

# SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE

(An Autonomous Institution)

Puducherry

## B.TECH. COMPUTER SCIENCE AND BUSINESS SYSTEMS

ACADEMIC REGULATIONS 2023 (R-2023)

**CURRICULUM AND SYLLABI** 

#### **COLLEGE VISION AND MISSION**

#### Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society

#### **Mission**

M1: Quality Education : To provide comprehensive academic system that

amalgamates the cutting-edge technologies with best

practices

M2: Research and Innovation: To foster value-based research and innovation in

collaboration with industries and institutions globally for

creating intellectuals with new avenues

M3: Employability and

Entrepreneurship

: To inculcate the employability and entrepreneurial skills

through value and skill-based training

M4: Ethical Values : To instill deep sense of human values by blending societal

righteousness with academic professionalism for the growth

of society

#### **DEPARTMENT VISION AND MISSION**

#### Vision

To envision the technology and business trends in this domain and to create technically competent professionals for meeting out the needs globally

#### **Mission**

**M1:** To foster knowledge sharing through contemporary curriculum and creative teaching learning process

M2: To impart strong computer and business skills to shine and sustain in the agile IT industry

M3: To promote technocrats with rich expertise in innovation and research

**M4:** To instill moral values and ethical responsibilities by empowering graduates to be socially responsible

#### PROGRAM OUTCOMES (Pos)

#### PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

#### PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

#### PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

#### PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

#### PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

#### PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

#### PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

#### PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

#### PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

#### **PO10: Communication:**

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

#### PO11:Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

#### PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

#### PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

**PEO1:** To apply computer science and business concepts to solve the real world problems

**PEO2:** To develop professional skills in contemporary areas of computer science and business systems to obtain employability and pursue higher education

**PEO3:** To reconcile business demands with state-of-the art technologies by providing innovative solutions and insightful decisions

PEO4: To ensure ample growth with social and ethical responsibilities

#### PROGRAMME SPECIFIC OUTCOMES (PSOs)

**PSO1:** Ability to gain deep knowledge in Computer Science with equal appreciation in humanities, management, sciences and human values.

**PSO2:** Ability to demonstrate the technical and business skills and provide solutions for the societal needs

**PSO3:** Ability to engage lifelong learning and bestow innovative contributions to enhance research in the field of computer science and business system

#### B.Tech. Computer Science and Business Systems – R2023 Curriculum and Syllabi

#### STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAMME

SI. No.	Course Category	Breakdown of Credits
1.	Humanities, Social Sciences and Management Courses (HS)	27
2.	Basic Science Courses (BS)	30
3.	Engineering Science Courses (ES)	18
4.	Professional Core Courses (PC)	58
5.	Professional Elective Courses (PE)	16
6.	Open Elective Courses (OE)	9
7.	Professional Activity Courses (PA)	13
8.	Mandatory non-Credit Course (MC)	-
9.	Ability Enhancement Courses (AEC)	-
	Total	171

#### **SCHEME OF CREDIT DISTRIBUTION - SUMMARY**

SI.	Course Category	Cre		Total						
No.	oourse oategory	ı	II	III	IV	٧	VI	VII	VIII	Credits
1	Humanities, Social Sciences and Management Courses (HS)	5	5	-	5	4	2	2	4	27
2	Basic Science Courses (BS)	11	9	5	5	-	-	-	-	30
3	Engineering Science Courses (ES)	6	8	-	4	-	-	-	-	18
4	Professional Core Courses (PC)	-	4	18	8	6	13	9	-	58
5	Professional Elective Courses (PE)	-	-	-	2	3	2	3	6	16
6	Open Elective Courses (OE)	-	-	-	-	3	3	3	-	9
7	Professional Activity Courses (PA)	-	-	-	-	1	1	3	8	13
8	Mandatory non-Credit Course (MC)*	-	-	-	-	-	-	-	-	-
9 Ability Enhancement Courses (AEC)*		-	-	-	-	-	-	-	-	-
	Total			23	26	18	21	21	18	171

\* AEC and MC are not included for CGPA calculation

#### **HONOURS DEGREE PROGRAMME:**

The student is permitted to opt for earning an *honours degree* in the same discipline of engineering in addition to the degree in his/her own discipline. To earn an honours degree the student is required to earn an additional 18 - 20 credits (over and above the total 170 credits prescribed in the curriculum) starting from fourth semester onwards by completing 5 additional courses offered in respective semesters. A student is eligible to exercise this option if he/she has passed all the courses offered upto third semester in the first attempt itself and has earned a CGPA / GPA\* (\*for lateral entry) of not less than 8.0. The prescribed courses offered for Honours degree are given in **Annexure V**.

Profess	ional Elective –	I (Offered in Semester IV)						
SI. No.	Course Code	Course Title						
1	U23CBE401	Business Strategies						
2	U23CBE402	Design thinking and its applications						
3	U23CBE403	Compiler Design						
4	U23CBE404	Business Process						
5	U23CBE405	Software Design with UML						
	Pro	fessional Elective – II (Offered in Semester V)						
SI. No.	Course Code	Course Title						
1	U23CBEC01	Business Intelligence and Applications (CSBS-CCE, AIDS, IT)						
2	U23CBE506	Robotics and Embedded Systems						
3	U23CBE507	Modern Web Applications						
4	U23CBE508	Data Mining and Analytics						
5	U23CBE509	E- Commerce and E- Payment Systems						
Professional Elective – III (Offered in Semester VI)								
SI. No.	Course Code	Course Title						
1	U23CBE610	Human Resource Management						
2	U23CBE611	Cognitive Science & Analytics						
3	U23CBE612	Cryptology						
4	U23CBE613	SAP Intelligent Robotic Process Automation						
5	U23CBE614	Digital Marketing						
		essional Elective – IV (Offered in Semester VII)						
SI. No.	Course Code	Course Title						
1	U23CBE715	Quantum Computation & Quantum Information						
2	U23CBE716	Advanced Social, Text and Media Analytics						
3	U23CBE717	Usability Design of Software Applications						
4	U23CBE718	Introduction to IoT						
5	U23CBEC02	Virtual Reality (CSBS-AIDS)						
	Profe	essional Elective – V (Offered in Semester VIII)						
SI. No.	Course Code	Course Title						
1	U23CBE819	Behavioral Economics						
2	U23CBE820	Computational Finance & Modeling						
3	U23CBE821	Psychology						
4	U23CBE822	Marketing Research & Marketing Management						
5	U23CBE823	Smart Systems						
	Profe	essional Elective – VI (Offered in Semester VIII)						
SI. No.	Course Code	Course Title						
1	U23CBE824	Enterprise Systems						
2	U23CBE825	Services Science and Service Operational Management						
3	U23CBE826	Image Processing and Pattern Recognition						
4	U23CBE827	Block chain and Applications						
5	U23CBEC03	Augmented Reality (CSBS-AIDS)						

## PROFESSIONAL ELECTIVE PRACTICAL COURSES (3 CREDITS)

	Profession	onal Elective - II (Offered in Semester V)				
SI. No.	Course Code	Course Title				
1	U23CBEP51	Business Intelligence and Applications Laboratory				
2	U23CBEP52	Robotics and Embedded Systems Laboratory				
3	U23CBEP53	Modern Web Applications Laboratory				
4	U23CBEP54	Data Mining and Analytics Laboratory				
5	U23CBEP55	E- Commerce and E- Payment Systems Laboratory				
Professional Elective – IV (Offered in Semester VII)						
SI. No.	Course Code	Course Title				
1	U23CBEP71	Quantum Computation & Quantum Information Laboratory				
2	U23CBEP72	Advanced Social, Text and Media Analytics Laboratory				
3	U23CBEP73	Usability Design of Software Applications Laboratory				
4	U23CBEP74	Introduction to IoT Laboratory				
5	U23CBEP75	Virtual Reality Laboratory				
	Profession	nal Elective –VI (Offered in Semester VIII)				
SI. No.	Course Code	Course Title				
1	U23CBEP81	Enterprise Systems Laboratory				
2	U23CBEP82	Services Science & Service Operational Management Laboratory				
3	U23CBEP83	Image Processing and Pattern Recognition Laboratory				
4	U23CBEP84	Block chain and Applications Laboratory				
5	U23CBEP85	Augmented Reality Laboratory

Course Name	F	UNDAMENTALS OF COMPUTER SCIENCE	3	0	0	3	25	75	100
	1)	To understand the basic concepts of pro	oblem solvi	ng conce	pts.			-	
	2)	To gain Knowledge about the syntax an	nd semantic	s about p	rogram	ming languag	je.		
Course Objectives	3)	To learn the techniques of Pointers, Arr	ays and Fu	nctions ir	ı C.				
Objectives	4)	To be exposed to user defined data type	es to handl	e the files	<b>3.</b>				
	5)	To develop program using pre-processor	or directives	s and files	3.				
	On co	ompletion of the course, the students	will be able	e to				BT Ma (Highest	
	CO1	Recognize the basics of programming of	concepts.					K.	
	CO2	Choose appropriate controls and functi	ons to solv	e the prol	blems.			K	1
Course Outcome	СОЗ	Develop and Manage memory with Poir	nters and A	rrays.				K	3
	CO4	Explore the various Input and Output f	unctions.					K	2
	CO5	Create and Manipulate the Files access	sing and st	orage.				K	3
UNIT-I	Intro	duction				(9Hrs)			
Constants- Decla	rations- Operato	nstructs of a specific language (ANSI C) Arithmetic Operators- Relational Operators- Assignment Operators and Expression	ntors-Logica	al Operato	ors-Type	e Conversion	- Incremer	t Decremer	nt
UNIT-II		rol Flow and Functions				(9Hrs)			
programming. Bas	sics of f	If-Else-If, Switch, Loops – while, do, for, but functions- parameter passing and returning Rules- Block structure- Initialization- Rules-	ng type- C r	nain retui	rn as inte	eger,-Externa	al- Auto- Lo	cal- Static-	CO2
UNIT-III	1	ters, Arrays and Structures				(9Hrs)			
Functions- Pointe Command line arç	r Arrays gument	Pointers and Function Arguments- Points- Pointer to Pointer- Multi-dimensional arr s- Pointer to functions- complicated decla structures- Pointer of structures- Self-refe	ay and Rovarations and	v/column I how the	major fo y are ev	rmats- Initiali aluated. Basi	zation of Po c Structure	ointer Arrays s- Structure	- CO3
UNIT- IV	T	and Output				(9Hrs)			
		Output – printf, Formated Input – scanf- \stderr,-Error Handling including exit- perro		•			•		CO4
UNIT- V	Unix	System Interface				(9Hrs)			
Directory- Storage	e alloca	el I/O – read and write- open,-create- clo tor. ebugging, Macro, User Defined Header, I						ns on Listin	CO5

Course	• To	understand the basic concepts of proble	and the basic concepts of problem solving concepts.											
Objectives •	• To	To gain Knowledge about the syntax and semantics about programming language.												
	• To	To learn the techniques of Pointers, Arrays and Functions in C.												
	• To	To be exposed to user defined data types to handle the files.												
	To develop program using pre-processor directives and files.													
	On co	ompletion of the course, the students	will be able	e to					lapping st Level)					
Course	CO1	Develop Algorithm and Flowcharts.							<b>K</b> 3					
Outcome	CO2	Develop program using tricky codes and parameter passing												
	CO3	Analyze problems and implement the	se using f	unction	S			l	К3					
	CO4	Design applications using Files concepts												
	CO5	Analyze and discover searching programs												

#### **List of Experiments:**

- 1. Algorithm and flowcharts of small problems like GCD
- 2. Develop a Small but tricky codes
- 3. Develop a program with Proper parameter passing
- 4. Write a C program using Command line Arguments
- 5. Write a Program to understand about Variable parameter
- 6. Develop a program to illustrate the use of Pointer to functions
- 7. Write a program to explain the concept of User defined header
- 8. Write a program to analyze the importance of Make file utility
- 9. Develop a program to elucidate Multi file program and user defined libraries
- 10. Develop a program with Interesting substring matching / searching programs
- 11. Write programs with Parsing related assignments

	(Co	ommon to ALL Branches)	-			-	-		•				
Prerequisite	Basic	sic Knowledge of Science											
	On co	ompletion of the course, the students		lapping est Level)									
	CO1	Demonstrate a comprehensive understanding of the tools and inventory associated with the IDEA Lab.											
	CO2	Develop proficiency in ideation techniques to generate creative and innovative solutions for various design challenges and problems											
Course Outcomes	CO3	Acquire practical knowledge of mecha hands-on experience with machinery, assembly of physical components.				•			K3				
	CO4	Cultivate the skills necessary for developing innovative and desirable products, including the ability to integrate user needs, market trends, and technological advancements into the design process.											
	CO5	Apply iterative design methodologies to refine and improve solutions based on feedback, user testing, and evaluation of functional, aesthetic, and usability aspects											

**Design process:** Traditional design, Design thinking, Existing sample design projects, Study on designs around us, Compositions/structure of a design, Innovative design: Breaking of patterns, Reframe existing design problems, Principles of creativity Empathy: Customer Needs, Insight-leaving from the lives of others/standing on the shoes of others, Observation

**Design team-Team formation, Conceptualization:** Visual thinking, Drawing/sketching, New concept thinking, Patents and Intellectual Property, Concept Generation Methodologies, Concept Selection, Concept Testing, Opportunity identification Prototyping: Principles of prototyping, Prototyping technologies, Prototype using simple things, Wooden model, Clay model, 3D printing; Experimenting/testing.

Sustainable product design, Ergonomics, Semantics, Entrepreneurship/business ideas, Product Data Specification, Establishing target specifications, Setting the final specifications. Design projects for teams.

#### **List of Lab Activities and Experiments**

- 1. Schematic and PCB layout design of a suitable circuit, fabrication and testing of the circuit.
- 2. Machining of 3D geometry on soft material such as softwood or modelling wax.
- 3. 3D scanning of computer mouse geometry surface. 3D printing of scanned geometry using FDM or SLA printer.
- 4. 2D profile cutting of press fit box/casing in acrylic (3 or 6 mm thickness)/cardboard, MDF (2 mm) board using laser cutter & engraver.
- 5. 2D profile cutting on plywood /MDF (6-12 mm) for press fit designs.
- 6. Familiarity and use of welding equipment.
- 7. Familiarity and use of normal and wood lathe.
- 8. Embedded programming using Arduino and/or Raspberry Pi.
- 9. Design and implementation of a capstone project involving embedded hardware, software and machined or 3D printed enclosure.
- 10. Discussion and implementation of a mini project.
- 11. Documentation of the mini project (Report and video).

Code	U23ESPC03	L	Т	Р	С	CAM	ESE	TM		
Course Name	ENGINEERING GRAPHICS USING AUTOCAD	0	0	2	1	50	50	100		

(Common to all Branches)

Prerequisite	Nil		
	On co	ompletion of the course, the students will be able to	BT Mapping (Highest Level)
	CO1	Familiarize with the fundamentals and standards of engineering graphics.	К3
Course	CO2	Perform drawing of basic geometrical constructions and multiple views of objects.	K2
Outcomes	CO3	Visualize the isometric and perspective sections of simple solids.	К3
	CO4	Connect side view associate on front view.	K4
	CO5	Correlate sectional views and lateral surface developments of various solids.	K4

#### **List of Experiments**

- 1. Study of capabilities of software for Drafting and Modeling Coordinate systems (absolute, relative, polar, etc.) Creation of simple figures like polygon and general multi-line figures.
- 2. Drawing a Title Block with necessary text and projection symbol.
- 3. Drawing 2D sketch by applying modify tools like fillet, mirror, array, etc.,
- 4. Drawing front view and top view of simple solids like prism, pyramid, cylinder, cone, etc., and Dimensioning.
- 5. Drawing front view, top view and side view of objects from the given pictorial views (eg. Simple stool, V-block, Mixie Base).
- 6. Drawing a plan of residential building (Two bed rooms, kitchen, hall, etc.)
- 7. Drawing sectional views of prism, pyramid, cylinder, cone, etc.
- 8. Drawing lateral surface development of prism, pyramid, cylinder, cone, etc,
- 9. Drawing isometric projection of simple objects.
- 10. Creating 3D model of simple object and obtaining 2D multi-view drawings.
- 11. Note: Plotting of drawings must be made for each exercise and attached to the records written by Students.

Course Name	CERTIFICATION COURSE-I	0	0	4	-	100	-	100		

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

	CO6 Understand Rectifiers and Regulators				

# **List of Experiments**

### Section- A Electrical Experiments

Demonstration on Power Sources, Ammeter, Voltmeter, Wattmeter and Energy meter are Pre-requisite for conducting this Electrical Engineering Lab.

- 1. Electrical safety precautions and study of tools, accessories, electrical joints and electrical symbols.
- 2. Domestic Wiring Practice
  - Staircase wiring
  - · Doctor's room wiring
  - Godown wiring
  - Wiring of Ceiling fan, LED lamps and Iron Box.
- 3. Design of Domestic power distribution.
- 4. Measurement of 3-phase power using two wattmeter method
- 5. Load test on DC shunt motor.
- 6. Load test on single phase transformer.
- 7. Load test on single phase Induction Motor.

### Section - B Electronics Experiments

- Study of Electronic components and equipment: Resistor, Capacitor
- 2. Measurement of AC signal parameter (Peak-Peak, rms period, frequency) using CRO.
- 3. VI Characteristics of PN junction diode, Zener diode
- Input and output characteristics of Common Emitter configuration of BJT
- 5. Characteristics of JFET
- Measurement of Ripple factor of HWR, FWR
- Voltage Regulator using Zener Diode

List of Exercises											

#### List of Exercises

- 1. Build a python program to implement Fibonacci series.
- 2. Build a python program to get a range of numbers from user and to separate even numbers and odd numbers respectively.
- 3. Build a function in Python to check duplicate letters. It must accept a string, i.e., a sentence. The function should return True if the sentence has any word with duplicate letters, else return False.
- 4. Build a program to perform arithmetic operations using lambda function.
- 5. Build a Python program that takes a list of numbers as input and returns a new list containing only the even numbers from the input list.
- 6. Build a python program to create a class called Car with attributes Company, model, and year, Implement a method that returns the age of the car in years.
- 7. Build a python program to create a base class called Shape that has a method called area which returns the area of the shape (set it to 0 for now). Then, create two derived classes Rectangle and Circle that inherit from the Shape class to calculate the area of derived classes.
- 8. Build a python program to implement aggregation using Numpy.
- 9. Build a python program to perform Indexing and Sorting.
- 10. Build a python program to perform Handling of missing data.
- 11. Build a python program to perform usage of Pivot table using Titanic datasets
- 12. Build a python program to perform use of eval () and guery ()
- 13. Build a python program to perform Scatter Plot
- 14. Build a python program to perform 3D plotting
- 15. Implement an application to process a real time data.

Course Code	OZJOBOZAA	L	Т	Р	С	CAM	ESE	TM
Course Name	CERTIFICATION COURSE-II	0	0	4	-	100	-	100

Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence.

Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

Course Name	Name Skill Enhancement Course 1 – R Programming		0	2	-	-	100	100			

#### Course Content:

## • Introduction

R and features, Evolution of R?, Big data Hadoop and R

## Data Types

R & R Studio Installation, Scalar, Vectors, Matrix, List, Data frames, Factors, Handling date in R, Conversion of data types, Operators in R

# Importing Data

CSV files, Database data (Oracle 11g), XML files, JSON files, Reading & Writing PDF file, Reading & Writing JPEG files, Saving Data in R,

# • Manipulating Data

Cbind, Rbind, Sorting, Aggregating, dplyr

# Conditional Statements and Functions

If ...else, For loop, While loop, Repeat loop, Apply ()

#### Statistical Concepts

Descriptive Statistics, Inferential Statistics, Central Tendency (Mean, Mode, Median), Hypothesis Testing, Probability, tTest, ,Chi Square test, Correlation

# • Predictive Modelling

Linear Regression, Normal distribution, Density

## • Data Visualisation in R using GGPlot

Box Plot, Histograms, Scatter Plotter, Line chart, Bar Chart, Heat maps, Misc. functions and Data Visualization using Plotly

	To kno	o know the Random number generator										
	To und	lerstand Poisson's Process.										
	To lea	rn little's law.										
	To stud	dy the Application in Scheduling										
	After	completion of the course the stu	idents will be a	able to					lapping st Level)			
Course	CO1	Find waiting cost						Ì	K3			
Outcome	CO2 Solve M/M/1 model.								K3			
	CO3 Solve M/M/m model.											
	CO4 Understand the Applications in Scheduling.											
	CO5 Understand the types of Inventory control											

- 1. Formulation of linear programming problems.
- 2. Solution of linear programming problem using graphical method with:
  - i. Multiple constraints
  - ii. Unbounded solution
  - iii. Infeasible solution
  - Alternative or multiple solution
- 3. Solution of linear programming problem with simplex method.
- 4. Problem solving using Big M method.
- 5. Problem solving using two phase method.
- 6. Solution on primal problem as well as dual problem.
- 7. Solution based on dual simplex method.
- 8. Solution of transportation problem.
- 9. Solution of assignment problem.
- 10. Simulation: Random number generation.
- 11. Performance measures for M/M/1 queuing model.
- 12. ABC analysis.

#### List of Exercises

- 1. Develop simple programs using java
- 2. Develop a java program that implements class and object.
- 3. Write a java program to find the frequency of a given character in a string
- 4. Write a java program to demonstrate inheritance and interfaces.
- 5. Develop a java program that implements the Packages.
- 6. Create java applications using Exception Handling for error handling.
- 7. Develop a simple real life application program to illustrate the use of Multi-Threads.
- 8. Implement simple applications using Collections.
- 9. Develop application using the concept of I/O Streams
- 10. Write a Java Program to demonstrate AWT and Swing Components
- 11. Develop a simple application and use JDBC to connect to a back-end database.

Course Objectives	To lear	earn the development of requirements specification.													
	To lear	rn the function oriented design using SA/SD.													
	To introduce the object-oriented design using UML, test case design														
	To stud	study about the implementation using C++ and testing.													
	To und	derstand the use of appropriate CASE tools and other tools such as configuration man													
	progra	m analysis tools in the software life	cycle.												
	After	completion of the course, the st	udents wi	ll be ab	le to				apping st Level)						
Course	CO1	Learn the development of requiren	nents speci	ification				ŀ	<b>K</b> 3						
Outcome	CO2	Learn the function oriented design	using SA/S	SD				ŀ	₹3						
	CO3	Know the object-oriented design using UML, test case design.													
	CO4	Implement using C++ and testing.	K2												
	CO5	use appropriate CASE tools and ot program analysis tools in the softw			onfigura	tion manage	ement tools	I	<b>K</b> 3						

- Development of requirements specification,
- Function oriented design using SA/SD,
- Object-oriented design using UML,
- Test case design,
- Implementation of the designed software using C++ language.
- Perform Testing using any tool or different strategies
- Use of appropriate CASE tools and other tools such as configuration management tools
- program analysis tools in the software life cycle

#### Course Content:

• Introduction

R and features, Evolution of R?, Big data Hadoop and R

Data Types

R & R Studio Installation, Scalar, Vectors, Matrix, List, Data frames, Factors, Handling date in R, Conversion of data types, Operators in R

Importing Data

CSV files, Database data (Oracle 11g), XML files, JSON files, Reading & Writing PDF file, Reading & Writing JPEG files, Saving Data in R,

• Manipulating Data

Cbind, Rbind, Sorting, Aggregating, dplyr

Conditional Statements and Functions

If ...else, For loop, While loop, Repeat loop, Apply ()

Statistical Concepts

Descriptive Statistics, Inferential Statistics, Central Tendency (Mean, Mode, Median), Hypothesis Testing, Probability, tTest, ,Chi Square test, Correlation

• Predictive Modelling

Linear Regression, Normal distribution, Density

Data Visualisation in R using GG Plot

Box Plot, Histograms, Scatter Plotter, Line chart, Bar Chart, Heat maps, Misc. functions and Data Visualization using Plotly
