# B.TECH. BIOMEDICAL ENGINEERING

## ACADEMIC REGULATIONS 2023 (R-2023)

## **CURRICULUM AND SYLLABI**

### COLLEGE VISION AND MISSION

### Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society

### Mission

### **M1: Quality Education**

To provide comprehensive academic system that amalgamates the cutting edge technologies with best practices.

### M2: Research and Innovation

To foster value-based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

### M3: Employability and Entrepreneurship

To inculcate the employability and entrepreneurial skills through value and skill based training.

### **M4: Ethical Values**

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

### DEPARTMENT VISION AND MISSION

### Vision

To provide quality education in Biomedical Engineering focused on promoting continuous enrichment in the relevant research field and innovations in medical diagnosis for human health care.

### Mission

### M1: Medical science Engineering

To provide quality Biomedical Engineering education that integrates engineering principles with biomedical sciences.

#### M2: Research and Development

To develop Biomedical engineers to apply innovative strategies for the design and development of medical equipment.

### **M3: Industrial Intelligence**

To incorporate novel technologies towards the healthcare industrial needs for medical applications and to become an entrepreneur.

#### M4: Ethical Responsibilities

To impart the desirable skill sets to become globally competent ethical professional.

#### PROGRAM OUTCOMES (POs)

#### PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

#### PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

### PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

#### PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

### PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

#### PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

### PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

#### PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

#### PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

#### PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

#### PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

#### PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Dr. A.Vijayalakshmi

### **PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

### **PEO1: Professional Skills**

To become outstanding professionals to demonstrate their skills in solving challenges for healthcare diagnosis.

### **PEO2: Higher Education and Research**

To work successfully in multi-disciplinary environments or pursue higher studies.

### **PEO3: Entrepreneurial Competencies**

To address the challenges in biomedical engineering that supports employment and entrepreneurship to serve the society.

### **PEO4: Leadership Quality**

To enable the graduates to exhibit leadership, make decisions with ethical responsibilities.

### **PROGRAM SPECIFIC OUTCOMES (PSOs)**

### **PSO1: Knowledge in Biomedical Engineering**

Comprehending fundamental concepts in Biomedical Engineering to meet the emerging trends.

### **PSO2:** Problem Solving in Medical Diagnosis

Apply Bio Signal and Image processing techniques to solve real time problems in medical field.

### **PSO3: Troubleshooting of Medical Equipment**

Troubleshoot the faulty medical Equipment used in health care industry.

A. M

SI.No	Course Category	Breakdown of Credits
1	Humanities and Social Sciences including Management courses (HS)	15
2	Basic Science Courses (BS)	24
3	Engineering Science including workshop, drawing, basics of electrical / mechanical / computer etc. (ES)	25
4	Professional Core Courses (PC)	65
5	Professional Electives Courses (PE)	18
6	Open Electives Courses (OE)	9
7	Project Work and Internship (PA)	13
8	Ability Enhancement Courses (AEC*)	-
9	Mandatory Courses (MC*)	-
	Total	169

### STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

	Total	22	22	23	22	21	22	20	17	169

\* AEC and MC credits are not included for CGPA calculation

### HONOURS DEGREE PROGRAMME:

The student is permitted to opt for earning an *honours degree* in the same discipline of engineering in addition to the degree in his/her own discipline. To earn an honours degree the student is required to earn an additional 18 - 20 credits (over and above the total 169 credits prescribed in the curriculum) starting from fourth semester onwards by completing 5 additional courses offered in respective semesters. A student is

A. On

5

eligible to exercise this option if he/she has passed all the courses offered upto third semester in the first attempt itself and has earned a CGPA /  $GPA^*$  (\*for lateral entry) of not less than 8.0.The prescribed courses offered for Honours degree are given in **Annexure – V**

Course Name	Desig	n Thinking and IDEA Lab	0	0	2	1	50	50	100	
	t	(Common to	ALL Brar	nches)						
Prerequisite	Basic	Knowledge of Science								
	On co	On completion of the course, the students will be able to								
	CO1	Demonstrate a comprehensive understanding of the tools and inventory associated with the IDEA Lab.								
	CO2	Develop proficiency in ideation techniques to generate creative and innovative solutions for various design and problems challenges								
Course Outcomes	CO3	Acquire practical knowledge of mechanical and electronic fabrication processes, including hands-on experience with machinery, tools, and techniques used in the manufacturing and assembly of physical components.							K3	
	CO4	Cultivate the skills necessary for developing innovative and desirable products, including the ability to integrate user needs, market trends, and technological advancements into the design process.							K4	
	CO5	Apply iterative design methodologies t user testing, and evaluation of function	,	K4						

**Design process:** Traditional design, Design thinking, Existing sample design projects, Study on designs around us, Compositions/structure of a design, Innovative design: Breaking of patterns, Reframe existing design problems, Principles of creativity Empathy: Customer Needs, Insight-leaving from the lives of others/standing on the shoes of others, Observation

**Design team-Team formation, Conceptualization:** Visual thinking, Drawing/sketching, New concept thinking, Patents and Intellectual Property, Concept Generation Methodologies, Concept Selection, Concept Testing, Opportunity identification Prototyping: Principles of prototyping, Prototyping technologies, Prototype using simple things, Wooden model, Clay model, 3D printing; Experimenting/testing.

Sustainable product design, Ergonomics, Semantics, Entrepreneurship/business ideas, Product Data Specification, establishing target specifications, Setting the final specifications. Design projects for teams.

### List of Lab Activities and Experiments

- 1. Schematic and PCB layout design of a suitable circuit, fabrication and testing of the circuit.
- 2. Machining of 3D geometry on soft material such as softwood or modelling wax.
- 3. 3D scanning of computer mouse geometry surface. 3D printing of scanned geometry using FDM or SLA printer.
- 4. 2D profile cutting of press fit box/casing in acrylic (3 or 6 mm thickness)/cardboard, MDF (2 mm) board using laser cutter & engraver.
- 5. 2D profile cutting on plywood /MDF (6-12 mm) for press fit designs.
- 6. Familiarity and use of welding equipment.
- 7. Familiarity and use of normal and wood lathe.

Dr. A.Vijayalakshmi

- 8. Embedded programming using Arduino and/or Raspberry Pi.
- 9. Design and implementation of a capstone project involving embedded hardware, software and machined or 3D printed enclosure.
- 10. Discussion and implementation of a mini project.
- 11. Documentation of the mini project (Report and video).

Students shall choose an international certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.
