

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

CURRICULUM & SYLLABI (Regulations 2023)

B.Tech - Electronics and Communication Engineering

ENGINEERING COLLEGE (AN AUTONOMOUS INSTITUTION)

B.TECH. ELECTRONICS AND COMMUNICATION ENGINEERING (Regulations-2023)

CURRICULUM & SYLLABI

Semester	Approval from Statutory Bodies
	Passed in the 6 th BoS Meeting held on July 21, 2023
T and fi	Approved in the 6 th Academic Council Meeting held on August 22, 2023
III and IV	Passed in the 7 th BoS Meeting held on February 29, 2024
in and iv	Approved in the 7 th Academic Council Meeting held on

VISION AND MISSION OF THE INSTITUTE

VISION

To be globally recognized for excellence in quality education, innovation, and research for the transformation of lives to serve the society.

M1: Quality Education	To provide a comprehensive academic system that amalgamates the cutting edge-technologies with best practices
M2: Research and Innovation	To foster value-based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues
M3: Employability and Entrepreneurship	To inculcate employability and entrepreneurial skills through value and skill-based training
M4: Ethical Values	To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society

VISION AND MISSION OF THE DEPARTMENT

VISION

Facilitate academic excellence and research among Electronics and Communication Engineers to meet Global needs with high competence and ethical professionalism

MISSION

M1: Academic Excellence	To impart learning skills to meet the global challenges in the field of Electronics and Communication Engineering								
M2: Research and Innovation	To provide excellence in research and innovation through multidisciplinary specialization								
M3: Employability and Entrepreneurship	To enhance inter and intrapersonal skills among students to make them employable and entrepreneurs								
M4: Ethics	To inculcate the significance of human values and professional skills to serve the society								

PROGRAMME OUTCOMES (POs)

PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal, and cultural issues, and the consequent responsibilities relevant to professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

PO9: Individual and teamwork:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, managing projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Technical Knowledge

Graduates will be able to develop an insightful combination of modern electronics and communication technology through technical knowledge.

PEO2: Research and Development

Enhance analytical and thinking skills to develop initiatives and innovative ideas for research and development, industry, and societal requirements.

PEO3: Leadership

Inculcate the qualities of teamwork as well as social, interpersonal, and leadership skills and adapt to the changing professional environments in the fields of engineering and technology.

PEO4: Professional Ethics

Motivate graduates to become good human beings and responsible citizens for the overall welfare of society.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO1: Domain Knowledge

Ability to understand the concepts in Electronics and Communication Engineering and to apply to different fields, such as Consumer Electronics, Communications, Signal Processing, etc.

PSO2: Embedded System Design

Ability to design a system based on the technical knowledge gained for embedded applications in electronics and communications engineering.

PSO3: Professional Competency

Ability to select cutting-edge engineering hardware and software tools to solve complex problems in Electronics and Communication Engineering

STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

S. No	Category	Credits
1	Humanities and Social Sciences including Management courses	15
2	Basic Science courses	20
3	Engineering Science courses	28
4	Professional core courses	66
5	Professional Elective courses	18
6	Open Elective Courses	9
7	Project work, seminar, and internship	13
8	Ability Enhancement Courses	
9	Mandatory Courses	
	Total Credits	169

SCHEME OF CREDIT DISTRIBUTION – SUMMARY

S.	Category		C	Total						
No	Category	I	П	ш	IV	v	VI	VII	VIII	credits

7	Project work and internship					1	1	3	8	13
8	Ability Enhancement Courses*									
9	Mandatory Courses*									
	Total Credits				23	21	22	20	17	169

* AEC and MC are not included in CGPA calculation

HONOURS DEGREE PROGRAMME:

The student is permitted to opt for earning an honours degree in the same discipline of engineering in addition to the degree in his/her discipline. To earn an honours degree the student is required to earn an additional 18 - 20 credits (over and above the total 169 credits prescribed in the curriculum) starting from the fourth semester onwards by completing 5 additional courses offered in respective semesters. A student is eligible to exercise this option if he/she has passed all the courses offered up to the third semester in the first attempt itself and has earned a CGPA / GPA of not less than 8.0.

The prescribed courses offered for Honours degree are given in Annexure -D

		(Common to all Bra	anches))						
Prerequisite	Physi	cs of 12 th standard or equivalent / Che	mistry	of 12th	standa	rd or ec	luivaler	nt.		
On completion of the course, the students will be able to BT Ma							pping			
	CO1	Understand the basic of properties of magnetic, dielectric and superconductors. K2								
	CO2	Identify the wave nature of the particles, physical significance of wave functions K3								
Course Outcome	CO3	Understand the basic principles of laser and fiber optics K2							2	
	CO4	Understand and familiar with the wate	er treat	ment.				K2		
	CO5	5 Understand the electrode potential for its feasibility in electrochemical reactions and uses of various batteries.							2	
	CO6	6 Understand the specific operating condition under which corrosion occurs and suggest a method to control corrosion.								

SECTION A – PHYSICS						
UNIT - I MAGNETIC, DIELECTRIC AND SUPERCONDUCTING MATERIALS Peri	ods: 8					
Introduction to magnetic materials, Ferromagnetism- Domain Theory-Types of energy-Hysteresis-Hard and Soft magnetic materials-ferrites-Dielectric Materials-Types of polarization – Langevin-Debye Equation-Frequency effects on polarization-Dielectric breakdown- Ferroelectric Materials- Superconducting materials and their properties.						
UNIT-II QUANTUM MECHANICS Peri	ods: 7					
Matter Waves - de Broglie Wavelength - Uncertainty Principle – Physical Significance of wave functions - Schrodinger wave Equation - Time Dependent - Time Independent - Application to Particle in a One Dimensional Box - Tunnel Diode.	; - CO2					
UNIT-III LASER AND FIBER OPTICS Peri	ods: 7					
Lasers - Principles of Laser - Spontaneous and Stimulated Emissions - Einstein's Coefficients Population Inversion and Laser Action –components of laser - Types of Lasers - NdYAG, CO ₂ laser GaAs Laser Fiber Optics - Principle and Propagation of light in optical fiber - Numerical aperture and acceptance angle - Types of optical fibers (material, refractive index, mode)	- , CO3					

SECTION B – CHEMISTRY

UNIT-IV WATER AND IT	'S TREATMENT		P	eriods: 8
Water: Sources and impuri turbidity, pH, hardness, al osmosis-disadvantages of treatment (phosphate, collo lon exchange demineralization	ties, Water quality parameter kalinity, TDS, COD and BO using hard water in boiler bidal, sodium aluminate and t tion and zeolite process.	rs: Definition and significa DD. Desalination of brac - Treatment of boiler Calgon conditioning) and	ance of-color, ode kish water: Reve feed water: Inter External treatme	our, erse rnal CO4 ent–

SECTION A - CIVIL ENGINEERING					
UNIT - I BUILDINGS AND BUILDINGS MATERIALS	Periods	s: 08			
Buildings - Definition - Classification according to NBC-plinth area, Floor area, carpet are	ea, floor				
space index - Development of Smart cities - green building, Benefits from green building. Building					
Materials - stone, brick, cement, cement mortar, concrete, steel, Timber - their properties and	uses				
UNIT - II BUILDINGS COMPONENTS AND SURVEYING	Periods	s: 08			
Various Buildings Components and their functions. Foundation: function and types - Brick m	nasonry,				
Stone Masonry and its types - Floors, Roofs and its types. Surveying: Objects - Classified	cation –	CO2			
Principles – Measurements of Distances and areas – Leveling					
UNIT - III BASIC INFRASTRUCTURE	Periods	s: 07			
Roads and Bridges – types, components advantage and disadvantages. Railways - Perman	ent way				
and its elements. Sources of Water - Quality of Water- Domestic sewage Treatment - Rainwater					
harvesting – Dams - site selection for dam construction, types of dams.					

		SECTION B – MECHAN	NICAL ENGINEERING					
UNIT- IV	INTERNAL AND	EXTERNAL COMBUS	TION SYSTEMS		Periods	: 08		
IC engines - stroke engine Steam gener Boiler mount	 Classification – merits and derators (Boilers) – ings and accessor 	Working principles – D merits. Classification – Constru ies – Merits and demeri	iesel and Petrol Engines: ctional features (of only lo ts – Applications.	Two stroke a w-pressure b	and four oilers) –	CO4		
UNIT- V POWER GENERATION SYSTEMS, REFRIGERATION AND AIR CONDITIONING SYSTEM Periods: 07								
Power plants: Thermal – Nuclear, Hydraulic, Solar, Wind, Geothermal, Wave, Tidal and Ocean Thermal Energy Conversion systems - Functions, Applications - Schemes and layouts (Description only) Refrigeration and Air Conditioning System: Terminology of Refrigeration and Air Conditioning. Principle of vapour compression and absorption system – Layout of typical domestic refrigerator –								
UNIT- VI	UNIT- VI MANUFACTURING PROCESS Periods: 07							
Lathe - types, Specifications, Operations of a centre lathe. Casting - Pattern making, Allowances, Green sand and dry sand moulding, casting defects. Welding - Arc and Gas welding process, brazing and soldering (process description only).

Course Name	DESIG LABO	N THINKING AND IDEA RATORY	-	-	2	1	50	50	100				
		(Common to ALI	L Branc	hes)									
Prerequisite	Basic	Basic Knowledge of Science											
	On cor	ompletion of the course, the students will be able to E											
	CO1	Demonstrate a comprehensive understanding of the tools and inventory associated with the IDEA Lab.											
	CO2	Develop proficiency in ideation techniques to generate creative and innovative solutions for various design challenges and problems											
Course Outcomes	CO3	Acquire practical knowledge of processes, including hands-on techniques used in the manu components.	Acquire practical knowledge of mechanical and electronic fabrication processes, including hands-on experience with machinery, tools, and techniques used in the manufacturing and assembly of physical components.										
	CO4	Cultivate the skills necessary for developing innovative and desirable products, including the ability to integrate user needs, market trends, and technological advancements into the design process. Apply iterative design methodologies to refine and improve solutions based on feedback, user testing, and evaluation of functional, aesthetic, and usability aspects											
	CO5												

Design process: Traditional design, Design thinking, Existing sample design projects, Study on designs around us, Compositions/structure of a design, Innovative design: Breaking of patterns, reframe existing design problems, Principles of creativity Empathy: Customer Needs, Insight-leaving from the lives of others/standing on the shoes of others, Observation

Design team-Team formation, Conceptualization: Visual thinking, Drawing/sketching, new concept thinking, Patents and Intellectual Property, Concept Generation Methodologies, Concept Selection, Concept Testing, Opportunity identification Prototyping: Principles of prototyping, Prototyping technologies, Prototype using simple things, Wooden model, Clay model, 3D printing; Experimenting/testing.

Sustainable product design, Ergonomics, Semantics, Entrepreneurship/business ideas, Product Data Specification, establishing target specifications, Setting the final specifications. Design projects for teams.

List of Lab Activities and Experiments

- 1. Schematic and PCB layout design of a suitable circuit, fabrication and testing of the circuit.
- 2. Machining of 3D geometry on soft material such as softwood or modelling wax.
- 3. 3D scanning of computer mouse geometry surface. 3D printing of scanned geometry using FDM or SLA printer.
- 4. 2D profile cutting of press fit box/casing in acrylic (3- or 6-mm thickness)/cardboard, MDF (2 mm) board using laser cutter & engraver.
- 5. 2D profile cutting on plywood /MDF (6-12 mm) for press fit designs.
- 6. Familiarity and use of welding equipment.
- 7. Familiarity and use of normal and wood lathe.
- 8. Embedded programming using Arduino and/or Raspberry Pi.
- 9. Design and implementation of a capstone project involving embedded hardware, software and machined or 3D printed enclosure.
- 10. Discussion and implementation of a mini project.
- 11. Documentation of the mini project (Report and video).

Course Name	CIRCUITS AND NETWORKS LABORATORY	0	0	2	1	50	50	100				

Prerequisite			
	On co	mpletion of the course, the students will be able to	BT Mapping
	CO1	Familiarize with the fundamentals of basic circuit elements.	K2
Course	CO2	K2	
Outcome	CO3	K3	
	CO4	Illustrate various network parameters.	K4
	CO5	Demonstrate the concepts of two port networks and simulation models	K4

List of Exercises

- 1. Study of passive and active components
- 2. Construction of series and parallel circuits using resistors and verification using KVL and KCL
- 3. Verification of mesh and nodal analysis
- 4. Verification of Thevenin's and Norton's Theorem
- 5. Verification of superposition Theorem
- 6. Verification of maximum power transfer theorem
- 7. DC response of RL, RC and RLC circuits
- 8. Determination of Z and Y parameters of a two-port network.
- 9. Determination of ABCD and h parameters of a two-port network.
- 10. Design of LPF and HPF using passive components
- 11. Simulate an LPF and HPF using PSPICE simulation tool and compare the results

	UZJECCIAA	L	Т	Р	С	CAM	ESE	ТМ
Course Name	CERTIFICATION COURSE - I	0	0	4	-	100	-	100

Prerequisite -Students shall choose an International/ Reputed organization certification course of 40-50 hours duration specified in the curriculum (It is mandatory to do a minimum of six courses) which will be offered through the Centre of Excellence. These courses have no credit and will not be considered for CGPA calculation.

- (i). Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.
- (ii). The Course coordinator handling the course will assess the student through attendance and MCQ test and declare the student as "pass" on satisfactory completion. A letter grade "P" is awarded to declare pass.
- (iii). The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.

	On o	On completion of the course, the students will be able to										
	CO1	CO1 Develop holistic attitude and harmony in the individual, family, and Society										
Course	CO2	Acquire grammar skills and capable to write and speak English confidently										
Outcomes	CO3	Understand the basic concept	K2									
	CO4	Know about the art and cultu secular nation	K2									
	CO5 Identify the inherent talent and develop it professionally K3											
UNIT-I UN	IVERSAL	HUMAN VALUES							Period	ls: 12		
Welcome an Academic an	d Introduc d Caree	ctions - Getting to know each r, Expectations of Family, Per	other, ers, So	Aspira ciety, N	tions Vation	and Co , Fixing	oncei one	rns - In e's Goal	dividual s, Self-			

Management - Self-confidence, Peer Pressure, Time Management, Anger, Stress Personality Development, Self-improvement, Health - Health issues, Healthy diet, Healthy lifestyle, Hostel life, Relationships - Home sickness, Gratitude towards Parents, Teachers and others Ragging and interaction, Competition and Cooperation, Peer Pressure, Society - Participation in Society, Natural Environment - Participation in Nature, Sum Up - Role of Education, Need for a Holistic Perspective, Self-evaluation and Closure - Sharing and feedback.

UNIT-II PROFICIENCY IN ENGLISH

Periods: 12

Communication skills - Prognostic test on Grammar - Synonyms, Antonyms, Tenses, Sentence Completion, Idioms and Phrases, One-word Substitution, Homophones, Homonyms, Use of Prepositions, Subject-verb

UNIT-III BRIDGE COURSE IN MATHEMATICS AND C PROGRAMMING Perio	ods: 12
Mathematics:	
Fundamentals of differential and integral calculus: Theory and Practice, Limit of function -	
Fundamental results on limits - Continuity of a function - Concept of differentiation - Concept of	
derivative - Slope of a curve -Differentiation Techniques - Derivatives of elementary functions from	
first principle - Derivatives of inverse functions - Logarithmic differentiation - Method of substitution -	
Differentiation of parametric functions -Differentiation of implicit functions - Higher order derivatives.	
Integrals of functions containing linear functions -Method of integration (Decomposition method,	CO3

method of substitution, integration by parts) - Definite integrals. Simple definite integrals - Properties of Definite integrals - Reduction formulae - Area and volume - Length of curve - surface area of a solid.

C Programming: Features of C and its basic Structure - Keywords - constants - variables - operators - Data types - Formatted input and output statements - Control and Looping statement - Arrays - Functions - Strings - writing simple C programs.

UNIT-IVLITERARY ACTIVITIESPeriods: 12Team building activities - Quiz - Oral Exercises - Group discussion, Debate, Extempore, Role play,
தறப்பு சொற்பொழிவு - தமிழர் மரபு மற்றும் தமிழர் தொழில்நுட்பம்.CO4UNIT-VCREATIVE ARTSPeriods: 12

	1 0110	, u.s. 12
Introduction to painting and renowned artworks - Documentary and Short films - Music - Instrumental - Dane- Classical, Cinematic - Mimicry - Mime.	Vocal,	CO5

		(Co	ommon	to all B	ranche	s)						
Prerequisite	Nil											
· · ·		On completion of the course, the students will be able to BT Mapping										
	CO1	CO1 Familiarize with the fundamentals and standards of engineering graphics.										
Course	CO2	CO2 Perform drawing of basic geometrical constructions and multiple K2 views of objects.										
Outcomes	CO3	Visualize the isometric and persp	ective	sections	s of sim	ple solids	3.	Ka	8			
	CO4	Connect side view associate on f	ront vie	eW.				K4	ļ			
	CO5	Correlate sectional views and lateral surface developments of various solids.										

List of Experiments

1. Study of capabilities of software for Drafting and Modeling – Coordinate systems (absolute, relative, polar, etc.) – Creation of simple figures like polygon and general multi-line figures.

- 2. Drawing a Title Block with necessary text and projection symbol.
- 3. Drawing 2D sketch by applying modify tools like fillet, mirror, array, etc.,
- 4. Drawing front view and top view of simple solids like prism, pyramid, cylinder, cone, etc., and Dimensioning.
- 5. Drawing front view, top view and side view of objects from the given pictorial views (eg. Simple stool, V-block, Mixie Base).
- 6. Drawing a plan of residential building (Two bedrooms, kitchen, hall, etc.)
- 7. Drawing sectional views of prism, pyramid, cylinder, cone, etc,
- 8. Drawing lateral surface development of prism, pyramid, cylinder, cone, etc,
- 9. Drawing isometric projection of simple objects.
- 10. Creating 3D model of simple object and obtaining 2D multi-view drawings.
- 11. Note: Plotting of drawings must be made for each exercise and attached to the records written by Students.

List of Exerci	Ses											

- 1. Write a C program to find the Area of the triangle.
- 2. Develop a C program to read a three-digit number and produce output like
- 3. 1 hundreds 7 tens 2 units for an input of 172.
- 4. Write a C program to check whether a given character is vowel or not using Switch Case statement.
- 5. Write a C program to Print the numbers from 1 to 10 along with their squares.
- 6. Demonstrate do—While loop in C to find the sum of 'n' numbers.
- 7. Find the factorial of a given number using Functions in C.
- 8. Write a C program to check whether a given string is palindrome or not?
- 9. Write a C program to check whether a value is prime or not?
- 10. Develop a C program to swap two numbers using call by value and call by reference.
- 11. Construct a C program to find the smallest and largest element in an array.
- 12. Implement matrix multiplication using C program.
- 13. Write a C program to perform various string handling functions like strlen, strcpy, strcat, strcmp.
- 14. Develop a C program to remove all characters in a string except alphabets.
- 15. Write a C program to find the sum of an integer array using pointers.
- 16. Write a C program to find the Maximum element in an integer array using pointers.
- 17. Construct a C program to display Employee details using Structures
- 18. Write a C program to display the contents of a file on the monitor screen.
- 19. Write a File by getting the input from the keyboard and retrieve the contents of the file using file operation commands.
- 20. Write a C program to create two files with a set of values. Merge the two file contents to form a single file
- 21. Write a C program to pass the parameter using command line arguments.

						•					

Prerequisite -Students shall choose an International/ Reputed organization certification course of 40-50 hours duration specified in the curriculum (It is mandatory to do a minimum of six courses) which will be offered through the Centre of Excellence. These courses have no credit and will not be considered for CGPA calculation.

- (i). Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.
- (ii). The Course coordinator handling the course will assess the student through attendance and MCQ test and declare the student as "pass" on satisfactory completion. A letter grade "P" is awarded to declare pass.
- (iii). The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.

Prerequisite				
	On completion of the course, the students will be able to	BT Mapping		
	CO1 Devise the function of logic gates	K2		
Course	CO2 Demonstrate various combinational circuits like adder, subtractor, and comparator	K3		
Outcome	CO3 Demonstrate various combinational circuits like a multiplexer, Demultiplexer encoder, decoder	K3		
	CO4 Design and implement the ripple counter	K3		
	CO5 Design and implement synchronous sequential circuits	K3		

List of Experiments:

- 1. Verify the logic gates.
- 2. Realization of functions using basic and universal gates (SOP and POS forms).
- 3. Design and implementation of code converters using logic gates.
 - i) BCD Code to Excess-3 Code and vice versa.
 - ii) Binary Code to Gray Code and vice versa
- 4. Design and realization of half adder, full adder, half subtractor, and full subtractor using.
 - i) Basic gates and
 - ii) Universal gates.
- 5. Design and implementation of a 2-bit Magnitude Comparator using Logic Gates and a 4-bit magnitude comparator IC.
- 6. Design and implementation of 4-bit binary adder/ subtractor BCD adder, using IC 7483
- 7. Design and implementation of multiplexer and demultiplexer using logic gates and MUX & DEMUX ICs (74150, 74154).
- 8. Design and implementation of encoder, decoder using logic gates, simple Priority Encoder, and 4 to 16-line decoder using 3 to 8-line decoder ICs.
- 9. Implementation of Flip Flops: SR, D, T, JK, and Master Slave JK Flip Flops using basic gates
- 10. Construction and verification of 4-bit ripple counter and mod-10 / mod-12 ripple counter.
- 11. Design and implementation of various shift registers.
- 12. Design and implementation of 3-bit synchronous up/down counters Ring counters, and Johnson counters.

Course Coue	023ECC4AA	L	Т	Р	С	CAM	ESE	TM		
Course Name	CERTIFICATION COURSE - IV 0 0 4 - 100									
				-						
Prerequisite	-									
Students sha	Il choose an International/ Reputed orga	anizatior	n certific	ation co	urse of 4	0-50 hou	irs dura	tion		
specified in th	ne curriculum (It is mandatory to do a m	inimum	of six c	ourses) v	which wil	l be offer	ed throu	ugh		
the Centre of	Excellence. These courses have no cre	dit and v	vill not b	e consic	lered for	CGPA ca	alculatio	n.		
(i). Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.										
(ii). The Course coordinator handling the course will assess the student through attendance and MCQ test and declare the student as "pass" on satisfactory completion. A letter grade "P" is awarded to declare pass.										

⁽iii). The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.

UNIT-I INTRODUCTION

Periods:06

Conceptual background - Right to know - Open Government - Transparency in governance and accountability - Right to information under the Indian Constitution - Article 19 (1)(a) and Article 21 of the Constitution - Role of NGOs and movement for right to information - Right to Information Act, 2005 - Scope and objectives.

UNIT- II OBLIGATION OF PUBLIC AUTHORITIES	Periods:06
Obligations of public authorities: Section 4	
Designation of Public Information Officers: Section 5	
Disposal of request: Section 7	
 Exemption from disclosure of information: Section 8 	
 Grounds for rejection to access in certain cases: Section 9 	
Severability: Section 10	
Third-party information: Section 11	
UNIT- III CENTRAL AND STATE INFORMATION COMMISSION	Periods:06
 Constitution of Central and State Information Commissions 	
Terms of office and conditions of service	
Removal of Chief Information Commissioner or Information Commissioner.	
Powers and functions of Information Commissions.	
UNIT- IV JUDICIARY AND RIGHT TO INFORMATION ACT	Periods:06
Protection of Right to access the information - Role of the Supreme Court and High Court's Recer dilution of the right to information Law	nt attempts of
UNIT-V RIGHT TO INFORMATION ACT, 2005, AND ITS RELEVANCE TO OTHER LAWS	Periods:06
Public Records Act, 1993	
Whistle Blowers Protection Act, 2014	

• Official Secrets Act, 1923

Course Name	MICR	O PROJECT	0	0	2	1	100	-	100		
	<u>.</u>	E	ECE						<u>.</u>		
Droroquisito	Elect	ronics, Communication									
Prerequisite	On c	ompletion of the course, the	student	s will be	e able to	ס		BT M	lapping		
	CO1	Identify the problem stateme literature survey	nt for th	e micro	project	work th	rough th	e I	K 2		
Course Outcomes	CO2	Choose the proper componer system.	nts as po	er the re	equirem	ents of th	e desigr	1/ I	K 2		
	CO3	Apply the acquainted skills to	develop	final mo	del/sys	tem		I	K 3		

There shall be a Micro Project, which the student shall pursue as a team consists of maximum 2 students during the third year, fifth semester. The aim of the micro project is that the student must understand the real time hardware/ software applications. The student should gain a thorough knowledge in the problem he/she has selected and, in the hardware/ software he/she is using in the Project. The Micro-project is an application that should be formally initiated and should be developed and to be implemented by the respective team.

The Micro Project shall be submitted in a report form along with the hardware model/ software developed, duly approved by the department internal evaluation committee. It shall be evaluated for 100 marks as Continuous Assessment. The department internal evaluation committee shall consist of faculty coordinator, supervisor of the project and a senior faculty member of the department. There shall be two reviews that will be considered for assessing a Micro Project work with weightage as indicated evaluation Methods.

List of Exper	iments	5:							

MATLAB / EQUIVALENT SOFTWARE PACKAGE

- 1. Perform sampling and reconstruction of signals and verify the presence of aliasing by comparing the original and reconstructed signals.
- 2. Compute the sum of two sinusoidal signals, and analyze their frequency response, including both magnitude and phase.
- 3. Implement and verify linear and circular convolution between two given signals.
- 4. Implement and verify autocorrelation for the given sequence and cross correlation between two given signals.
- 5. Compute and implement the N-point DFT of a given sequence and compute the power density spectrum of the sequence.
- 6. Implement and verify N-point FFT of a given sequence and find the frequency response (magnitude and phase).
- 7. Design IIR Butterworth filter and compare their performances with different orders (Low Pass Filter / High Pass Filter)
- 8. Design IIR Chebyshev filter and compare their performances with different orders (Low Pass Filter / High Pass Filter).
- 9. Design FIR filter (Low Pass Filter /High Pass Filter) using windowing technique using rectangular window and hamming window
- 10. Design and verify Filter (IIR and FIR) frequency response by using Filter design and Analysis Tool.
- 11. Compute the decimation and interpolation of a given signal and analyze the effects of these processes on signal representation.

DSP PROCESSOR BASED IMPLEMENTATION

- 12. Study of architecture and various addressing modes of Digital Signal Processor
- 13. Generation and Analysis of Discrete-Time Signals
- 14. Implementation and Analysis of FFT-Decimation-In-Time (DIT) Algorithm

There shall be a Micro Project, which the student shall pursue as a team consists of maximum 2 students during the third year, fifth semester. The aim of the micro project is that the student must understand the real time hardware/ software applications. The student should gain a thorough knowledge in the problem he/she has selected and, in the hardware/ software he/she is using in the Project. The Micro-project is an application that should be formally initiated and should be developed and to be implemented by the respective team.

The Micro Project shall be submitted in a report form along with the hardware model/ software developed, duly approved by the department internal evaluation committee. It shall be evaluated for 100 marks as Continuous Assessment. The department internal evaluation committee shall consist of faculty coordinator, supervisor of the project and a senior faculty member of the department. There shall be two reviews that will be considered for assessing a Micro Project work with weightage as indicated evaluation Methods.

Course Code	110050000	Pe	riods/W	/eek	Credit	Credit Maximum Marks				
Course Code	UZJECCOAA	L	Т	Р	С	CAM	ESE	ТМ		
Course Name	CERTIFICATION COURSE - VI	0	0	4	-	100	-	100		

Prerequisite

Students shall choose an International/ Reputed organization certification course of 40-50 hours duration specified in the curriculum (It is mandatory to do a minimum of six courses) which will be offered through the Centre of Excellence. These courses have no credit and will not be considered for CGPA calculation.

- (i). Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.
- (ii). The Course coordinator handling the course will assess the student through attendance and MCQ test and declare the student as "pass" on satisfactory completion. A letter grade "P" is awarded to declare pass.
- (iii). The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.
