricular Activities in College |

1. Physical Activity

This would involve a daily routine of physical activity with games and sports. There would be games in the evening or at other suitable times according to the local climate. These would help develop team work besides health. Each student could pick one game and learn it for the duration of the induction program and hopefully, continue with it later.

2. Creative Arts

Every student would choose one skill related to the arts whether visual arts or performing arts. Examples are painting, music, dance, pottery, sculpture etc. The student would pursue it every day for the duration of the program. These would allow for creative expression. It would develop a sense of aesthetics and also enhance creativity which would, hopefully, flow into engineering design later.

3. Mentoring and Universal Human Values

Mentoring and connecting the students with faculty members is the most important part of student induction. Mentoring takes place in the context and setting of Universal Human Values. It gets the student to explore oneself and experience the joy of learning, prepares one to stand up to peer pressure and take decisions with courage, be aware of relationships and be sensitive to others, understand the role of money in life and experience the feeling of prosperity. Need for character building has been underlined by many thinkers, universal human values provide the base. Methodology of teaching this content is extremely important. It must not be through do's and don'ts, but by getting the students to explore and think by engaging them in a dialogue. It is best taught through group discussions and real life activities rather than lecturing. The role of group discussions, however, with clarity of thought of the teachers cannot be over emphasized. It is essential for giving exposure, guiding thoughts, and realizing values. The teachers must come from all the departments rather than only one department like HSS or from outside of the Institute. Experiments in this direction at IIT(BHU) are noteworthy and one can learn from them. Discussions would be conducted in small groups of about 20 students with a faculty mentor each. It is to open thinking towards the self. Universal Human Values discussions could even continue for rest of the semester as a normal course, and not stop with the induction program. Besides drawing the attention of the student to larger issues of life, it would build relationships between teachers and students which last for their entire 4-year stay and possibly beyond.

4. Other Activity

Activities that are not there on a daily basis, but are conducted for 3-4 days (typically in the afternoons) and change thereafter.

4.1. Familiarization with College, Department/Branch

The incoming students should be told about the credit and grading system, and about the examinations. They should be informed about how study in college differs from study in school. They should also be taken on a tour of the college and shown important points such as library, canteen, and other facilities. They should be shown their department, and told what it means to get into the branch or department. Describe what role the technology

B.Tech. – Artificial Intelligence and Data Science

J. A. / 1

related to their department plays in society and after graduation what role the student would play in society as an engineer in that branch. A lecture by an alumnus of the Dept. would be very helpful in this regard. They should also be shown the laboratories, workshops and other facilities. The above should be done right in the first two days, and then over the afternoons thereafter, as appropriate.

4.2. Literary Activity

Literary activity would encompass reading a book, writing a summary, debating, enacting a play etc.

4.3. Proficiency Modules

The induction program period can be used to overcome some critical lacunas that students might have, for example, English, computer familiarity etc. These should run like crash courses, so that when normal courses start after the induction program, the student has overcome the lacunas substantially. We hope that problems arising due to lack of English skills, wherein students start lagging behind or failing in several subjects, for no fault of theirs, would, hopefully, become a thing of the past.

4.4. Lectures and Workshops by Eminent People

Lectures by eminent people should be organized, say, once a week. It would give the students exposure to people who are eminent, in industry or engineering, in social service, or in public life. Alumni could be invited as well. Motivational lectures about life, meditation, etc. by Ramakrishna Mission, Art of Living, Vivekanand Kendras, S-VYASA, etc. may be organized. Workshops which rejuvenate or bring relief to students would also be welcome, such as, Art of Living workshops (3 sessions, 9 hours).

4.5. Visits in Local Area

A couple of visits to the local landmarks including historical monuments should be organized. This would familiarize the students with the area together with bonding with each other, like in a picnic. Visits should also be organized to a hospital, orphanage or a village. These would expose them to people in suffering or to different lifestyles. This might also sensitize them to engineering needs in these areas.

4.6. Extra-Curricular Activities in College

The new students should be introduced to the extra-curricular activities at the college/university. They should be shown the facilities and informed about activities related to different clubs etc. This is when selected senior students involved in or leading these activities can give presentations, under faculty supervision.

| | ENGINEERING MATHEMATICS – II | L | T | P | C | Hrs |
|-----------|---|---|---|---|---|-----|
| U20BST215 | (MULTIPLE INTEGRALS AND TRANSFORMS) (Common to EEE, ECE, CSE, IT, ICE, Mech., Civil, BME, Mechatronics, CCE, AI&DS, FT) | 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To develop logical thinking and analytic skills in evaluating multiple integrals.
- To equip them familiar with Laplace, transform and solve the differential equations using Laplace transform techniques.
- To enable the students to expand functions into Fourier series using change of intervals.
- To gain good knowledge in application of Fourier transforms.
- To inculcate the computational knowledge in Z-transforms.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Understand the concept of double and triple integrals. (K2)
 CO2 – Find Laplace transform and inverse transform of simple functions. (K3)
 CO3 – Convert a periodic function into series form. (K3)
 CO4 – Compute Fourier transforms of various functions. (K3)
 CO5 – Solve difference equations using Z- transforms. (K3)

UNIT I MULTIPLE INTEGRALS**(12 Hrs)**

Multiple Integrals, change of order of integration and change of variables in double integrals (Cartesian to polar). Applications: Areas by double integration and volumes by triple integration (Cartesian and polar).

UNIT II LAPLACE TRANSFORMS AND INVERSE LAPLACE TRANSFORMS**(12 Hrs)**

Definition, Transforms of elementary functions, properties. Transform of derivatives and integrals. Multiplication by t and division by t . Transform of unit step function, transform of periodic functions. Initial and final value theorems, Methods for determining inverse Laplace Transforms, Convolution theorem, Application to differential equations and integral equations. Evaluation of integrals by Laplace transforms.

UNIT III FOURIER SERIES**(12 Hrs)**

Dirichlet's conditions – General Fourier series – Expansion of periodic function into Fourier series – Fourier series for odd and even functions – Half-range Fourier cosine and sine series – Change of interval – Related problems.

UNIT IV FOURIER TRANSFORMS**(12 Hrs)**

Fourier Integral theorem. Fourier transform and its inverse, properties. Fourier sine and cosine transforms, their properties, Convolution and Parseval's identity.

UNIT V Z - TRANSFORMS**(12 Hrs)**

Difference equations, basic definition, z-transform - definition, Standard z-transforms, Damping rule, Shifting rule, Initial value and final value theorems and problems, Inverse z-transform. Applications of z-transforms to solve difference equations.

COMPUTER PROGRAMMING – II (PROGRAMMING IN PYTHON)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn the basic concept of python programming.
- To infer the availability of various data types and Object Oriented Principles.
- To acquire and practice the knowledge of predefined packages Numpy.
- To understand Data Manipulation with Pandas.
- To infer the programming concept for Visualization with Matplotlib.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Interpret the basic concepts of Python programs. **(K2)**

CO2 – Articulate the concepts of Sets, Dictionaries and Object Oriented concepts. **(K2)**

CO3 – Experiment with Numpy package. **(K3)**

CO4 – Apply and analyze Data Manipulation With Pandas. **(K3)**

CO5 – Illustrate programming concept for Visualization with Matplotlib. **(K2)**

UNIT I INTRODUCTION TO PYTHON

(9 Hrs)

Structure of Python Program – Underlying mechanism of Module Execution – Branching and Looping – Problem Solving Using Branches and Loops – Functions – Lambda Functions – Lists and Mutability – Problem Solving Using Lists and Functions.

UNIT II SEQUENCE DATATYPES AND OBJECT ORIENTED PROGRAMMING

(9 Hrs)

Sequences – Mapping and Sets – Dictionaries. Classes: Classes and Instances – Inheritance – Exception Handling – Introduction to Regular Expressions using "re" module.

UNIT III USING NUMPY

(9 Hrs)

Basics of NumPy – Computation on NumPy – Aggregations – Computation on Arrays – Comparisons – Masks and Boolean Arrays – Fancy Indexing – Sorting Arrays – Structured Data: NumPy's Structured Array.

UNIT IV DATA MANIPULATION WITH PANDAS

(9 Hrs)

Introduction to Pandas Objects – Data indexing and Selection – Operating on Data in Pandas – Handling Missing Data – Hierarchical Indexing – Combining Data Sets. Aggregation and Grouping – Pivot Tables – Vectorized String Operations – Working with Time Series – High Performance Pandas – eval() and query().

UNIT V VISUALIZATION WITH MATPLOTLIB

(9 Hrs)

Basic functions of Matplotlib – Simple Line Plot – Scatter Plot – Density and Contour Plots – Histograms – Binnings and Density – Customizing Plot Legends – Colour Bars – Three-Dimensional Plotting in Matplotlib.

U20EST245

DATA STRUCTURE AND APPLICATIONS

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To impart the basic concepts of Data Structures and its terminologies.
- To understand concepts about Stack and Queue operations.
- To understand basic concepts about linked list and its various operations.
- To understand concepts about Tree and its applications.
- To understand basic concepts about Hashing and Graph.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Analyze Fundamentals of Data Structures. **(K2)**

CO2 – Illustrate Stack, Queue and its operation. **(K3)**

CO3 – Apply and analyze Linked List operation. **(K3)**

CO4 – Construct the Tree and its various applications. **(K2)**

CO5 – Summarize Hashing and Graph techniques. **(K2)**

UNIT I BASIC TERMINOLOGIES OF DATA STRUCTURES**(9 Hrs)**

Introduction: Basic Terminologies – Elementary Data Organizations. Data Structure Operations: Insertion – Deletion – Traversal. Array and its operations. Polynomial Manipulation.

UNIT II STACK AND QUEUE OPERATIONS**(9 Hrs)**

Stacks and Queues: ADT Stack and its operations. Applications of Stacks: Expression Conversion and evaluation. ADT Queue: Types of Queue – Simple Queue – Circular Queue – Priority Queue – Operations on each type of Queues.

UNIT III LINKED LIST OPERATIONS**(9 Hrs)**

Linked Lists: Singly linked lists – Representation in memory. Algorithms of several operations: Traversing – Searching – Insertion – Deletion in linked list. Linked representation of Stack and Queue. Doubly linked list: operations. Circular Linked Lists: operations.

UNIT IV TREES**(9 Hrs)**

Trees: Basic Tree Terminologies – Different types of Trees: Binary Tree – Threaded Binary Tree – Binary Search Tree – Binary Tree Traversals – AVL Tree. Introduction to B-Tree and B+ Tree. Heap – Applications of heap.

UNIT V HASHING AND GRAPHS**(9 Hrs)**

Hashing: Hash Table – Hash Function and its characteristics. Graph: Basic Terminologies and Representations – Graph traversal algorithms. Definition – Representation of Graph – Types of graph – Breadth-first traversal – Depth-first traversal – Topological Sort – Bi-connectivity – Cut vertex – Euler circuits – Applications of graphs.

U20EST247

OBJECT ORIENTED PROGRAMMING

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn the basic concepts of object oriented programming in C++.
- To explore the programming principles of Class, Object, and Constructors.
- To know the principles of Functions and Inheritance.
- To develop a C++ application using Polymorphism Concepts.
- To expertise the programming skills in Templates and Exception Handling.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Develop programs using OOP principles. **(K2)**

CO2 – Experimental with the concepts of Class & Objects and Constructors & Destructors. **(K3)**

CO3 – Infer the concepts of Functions and Inheritance with its types. **(K2)**

CO4 – Develop C++ programs using Polymorphism and Virtual Function. **(K3)**

CO5 – Construct interactive C++ programs using Templates and Exception Handling. **(K2)**

UNIT I OBJECT ORIENTED PROGRAMMING IN C++**(9 Hrs)**

Object Oriented Programming Concepts: Basic Program Construction – Data Types – Type Conversion – Operators – Key Concepts of Object Oriented Programming. Introduction and Structure of the C++ program – Stream Classes – Formatted and Unformatted Data – Unformatted Console I/O Operations – Bit Fields – Manipulators. Decision making statements – jump statement – switch case statement – looping statements.

UNIT II CLASSES AND OBJECTS, CONSTRUCTORS AND DESTRUCTORS**(9 Hrs)**

Introduction to Classes and Objects – Constructors and its Types – Overloading Constructors – Copy Constructors – Destructors.

UNIT III FUNCTIONS AND INHERITANCE**(9 Hrs)**

Functions: Passing arguments – LValues and RValues – Library Functions – Inline functions – Friend Functions. Inheritance: Introduction – Types of Inheritance.

UNIT IV POLYMORPHISM AND VIRTUAL FUNCTION**(9 Hrs)**

Polymorphism: Compile Time and Run Time Polymorphism. Overloading: Function Overloading and Operator Overloading – Overloading Unary Operators – Overloading Binary Operators. Virtual Functions – Abstract Classes.

UNIT V TEMPLATES AND EXCEPTION HANDLING**(9 Hrs)**

Generic Functions – Need of Templates – Function Templates – Class Templates. Exception Handling: Need of Exceptions – Keywords – Simple and Multiple Exceptions.

**COMPUTER AND COMMUNICATION
NETWORKS**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand the protocol layering and physical level communication.
- To analyze the basic functionality of datalink layer
- To learn the functions of network layer and the various routing protocols.
- To familiarize the functions and protocols of the Transport layer.
- To understand the concepts of application layer protocols.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Apply the knowledge on principles of computer networks and physical layer signal transmission along with impairments and performance analysis. **(K2)**
CO2 – Explain the concepts and functionality of datalink layer **(K2)**
CO3 – List the functions and different routing algorithms of network layer. **(K3)**
CO4 – Classify the various functionalities of the protocols in transport layer. **(K3)**
CO5 – Examine the working of various application layer protocols. **(K3)**

UNIT I INTRODUCTION**(9 Hrs)**

Network Applications – Network Hardware and Software – OSI – TCP/IP model – Example Networks – Internet protocols and standards – Connection Oriented Network – X.25 – Frame Relay – Guided Transmission Media – Wireless Transmission – Mobile Telephone System – Transmission modes – Topologies. Case Study: Simple network communication with corresponding cables.

UNIT II DATA LINK LAYER**(9 Hrs)**

Framing – Error Detection and Correction – Checksum. DLC services – Sliding window protocols – Flow and Error control – HDLC – PPP – Multiple access protocols – Multiplexing – Ethernet – IEEE 802.11 – IEEE802.16 – Bluetooth – RFID.

UNIT III NETWORK LAYER**(9 Hrs)**

Network layer services – Packet Switching – IPV4 Addresses – subnetting – Routing algorithms. Network layer protocols: RIP – OSPF – BGP – ARP – DHCP – ICMP – IPv4 and IPv6 – Mobile IP – Congestion control algorithms – Virtual Networks and Tunnels-Global Internet. Case study – Different routing algorithms to select the network path with its optimum and economical during data transfer – Link State routing – Flooding – Distance vector.

UNIT IV TRANSPORT LAYER**(9 Hrs)**

Introduction – Transport layer protocol – UDP – Reliable byte stream (TCP) – Connection management – Flow control – Retransmission – TCP Congestion control – Congestion avoidance – Queuing – QoS – Application requirements.

UNIT V APPLICATION LAYER**(9 Hrs)**

DNS – E-Mail – WWW – Architectural Overview – Dynamic web document and http. Protocols: SSH – SNMP – FTP – SMTP – SONET/SDH – ATM – Telnet – POP.

DATABASE MANAGEMENT SYSTEMS

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn about Database Structure and Data Models.
- To study SQL Commands for storing and retrieving data into the database.
- To study the Relational database system design.
- To understand the concept of Transactions.
- To understand the concept of Concurrency Control and Recovery System.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Develop conceptual data model using Entity Relationship Diagram. **(K2)**

CO2 – Design conceptual and logical database models for an application. **(K2)**

CO3 – Analyze relational database design of an application. **(K3)**

CO4 – Explain the need for Indexing, Hashing and Transactions in database. **(K2)**

CO5 – Determine the strategies for providing security, privacy, and recovery of data. **(K3)**

UNIT I INTRODUCTION**(9 Hrs)**

Database System Application – Purpose of Database Systems – View of Data – Database Languages – Relational Database – Database Design – System Structure – Database Architecture. Database Design and E-R Model: Overview of the Design Process – The E-R Model – Constraints – E-R Diagrams – E-R Design Issues – Extended E-R features – Reduction to Relational Schemas – Other aspects of Database Design.

UNIT II RELATIONAL MODEL**(9 Hrs)**

Structure of Relational Database – Fundamental Relational Algebra Operations – Extended Relational Algebra Operations – Modification of the Database. Structured Query Language: Introduction – Basic Structure of SQL Queries – Set Operations – Additional Basic Operations – Aggregate Functions – Null Values – Nested Sub queries – Views – Join Expression.

UNIT III RELATIONAL DATABASE DESIGN**(9 Hrs)**

Features of Good Relational Designs – 1NF – 2NF – 3NF – 4NF with Examples. Atomic Domains and First Normal Form – Decomposition using Functional Dependencies – Functional Dependency Theory – Algorithm for Decomposition – Decomposition using Multivalued Dependencies.

UNIT IV INDEXING, HASHING AND TRANSACTION MANAGEMENT**(9 Hrs)**

Basic Concepts – Ordered Indices – B+ Tree Index Files – B-Tree Files – Multiples – Key Access – Static Hashing – Dynamic Hashing – Comparison of Ordered Indexing and Hashing – Bitmap Indices. Transaction Management: Transaction Concept – Storage Structure – Transaction Atomicity and Durability – Transaction Isolation and Atomicity – Serializability – Recoverability – Transaction Isolation Levels – Implementation of Isolation Levels.

UNIT V QUERY PROCESSING AND CONCURRENCY CONTROL**(9 Hrs)**

Query Processing: Measures of Query Cost – Selection Operation – Sorting-Join Operation – Other Operations – Evaluation of Expressions. Query optimization: Overview – Transformation of Relational Expressions – Estimating Statistics of Expression Results – Choice of Evaluation Plan. Concurrency Control: Lock Based Protocols – Timestamp Based Protocols – Validation Based Protocols. Recovery System: Failure Classification – Remote Backup Systems.

**DATA STRUCTURE AND APPLICATIONS
LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand the basic concepts of Data Structures.
- To experiment the concepts of Searching.
- To implement Sorting Concepts.
- To study about the linear Data Structures.
- To learn the concept of non-linear Data Structures.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Analyze the algorithm's / program's efficiency in terms of time and space complexity. **(K2)**

CO2 – Solve the given problem by identifying the appropriate Data Structure. **(K2)**

CO3 – Solve problems in linear Data Structures. **(K3)**

CO4 – Solve problems in non-linear Data Structures. **(K3)**

CO5 – Implement Sorting and Searching techniques. **(K3)**

List of Exercises

1. Write a C program to implement recursive and non-recursive
 - i) Linear search
 - ii) Binary Search.
2. Write a C program to implement
 - i) Bubble sort
 - ii) Selection sort
 - iii) Insertion sort
 - iv) Shell sort
 - v) Heap sort.
3. Write a C program to implement the applications of Stack.
 - a) Convert Expressions from Infix to Postfix
 - b) Evaluation of Expressions
4. Write a C program to implement the following using an array.
 - a) Stack ADT
 - b) Queue ADT
5. Write a C program to implement list ADT to perform following operations
 - a) Insert an element into a list.
 - b) Delete an element from list
 - c) Search for a key element in list
 - d) Count number of nodes in list.
6. Write a C program to implement the following using a singly linked list.
 - a) Stack ADT
 - b) Queue ADT.
7. Write a C program to implement the dequeue (double ended queue) ADT using a doubly linked list and an array.
8. Write a C program to perform the following operations:
 - a) Insert an element into a binary search tree.
 - b) Delete an element from a binary search tree.
 - c) Search for a key element in a binary search tree.
9. Write a C program that use recursive functions to traverse the given binary tree in
 - a) Preorder
 - b) Inorder and
 - c) Postorder.

10. Write a C program to perform the AVL tree operations.
11. Write a C program to implement Graph Traversal Techniques.

Course Objectives

- To learn and understand the DDL statements.
- To experiment the DML statements.
- To practice the DCL statements.
- To learn and understand the PL/SQL.
- To implement GUI applications using SQL.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Implement the DDL statements. (K2)
 CO2 – Experiment the DML commands. (K2)
 CO3 – Infer the built in functions in SQL. (K2)
 CO4 – Implement PL/SQL programs. (K3)
 CO5 – Develop GUI applications in their known platform. (K3)

List of Experiments

1. Create Table using Data Definition Language (DDL).
2. Modify Table using Data Manipulation Language (DML).
3. Store and Retrieve data through Data Control Language (DCL).
4. Implement Constraints and Built-in functions in various tables.
5. Perform Joins and Group-by functions.
6. Implement Simple Programs in PL/SQL.
7. Create PL/SQL programs using functions.
8. Create PL/SQL programs using procedures.
9. Create PL/SQL programs using triggers.
10. Developing GUI applications.
 - Student Information System.
 - Inventory Management.
 - Payroll Processing.

U20ADC2XX

CERTIFICATION COURSE-II

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 4 | 0 | 50 |

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

U20ADS201

SKILL DEVELOPMENT COURSE 1

(Choose anyone of the below three courses)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 0 | 30 |

1. CLEAN CODE**Course Content:**

1. Introduction to Clean Code.
2. Bad Code - The Total Cost of Owning a Mess: The Grand Redesign in the Sky – Attitude.
3. The Primal Conundrum.
4. The Art of Clean Code - Schools of Thought - The Boy Scout Rule - Prequel and Principles.
5. Introduction to Naming Convention - Meaningful Names – Introduction - Use Intention-Revealing Names - Avoid Disinformation - Make Meaningful Distinctions - Use Pronounceable Names - Use Searchable Names - Avoid Encodings.
6. Hungarian Notation - Member Prefixes - Interfaces and Implementations.
7. Avoid Mental Mapping - Class Names - Method Names - Use Solution Domain Names - Use Problem Domain Names.
8. Functions - Blocks and Indenting - Sections within Functions - One Level of Abstraction per Function.
9. Reading Code from Top to Bottom: The Stepdown Rule - Switch Statements - Use Descriptive Names.
10. Function Arguments - Common Monadic Forms - Flag Arguments - Dyadic Functions – Triads - Argument Objects.
11. Comments - Comments Do Not Make Up for Bad Code - Explain Yourself in Code - Good Comments - Legal Comments.
12. Formatting - The Purpose of Formatting - Different Formatting Types.
13. Error Handling - Use Exceptions Rather Than Return Codes.

2. EXPLORING OF GITHUB**Course Content:**

1. Introduction to Version Control - Keeping Historical Copies - Diffing Files - Applying Changes.
2. Practical Application of diff and patch.
3. Version control - Version Control and Automation.
4. Git - Installing Git - Installing Git on Windows (Optional) - First Steps with Git - Tracking Files - The Basic Git Workflow - Anatomy of a Commit Message.
5. Introduction to Git Locally - Using Git Locally.
6. Skipping the Staging Area - Getting More Information About Our Changes - Deleting and Renaming Files.
7. Undoing Changes Before Committing - Amending Commits – Rollbacks - Identifying a Commit
8. Introduction to branch - Creating New Branches - Working with Branches.
9. Merging - Merge Conflicts. Working with Remotes.
10. Introduction to GitHub - Basic Interaction with GitHub – Introduction to remote - Working with Remotes - Fetching New Changes - Updating the Local Repository.
11. The Pull-Merge-Push Workflow - Pushing Remote Branches - Rebasing the Changes - Rebasing Example.
12. Collaboration Introduction to Collaboration - Simple Pull Request on GitHub - The Typical Pull Request Workflow on GitHub - Updating an Existing Pull Request - Squashing Changes.
13. Code reviews - Code Review Workflow - Uses of Code Reviews in GitHub. Managing Collaboration.
14. Tracking Issues.
15. Continuous Integration.
16. Collaboration.

3. APTITUDE - I**Course Content:**

1. Number System - Basics, Properties & Type of Numbers - Divisibility Rules
2. LCM & HCF - Unit Digit Concept [Cyclicity Method]
3. Decimals, Simplification, Ratio & Proportion - Compounded & Duplicate Ratio - Inverse Ratio - Shortcut to Find Ratio - Continuous Proportion - Mean & Divisibility Proportion.
4. Ages - Both Data is in Ratio or Time Format - One Data in Ratio or Time Format & Other Data in Sum, Difference or Product
5. Logical [Puzzles] Method.
6. Average - Basics & Finding Average in Complex - Replacement & Alteration Method - Average Speed Finding Problems.
7. Allegation & Mixtures
8. Ratio of Mixture - Finding the Kilogram through Ratio
9. Mean Value Method
10. Ratio Mixture [Fraction Method] - Iteration Method.

U20ADM202

ENVIRONMENTAL SCIENCE

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 2 | 0 | 0 | 0 | 30 |

We as human being are not an entity separate from the environment around us rather we are a constituent seamlessly integrated and co-exist with the environment around us. We are not an entity so separate from the environment that we can think of mastering and controlling it rather we must understand that each and every action of ours reflects on the environment and vice versa. Ancient wisdom drawn from Vedas about environment and its sustenance reflects these ethos. There is a direct application of this wisdom even in modern times. Idea of an activity based course on environment protection is to sensitize the students on the above issues through following two type of activities.

(a) Awareness Activities:

- i. Small group meetings about water management, promotion of recycle use, generation of less waste, avoiding electricity waste
- ii. Slogan making event
- iii. Poster making event
- iv. Cycle rally
- v. Lectures from experts

(b) Actual Activities:

- i. Plantation
- ii. Gifting a tree to see its full growth
- iii. Cleanliness drive
- iv. Drive for segregation of waste
- v. To live some big environmentalist for a week or so to understand his work
- vi. To work in kitchen garden for mess
- vii. To know about the different varieties of plants
- viii. Shutting down the fans and ACs of the campus for an hour or so

| | | | | | | |
|-----------|--|----------|----------|----------|----------|------------|
| U20BST337 | PROBABILITY AND STATISTICS FOR DATA SCIENCE | L | T | P | C | Hrs |
| | | 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To acquire skills in handling situation including more than one random variable.
- To familiarize the student about the continuous random variables and their Applications.
- To study the basic concepts of Statistics.
- To learn the concept of testing of hypothesis using statistical analysis.
- To learn the concept of Small sampling.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Apply the concept of probability in random variables. (K3)

CO2 - Apply the basic rules of continuous random. (K3)

CO3 - Understand the basic concepts of Statistics. (K2)

CO4 - Derive the inference for various problems using testing of hypothesis in large Samples. (K5)

CO5 - Solve the problems related to Testing of Hypotheses in small sample. (K5)

UNIT I DISCRETE RANDOM VARIABLES**(12 Hrs)**

Random Variables and their event spaces - The probability mass function - Marginal density - Byes Theorem - Distribution functions - Binomial, Geometric, Negative Binomial and Poisson.

UNIT II CONTINUOUS RANDOM VARIABLES**(12 Hrs)**

Some important distributions - Exponential distribution – Gamma – Weibull - Gaussian distributions - normal distribution. Application of Distribution – Reliability - Failure density and Hazard function.

UNIT III STATISTICS**(12 Hrs)**

Measures of central tendency - Arithmetic Mean, Median and Mode - Measures of dispersion and Standard deviation – Quartile deviation - Skewness and Measures of Skewness - Pearson's coefficient of skewness - Moments - Correlation - Rank correlation and regression - Curve fitting by the method of least squares.

UNIT IV LARGE SAMPLES**(12 Hrs)**

Testing of hypothesis - Fitting of straight lines - Second degree parabolas and more general curves - Test of significance: Large samples test for single proportions, differences of proportions, single mean, difference of means and standard deviations.

UNIT V SMALL SAMPLES**(12 Hrs)**

Test for single mean - difference of means - Test for ratio of variances - Chi-square test for goodness of fit and independence of attributes - Analysis of variance.

U20EST363

**SOFTWARE ENGINEERING AND AGILE
SOFTWARE DEVELOPMENT**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 60 |

Course Objectives

- To familiarize the concepts of Software Engineering.
- To understand Software Design concepts.
- To learn about Software testing.
- To study the Agile Methodology.
- To understand the process of Agile Methodology.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Perform Software engineering processes. (K2)
 CO2 – Make use of software design. (K3)
 CO3 – Apply different software testing strategies. (K3)
 CO4 – Illustrate different Agile Methodology. (K2)
 CO5 – Make use of different process of Agile Methodology. (K3)

UNIT I SOFTWARE ENGINEERING PROCESSES**(12 Hrs)**

Software engineering concepts – Development activities – Software development lifecycle models – Software project management – Project planning – Estimation – Scheduling – Risk management – Software configuration management - Project Planning – Empirical Estimation Techniques – Staffing Level Estimation – Scheduling – Organization and Team structures – Staffing – Software Requirements specification.

UNIT II SOFTWARE DESIGN**(12 Hrs)**

Characteristics of a Good Software Design – Coupling and Cohesion – Structured Analysis – Data Flow Diagrams – Structured and Detailed Design – Object oriented concepts – UML Diagrams – Use case model – Class diagrams – Interaction diagrams – Activity diagrams – State chart diagrams – Object Oriented Analysis and Design methodology – Characteristics of a good User Interface – Types – A User Interface Design methodology.

UNIT III SOFTWARE TESTING**(12 Hrs)**

Introduction to Software testing – Psychology of Testing – Principles of Software Testing – Defects – Defect Prevention Strategies – Role of a tester – Software Testing Life Cycle.

UNIT IV AGILE METHODOLOGY**(12 Hrs)**

Theories for Agile Management – Agile Software Development – Traditional Model vs. Agile Model – Classification of Agile Methods – Agile Manifesto and Principles – Agile Project Management – Agile Team Interactions – Ethics in Agile Teams – Agility in Design, Testing – Agile Documentations – Agile Drivers, Capabilities and Values.

UNIT V AGILE PROCESSES**(12 Hrs)**

Lean Production – SCRUM, Crystal, Feature Driven Development – Adaptive Software Development – Extreme Programming: Method Overview – Lifecycle – Work Products, Roles and Practices.

OPERATING SYSTEM INTERNALS

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To analyze the role of OS in the overall computer system and to observe the operations performed by OS as a resource manager.
- To understand the scheduling policies of OS.
- To learn the different memory management techniques.
- To understand Mass storage systems and file system interfaces.
- To analyze the goals and principles of protection and to study different OS case studies and compares their features.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Acquire the knowledge about operating systems objectives, functionalities and components. **(K2)**

CO2 – A clear understanding of program, process, thread and synchronization. **(K2)**

CO3 – Understand deadlock, prevention and avoidance algorithms. **(K2)**

CO4 – Compare and contrast various memory management schemes. **(K3)**

CO5 – Analyze the disk management and understand about the Linux OS. **(K4)**

UNIT I INTRODUCTION TO OPERATING SYSTEM INTERNALS**(9 Hrs)**

Introduction to System Software – Objectives and functions of OS – Evolution of OS – Distributed System – Real-Time systems – Operating system components – Interrupts – System calls – Virtual machines – Symmetric Multiprocessing – Microkernel. Working with LINUX commands.

UNIT II PROCESS MANAGEMENT**(9 Hrs)**

Process Management: Processes – Operations on Processes – Inter-process Communication – CPU Scheduling. Threads – Overview – Multithreading models – Threading issues – Process Synchronization. The Critical-section problem – Synchronization hardware – Mutex locks – Semaphores – Classic problems of synchronization – Critical regions – Monitors.

UNIT III SYSTEM MODEL**(9 Hrs)**

Deadlock Characterization – Methods for handling Deadlocks – Deadlock Detection – Deadlock Prevention – Deadlock Avoidance – Deadlock Recovery. Storage Management: Swapping – Contiguous Memory Allocation – Paging – Segmentation – Segmentation with paging.

UNIT IV VIRTUAL MEMORY**(9 Hrs)**

Virtual Memory: Background – Demand Paging – Page Replacement – Thrashing. File concept – Access methods – Directory Structure – File system mounting – File Sharing and Protection. File System Implementation: File System Structure – Directory implementation – Allocation Methods – Free Space Management.

UNIT V DISK MANAGEMENT, I/O SYSTEMS AND CASE**(9 Hrs)**

Kernel I/O Subsystems – Disk Structure – Disk Scheduling – Disk Management – Swap-Space Management. I/O Systems: I/O Hardware – Application I/O interface – Kernel I/O subsystem – Streams – Performance. Linux System: Design Principles – Kernel Modules – Process Management – Scheduling – Memory Management – File System – Inter-process Communication.

| U20EST365 | ALGORITHM DESIGN AND ANALYSIS | L | T | P | C | Hrs |
|-----------|-------------------------------|---|---|---|---|-----|
| | | 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To analysis the performance of Algorithms.
- To understand the problems based on Divide and Conquer and Greedy method.
- To infer the various methods to solve a problem using Dynamic method.
- To analyze and develop the suitable approach to solve the problems using Backtracking and Iterative improvement methods.
- To study the problems based on Branch and Bound and NP-Hard.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Analyze and improve the efficiency of algorithms and estimate the performance of algorithm. **(K2)**

CO2 – Experiment the Divide and Conquer and Greedy method for various case studies. **(K3)**

CO3 – Determine the Dynamic programming paradigms and explain when an algorithmic design situation calls for it. **(K3)**

CO4 – Applying different approaches to solve a problem using Backtracking and Iterative Improvement. **(K3)**

CO5 – Interpret the Branch and Bound and NP-Hard paradigms. **(K3)**

UNIT I INTRODUCTION TO ALGORITHM AND NOTATIONS (9 Hrs)

Introduction – Algorithm – Pseudo code for expressing algorithms – Performance Analysis – Time complexity – Space complexity – Asymptotic Notation – Big oh notation – Omega notation – Theta notation and Little oh notation – Probabilistic analysis – Amortized analysis.

UNIT II DIVIDE AND CONQUER AND GREEDY METHOD (9 Hrs)

Divide and Conquer method: Solving recurrence relations – Applications – Binary search – Merge sort – Quick sort. Greedy method: General method – applications – Job sequencing with deadlines – Knapsack problem – Minimum cost spanning trees – Single source shortest path problem - Activity Selection Problem.

UNIT III DYNAMIC PROGRAMMING (9 Hrs)

Dynamic Programming: Applications – Rod cut – Longest Common Subsequence – Multistage graphs – Optimal binary search trees – 0/1 knapsack problem – All pairs shortest path problem – Traveling sales person problem.

UNIT IV BACKTRACKING AND ITERATIVE IMPROVEMENT (9 Hrs)

Backtracking: General method – Applications – N-queen problem – Sum of subsets problem – Graph coloring – Hamiltonian Cycle. Iterative Improvement: The Simplex Method – The Maximum-Flow Problem.

UNIT V BRANCH AND BOUND, NP-HARD PROBLEMS (9 Hrs)

General method – Applications – Traveling sales person problem – 0/1 knapsack problem – LC Branch and Bound solution – FIFO Branch and Bound solution. NP-Hard and NP-Complete problems – Basic concepts – Non deterministic algorithms – NP-Hard and NP-Complete classes - Decidability and Undecidability.

| U20ADT303 | FUNDAMENTALS OF ARTIFICIAL INTELLIGENCE | L | T | P | C | Hrs |
| | | 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn the basics of artificial intelligence concepts
- To understand the problem solving techniques.
- To enable the students to understand the reasoning and planning.
- To gain good knowledge in the concept of uncertainty.
- To inculcate the perceiving and acting of AI applications.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Differentiate between various approaches to Artificial Intelligence. **(K2)**

CO2 – Design intelligent agents and distinguish between Utility based agents and Goal based agents. **(K3)**

CO3 – Apply concepts, methods, and theories of search, heuristics, games, knowledge representation and planning. **(K3)**

CO4 – Apply Natural language processing techniques. **(K3)**

CO5 – Understand the limitations of Artificial Intelligence techniques. **(K2)**

UNIT I INTRODUCTION TO AI**(9 Hrs)**

Introduction: Introduction to Artificial Intelligence – Various definitions of AI – AI Applications and Techniques – Turing Test and Reasoning – forward and backward chaining. Intelligent Agents: Introduction to Intelligent Agents – Rational Agent – their structure – reflex – model-based – goal-based and utility-based agents – behavior and environment in which a particular agent operates.

UNIT II PROBLEM-SOLVING**(9 Hrs)**

Problem Solving and Search Techniques: Problem Characteristics – Production Systems – Control Strategies – Breadth First Search – Depth First Search – iterative deepening – uniform cost search – Hill climbing and its Variations – simulated annealing – genetic algorithm search. Heuristics Search Techniques: Best First Search – A* algorithm – AO* algorithm – MinMax and game trees – refining MinMax – Alpha – Beta pruning – Constraint Satisfaction Problem – Means-End Analysis.

UNIT III KNOWLEDGE, REASONING AND PLANNING**(9 Hrs)**

Knowledge Representation: Introduction to First Order Predicate Calculus – Resolution Principle – Unification – Semantic Nets – Conceptual Dependencies – Semantic networks – Frames system – Production Rules – Conceptual Graphs – Ontologies. Planning: Basic representation for planning – symbolic-centralized vs. reactive- distributed – Partial order planning algorithm.

UNIT IV UNCERTAIN KNOWLEDGE AND REASONING**(9 Hrs)**

Reasoning with Uncertain Knowledge: Different types of uncertainty – Degree of belief and degree of truth – various probability constructs – Prior probability – Conditional probability – Probability axioms – Probability distributions and joint probability distributions – Bayes' rule – Other approaches to modeling uncertainty such as Dempster-Shafer theory and Fuzzy sets/logic.

UNIT V COMMUNICATING, PERCEIVING AND ACTING**(9 Hrs)**

Understanding Natural Languages: Components and steps of communication – Contrast between formal and natural languages in the context of grammar – Parsing and semantics – Parsing Techniques – Context-Free and Transformational Grammars. Computer Vision-Robotics.

**BASIC MACHINE LEARNING
TECHNIQUES**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 45 |

Course Objectives

- To learn the basics of machine learning concepts.
- To understand the classification algorithms.
- To enable the students to understand the regression models.
- To gain good knowledge in the concept of clustering algorithms.
- To inculcate the dimensionality reduction techniques.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Understand the concepts of machine learning algorithms. **(K2)**

CO2 – Explore the classification models. **(K2)**

CO3 – Acquire knowledge on regression models. **(K2)**

CO4 – Analyze the clustering algorithms. **(K3)**

CO5 – Demonstrate the dimensionality reduction techniques. **(K3)**

UNIT I INTRODUCTION TO MACHINE LEARNING**(9 Hrs)**

Basics of Machine Learning – Using data to make decisions – Types of Machine Learning Algorithms – Workflow: from data to deployment – Data Preprocessing and Feature Engineering – Outlier Detection – Performance Evaluation.

UNIT II REGRESSION MODELS**(9 Hrs)**

Introduction of Regression Algorithms – Linear Regression – Multivariate Linear Regression – Logistic Regression – sigmoid function – Applications - Performance Evaluation.

UNIT III CLASSIFICATION MODELS**(9 Hrs)**

Basics of Classification Algorithms – Building a Classifier and making Predictions – Support Vector Machine – separating data with maximum margin – Bayes theorem – Naive Bayes – classifying with conditional probabilities – K-Nearest Neighbor – Classifying with distance measurements – Applications - Performance Evaluation.

UNIT IV CLUSTERING MODELS**(9 Hrs)**

Basics of Clustering Algorithms – K-Means improving cluster performance with postprocessing – K-Medians – Expectation Maximization – Hierarchical Clustering – Applications.

UNIT V DIMENSIONALITY REDUCTION TECHNIQUES**(9 Hrs)**

Introduction– Subset Selection - Principal Component Analysis (PCA) – Factor analysis – Multidimensional Scaling - Linear Discriminant Analysis (LDA) – Generalized Discriminant Analysis(GDA) – Case Study.

GENERAL PROFICIENCY – I

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To enrich strong vocabulary and decoding skills *through comprehension analysis*
- To advance communication and leadership skills pragmatically
- To pronounce English sounds in isolation and in connected speech
- To expand effective written communication skills to meet organizational goals
- To extend knowledge on verbal aptitude and prepare for interviews

Course Outcomes

After completion of the course, the students will be able to

CO1 – Interpret meaning and apply reading strategies in technical and non-technical context. (K3)

CO2 – Develop interpersonal communication skills professionally. (K5)

CO3 – Infer the distinct speech sounds and overcome native language influence. (K2)

CO4 – Demonstrate various forms of formal writing. (K3)

CO5 – Apply the techniques of verbal aptitude in competitive exams. (K3)

UNIT I COMPREHENSION ANALYSIS**(6 Hrs)**

Listening: Listening Comprehension (IELTS based) – **Speaking:** Break the iceberg – **Reading:** Reading technical passage (IELTS based) – **Writing:** Writing Task: 1 (IELTS: Graph/ Process /Chart Description) **Vocabulary:** Synonyms (IELTS).

UNIT II PERSONALITY DEVELOPMENT**(6 Hrs)**

Listening: Interview Videos- **Speaking:** Extempore & Presentation (Soft Skills) – **Reading:** British & American Vocabulary, Read and review (Books, Magazines) – **Writing:** SWOT Analysis **Vocabulary:** Idioms (IELTS).

UNIT III INFERENTIAL LEARNING**(6 Hrs)**

Listening: Listening Speech sounds to overcome Mother Tongue Influence, Anecdotes– **Speaking:** Interpersonal Interaction and Situational attribution–**Reading:** Distinguish between facts & opinions – **Writing:** Writing Conversation to different context **Vocabulary:** Phrasal Verbs (IELTS).

UNIT IV INTERPRETATION AND FUNCTIONAL WRITING**(6 Hrs)**

Listening: Group Discussion videos – **Speaking:** Group Discussion Practice – **Reading:** Interpretation of data – Graph, table, chart, diagram (IELTS based) –**Writing:** Writing Task: 2 (IELTS) **Vocabulary:** Collocations (IELTS).

UNIT V APTITUDE**(6 Hrs)**

Language Enhancement: Articles, Preposition, Tenses. **Verbal Ability Enhancement:** Blood Relation, Completing Statements- Cloze test, Spotting Errors –Sentence Improvement, One Word Substitution, Word Analogy, Word Groups (GATE).

STATISTICAL LABORATORY

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To familiarize the concept of Uni-variate, bi-variate frequency distributions.
- To understand the concept of Measures of location and dispersion.
- To learn Rank correlation.
- To understand the concept of Regression Equations.
- To introduce the concepts of curve fitting.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Draw the different types of curves. **(K4)**

CO2 - Understand the concept of Skewness and Kurtosis. **(K2)**

CO3 - Compute the Correlation coefficient. **(K5)**

CO4 - Compute regression lines. **(K5)**

CO5 - Find the straight line and parabola. **(K5)**

List of Experiments

1. Construction of bar diagram
2. Construction of pie diagram
3. Construction of Mean, Median and Mode
4. Construction of standard deviation.
5. Measures of Skewness and Kurtosis for both grouped and ungrouped data.
6. Computation of Correlation co-efficient.
7. Computation Rank correlation.
8. Regression Equations.
9. Fit a straight line.
10. Fit a parabola.

Course Objectives

- To familiarize the concept of Divide-and-Conquer technique.
- To understand the concept of Greedy Method.
- To learn Dynamic Programming.
- To understand the concept of Backtracking.
- To introduce the concepts of Branch-and-Bound technique.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Implement concepts using Divide-and-Conquer technique. (K2)

CO2 – Understand the concept using Greedy Method. (K2)

CO3 – Experiment programs using Dynamic Programming. (K3)

CO4 – Implement concepts using Backtracking. (K3)

CO5 – Understand the Branch-and-Bound technique. (K3)

List of Experiments

Implement the following concepts:

1. Binary search using Divide-and-Conquer technique.
2. Merge and Quick sort using Divide-and-Conquer technique.
3. Finding Maximum and Minimum using Divide-and-Conquer technique.
4. Knapsack using Greedy technique.
5. Minimum Spanning Tree using Prim's and Kruskal's Algorithm using Greedy technique.
6. Single-Source Shortest Paths algorithms using Greedy technique.
7. Longest common subsequence using Dynamic Programming technique.
8. All Pairs Shortest Paths using Dynamic Programming technique.
9. 8 Queens with the design of Backtracking.
10. Sum of subsets with the design of Backtracking.
11. m-coloring with the design of Backtracking
12. Hamiltonian cycle with the design of Backtracking
13. 0/1 Knapsack problems with Branch-and-Bound technique.

Course Objectives

- To study about the PROLOG programming.
- To learn the basics of 8 queens problem.
- To develop the programs using DFS and BFS.
- To develop applications using Means End Analysis.
- To understand the concepts of Traveling salesman problem.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Describe the basics of PROLOG programming. (K2)
CO2 – Implement the concepts using DFS and BFS. (K2)
CO3 – Implement the concepts using Means End Analysis. (K2)
CO4 – Ability to implement Genetic Algorithm. (K3)
CO5 – Experiment Traveling Salesman Problem. (K3)

List of Experiments

1. Study of PROLOG. Write the following programs using PROLOG.
2. Write simple fact for the statements using PROLOG.
3. Write a program to solve 8 queens problem.
4. Write a program to solve water jug problem using PROLOG.
5. Solve any problem using depth first search.
6. Solve any problem using best first search.
7. Solve 8-puzzle problem using best first search.
8. Solve Robot (traversal) problem using means End Analysis.
9. Tournament Selection Method – Genetic Algorithm.
10. Solve traveling salesman problem.

**BASIC MACHINE LEARNING TECHNIQUES
LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To study about the data preprocessing concepts.
- To learn the basics of supervised algorithms.
- To develop the unsupervised algorithms.
- To develop applications using Regression techniques.
- To understand the concepts of Dimensionality Reduction techniques.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Describe the data preprocessing techniques. (K2)
 CO2 – Implement the concepts using Supervised algorithms. (K2)
 CO3 – Implement the concepts using Unsupervised algorithms. (K2)
 CO4 – Ability to implement Regression Techniques. (K3)
 CO5 – Experiment Dimensionality Reduction techniques. (K3)

List of Experiments

Implementation the following algorithms with suitable applications using Python.

1. Data preprocessing
2. Support Vector Machine
3. Naive Bayes
4. K-Nearest Neighbor
5. Linear Regression
6. Logistic Regression
7. K-Means
8. K-Medians
9. Principal Component Analysis
10. Linear Discriminant Analysis

SKILL DEVELOPMENT COURSE 2

(Choose anyone of the below three courses)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 0 | 30 |

1. API DESIGN – I**Course Content:**

1. REST – What You Didn't Know
2. A brief history of REST
3. Principle 1 – everything is a resource
4. Principle 2 – each resource is identifiable by a unique identifier
5. Principle 3 – use the standard HTTP methods
6. Principle 4 – resources can have multiple representations
7. Principle 5 – communicate statelessly
8. The REST goals
9. Separation of the representation and the resource
10. Visibility and Reliability
11. Scalability and performance
12. Working with WADL
13. Taking advantage of the existing infrastructure
14. Getting Started with Node.js
15. Installing Node.js
16. Node Package Manager
17. Installing the Express framework and other modules
18. Setting up a development environment
19. Handling HTTP requests
20. Modularizing code
21. Testing Node.js
22. Working with mock objects
23. Deploying an application

2. EXPLORING OF RESEARCH TOOLS**Course Content:**

1. Bit.ai
2. elink.io
3. GanttPRO
4. Grammarly
5. Typeset.io
6. Scrivener
7. Endnote
8. Evernote
9. Mendeley
10. ContentMine
11. ResearchGate
12. Google Scholar

3. APTITUDE – II

Course Content:

1. Number System – II [Advanced Level].
2. Factors [Sum, Product, odd, Even].
3. Remainder Theorem - No of Zeros at End -Highest Power - Finding the Last two Digits.
4. Time & Work, Chain Rule - Working Together.
5. Combination Method - Before, After & Alternative Method.
6. Men & Days - Men, Days & Work - Efficiency & Wages.
7. Equation Method.
8. Profit & Loss - Basics & Short Cuts - Passing Through Successive Hands.
9. Purchase & Selling - Dishonest Shopkeeper.
10. Successive Discount into Single Equivalent Discount - Dealing with two or more Parts.
11. Percentage - Conversion & Shortcuts - Population, Depreciation Methods.
12. Percentage Savings & Expenditure - Reduction in Consumption - Percentage Relationship.
13. Time, Speed & Distance, Trains, Boats - Relationship between T/S/D.
14. Train in same Direction - Opposite Direction.
15. Boats along with Streams - Against the Stream

| U20BST432 | DISCRETE MATHEMATICS AND GRAPH THEORY | L | T | P | C | Hrs |
|-----------|---------------------------------------|---|---|---|---|-----|
| | (Common to CSE, IT and AI&DS) | 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To learn the concept of symbolic logic and truth tables.
- To apply the rules of Inference and predicate calculus.
- Analyze the asymptotic performance of Lattices.
- To understand the fundamental concepts of Graph theory.
- Synthesize efficient algorithms in Graph theory and trees.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Construct mathematical arguments using logical connectives and truth tables. (K3)

CO2 – Apply propositional and predicate logic and quantifiers. (K3)

CO3 – Solve the problems using counting techniques in Lattices. (K3)

CO4 – Familiarize the different types of Graphs. (K3)

CO5 – Understand various types of trees and methods for algorithms. (K2)

UNIT I MATHEMATICAL LOGIC AND STATEMENT CALCULUS (12 Hrs)

Introduction – Connectives – Statement formulae – Truth table – Tautologies – Equivalence of Statement formulae – NAND and NOR Connectives – Implications – Principal conjunctive and disjunctive normal forms.

UNIT II PREDICATE CALCULUS (12 Hrs)

Inference calculus – Derivation process – Conditional proof – Indirect method of proof – Automatic theorem proving – Predicate calculus.

UNIT III LATTICES (12 Hrs)

Boolean algebra – Lattices – Sub lattices – Complemented and Distributive lattices. Partially Ordered Relations – Lattices as Posets – Hasse Diagram – Properties of Lattices.

UNIT IV GRAPH THEORY (12 Hrs)

Graphs – Applications of graphs – Degree – Pendant and isolated vertices – Isomorphism – Sub graphs – Walks – Paths and Circuits – Connected graphs – Euler graphs – Hamilton paths and circuits – Complete graph.

UNIT V TREES (12 Hrs)

Trees – Properties of Trees – Pendant vertices in a Tree – Kruskal algorithm.

U20ADT405**DATA VISUALIZATION**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To explore the fundamental concepts of Visualization.
- To understand the various visualization techniques using Seaborn.
- An understanding of the key techniques and used in visualization, graphical perception and techniques using Bokeh.
- To understand the visualization concept using Tableau.
- To learn the Maps using Tableau.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Design and create data visualizations. **(K3)**

CO2 – Understand the Seaborn library in Python. **(K2)**

CO3 – Analyze the visualization concepts using Bokeh. **(K2)**

CO4 – Apply the various Charts using Tableau. **(K3)**

CO5 – Understand and apply Maps in Tableau. **(K3)**

UNIT I INTRODUCTION TO VISUALIZATION**(9 Hrs)**

Introduction to data visualization - Importance of data visualization - data wrangling - tools and libraries for visualization - types of data – Plots – line - bar – radar - relation – scatter – bubble –heatmap – pie - Stacked Bar Chart - Venn diagram - distribution plot – histogram – density - box plot – geo - dot plot.

UNIT II INTRODUCTION TO SEABORN**(9 Hrs)**

Introduction to Seaborn - Advantages of Seaborn - Controlling Figure Aesthetics - Seaborn Figure Styles - Removing Axes Spines - Colour Palettes - Kernel Density Estimation - Plotting Bivariate Distributions - Visualizing Pairwise Relationships - Violin Plots - Multi-Plots in Seaborn - Facet Grid - Regression Plots - Squarify.

UNIT III INTRODUCTION TO BOKEH**(9 Hrs)**

Concepts of Bokeh - Interfaces in Bokeh - Bokeh Server – Presentation – Integrating - The Design Principles of Geoplotlib - Geospatial Visualizations - Tile Providers - Custom Layers.

UNIT IV VISUALIZATION USING TABLEAU**(9 Hrs)**

Connecting to data source – Creating Univariate Charts: Tables – Bar graphs – Pie charts – Sorting the graphs – Histograms – Line Charts – Using the Show Me toolbar – Stacked Bar Graphs – Box Plots – Showing Aggregate Measures. Creating Bivariate Charts: Tables – Scatter Plots – Swapping Rows and Columns – Adding trend lines – Selecting color Palettes – Using dates. Creating Multivariate Charts – Acets – Area Charts – Bullet Graphs – dual axes charts – Gantt charts – heat maps.

UNIT V MAPS USING TABLEAU**(9 Hrs)**

Setting Geographic Roles – Placing marks on a Map – Overlaying Demographic data – Creating choropleth Maps – Using polygon shapes – Customizing Maps – Creating Dashboards – Creating Storyboard.

| U20ADT406 | ADVANCED MACHINE LEARNING TECHNIQUES | L | T | P | C | Hrs |
|-----------|---|---|---|---|---|-----|
| | | 2 | 2 | 0 | 3 | 45 |

Course Objectives

- To learn the insight of decision learning concepts
- To enable the students to understand the Rule base Learning
- To understand the ensemble methods to boost the performance of models.
- To gain good knowledge in the concept of Neural Network.
- To inculcate Feed forward Neural Network.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Understand the concepts of Decision learning algorithm. **(K2)**

CO2 – Explore the rule based learning. **(K2)**

CO3 – Acquire knowledge on ensemble learning. **(K2)**

CO4 – Explore and Analyze the Neural Network. **(K2)**

CO5 – Demonstrate the backpropagation Neural Network. **(K3)**

UNIT I DECISION TREES**(9 Hrs)**

Decision tree representation – Basic decision tree algorithm – Hypothesis space search – Inductive bias – Issues in decision tree – Case studies with C4.5 and CART – Incremental decision tree induction – ID3 – Hidden Markov Model.

UNIT II RULE BASED LEARNING**(9 Hrs)**

Rule Induction – One Rule in Rule Learning – Association rule mining – Association rules – Case studies with Apriori and Equivalence Class Transformation Algorithm.

UNIT III ENSEMBLE LEARNING**(9 Hrs)**

Introduction – Bayesian methods – Bagging: Random Forest – Boosting: Adaboost and XGBoost Algorithms Light GBM – Stacking.

UNIT IV ARTIFICIAL NEURAL NETWORK**(9 Hrs)**

Neural Network Representation – Types of activation functions - Network Topology – Perceptrons – Learning rule: Hebbian – Perceptron and Delta – Single Layer Neural Network.

UNIT V FEED FORWARD NEURAL NETWORK**(9 Hrs)**

Multi-Layer Feedforward Network – MLP Architecture – Error Metrics: Mean Square Error (MSE) – Cross-Entropy (CE) – Minimum Classification Error (MCE) – Learning by Backpropagation – Enhancing backpropagation – Generalization Issues.

|-----------|--|---|---|---|---|-----|
| U20ADT407 | EXPERT SYSTEM AND DECISION MAKING | L | T | P | C | Hrs |
| | | 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn the basics of Expert systems.
- To understand the concepts of Knowledge representation.
- To enable the students to understand the Inference methods.
- To gain good knowledge in the concept of Reasoning under uncertainty.
- To inculcate the design of expert system.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Understand the concepts of Expert systems. (K2)
 CO2 – Acquire knowledge on Knowledge representation techniques. (K2)
 CO3 – Explore the Inference methods. (K3)
 CO4 – Explore and Analyze the Reasoning under uncertainty. (K2)
 CO5 – Demonstrate the design of expert system. (K3)

UNIT I INTRODUCTION TO EXPERT SYSTEMS**(9 Hrs)**

The meaning of an expert system - problem domain and knowledge domain - the advantages of an expert system - general stages in the development of an expert system - general characteristics of an expert system - history and uses of expert systems today - rule-based expert systems - procedural and nonprocedural paradigms - characteristics of artificial neural systems.

UNIT II THE REPRESENTATION OF KNOWLEDGE**(9 Hrs)**

The study of logic - difference between formal logic and informal logic - meaning of Knowledge - how knowledge can be represented - semantic nets - how to translate semantic nets into PROLOG - limitations of semantic nets – schemas - frames and their limitations - how to use logic and set symbols to represent knowledge - the meaning of propositional and first order predicate logic – quantifiers - imitations of propositional and predicate logic.

UNIT III METHODS OF INFERENCE**(9 Hrs)**

Trees – lattices - and graphs - state and problem spaces - AND-OR trees and goals - methods of inference - rules of inference - limitations of propositional logic - logic systems - resolution rule of inference - resolution systems - and deduction - shallow and causal reasoning - applying resolution to first-order predicate logic - forward and backward chaining - additional methods of Inference - Meta knowledge - the Markov decision process – Decision Making – Decision Making using ML, Decision Support System – Role of Artificial Intelligence in Intelligent Decision Support System.

UNIT IV REASONING UNDER UNCERTAINTY**(9 Hrs)**

The meaning of uncertainty and theories devised to deal with it - types of errors attributed to uncertainty - errors associate - with induction - features of classical probability - experimental and subjective probabilities - compound and conditional probabilities - hypothetical reasoning and backward induction - temporal reasoning - Markov chains - odds of belief - sufficiency and necessity - role of uncertainty in inference chains - implications of combining evidence - role of inference nets in expert systems - how probabilities are propagated.

UNIT V DESIGN OF EXPERT SYSTEMS**(9 Hrs)**

How to select an appropriate problem - the stages in the development of an expert system - types of errors to expect in the development stages - the role of the knowledge engineer in the building of expert systems - the expected life cycle of an expert system - how to do a life cycle model.

U20HSP402

GENERAL PROFICIENCY – II

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To examine various standardized test in English language.
- To recognize the key features of various technical writing.
- To integrate LSRW skills to endorse multifarious skill set in practical situation.
- To understand the factors that influences the usage of grammar.
- To understand the basic concepts of logical reasoning skills.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Infer ideas to attend international standardized test by broadening receptive and productive skills. **(K2)**

CO2 – Interpret the types of writing in different state of affairs. **(K3)**

CO3 – Develop language skills professionally to groom the overall personality through sensitizing various etiquettes in real time situation. **(K3)**

CO4 – Identify the rules of grammar in academic discourse settings. **(K2)**

CO5 – Maximise the skills to compete in various competitive exams like GATE, GRE, CAT, UPSC, etc. **(K5)**

UNIT I CAREER SKILLS**(6 Hrs)**

Listening: Listening at specific contexts. **Speaking:** Mock interview (Personal and Telephonic). **Reading:** Read and Review - Newspaper, Advertisement, Company Handbooks, and Guidelines (IELTS based) **Writing:** Essay Writing (TOEFL) **Vocabulary:** Words at specified context (IELTS).

UNIT II CORPORATE SKILLS**(6 Hrs)**

Listening: Listening and replicating **Speaking:** Team Presentation (Work Place Etiquettes) **Reading:** Short texts (signs, emoticons, messages) **Writing:** E-mail writing - Hard skills - Resume' Writing, Job Application Letter, Formal Letter **Vocabulary:** Glossary (IELTS).

UNIT III FUNCTIONAL SKILLS**(6 Hrs)**

Listening: Listening TED Talks – **Speaking:** Brainstorming & Individual Presentation, Persuasive Communication – **Reading:** Text Completion (GRE Based) **Writing:** Expansion of Compound Words **Vocabulary:** Expansion of vocabulary (IELTS).

UNIT IV TRANSFERABLE SKILLS**(6 Hrs)**

Listening: Listening Documentaries and making notes – **Speaking:** Conversation practice at formal & informal context **Reading:** Read and transform- report, memo, notice and advertisement. **Writing:** Euphemism, Redundancy, and Intensifiers **Vocabulary:** Refinement of vocabulary (IELTS).

UNIT V APTITUDE**(6 Hrs)**

Transformational Grammar: Phrases & Clauses, Concord, Conditional Clauses, Voice, Modals. **Verbal Ability Enhancement:** Letter Series, Coding & Decoding, Sentence Completion (GATE), Critical Reasoning and Verbal Deduction (GATE), Syllogism.

| U20ADP405 | DATA VISUALIZATION LABORATORY | L | T | P | C | Hrs |
|-----------|-------------------------------|---|---|---|---|-----|
| | | 0 | 0 | 2 | 1 | 30 |

Course objectives

- To introduce the basic concepts of various Visualization techniques.
- Producing different types of Graphs, Charts and Maps.
- To understand the different types of plots.
- To learn the concept of maps and heat map.
- To work with dashboard concepts.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Demonstrate various Visualization techniques used to display the data to understand easier. **(K2)**

CO2 – Analyze the different visualization diagrams. **(K3)**

CO3 – Experiment various charts. **(K2)**

CO4 – Implement plots and heat map. **(K2)**

CO5 – Experiment the concepts of dashboard. **(K3)**

List of Experiments

Implement the following Data visualization Techniques using Python and Tableau.

1. Bar Charts
2. Pie Charts
3. Line Charts
4. Dot Charts
5. Histograms
6. Box Plots
7. Density Plots
8. Scatter Plots
9. Radial Diagrams
10. Chart Tables
11. Heat Map
12. Pyramids
13. Maps
14. Dashboard

**ADVANCED MACHINE LEARNING
TECHNIQUES LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To learn the insight of machine learning algorithms.
- To study about the Decision and Rule based learning concepts.
- To understand the Equivalence Class Transformation Algorithm
- To develop and boost the Machine learning models using ensemble methods.
- To understand the concept of neural network

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Understand the basics of machine learning algorithms. (K2)
 CO2 – Implement decision and rule based learning models. (K2)
 CO3 – Experiment the Equivalence class transformation algorithm. (K3)
 CO4 – Implement ensemble models. (K2)
 CO5 – Implement the neural network. (K3)

List of Experiments

Implementation the following algorithms with suitable applications using Python.

1. ID.3 algorithm
2. C4.5 algorithm
3. CART Decision Tree Algorithm
4. Apriori
5. Equivalence Class Transformation Algorithm
6. Naïve Bayes ensemble
7. Random forests
8. Adaboost
9. XGBoost
10. Simple Neural Network

|-----------|---|---|---|---|---|-----|
| U20ADP407 | EXPERT SYSTEM AND DECISION MAKING LABORATORY | L | T | P | C | Hrs |
| | | 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To learn the basics of expert system.
- To understand the concept of decision making.
- To analyze the specific expert system problems.
- To understand the applications of expert system.
- To equip the student to produce the decision making systems.

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Understand the basics of expert system. (K2)
 CO2 – Learn the concept of decision making. (K2)
 CO3 – Implement the specific expert system problems. (K2)
 CO4 – Experiment the applications of expert system. (K2)
 CO5 – Implement the decision making systems. (K2)

List of Experiments

1. Develop an Expert system for Diagnosing Eye Diseases.
2. Develop a Medical Expert System.
3. Develop an Expert system for Categorize disease.
4. Build an expert system for Diagnosing mental disorders.
5. Develop an expert system for Disease Diagnosis to Expert systems style.
6. Build an expert system that attempts to guess the user's animal in 20 questions or less.
7. Develop an Expert System that asks you a couple of questions about a certain flower, and answers with its name as a result.
8. Develop an Expert system for space rockets launch decision-making on the basis of weather conditions.
9. Develop an Expert system for Propositional calculus with backward-chaining inference engine.
10. Build an Expert system that advises the university best suited to the user based on his choices.

(Choose anyone of the below three courses)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 0 | 30 |

1. API DESIGN – II**Course Content:**

1. Building a Typical Web API
2. Specifying the API
3. Implementing routes
4. Testing the API
5. Content negotiation
6. Cross-origin resource sharing
7. API versioning
8. Using NoSQL Databases
9. Key/value store – LevelDB
10. Document store – MongoDB
11. Database modeling with Mongoose
12. Testing a NoSQL database solution
13. Content delivery network
14. Implementing a Full-fledged RESTful Service
15. Extensibility and versioning
16. Working with arbitrary data
17. Linking
18. Implementing paging and filtering
19. Caching
20. Discovering and exploring RESTful services

2. DYNAMIC PROGRAMMING**Course Content:**

1. Longest Common Subsequence
2. Longest Increasing Subsequence
3. Edit Distance
4. Minimum Partition
5. Ways to Cover a Distance
6. Longest Path In Matrix
7. Subset Sum Problem
8. Optimal Strategy for a Game
9. 0/1Knapsack Problem
10. Boolean Parenthesization Problem
11. Shortest Common Supersequence
12. Matrix Chain Multiplication
13. Partition problem
14. Rod Cutting
15. Coin change problem
16. Word Break Problem
17. Maximal Product when Cutting Rope
18. Dice Throw Problem
19. Box Stacking
20. Egg Dropping Puzzle

3. APTITUDE – III**Course Content:**

1. Quicker Mathematical Methods
2. Permutation & Combination
3. Probability
4. Simple & Compound Interest
5. Data Sufficiency
6. Clocks & Calendars
7. Geometry
8. Data Interpretation
9. Logical Reasoning
10. Syllogism
11. Direction Sense
12. Blood Relation
13. Number Series
14. Coding & Decoding
15. Logical Analogy
16. Analytical Reasoning
17. Passage Oriented Analysis
18. Seating Arrangements
19. Cubes & Dices
20. Lateral Thinking
21. Mind Bending Puzzles

U20ADE401

AUTOMATA AND COMPILER DESIGN

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To introduce the Finite Automata, NFA and DFA.
- To gain insight into the Context Free Language and Pushdown Automata.
- To understand in depth about Parsing and Turing machine.
- To study about the Lexical Analysis and Syntax Analysis.
- To acquaint the Intermediate Code Generation, Code Optimization and Code Generation.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the concept of Finite Automata, NFA and DFA **(K2)**

CO2 - Understand about Context Free Language and Pushdown Automata. **(K2)**

CO3 - Construct a Turing Machine. **(K3)**

CO4 - Explain the concept of Lexical Analysis and Syntax Analysis. **(K3)**

CO5 - Describe the Intermediate code generation, Code Optimization and Code Generation. **(K4)**

UNIT I FINITE AUTOMATA AND REGULAR EXPRESSIONS**(12 Hrs)**

Introduction: Finite Automata – Deterministic Finite Automata – Non-Deterministic Finite Automata – Conversion from NFA to DFA – NFA with ϵ moves. Regular Expression: Conversion from Regular Expression to DFA (Direct / Indirect method) – Two way finite automata – Moore and Mealy Machine – Applications of Finite Automata.

UNIT II CONTEXT-FREE GRAMMAR AND LANGUAGES, PUSHDOWN AUTOMATA**(12 Hrs)**

Context – Free Grammar and Languages: Definitions and More Examples – Regular Languages and Regular Grammars – Derivation Trees and Ambiguity – Simplified Forms and Normal Forms – Chomsky Normal Form – Greibach Normal Form. Pushdown Automata: Definitions and Examples – A PDA from a Given CFG – A CFG from a Given PDA. Pumping Lemma.

UNIT III TURING MACHINES**(12 Hrs)**

Turing Machines: Turing Machines as Language Acceptors – Turing Machines for Accepting Regular Languages – Turing Machine for Addition and Subtraction.

UNIT IV LEXICAL ANALYSIS AND SYNTAX ANALYSIS**(12 Hrs)**

Compilers: The Phases of compiler – Lexical analysis – The role of the lexical analyser – Input buffering – Specification of tokens – Recognition of tokens – A language for specifying lexical analyzers – Design of a lexical analyzer. Parser: Top-Down Parser – Predictive Parser, Bottom-up Parser – SLR Parser.

UNIT V INTERMEDIATE CODE GENERATION, CODE OPTIMIZATION AND CODE GENERATION**(12 Hrs)**

Intermediate Code Generation: Declarations – Assignment statements – Boolean expressions – Procedure calls. Code Optimization: Principal sources of optimization – Loop Optimization. Code Generation: Issues in the design of code generator – Simple code generator – Basic blocks and flow graphs – The DAG representation of Basic Block – Generating code from DAGs – Peephole optimization.

PRINCIPLES OF DATA ANALYTICS

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To provide strong foundation for data analytics.
- Understand the underlying core concepts in Big Data and cloud technologies.
- Exploring data visualizing tools.
- Apply Machine learning models using data analytics.
- To explore the recent technologies.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Explore the fundamental concepts of data analytics. **(K2)**

CO2 – Understand data analysis techniques for applications handling large data. **(K2)**

CO3 – Understand basic concepts of R Programming. **(K2)**

CO4 – Analyze various Visualization and Exploration techniques. **(K2)**

CO5 – Explore the Geographic data using ggmap library. **(K3)**

UNIT I INTRODUCTION**(9 Hrs)**

Data Analytics - Types – Phases - Quality and Quantity of data – Measurement - Exploratory data analysis - Business Intelligence.

UNIT II BIG DATA**(9 Hrs)**

Big Data and Cloud technologies - Introduction to HADOOP: Big Data, Apache Hadoop, MapReduce - Data Serialization - Data Extraction - Stacking Data - Dealing with data.

UNIT III BASICS TO R PROGRAMMING**(9 Hrs)**

Installing packages and getting help in R – Data types in R - Special values in R – Matrices in R – Editing a matrix in R – Data frames in R – Editing a data frame in R – Importing data in R – Exporting data in R – Writing a function in R – Writing if else statements in R – Basic loops in R – Nested loops in R – The apply, lapply, sapply, and tapply functions – Using par to beautify a plot in R – Saving plots.

UNIT IV DATA EXPLORATION AND VISUALIZATION TECHNIQUES IN R**(9 Hrs)**

Measuring Categorical Variation with a Bar Chart – Continuous Variation with a Histogram – Covariation with Box Plots – Covariation with Symbol Size – 2D bin and Hex Charts – Creating a Scatterplot – Adding a regression line to the – Scatterplot – Plotting categories – Labeling the Graph – Legend Layouts – Creating a facet – Theming – Bar Charts – Violin Plots – Density Plots.

UNIT V VISUALIZING GEOGRAPHIC DATA WITH GGMAP**(9 Hrs)**

Displaying Information with Maps – Activity: Creating a Variable-Encoded Regional Map – Trends, Correlations and Statistical Summaries – Creating a Time Series Plot with the Mean, Median, and Quantiles – Trends, Correlations, and Scatter plots – Creating a Scatter Plot and Fitting a Linear Regression Model – Creating a Correlation Plot.

SOFT COMPUTING

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- Soft Computing techniques and their difference from conventional techniques.
- To introduce the concepts and techniques of building blocks of Artificial Intelligence.
- To generate an ability to design, analyze and perform experiments on real life problems using various Neural Network algorithms.
- To provide the understanding of Genetic Algorithms and its applications in developing solutions to real-world problems.
- To conceptualize Fuzzy Logic and its implementation for various real-world applications.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Analyze and evaluate whether a problem can be solved using AI techniques and analyze the same using basic concepts of AI. **(K3)**
- CO2** – Understand AI concepts used to develop solutions that mimic human like thought process on deterministic machines for real-world problems. **(K2)**
- CO3** – Understand the fundamental concepts of Neural Networks, different neural network architectures, algorithms, applications and their limitations. **(K2)**
- CO4** – Apply Genetic Algorithms in problems with self-learning situations that seek global optimum. **(K4)**
- CO5** – Apply Fuzzy Logic, the concept of fuzziness and fuzzy set theory in various systems. **(K4)**

UNIT I INTRODUCTION TO SOFT COMPUTING**(9 Hrs)**

Importance of soft computing - Soft computing versus hard computing - Supervised and unsupervised learning - Introduction to main components of soft computing: Fuzzy logic - Neural networks - Genetic algorithms.

UNIT II FOUNDATIONS OF ARTIFICIAL INTELLIGENCE**(9 Hrs)**

Introduction to artificial intelligence - Application areas of artificial intelligence - State space search: Depth first search - Breadth first search - Heuristic search: Best first search - Hill Climbing - Beam Search - Tabu Search - Introduction to randomized search: Simulated annealing - Genetic algorithms - Ant colony optimization - Introduction to expert systems - Introduction to AI-related fields like game playing - speech recognition - language detection machine - computer vision - robotics.

UNIT III NEURAL NETWORKS**(9 Hrs)**

Basic concepts of neural network - Overview of learning rules and parameters - Activation functions - Single layer perceptron and multilayer perceptron - Multilayer feed forward network - Backpropagation networks: Architecture - Algorithm - Variation of standard backpropagation neural network - Radial basis function network - Recurrent neural network - Introduction to Associative Memory - Recent applications.

UNIT IV GENETIC ALGORITHMS**(9 Hrs)**

Difference between traditional algorithms and Genetic Algorithm (GA) - Basic concepts of GA - Working principle - Encoding methods - Fitness function - GA Operators: Reproduction - Crossover - Mutation - Convergence of GA - Detailed algorithmic steps - Adjustment of parameters - Multi-criteria optimization - Solution of typical problems using genetic algorithm - Recent applications.

UNIT V FUZZY LOGIC**(9 Hrs)**

Concepts of uncertainty and imprecision - Concepts, properties and operations on classical sets and fuzzy sets - Classical and fuzzy relations - Membership functions and its types - Fuzzification - Fuzzy rule-based systems - Defuzzification - Fuzzy propositions - Fuzzy extension principle - Fuzzy inference system - Recent applications.

GPU COMPUTING

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course objectives

- The course aims to give an overview of an important trend in high performance computing – GPU programming.
- To experience the expertise of GPUs (graphics processing units) are special purpose hardware originally designed for graphics and games
- To understand the basic concepts of GPU programming,
- To get the introduction about CUDA (Compute Unified Device Architecture) parallel computing platform and hands-on experience on implementing some standard CUDA programs
- Finally the course will give a brief overview of the current applications and future trends of GPU computing in scientific research.

Course Outcome

After completion of the course, the students will be able to

CO1 – Define terminology commonly used in parallel computing, such as efficiency and speedup. **(K2)**

CO2 – Describe common GPU architectures and programming models. **(K2)**

CO3 – Implement efficient algorithms for common application kernels, such as matrix multiplication. **(K3)**

CO4 – Given a problem, develop an efficient parallel algorithm to solve it. **(K4)**

CO5 – Given a problem, implement an efficient and correct code to solve it, analyze its performance, and give convincing written and oral presentations explaining your achievements. **(K2)**

UNIT I INTRODUCTION**(9 Hrs)**

History, Graphics Processors, Graphics Processing Units, GPGPUs. Clock speeds, CPU / GPU comparisons, Heterogeneity, Accelerators, Parallel programming, CUDA OpenCL / Open ACC, Hello World Computation Kernels, Launch parameters, Thread hierarchy, Warps / Wave fronts, Thread blocks / Workgroups, Streaming multiprocessors, 1D / 2D / 3D thread mapping, Device properties, Simple Programs, OpenMP.

UNIT II MEMORY**(9 Hrs)**

Memory hierarchy, DRAM / global, local / shared, private / local, textures, Constant Memory, Pointers, Parameter Passing, Arrays and dynamic Memory, Multi-dimensional Arrays, Memory Allocation, Memory copying across devices, Programs with matrices, Performance evaluation with different memories.

UNIT III SYNCHRONIZATION**(9 Hrs)**

Memory Consistency, Barriers (local versus global), Atomics, Memory fence. Prefix sum, Reduction. Programs for concurrent Data Structures such as Worklists, Linked-lists. Synchronization across CPU and GPU Functions: Device functions, Host functions, Kernels functions, Using libraries (such as Thrust), and developing libraries.

UNIT IV SUPPORT, STREAM, SYNCHRONIZATION**(9 Hrs)**

Support: Debugging GPU Programs. Profiling, Profile tools, Performance aspects Streams: Asynchronous processing, tasks, Task-dependence, Overlapped data transfers, Default Stream, Synchronization with streams. Events, Event-based-Synchronization - Overlapping data transfer and kernel execution, pitfalls.

UNIT V CASE STUDIES**(9 Hrs)**

Image Processing, Graph algorithms, Simulations, Deep Learning Advanced Concepts: Dynamic Parallelism, Unified Virtual Memory, Multi-GPU Processing, Peer access, Heterogeneous processing, cuDNN.

**MICROPROCESSORS AND
MICROCONTROLLERS**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand and learn the architecture and assembly language program of 8085.
- To understand and learn the architecture and assembly language program of 8086.
- To explore the interfacing the peripherals and other chips to 8086
- To learn and understand the Intel 8051 microcontroller architecture.
- To acquire the knowledge of Raspberry Pi and Arduino Processors.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Explain the basic architecture of 8085 microprocessors (K2)

CO2 - Articulate the knowledge of the architecture and instruction sets of 8086 (K2)

CO3 - Summarize the interfacing of various peripherals to various 8086. (K2)

CO4 - Illustrate the architecture of the 8051 microcontrollers (K2)

CO5 - Exemplify the use of Raspberry and Arduino processors. (K2)

UNIT I INTEL 8085 MICROPROCESSORS**(9 Hrs)**

Introduction – Need for Microprocessor – Evolution – 8085 Architecture – Pin diagram - Timing Diagram – Addressing Modes – Instruction Formats – Instruction Set.

UNIT II INTEL 8086 MICROPROCESSORS**(9 Hrs)**

Introduction to 8086 Microprocessor – 8086 Architecture – Pin diagram – I/O and Memory Interfacing – Addressing Modes – Instruction Format – Instruction Set – Interrupts – Assembler Directives – Assembly Language Programming.

UNIT III PERIPHERALS AND INTERFACING TO 8086**(9 Hrs)**

Parallel Communication Interface (8255) – Serial Communication interface (8251) – D/A and A/D Interface – Programmable Timer Controller (8254) – Keyboard/display controller (8279) – Programmable Interrupt Controller (8259) – DMA controller (8237).

UNIT IV INTEL 8051 MICROCONTROLLER AND INTERFACING**(9 Hrs)**

Introduction – Architecture – Memory Organization – Special Function Registers – Pins and Signals – Timing and control – Port Operation – Memory and I/O Interfacing – Interrupts – Instruction Set and Programming. Interfacing – LCD and Keyboard Interfacing – RTC and EEPROM interface using I2C protocol – Stepper Motor, Traffic Light Controller.

UNIT V INTRODUCTION TO RASPBERRY PI and ARDUINO**(9 Hrs)**

Raspberry Pi Hardware – Raspberry Pi Software – Programming on Raspberry Pi – Interfacing to Raspberry Pi Inputs/ Outputs – Interfacing to Raspberry Pi Buses – Interacting to Physical Environment. – Arduino Board – Sketches – Mathematical Operators – Serial Communications – Interfacing with sensors.

OPERATIONS RESEARCH

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 1 | 0 | 3 | 60 |

Course Objectives

- To understand the role of operation research in decision making.
- To provide knowledge and training in using optimization techniques.
- To impart the various operation research models for effective problem solving.
- To know the basics and the methods of solving game theory and network problems.
- To acquire knowledge in principles of Queuing Theory.

Course Outcomes

After completion of the course, students shall have ability to

CO1 - Understand the characteristics of different types of decision-making environments. (K2)

CO2 - Solve Transportation Models and Assignment Models. (K3 & K4)

CO3 - Design new simple models by using critical path method. (K3 & K4)

CO4 – Understand the applications of game theory. (K2)

CO5 – Apply Queuing theory and solve problems related to it. (K3)

UNIT I LINEAR PROGRAMMING**(12 Hrs)**

Stages of development of Operations Research – Applications of Operations Research – Limitations of Operations – Introduction to Linear Programming – Graphical Method – Simplex Method - Duality.

UNIT II TRANSPORTATION PROBLEMS**(12 Hrs)**

Basic feasible solution by different methods - Fixing optimal solutions - Stepping stone method - MODI method - Assignment problem – Formulation – Optimal solution.

UNIT III NETWORKS MODELS**(12 Hrs)**

Shortest Path Problem – Floyd's Algorithm – Minimum Spanning Tree Problem - CPM/PERT – Crashing of a Project network.

UNIT IV THEORY OF GAMES**(12 Hrs)**

Rectangular games -- Minimax theorem -- graphical solution of $2 \times n$ or $m \times 2$ games -- game with mixed strategies.

UNIT V INVENTORY MODELS**(12 Hrs)**

Basic Waiting Line Models: $(M/M/1):(GD/a/a)$ – $(M/M/1):(GD/N/a)$ – $(M/M/C):(GD/a/a)$ – $(M/M/C):(GD/N/a)$

DEEP LEARNING

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand Neural Network basic Architecture and various Activation functions.
- To understand CNN and different Neural network model
- Able to apply different optimization techniques to fine tune the deep learning models
- Study about various Deep learning models
- Understand the deep reinforcement learning

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand basic neural network activation function and loss functions. **(K2)**

CO2 - Able to apply different Convolutional Neural Network. **(K2)**

CO3 - Understand different deep learning regularization and optimization methods. **(K2)**

CO4 - Understand different Neural Network Model. **(K2)**

CO5 - Understand Neural Style transfer and autoencoding process. **(K2)**

UNIT I FOUNDATIONS OF NEURAL NETWORKS**(9 Hrs)**

Neural Networks: The Biological Neuron-The Perceptron - Multilayer Feed - Forward Networks - Training Neural Networks: Backpropagation Learning - Activation Functions: Linear – Sigmoid – Tanh - Hard Tanh – Softmax -Rectified Linear - Loss Functions: Loss Function Notation - Loss Functions for Regression - Loss Functions for Classification - Loss Functions for Reconstruction - Hyperparameters: Learning Rate – Momentum – Sparsity -Understanding Convolutions.

UNIT II CNN**(9 Hrs)**

CNN Building Blocks: Layer Type - Convolutional Layer - Activation Layer - Pooling Layer - Fully Connected Layer -Batch Normalization – Dropout - Common architecture and Training Pattern - LeNet-5 - AlexNet - VGG16 net - ResNet.

UNIT III REGULARIZATION AND OPTIMIZATION**(9 Hrs)**

Regularization - Dropout Regularization - Normalizing Inputs- Vanishing / Exploding Gradients - Weight Initialization - Numerical Approximation of Gradients - Gradient Checking. Mini-batch Gradient Descent - Exponentially Weighted Averages - Bias Correction in Exponentially Weighted Averages - Gradient Descent with Momentum - Adam Optimization Algorithm - Learning Rate Decay - The Problem of Local Optima - Transfer learning and Fine tuning.

UNIT IV RNN**(9 Hrs)**

Building and improving Feed Forward Language Model - RNN - Bidirectional RNN – LSTM – GRU - Seq2Seq paradigm - multilength Seq2Seq.

UNIT V DEEP REINFORCEMENT LEARNING**(9 Hrs)**

Value iteration - Q Learning - Basic deep Q Learning - Policy gradient method - actor critic method - Experience replay - Basic autoencoding - convolutional autoencoding - variational autoencoding - Generative Adversarial Network (GAN).

|------------------|---|----------|----------|----------|----------|------------|
| U20ADT509 | IMAGE PROCESSING AND COMPUTER VISION | L | T | P | C | Hrs |
| | | 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand basic image processing concepts.
- To study different object segmentation methods.
- To understand different shape invariant in images and videos.
- Able to understand various object recognition methods.
- Study about Texture and object motion analysis.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Recognize and describe both the theoretical and practical aspects of computing with images. **(K2)**

CO2 - Understand object segmentation methods. **(K2)**

CO3 - Understand shape representation methods. **(K2)**

CO4 - Apply object recognition and optimization techniques. **(K3)**

CO5 - Understand motion analysis in video. **(K2)**

UNIT I INTRODUCTION TO DIGITIZED IMAGE**(9 Hrs)**

Basic Concepts - Image Digitization – Sampling – Quantization - colour images - digital image properties - Image data representation - Traditional data structure - Hierarchical data structure - Image Pre-processing - Pixel brightness transformation - geometric transformation - Image smoothing - Edge Detectors – Scaling - Canny Edge Detector - edges in multispectral images - image restoration - Inverse filtration - wiener filtration.

UNIT II OBJECT SEGMENTATION**(9 Hrs)**

Thresholding - Edge based segmentation - edge image thresholding - edge relaxation - border tracing - Hough transforms - border detection - region construction from borders - region growing segmentation - region merging -region splitting - splitting and merging - matching.

UNIT III SHAPE REPRESENTATION**(9 Hrs)**

Region identification - contour based shape representation - simple geometric border representation - Fourier transform of boundaries - Shape invariants - region based shape representation - simple scalar region descriptors –moments - convex hull - region decomposition - region neighbourhood graphs.

UNIT IV OBJECT RECOGNITION**(9 Hrs)**

Knowledge representation - statistical pattern recognition - Syntactic pattern recognition - optimization techniques in recognition - Mathematical Morphology - Morphological transformation – dilation – erosion - opening and closing -homotopic transformation – skeleton - thinning and thickening.

UNIT V TEXTURE AND MOTION ANALYSIS**(9 Hrs)**

Statistical texture description - Syntactic texture description - hybrid texture description - texture recognition - Motion Analysis - Optical flow method - detection of interest points.

BIG DATA TOOLS AND TECHNIQUES

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- Understand big data for business intelligence.
- Learn business case studies for big data analytics.
- Understand nosql big data management.
- Perform map-reduce analytics using Hadoop and related tools.
- Understand big data for business intelligence.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Describe big data and use cases from selected business domains. (K2)

CO2 - Explain NoSQL big data management. (K3)

CO3 - Install, configure, and run Hadoop and HDFS. (K3)

CO4 - Perform map-reduce analytics using Hadoop. (K2)

CO5 - Use Hadoop related tools such as HBase, Cassandra, Pig, and Hive for big data analytics. (K2)

UNIT I UNDERSTANDING BIG DATA**(9 Hrs)**

What is big data – why big data – convergence of key trends – unstructured data – industry examples of big data – web analytics – big data and marketing – fraud and big data – risk and big data – credit risk management – big data and algorithmic trading – big data and healthcare – big data in medicine – advertising and big data – big data technologies – introduction to Hadoop – open source technologies – cloud and big data – mobile business intelligence – Crowd sourcing analytics – inter and trans firewall analytics.

UNIT II NOSQL DATA MANAGEMENT**(9 Hrs)**

Introduction to NoSQL – aggregate data models – aggregates – key-value and document data models – relationships – graph databases – schemaless databases – materialized views – distribution models – sharding – master-slave replication – peer-peer replication – sharding and replication – consistency – relaxing consistency – version stamps – map-reduce – partitioning and combining – composing map-reduce calculations.

UNIT III BASICS OF HADOOP**(9 Hrs)**

Data format – analyzing data with Hadoop – scaling out – Hadoop streaming – Hadoop pipes – design of Hadoop distributed file system (HDFS) – HDFS concepts – Java interface – data flow – Hadoop I/O – data integrity – compression – serialization – Avro – file-based data structures.

UNIT IV MAPREDUCE APPLICATIONS**(9 Hrs)**

MapReduce workflows – unit tests with MRUnit – test data and local tests – anatomy of MapReduce job run – classic Map-reduce – YARN – failures in classic Map-reduce and YARN – job scheduling – shuffle and sort – task execution – MapReduce types – input formats – output formats.

UNIT V HADOOP RELATED TOOLS**(9 Hrs)**

Hbase – data model and implementations – Hbase clients – Hbase examples – praxis.Cassandra – cassandra data model – cassandra examples – cassandra clients – Hadoop integration. Pig – Grunt – pig data model – Pig Latin – developing and testing Pig Latin scripts. Hive – data types and file formats – HiveQL data definition – HiveQL data manipulation – HiveQL queries – Apache Spark ML.

DEEP LEARNING LABORATORY

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand Neural Network basic Architecture and various Activation functions.
- To understand gradient descent for deep learning.
- Able to apply different optimization techniques to fine tune the deep learning models.
- Study about various Deep learning models.
- Understand the working of model in different applications.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Understand the role of neural networks in engineering & artificial intelligence. **(K2)**

CO2 – Understand regularization methods for gradient problem. **(K2)**

CO3 – Apply various optimization techniques and fine-tuning process. **(K3)**

CO4 – Understand various Neural Network models. **(K2)**

CO5 – Apply deep learning Network in various applications. **(K3)**

List of Exercises

1. Build a simple Neural Network.
2. Build a deep learning model to Classify cat and dog using CNN
3. Build a deep learning model to predict Stock Prices using Recurrent Neural Network
4. Build a deep learning model to Forecast Sales using LSTM
5. Build a deep learning model to predict Movie box office using GRU model
6. Build a deep learning model to predict Sports result Prediction using RNN and LSTM
7. Build a deep learning model to predict Cardiovascular Disease using ANN
8. Build a deep learning model to create an art using Style Transfer technique
9. Build a deep learning model to identify traffic signs from the image
10. Build a deep learning model for Fashion Recommendation System

U20ADP509

**IMAGE PROCESSING AND COMPUTER
VISION LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand basic image processing concepts.
- To study different object segmentation methods.
- To understand different shape invariant in images and videos.
- Able to understand various object recognition methods.
- Study about object motion analysis.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Setup and study computer vision libraries. **(K2)**

CO2 - Implement object detection mechanism. **(K2)**

CO3 - Apply object tracking methods. **(K3)**

CO4 - Implement deep learning models in computer vision. **(K2)**

CO5 - Apply deep learning model to reconstruct a 3D scene. **(K3)**

List of Exercises

1. Write a program to read and write an image and a video file.
2. Write a program to detect a line, circle and ellipse.
3. Write a program to detect edges and apply median and Gaussian filters in an image.
4. Write a program to detect contour in an image.
5. Write a program to detect foreground and background in video.
6. Write a program to recognize traffic sign using machine learning algorithm.
7. Write a program to track Objects in a video.
8. Write a program to reconstruct a scene in 3D by inferring the geometrical features of the scene from camera motion.
9. Build a deep learning model to classify digits in MNIST dataset.
10. Build a deep learning model to detect smiles in SMILES Dataset.

| U20ADP510 | BIG DATA TOOLS AND TECHNIQUES LABORATORY | | | | L | T | P | C | Hrs |
| | | | | | 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand setting up of Hadoop Cluster.
- To solve problems using Map Reduce Technique.
- To solve Big Data problems.
- To implement the concepts in R Programming.
- To solve operations using NoSQL.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Set up multi-node Hadoop Clusters. **(K2)**
CO2 – Apply Map Reduce algorithms for various algorithms. **(K3)**
CO3 – Implementation of clustering, regression and classification techniques. **(K2)**
CO4 – Data processing using R programming. **(K3)**
CO5 – Unstructured data processing using NoSQL. **(K3)**

List of Experiments

1. Installation, Configuration, and Running of Hadoop and HDFS
2. Implementation of Word Count / Frequency Programs using MapReduce
3. Implementation of Page Rank Computation
4. Implementation of Linear and Logistic Regression
5. Implementation of SVM and Decision Tree Classification Technique
6. Implementation of following Clustering Techniques:
 - Hierarchical Clustering
 - Partitioning Clustering
 - Fuzzy Clustering
 - Density Based Clustering
 - Model Based Clustering
7. Application to adjust the Number of Bins in the Histogram using R Language
8. Build supervised learning models using Apache Spark ML.
9. Application to analyze Stock Market Data using R Language
10. Unstructured data into NoSQL data and do all operations such as NoSQL query with API.
11. Application of Recommendation systems using Hadoop/mahout libraries.

U20ADC5XX

CERTIFICATION COURSE-V

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 4 | - | 50 |

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

U20ADS504**SKILL DEVELOPMENT COURSE 4**

(Foreign Language / IELTS – I)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | - | 30 |

Student should choose the Foreign Language/IELTS course like Japanese/French/ Germany/IELTS, etc. approved by the Department committee comprising of HoD, Programme Academic Coordinator, Class advisor and language Experts. The courses are to be approved by Academic Council on the recommendation of HoD at the beginning of the semester if necessary, subject to ratification in the next Academic council meeting. Students have to complete the courses successfully. The Committee will monitor the progress of the student and recommend the grade (100% Continuous Assessment pattern) based on the completion of course. The marks attained for this course is not considered for CGPA calculation.

U20ADS505

SKILL DEVELOPMENT COURSE 5

(Presentation Skills using ICT)

L T P C Hrs

0 0 2 - 30

The methodology used is "learning by doing", a hands-on approach, enabling the students to follow their own pace. The teacher, after explaining the project, became a tutor, answering questions and helping students on their learning experience.

ICT skills

- Understand ICT workflow in cloud computing.
- Manage multitasking.
- Deal with main issues using technology in class.
- Record, edit and deliver audio and video.
- Automate assessments and results.

Teaching tools

- Different ways to create audiovisual activities.
- Handle audiovisual editors.
- Collaborative working.
- Individualize learning experience.
- Get instant feedback from students.

Each one of the students will be assigned an ICT Topic and the student has to conduct a detailed study and have to prepare a report, running to 15 or 20 pages for which a demo to be performed followed by a brief question and answer session. The demo will be evaluated by the internal assessment committee for a total of 100 marks. The marks attained for this course is not considered for CGPA calculation.

U20ADM505

INDIAN CONSTITUTION

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 2 | 0 | 0 | 0 | 30 |

Course Objectives

- To Enable the student to understand the importance of constitution
- To understand the structure of executive, legislature and judiciary
- To understand philosophy of fundamental rights and duties

Course Outcomes

After completion of the course, the students will be able to

- CO1** - Understand historical background of the constitutional making and its importance for building a democratic India, the structure of Indian government, the structure of state government, the local Administration.
- CO2** - Understand knowledge on directive principle of state policy, the knowledge in strengthening of the constitutional institutions like CAG, Election Commission and UPSC for sustaining democracy.

UNIT I INDIAN CONSTITUTION

Salient Features - Preamble - Fundamental Rights – Directive Principles of State Policy - Fundamental Duties.

UNIT II PARLIAMENTARY SYSTEM

Powers and Functions of President and Prime Minister - Council of Ministers - The Legislature Structure and Functions of Lok Sabha and Rajya Sabha – Speaker.

UNIT III THE JUDICIARY

Organization and Composition of Judiciary - Powers and Functions of the Supreme Court - Judicial Review – High Courts.

UNIT IV STATE GOVERNMENTS

Powers and Functions of Governor and Chief Minister – Council of Ministers - State Legislature.

UNIT V LOCAL GOVERNMENTS

73rd and 74th Constitutional Amendments – Federalism - Center – State Relations.

Text Books

U20ADT611

NLP AND CHATBOT

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To explain and apply fundamental algorithms and techniques in the area of natural language processing (NLP).
- To understand approaches to syntax and semantics in NLP.
- To implementation of machine translation.
- To understand about chatbot.
- To learn conversational interface.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the concept of NLP. (K2)

CO2 - Create Language Modelling. (K3)

CO3 - Understand the concept of machine translation. (K3)

CO4 - Illustrate the chatbot. (K3)

CO5 - Understand the concept of conversational interface. (K2)

UNIT I INTRODUCTION**(9 Hrs)**

Introduction to NLP – NLP preprocessing steps – NLP Feature Engineering - Words - Structure - spellcheck, morphology using FSTs - Semantics - Lexical Semantics, word count vector, WordNet and WordNet based similarity measures, Distributional measures of similarity, Concept Mining - Word Sense Disambiguation - supervised, unsupervised and semi-supervised approaches - Parts of Speech.

UNIT II LANGUAGE MODELLING**(9 Hrs)**

Sentences - Basic ideas in compositional semantics, Classical Parsing – different types of parsing - Bottom up, top down, Dynamic Programming - Parsing using Probabilistic Context Free Grammars and Expectation - Maximization based approaches for learning PCFG parameters. Language Modelling.

UNIT III MACHINE TRANSLATION**(9 Hrs)**

Machine Translation - rule-based techniques, Statistical Machine Translation, parameter learning using Expectation - Maximization - Information Extraction - Introduction to Named Entity Recognition and Relation Extraction - Natural Language Generation - the potential of using ML - Advanced Language Modelling – Applications - summarization, question answering.

UNIT IV CHATBOT**(9 Hrs)**

Chatbot – Design of a Chatbot - Introduction to Conversational Interface - Preliminaries, developing a speech based Conversational Interface, Conversational Interface and devices - Technology of Conversation: Introduction - Conversation as Action - The structure of Conversation - The language of Conversation.

UNIT V CONVERSATIONAL INTERFACE**(9 Hrs)**

Developing a Speech-Based Conversational Interface - Implementing Text to Speech - Text Analysis - Wave Synthesis - Implementing Speech Recognition - Language Model, Acoustic Model - Decoding - Speech Synthesis Mark-up Language - Advanced voice user interface design – Advanced Chatbots.

U20ADT612

AI AND AUTOMATION

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To understand the working of agents and its advantage.
- To study the development and deployment of chatbot using AWS.
- To experiment IoT with AI.
- To create mobile application with TensorFlow.
- To implement the concept of Artificial Intelligence with Cyber Security.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the working of agents. **(K2)**

CO2 - Develop and deploy of Chatbot using AWS. **(K3)**

CO3 - Experiment IoT with AI. **(K4)**

CO4 - Create and Develop mobile application with TensorFlow. **(K4)**

CO5 - Implement the concept of Artificial Intelligence with Cyber Security. **(K3)**

UNIT I INTELLIGENT AUTONOMOUS AND MULTI-AGENT**(9 Hrs)**

Introduction – Challenges – Cyber Adversary – Embodied Agents – Required AI coordination. Active Inference in Multi-Agent System: Introduction – Energy based Adaptive agent – Applications – Validation.

UNIT II CHATBOT USING AWS**(9 Hrs)**

Introduction to AWS and Amazon CLI – Creation of local development environment – Introduction to Alexa – Creating Lambda – Connecting to External APIs – Creation of Amazon Lex Chatbot – Lex responses – Lex Bot to Dynamo DB – Application Chatbot to Facebook – Slack – HTTP.

UNIT III INTERNET OF THINGS AND ARTIFICIAL INTELLIGENCE**(9 Hrs)**

Web of Smart Entities: Introduction – Smart Things – Vision – Use of Artificial Intelligence – Interacting with Automation – Artificial Intelligence and the Internet of Big Things – Value of Information and Internet of Things.

UNIT IV TENSORFLOW FOR MOBILE APPLICATIONS**(9 Hrs)**

Introduction to TensorFlow – TensorFlow Lite on Android – application using CNN – Finding Pattern - Features from Image – TensorFlow Core Machine Learning – Conversion – ML Kit Basic – Face Detection – Barcode Scanner – Text Recognition.

UNIT V DETECTION OF CYBER SECURITY THREATS WITH ARTIFICIAL INTELLIGENCE**(9 Hrs)**

Introduction – Detecting Spam with Perceptions – Spam with SVMs – Phishing – Spam Detection with Naive Bayes – Malware Threat Detection – Different Malware types – Decision Tree Malware Detectors – Metamorphic Malware – Network Anomaly Detection.

| U20ADT613 | ROBOTICS PROCESS AUTOMATION – UI | | | | L | T | P | C | Hrs |
| | PATH | | | | 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To learn the basics of data science
- To enable the students to understand the statistics and probability.
- To understand the tools in developing and visualizing data.
- To gain good knowledge in the application areas of data science.
- To inculcate the perceiving and acting of data science applications.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand basic programming concepts and its operation from RPA perspective. **(K2)**

CO2 - Understand the basic concepts of Robotic Process Automation and its applications. **(K2)**

CO3 - Develop familiarity and deep understanding of UI Path tools. **(K3)**

CO4 - Apply automation to image, text, data tables, citrix, pdf, email, etc., execute exception handling and apply various functionalities of orchestrator. **(K3)**

CO5 - Analyse opportunities of research in Artificial Intelligence with respect to RPA. **(K4)**

UNIT I PROGRAMMING FUNDAMENTALS**(9 Hrs)**

Understanding the application - Basic Web Concepts – Protocols - Email Clients - Data Structures - Data Tables – Algorithms - Software Processes - Software Design – SDLC – Scripting - Net Framework - .Net Fundamentals – XML - Control structures and functions – XML – HTML – CSS - Variables and Arguments.

UNIT II RPA CONCEPTS**(9 Hrs)**

Fundamentals: History of Automation - Introduction to RPA - RPA vs Automation - Processes and Flowcharts - Programming Constructs in RPA - Processes and workloads that can be Automated - Types of Bots. Advanced concepts: Standardization of processes - RPA Development methodologies - Difference from SDLC - Robotic control flow architecture - RPA business case - RPA Team - Process Design Document/Solution Design Document - Industries best suited for RPA - Risks and Challenges with RPA - RPA and emerging ecosystem.

UNIT III UIPATH INTRODUCTION AND EXPLORATION**(9 Hrs)**

Introduction: Installing UiPath Studio community edition - The User Interface - Keyboard Shortcuts About Updating - About Automation Projects - Introduction to Automation Debugging - Managing Activation Packages - Reusing Automations Library - Installing the Chrome Extension – Variables - Control Flow - Data Manipulation - Recording and Advanced UI Interaction - Selectors.

UNIT IV UIPATH ADVANCED AUTOMATION**(9 Hrs)**

Image, Text and Advanced Citrix Automation - Excel Data Tables and PDF - Email Automation - Debugging and Exception Handling - Project Organization. Orchestrator: Tenants – Authentication – Users – Roles – Robots – Environments - Queues and Transactions - Schedules.

UNIT V ARTIFICIAL INTELLIGENCE AND RPA**(9 Hrs)**

Research on application of RPA for Machine Learning, Agent awareness - Natural Language Processing - Computer Vision, etc, Case studies and projects on applying RPA for designing and developing robots for real-world problems.

U20ADT614

WEB TECHNOLOGY

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To study the fundamentals of web application development.
- To understand the design components and tools using CSS and Javascript.
- To learn the concepts of the PHP programming fundamentals.
- To study about image basics.
- To understand the working procedure of Django for forms.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Develop basic web applications. (K3)

CO2 - Design the web applications using CSS and Validate the web pages using JavaScript functions. (K3)

CO3 - Demonstrate the PHP application to advance scripts. (K3)

CO4 - Learn the basics of Django. (K2)

CO5 - Update the knowledge of Django. (K3)

UNIT I INTRODUCTION TO WWW AND HTML**(9 Hrs)**

Protocols - secure connections - application and development tools - the web browser - What is server - dynamic IP. Web Design: Web site design principles - planning the site and navigation. HTML: The development process - Html tags and simple HTML forms - web site structure.

UNIT II CSS AND JAVASCRIPT**(9 Hrs)**

Need for CSS - introduction to CSS - basic syntax and structure - using CSS - background images - colours and properties - manipulating texts - using fonts - borders and boxes - margins - padding lists - positioning using CSS - CSS2. Client side scripting - What is JavaScript - How to develop JavaScript - simple JavaScript - variables - functions - conditions - loops and repetition.

UNIT III PHP**(9 Hrs)**

Introduction, Basics, Data types, Operators, Flow control, Arrays, Array functions, Strings and Regular expressions, Generators. OOP in PHP -- Classes, Objects, Constructors and Destructors, Access Modifiers, Methods, Inheritance, Error and Exceptional Handling, File Handling. Web Development Frameworks - Introduction - Yii - Model View Controller - Entry Script - Application - Controller - Model - View - Component - Module.

UNIT IV INTRODUCTION TO DJANGO**(9 Hrs)**

Introduction to Django - Creating the Project - Running the Development Server - Creating the Application - Designing a Model - Setting up the Database - Setting up the Application - Dynamic Web Sites - Communication - Data Storage - Presentation.

UNIT V DJANGO ARCHITECTURE, FORMS AND APIS**(9 Hrs)**

Django model layer - View layer - Template Layer - Forms - Automated admin interface - Django Security - Django Web application tools - Core functionalities - Geographic Framework. Templates - Forms - Validation - Authentication - Advanced Forms processing techniques - Django REST framework - Django piston.

U20ADP611

NLP AND CHATBOT LABORATORY

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand the NLP concepts.
- To implement text classification and summarization.
- To create WhatsApp group chat.
- To understand sentiment analysis.
- To learn spam detection model.

Course Outcomes

After completion of the course, the students will be able to

- CO1** – Implementation of concepts with python. **(K3)**
CO2 – Create NLP applications for other languages. **(K2)**
CO3 – Illustrate detection models. **(K3)**
CO4 – Develop applications using sentiment analysis. **(K3)**
CO5 – Implement whatsapp chat analysis. **(K3)**

List of Exercises

1. Implementation of Resume Screening with Python
2. Creation of Named Entity Recognition with Python
3. Development of Sentiment Analysis with Python
4. Create Keyword Extraction with Python
5. Implementation of Spelling Correction Model with Python
6. Creation of Keyboard Autocorrection Model
7. Implementation of Election Results Prediction by analyzing Tweets
8. Development of NLP for Other languages
9. Creation of Text Classification using Deep Learning
10. Summarize Text with Machine Learning
11. Implement a chatbot for Task Management.
12. Implement a chatbot to recommend a gift product.
13. Development of WhatsApp Group Chat Analysis
14. Implementation of Next Word Prediction Model
15. Creation of Fake News detection Model
16. Development of NLP for WhatsApp Chats
17. Implementation of OCR using Tesseract.

**AI AND AUTOMATION
LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand the AI concepts.
- To learn the automation in shopping cart.
- To learn how to create AI project.
- To implement automation projects.
- To understand the process of automation in AI projects with sample projects.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Implementation of automation in AI projects. (K3)

CO2 – Develop capstone projects using automation. (K3)

List of Exercises

The following topics are used to create as capstone projects using AI and Automation.

1. Automatic Answer Checker
2. Smart Health Consulting Project
3. College Enquiry Chat Bot
4. Online AI Shopping With M-Wallet System
5. Intelligent Tourist System Project
6. Online Assignment Plagiarism Checker
7. Question paper generator system
8. Aptitude Tests
9. Teachers Automatic Time-Table Software
10. Automatic Attendance System.

U20ADP613

**ROBOTIC PROCESS AUTOMATION
– UI PATH LABORATORY**

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To understand the concept of RPA – UI path.
- To implement web scraping, data mitigation process.
- To learn the email query processing and customer support emails.
- To develop credit card applications.
- To automate the process in excel and pdf.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Implementation of RPA – UI path. (K3)

CO2 – Develop web scraping, data mitigation and entry process. (K2)

CO3 – Create the query processing in email and customer support emails. (K3)

CO4 – Develop credit card applications. (K3)

CO5 – Implement the automation process in excel and pdf. (K3)

List of Exercises

1. Web Scraping
2. Data Migration & Entry
3. Email Query Processing
4. Invoice Processing
5. Customer Support Emails
6. Scheduling systems
7. Expense management
8. Credit card applications
9. Moving Files from one Source Folder to Destination Folder
10. Excel Automation
11. PDF Automation

U20ADC6XX

CERTIFICATION COURSE – VI

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 4 | - | 50 |

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

U20ADS606**SKILL DEVELOPMENT COURSE 6**
(Foreign Language / IELTS – II)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | - | 30 |

Student should choose the Foreign Language/IELTS course like Japanese/French/ Germany/IELTS, etc. approved by the Department committee comprising of HoD, Programme Academic Coordinator, Class advisor and language Experts. The courses are to be approved by Academic Council on the recommendation of HoD at the beginning of the semester if necessary, subject to ratification in the next Academic council meeting. Students have to complete the courses successfully. The Committee will monitor the progress of the student and recommend the grade (100% Continuous Assessment pattern) based on the completion of course. The marks attained for this course is not considered for CGPA calculation.

U20ADS607

SKILL DEVELOPMENT COURSE 7
(Technical Seminar)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | - | 30 |

Course Objectives

- To encourage the students to study advanced engineering developments
- To prepare and present technical reports.
- To encourage the students to use various teaching aids such as over head projectors, power point presentation and demonstrative models.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Review, prepare and present technological developments.

CO2 - Face the placement interviews.

Method of Evaluation:

- During the seminar session each student is expected to prepare and present a topic on engineering/ technology, for duration of about 20 minutes.
- In a session of three periods per week, 8 to 10 students are expected to present the seminar.
- Each student is expected to present atleast twice during the semester and the student is evaluated based on that.
- At the end of the semester, he / she can submit a report on his / her topic of seminar and marks are given based on the report.
- A Faculty guide is to be allotted and he / she will guide and monitor the progress of the student and maintain attendance also.
- Evaluation is 100% internal. The marks attained for this course is not considered for CGPA calculation.

U20ADS608

SKILL DEVELOPMENT COURSE 8
(NPTEL / MOOC - I)

| L | T | P | C | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | - | 30 |

Student should register online courses like MOOC / SWAYAM / NPTEL etc. approved by the Department committee comprising of HoD, Programme Academic Coordinator, Class advisor and Subject Experts. Students have to complete the relevant online courses successfully. The list of online courses is to be approved by Academic Council on the recommendation of HoD at the beginning of the semester if necessary, subject to ratification in the next Academic council meeting. The Committee will monitor the progress of the student and recommend the grade (100% Continuous Assessment pattern) based on the completion of course / marks secured in online examinations. The marks attained for this course is not considered for CGPA calculation.

| U20ADM606 | ESSENCE OF INDIAN TRADITIONAL KNOWLEDGE | L | T | P | C | Hrs |
|-----------|---|---|---|---|---|-----|
| | | 2 | 0 | 0 | - | 30 |

Course Objectives

The course will introduce the students to

- To get a knowledge in Indian Culture
- To Know Indian Languages and Literature and the fine arts in India
- To explore the Science and Scientists of Medieval and Modern India

Course Outcomes

After completion of the course, the students will be able to

- CO1 – Understand philosophy of Indian culture. (K2)
 CO2 – Distinguish the Indian languages and literature. (K3)
 CO3 – Learn the philosophy of ancient, medieval and modern India. (K1)
 CO4 – Acquire the information about the fine arts in India. (K3)
 CO5 – Know the contribution of scientists of different eras. (K2)

UNIT I INTRODUCTION TO CULTURE

Culture, Civilization, Culture and Heritage, General Characteristics of Culture, Importance of Culture in Human Literature, Indian Culture, Ancient India, Medieval India, Modern India.

UNIT II INDIAN LANGUAGES, CULTURE AND LITERATURE

Indian Languages and Literature-I: The role of Sanskrit, Significance of Scriptures to Current Society, Indian Philosophies, Other Sanskrit Literature, Literature of South India Indian Languages and Literature-II: Northern Indian languages & Literature.

UNIT III RELIGION AND PHILOSOPHY

Religion and Philosophy in Ancient India, Religion and Philosophy in Medieval India, Religious Reform Movements in Modern India (selected movements only).

UNIT IV FINE ARTS IN INDIA (ART, TECHNOLOGY& ENGINEERING)

Indian Painting, Indian handicrafts, Music, Divisions of Indian Classic Music, Modern Indian Music, Dance and Drama, Indian Architecture (ancient, medieval and modern), Science and Technology in India, Development of Science in Ancient, Medieval and Modern India.

UNIT V EDUCATION SYSTEM IN INDIA

Education in Ancient, Medieval and Modern India, Aims of Education, Subjects, Languages, Science and Scientists of Ancient India, Science and Scientists of Medieval India, Scientists of Modern India.
