

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE

> (An Autonomous Institution) Puducherry

2nd Board of Studies Meeting in the **Department of Mechanical Engineering**

for the Programmes B.Tech, M.Tech & Ph.D

Date & Time 10-04-2021 & 10.30 am

MINUTES OF THE MEETING

Department of Mechanical Engineering Minutes of Board of Studies Meeting (UG)

The SecondBoard of Studies meeting of Department of Mechanical Engineering was held on 10 April 2021 at 10:30 A.M in the R&D Lab, Department of Mechanical Engineering, Sri Manakula Vinayagar Engineering College with the Head of the Department in the Chair.

The following members were present for the BoS meeting:

| SI. No | Name of the Member with Designation and official Address | Responsibility in the BoS |
|---------|---|------------------------------|
| 1 | Dr. K.Velmurugan Professor and Head Department of MECH, SMVEC | Chairman |
| Externa | al Members | |
| 2 | Dr. N. Alagumurthi, Ph.D, Professor & Head Department of Mechanical Engineering, Pondicherry Engineering College, Puducherry-605014. Email id: alagumurthi@pec.edu Mobile No.: 9486143090 | University Nominee |
| 3 | Dr. M. Leenus Jesu Martin, Ph.D, Director for campus SRM Institute of Science and Technology, Tamil Nadu – 603203 Email id: hod.auto@ktr.srmuniv.ac.in Mobile No.: 9940036021 | Member |
| 4 | Dr. A.T. Ravichandran, Ph.D, Dean School of Mechanical and Construction Engineering Vel Tech Rangarajan Dr.Sagunthala R & D Institute of Science and Technology, Avadi, Chennai – 600062 Email id: hodmech@veltech.edu.in Mobile No.: 9942940600 | Member |
| Interna | IMembers | |
| 5 | Dr.G.G.Sozhamannan, Professor, Specialization: <i>Manufacturing Engineering</i> | Member |
| 6 | Dr.T.Coumaressin, Associate Professor, Specialization: Thermal Engineering | Member |

| 7 | Dr.K.Hemalatha, Associate Professor, Specialization: <i>Engineering Design</i> | Member |
|--------|---|----------------------|
| 8 | Dr.A.Thiagarajan, Associate Professor, Specialization: <i>Product Design & Manufacturing</i> | Member |
| 9 | Prof.N.Vijayan, Assistant Professor, Specialization: <i>Mathematics</i> | Member |
| 10 | Prof.K.Oudayakumar Associate Professor, Specialization: <i>Physics</i> | Member |
| 11 | Dr.K.Karthikeyan Associate Professor, Specialization: <i>Chemistry</i> | Member |
| 12 | Dr.D.Jaichithra, 12 Professor, Specialization: <i>English</i> | |
| Co-opt | ed Members | |
| 13 | Dr. Anand Gurupatham Deputy General Manager, CAE-Department Head at Renault Nissan, Technology & Business Center, Chennai, Tamil Nadu, India | Industrial Member |
| Alumni | | |
| 14 | Mr.P.Madavan, Research Scholar MIT, Anna university, Chennai. | Alumni Member |

Agenda of the Meeting

- 1. Consideration of confirmation of minutes of the previous meeting held on 17.07.2020
- 2. Consideration of revision of curriculum and syllabus of V and VI semester of
 - B.Tech. MECHANICAL to be offered under Regulations 2019 to the students admitted in the academic year 2019-20
- 3. Consideration of revision of curriculum and syllabus of III and IV semester of
 - B.Tech. MECHANICAL to be offered under Regulations 2020 to the students admitted in the academic year 2020-21
 - a. Revision of detail syllabus
 - b. Revision of list of electives to be offered in both the semesters
- 4. Consideration of assessment of quality of question papers of U.G. Programmes drawn in previous examinations
- Consideration of review of feedback received from various stakeholders like parents, alumni, Industries Experts, Recruiters etc.on the revised Vision, Mission and Program Educational Objectives (PEOs) of the Department
- 6. Consideration of offering of Professional and Open electives in IV semester students admitted in the Academic Year 2019-20. The students should have to register one professional and one open elective as per Regulations 2019.

- 7. To consider and approve the department committee to monitor the Academic Activities
- 8. Consideration and approve the students admitted in the Academic Year 2020-21
- 9. Discuss about immediate supplementary exam for 2017-2021 batch after the VIII semester end semester examination results declaration due to Covid situation
- 10. Consideration of revision of list of panel of question paper setters and Examiners for the examinations of UG Programmes for the academic year 2021-22
- 11. Any other item with the permission of chair

UG Minutes of the Meeting

Dr. K.Velmurugan, Chairman, BoS opened the meeting by welcoming and introducing the external members, to the internal and co-opted members and thanked them for accepting to become the member of the Board of Studies and the meeting thereafter deliberated on agenda items that had been approved by the Chairman.

Consideration of confirmation of minutes of the previous meeting held on 17.07.2020:

Chairman, BoS, appraised the minutes of Ist BoS, its implementation and then it is confirmed with the approval for the incorporation of minor revisions needed as mentioned below:

| | SI. No. | Points discussed | Annexure |
|--------|------------|---|----------|
| | 1. | Curriculum 2019-2020, 191 credit is very high Credits reduced from 191 to 164 for the Curriculum and Regulation 2020-21 Credits reduced from 191 to 182 for the Curriculum and Regulation 2019-20 | 1.1 |
| | 2. | Certain subjects can be clubbed and modern subjects can be included • Latest technology subjects are included in the electives | 1.2 |
| | 3. | Fundamental of Mechanical Engineering can be removed for Mechanical Students as they are studying it as their domain Fundamental of Mechanical Engineering removed from curriculum | 1.3 |
| | 4. | Basic Science papers can be added in I semester Physics for Mechanical Engineering included in I semester | 1.4 |
| ltem:1 | 5. | Syllabus should be based on Outcome based, mapping to be provided in the syllabus Syllabus are prepared based on OBE, mapping provided | 1.5 |
| | 6. | Blooms Taxonomy knowledge levels should be given for the questions when setting the question papers Blooms Taxonomy knowledge levels included in question papers | 1.6 |
| | 7. | Engineering Metallurgy: Unit 3 Casting process can be removed in that place controlling factors of casting metallurgy must be included In Engineering Metallurgy, Unit 3 Casting process removed as per the suggestions | 1.7 |
| | 8 | Subjects and lab concepts should go parallelSubjects and lab are planned accordingly | - |
| | 9 | Mandatory courses like Indian constitution, Essence of Indian Traditional Knowledge, Professional ethics, Induction program should be made compulsory for all students | 1.9 |
| | | Mandatory courses like Indian constitution, Essence of Indian Traditional Knowledge, Professional ethics, Induction program made mandatory | |

| | Recommended to approve the B.Tech. Degree Regulations 2019 (R-19), Curriculum from I to VIII semesters and syllabus for V and VI the B.Tech – Mechanical Engineering for the students going to be admitted in the Academic Year 2019-20 with few suggestion: (Annexure 2) |
|--------|---|
| ltem:2 | In the 2019 Regulation, the professional elective subject Hydrogen fuel can be replaced with courses like Electric vehicles or Mass Rapid Transport System (MRTS), this will enhance the student's knowledge on Railways thus enabling them to pursue their career in Railways (Annexure 2.1) |
| | 2. In the laboratories, skill levels (S1, S2, S3) can be added in addition to knowledge level |
| | 3. IPR, copy rights, trade and patent making concepts to be included in syllabus |
| | Analytical subjects should have 60 hours, each tutorial hour should be awarded 1 credit |
| | Recommended to approve the B.Tech. Degree Regulations 2020 (R-2020), Curriculum from I to VIII semesters and syllabus for III to IV B.Tech – Mechanical Engineering for the students admitted in the Academic Year 2020-21 with minor correction (Annexure 3) |
| | 1. In the Basic Electrical & Electronics Engineering Course of I semester, Knowledge level k4 is used which indicates End semester question paper should also attain that level, which will be too high for I year students. |
| | 2. A course on Universal human values to be made mandatory |
| | While organizing Induction program for I year students, technical games related to other department can also be conducted to provoke students' inter-disciplinary subject interest |
| ltem:3 | 4. The experts feel too many labs are available , instead integrated courses (Theory lab) combined can be floated, this will improve student's technical skill on that particular course |
| | 5. MOOC (Massive Open Online Courses) like NPTEL courses can be made creditable. List of approved courses can be finalized by the department committee. The students have to produce his course completion certificate for claiming credits. If he/she fails, the student should take up the similar type of assessment conducted by the institute for the claim of the credit |
| | The MOOC can even be included in professional elective; instead of studying a subject student can do a course in NPTEL. This will benefit students by receiving certificate from IITs. This will provoke self-learning skills among students |
| | 7. While floating electives, instead of offering to selective department, electives subjects should be selected in such a way that it can be offered to all department |
| | The course codes of open elective -II offered by MBA department can be made same to avoid confusion in COE |

| | The syllabus content of the courses should also be practiced in the lab, to gain practical knowledge. For subjects like Industrial Casting Technology, demonstration using casting furnace, Foundry practice can be given as either group exercise or lab technician can demonstrate |
|--------|--|
| | 10. Subject like Design for Manufacturing can be included |
| | 11. K1 level can be taken out from course outcomes, as it denotes very low basic level, which the students expected to acquire during their schooling. |
| | In the Course Non-conventional energy sources, unit IV to be renamed as Geothermal & Bio-Mass Sources (Annexure 3.12) |
| | 13. Hydraulics and Pneumatics subject to be included as Core subject, since students should possess the knowledge on values, actuators which will help to pursue career in industrial automation |
| ltem:3 | 14. New subjects and labs like Mechanical equipments for infrastructure, Core Engineering Industries, Material handling equipment, Energy auditing, Industrial coding, Industrial safety lab, Low energy consuming equipments can be added to enhance students core engineering knowledge and exposure |
| | 15. In the course IoT & Smart Manufacturing, unit III content to be modified (Annexure 3.15) |
| | In the course Energy & Climate Change, Unit V Alternate Fuels and Renewable Energy need to be changed, to avoid content repetition (Annexure 3.16) |
| | 17. In the Employability Enhancement course AutoCAD for Mechanical title to be reframed as AutoCAD for Mechanical Engineering |
| | 18. In the Employability Enhancement courses, Trouble and Troubleshooting to be replaced as Trouble shooting and repair of two-wheeler, Trouble shooting and repair of four-wheeler, Trouble shooting and repair of CNC machines, Electronic Trouble shooting for Mechanical Engineering |
| | 19. In the EEC, Hands on training using 3D printing can be replaced just as 3D printing |
| ltem:4 | Consideration of assessment of quality of question papers of U.G. Programmes drawn in previous examinations The BOS experts reviewed the End semester question papers of the III, V and |
| | VII semester Autonomous exams and found satisfactory |
| ltem:5 | Consideration of review of feedback received from various stakeholders like parents, alumni, Industries Experts, Recruiters etc. on the revised Vision, Mission and Program Educational Objectives (PEOs) of the Department (Annexure 5) The BOS experts reviewed the revised Vision, Mission and Program Educational Objectives (PEOs) of the Department and suggested PSO to be made as program/domain specific |
| | |

| | Consideration of offering of Professional and Open electives in IV semester students admitted in the Academic Year 2019-20. The students should have to register one professional and one open elective as per Regulations 2019. The committee approved the list of professional and open elective offered by the departments for the IV semester students admitted in Academic year |
|---------|--|
| ltem:6 | 2019-2020 The students willingness to opt elective has been collected and the following electives were selected by students Professional Electives U19MEE42/Computer Aided design U19MEE43/Product design and development U19MEE45/Non-conventional energy sources |
| Item:7 | 1. U19CS043/ Programming in JAVA To consider and approve the department committee to monitor the Academic Activities The BOS experts recommended to include Course Equivalence Committee, in |
| | the committee list for the redo candidates of different regulations |
| ltem:8 | To Consider and approve the students admitted in the Academic Year 2020-21 For BSc students admission into B.Tech program as lateral entry, the students need to undergo bridge course with assessment (or) BSc students eligibility can be declined for B.Tech Lateral admission Diploma lateral entry - more courses to be added as per TNEA /CENTAC / PTU revised guidelines (Annexure 8) |
| ltem:9 | Discuss about immediate supplementary exam for 2017-2021 batch after the VIII semester end semester examination results declaration due to Covid situation The BOS experts recommended and passed to the Academic council and Governing Body |
| Item:10 | Consideration of revision of list of panel of question paper setters and Examiners for the examinations of UG Programmes for the academic year 2021-22 |
| | Recommended to approve the panel of examiners (Annexure 10) |

| | Other points Discussed | | | | | | | |
|---------|--|--|--|--|--|--|--|--|
| | 1. Overall the committee experts were satisfied with our curriculum structure and syllabus framing | | | | | | | |
| | 2. Curriculum design to be done every year. At the end of every semester feedbacks to be collected from faculties and students related to depth of knowledge, whether time span is sufficient to complete the syllabus, or any other advanced topics to be included. This has to be recorded in the internal BOS in concurrence with the course coordinator and forwarded to BOS for further approval. | | | | | | | |
| | 3. The current syllabus for the curriculum 2019-20 and 2020-21 are approved without any further revision, except for the few mentioned course little flaws to be rectified | | | | | | | |
| | 4. IPR, Geographical Indicators, Copy rights such subjects can also be incorporated | | | | | | | |
| Item:11 | 5. Credits can be given for patent and journal publication by students | | | | | | | |
| | 6. In the open elective Patent/Journal can be considered | | | | | | | |
| | 7. Value added courses on energy auditing, industrial safety can be conducted through industry interaction and students can be certified, which will be an added advantage for their jobs | | | | | | | |
| | 8. Japanese can be included in the foreign language classes. As the students with Japanese proficiency find more opportunities in Japan | | | | | | | |
| | 9. Engineering Product Lab: The purpose of the lab is to check the working, repair and maintenance work of Washing machine, Grinder, Iron Box and other house hold equipment | | | | | | | |
| | 10. Course coordinator committee meeting along with students representatives to be conducted at the end of the semester, to discuss about the discrepancies faced like depth of syllabus, hours allotted for completing the syllabus and students feedbacks related to the curriculum and the subjects | | | | | | | |

The meeting was concluded at 01:30PM with vote of thanks by Dr.K.Velmurugan, Head of Department, Mechanical Engineering

PHYSICS FOR MECHANICAL ENGINEERING

Course Objectives

U20BST106

- The purpose of this course is to provide an understanding of physical concepts and underlying various engineering and technological applications.
- In addition, the course is expected to develop scientific temperament and analytical skill in students, to enable them logically tackle complex engineering problems in their chosen area of application.
- This course gives good broad baseline knowledge of laser safety and fiber optics
- To acquire knowledge of the Quantum Mechanics in Classical Mechanics and electromagnetic radiation
- To understand the basis of solar energy and solar radiation measurement

Course Outcomes

After completion of the course, the students will be able to

CO1 - To understand the basic concept of semiconductor in physics. (K2)

CO2 - To apply the Physics concepts in acoustics. (K3)

- CO3 To understand scientifically the new developments in lasers and fiber optics. (K3)
- CO4 To understand about quantum mechanics and it applications. (K2)
- CO5 To emphasize the significance of Green technology through Physics principles. (K1)

UNIT I SEMICONDUCTOR PHYSICS

Semiconductor Physics: Intrinsic Semiconductors - Energy band diagram - direct and indirect semiconductors Carrier concentration in intrinsic semiconductors – extrinsic semiconductors - Carrier concentration in Ntype & P-type semiconductors - Carrier transport: Velocity-electric field relations - drift and diffusion transport -Einstein's relation - Hall effect and devices - Zener and avalanche breakdown in p-n junctions - tunnel diode -Schottky diode.

UNIT II ACOUSTICS

Acoustics: Intensity - Loudness - Absorption coefficient and its determination - Reverberation - Reverberation time - Factors affecting acoustics of buildings and their remedies - Sources and impacts of noise - Sound level meter - Strategies on controlling noise pollution - Ultrasonic waves and properties - Methods of Ultrasonic production (Magnetostriction and Piezoelectric) - Applications of Ultrasonic in Engineering and medicine.

UNIT III LASERS AND FIBER OPTICS

Lasers: Characteristics of Lasers - Einstein's coefficients and their relations - Lasing action - Working principle and components of CO2 Laser, Nd-YAG Laser, Semiconductor diode Laser, Excimer Laser and Free electron Laser - Applications in Remote sensing, holography and optical switching - Mechanism of Laser cooling and trapping.

Fiber Optics: Principle of Optical fiber – Acceptance angle and acceptance cone – Numerical aperture – Vnumber - Types of optical fibers (Material, Refractive index and mode) - Photonic crystal fibers - Fiber optic communication - Fiber optic sensors.

UNIT IV QUANTUM MECHANICS

Quantum mechanics: Inadequacies of Classical Mechanics - Duality nature of electromagnetic radiation - De Broglie hypothesis for matter waves -Heisenberg's uncertainty principle -Schrödinger's wave equation -Particle confinement in 1D box (Infinite Square well potential).

UNIT V GREEN ENERGY PHYSICS

Introduction to Green energy - Solar energy: Energy conversion by photovoltaic principle - Solar cells - Wind energy: Basic components and principle of wind energy conversion systems - Ocean energy: Wave energy -Wave energy conversion devices - Tidal energy - single and double basin tidal power plants - Ocean Thermal Electric Conversion (OTEC) - Geothermal energy: Geothermal sources (hydrothermal, geo-pressurized hot dry rocks, magma) - Biomass: Biomass and bio-fuels - bio-energies from wastages - Fuel cells: H2O2 - Futuristic Energy: Hydrogen – Methane Hydrates – Carbon capture and storage (CCS).

FLUID MECHANICS AND MACHINERY **U20MET307**

Course Objectives

- To understand the properties of the fluid and flow characteristics. ٠
- To emphasize the concept of dimensional analysis.
- To understand the concept of flow through circular pipes and boundary layer flows.
- To provide knowledge on the working principle and performance curves of hydraulic turbines.
- To educate the working principles and performance analysis of fluid pumps.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the basic fluid property and its application. (K2)

CO2 - To apply the concepts of dimensional analysis on the fluid structure. (K3)

CO3 - To solve the rate of flow and energy losses in flow through pipes. (K3)

CO4 - To evaluate the operating characteristics of hydraulic turbines. (K3)

CO5 - Understand the working principles of hydraulic pumps and performances (K2)

UNIT I FLUID PROPERTIES AND FLUID STATICS

Units and dimensions - Properties of fluids - mass density, specific weight, specific volume, specific gravity, viscosity, compressibility, vapour pressure, surface tension and capillarity, fluid statics, manometers, Hydrostatic Forces, buoyancy, forces on submerged bodies, stability of floating bodies

UNIT II FLUID KINEMATICS AND FLUID DYNAMICS

Flow characteristics - concept of control volume - application of continuity equation, energy equation and momentum equation. Bernoulli's equation, applications - Venturi meter, Orifice meter, Pitot tube - dimensional analysis -Buckingham's π theorem applications - similarity laws and models.

UNIT III INCOMPRESSIBLE FLUIDS AND FLOW THROUGH PIPES

Viscous flow - laminar flow between parallel plates, - Laminar and Turbulent flow, Reynold's experiment flow through Circular pipes - Darcy - Weisbach equation - friction factor minor losses - flow through pipes in series and in parallel - power transmission - boundary layer flows, boundary layer thickness, boundary layer separation.

UNIT IV HYDRAULIC MACHINE AND TURBINES

Principles of Turbo Machinery: Fluid Machines - Classification - Introduction to Impact of jet Stationary plates, Moving Plates and Vanes - Construction of Velocity Vector Diagram- Unit and Specific Quantities. Turbine -Classification - Impulse Turbine - Pelton Wheel - Reaction Turbines - Francis and Kaplan Turbines - Draft Tube Theory - Velocity Triangle - Estimation of force, Power and efficiency - General Characteristics of Turbine – Similarity Study – Governing of Turbine – Cavitation in Turbine.

UNIT V HYDRAULIC PUMPS

Classification - Centrifugal Pump - Velocity Triangle - Estimation of Power Required and efficiency - General characteristics - Similarity study - Cavitation in Pump - Reciprocating Pump - Air Vessels - Ideal and Actual Indicator Diagram - Estimation of Power Required, percentage Slip and Efficiency - Cavitation - special purpose pumps.

Control System Engineering- ME T65

Day and Date: Thursday & 08.04.2021 Time: 02.00 pm to 03.30 pm

Max. Marks- 50

.....

Instructions:

 IMP: Verify that you have received question paper with correct course, code, branch etc.

 i) All questions are compulsory.

 ii) Figure to the right indicates full marks.

iii) Assume suitable data wherever necessary.

Course Outcomes:

CO1: To introduce to the basics of control System Engineering as part of life. Knowledge Level: K1–Remember, K2–Understand, K3–Apply, K4–Analyze & K5–Evaluate

| | | Marks | B.L | CO's |
|------|--|-------|-----|------|
| | PART A (20 Marks) | | | |
| | Answer all the Questions | | | |
| Q.1 | What is control system? | 2 | K1 | COI |
| Q.2 | Distinguish between open loop and closed loop system | 2 | K1 | COI |
| Q.3 | What are the effects of feedback on control system? | 2 | K2 | COL |
| Q.4 | Why negative feedback preferred in control systems? | 2 | К2 | COI |
| Q.5 | Define open loop system? | 2 | K2 | COI |
| Q.6 | List out the advantages of closed loop control system | 2 | K1 | COI |
| Q.7 | List out the advantages of open loop control system | 2 | K1 | COI |
| Q.8 | List out the basic components of control system | 2 | K1 | COI |
| Q.9 | Define Actuator. | 2 | К2 | COI |
| Q.10 | What is servo Mechanism | 2 | K1 | COI |
| | PART B (30 Marks) | | | |
| | Answer any three Questions | | | |
| Q.11 | Discuss in detail about Closed loop control system with two suitable examples. | 10 | К2 | COI |
| Q.12 | Discuss in detail about Open loop control system with two suitable examples. | 10 | K2 | COI |
| Q.13 | Explain in brief about basic components of control system and its requirements? | 10 | K2 | COI |
| Q.14 | Discuss about the Mathematical Modeling of Systems and its transfer function | 10 | K2 | COI |

| | PART B (5 x 11 = 55 Marks) | | | |
| 0.11 | Answer all the Questions Choosing one question from each | | 1 | |
| Q.11 | A single-cylinder, single-acting four-stroke gas engine develops 20 kW | 11 | 3 | COI |
| | at 250 rpm. During the expansion stroke, the workdone is three times | | | |
| | the work done on the gases during the compression stroke. The work- | | | |
| | done on the suction and exhaust strokes may be neglected. If the | | | |
| | flywheel has a mass of 1.5 tons and has a radius of gyration of 0.6 m. | | | |
| | Determine the cyclic fluctuation of energy and coefficient of fluctuation | | | |
| | of speed (OR) | | | |
| 0.12 | | | | |
| Q.12 | The turning moment diagram for a multicylinder engine has been drawn | 11 | 3 | CO1 |
| | to a scale 1 mm = 600 N-m vertically and 1 mm = 3° horizontally. The | | | |
| | intercepted areas between the output torque curve and the mean | | | |
| | resistance line, taken in order from one end, are as follows: $+52, -124,$ | | | |
| | +92, -140, +85, -72 and $+107$ mm ² , when the engine is running at a | | | |
| | speed of 600 r.p.m. If the total fluctuation of speed is not to exceed \pm | | | |
| | 1.5% of the mean, find the necessary mass of the flywheel of radius 0.5 m. | | | |
| Q.13 | Derive the natural frequency equation of an undamped free longitudinal | 11 | 3 | 000 |
| | vibration of a spring-mass system. | | 3 | CO2 |
| | in the second | | | |

- (OR)
- Q.14 A vibrating system consists of 8 kg, a spring of stiffness 5.6 N/mm, and 11 3 a dashpot of damping coefficient of 40 N/m/s. Find: (a) the critical damping coefficient; (b) the damping factor; (c) the natural frequency of damped vibration; (d) the logarithmic decrement; (e) the ratio of two consecutive amplitudes.

| Q.15 | It carries two wheels, each of 60 kg mass, one at the center of the shaft and the other at 450 mm from the center. The external and internal | п | 3 | CO |
|---------|--|------|---|-----|
| | diameters of the shaft are 80 mm and 50 mm, respectively. Determine the lowest whirling speed of the shaft. The shaft material density and modulus of elasticity are 7500 kg/m ³ and 210 GN/m ² . (OR) | | | |
| Q.16 | mm for the remaining length. One end of the shaft is fixed, and the other carries a rotor of 200 kg mass with a radius of gyration of 45 mm. find the frequency of free torsional vibration neglecting the inertia of the | 11 | 3 | CO: |
| | shaft. Take $G = 84 \text{ GN/m}^2$. | 10 1 | | |
| Q.17 | Derive the lift equation for porter governor. (OR) | 11 | 3 | CO4 |
| Q.18 | A Hartnell governor having a central sleeve and two right-angled bell crank levers moves between 290 rpm and 310 rpm for a sleeve lift of 15 mm. The sleeve arms and the ball arms are 80 mm and 120 mm, | 11 | 3 | CO4 |
| | respectively. The levers are pivoted at 120 mm from the governor axis, and each ball mass is 2.5 kg. The ball arms are parallel to the governor axis at the lowest equilibrium speed. Determine (1) loads on the spring at the lowest and the highest equilibrium speeds and (2) stiffness of the spring. | | | |
| Q.19 | The cranks of a two-cylinder uncoupled inside cylinder locomotive are at right angles and are 325 mm long. The cylinders are 675 mm long. | 11 | 3 | CO5 |
| firme a | The rotating mass per cylinder is 200 kg at the crankpin, and the mass of the reciprocating parts per cylinder is 240 kg. The wheel center lines are 1.5 m apart. The whole of the rotating and two-thirds of the reciprocating masses are to be balanced. The balance masses are to be | | | |
| | placed in the planes of the rotation of the driving wheels at a radius of 800 mm. Find the magnitude and direction of the balancing masses. (OR) | | | |
| | The four masses m_1 , m_2 , m_3 , and m_4 have the radii of rotation as 200 mm, 150 mm, 250 mm, and 300 mm are 200kg, 300 kg, 240 kg, and 260 kg magnitude, respectively. The angles between the successive masses are 45°, 75°, and 135°, respectively. Find the position and magnitude of the balancing mass required if the radius of rotation is 200 mm. | 11 | 3 | CO5 |

U20MET202

ENGINEERING METALLURGY

Т С Hrs L Ρ 3 45 3 0 0

Course Objectives

- · To learn solidification structure, solid solution and allotropy of metals
- · To learn the phase diagrams, various reactions and properties of steel
- To learn about the heat treatment and its importance real applications.
- To learn about Recovery, Recrystallization and Grain Growth
- To learn the deformation and failures of metals.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the fundamentals of solidification, metal structure, solid solution metals, (K2)

- CO2 Recognize the phase diagram and equilibrium diagram with reactions. (K1)
- CO3 Understand the basic fundamentals of heat treatment and importance in metals. (K2)
- CO4 Recognize crystal structure, nucleation, recovery and grain growth. (K3)

CO5 - Understand and analysis the behavior of engineering materials and prevention the failures. (K34)

UNIT I SOLIDIFICATION AND THEORY OF ALLOYS

Mechanism of crystallization, solidification of metals: pure metals and alloys, concept of super cooling, Nucleation: homogenous nucleation and heterogeneous nucleation. Solid solutions : Substitution solid solution-Interstitial solid solution, Hume-Rothery Rule, Lever Rule-Allotropy

UNIT II PHASE DIAGRAM AND IRON-CARBON EQUILIBRIUM DIAGRAM

Construction and interpretation of binary phase diagrams - Types - Eutectic, Eutectoid, Peritectic and Peritectoid systems - Iron Carbon equilibrium diagrams - classification of steels and alloy steels - types, manufacturing methods, properties and applications of cast irons.

UNIT III HEAT TREATMENT OF STEELS

Introduction to heat treatment- Classifications, Heat treatment of ferritic steels: constant temperature transformation-Continuous cooling curves-Important of heat treatment of steels- Surface Hardening process: classifications- Martempering and Austempering - Heat treatment of stainless steel: austenite stainless steel and Duplex stainless steel- shot peening-laser peening

UNIT IV RECOVERY, RECRYSTALLIZATION AND GRAIN GROWTH

Introduction to recovery and recrystallization, recrystallization of time and temperature, Degree of cold work and hot work, recrystallization of original grain growth, laws of recrystallization, Factors affecting rate of recrystallization - Grain growth - normal grain growth and abnormal grain growth- grain orientation- Factors affecting rate of grain growth

UNIT V DEFORMATION AND FAILURES OF METALS

Introduction deformation- types-strengthening mechanism of alloys, - ductile and brittle behavior of metals-Ductile to brittle transition- fracture modes - mechanism creep behavior- creep life predictions- fatigue behavior- S-N Curve-design against creep and fatigue

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE

(Approved by AICTE, New Delhi & Affiliated to Pondicherry University) (Accredited by NBA-AICTE, New Delhi, ISO 9001:2000 Certified Institution & Accredited by NAAC with "A" Grade) (An Autonomous Institution) (As per UGC Regulations 2018)

Madagadipet, Puducherry - 605 107

Department of Mechanical Engineering

Details of the Induction Program Schedule

| SI. | Date/Day | Ac | tivity | Staff In-charge |
|-----|-------------------------------|---|--|--|
| No. | - | FN | AN | |
| | | Creative A | rts and Culture | |
| 1 | 10.02.2021 & 11.02.2021 | Drawing/Painting | 1.Mrs.Namitha, AP, English Department 2.Mr.Karupusamy, AP,B.Arch 3. Mr.M.Gunasekar 4.Mr.L.Martin | |
| | | Creative A | rts and Culture | |
| 2 | 12.02.2021 & 13.02.2021 | Singing songs, Mono acting, Extempore and Story Telling | Ad Zap, Elocution and Poem Writing | 1. Mr.D.Karunakaran 2.Dr.L.Saravanan 3.Mr.P.Jayakumar 4. Mr.S.Arulpradepp 5.Mr.S.Jagan |
| | | Mentoring and Un | iversal Human Values | - |
| 3 | 19.02.2021 & 20.02.2021 | Character building, Leadership quality and moral values | Saving of nature in working and studying environment | 1.Mr.D.Karunakaran 2.Mr.M.Santhoshkumar 3.Mr.V.Ashok Kumar 4. Mr.S.Jagan |
| | | Familiarization with | college and Department | |
| 4 | 27.01.2021 & 27.01.2021 | About the College and the facilities | About the Department and facilities | 1.Dr.K.Velmurugan 2.Dr.G.G.Sozhamannan 3.Dr.K.Hemalatha 4.Dr.T.Coumaressin |

| | | Literary Activity ar | nd Proficiency Modules | |
|---|-------------------------------|---|---|--|
| 5 | 23.02.2021 | Books reading, writing summary, debating, enacting roles. | Computer familiarity | 1.Dr.K.Pavalavana Pandian 2.Mr.S.Arulpradeep 3.Mr.R.Hemanthkumar 4.Mr.K.Navanithakrishnan |
| | | Lectures and works | hops by Eminent People | |
| 6 | 24.02.2021 & 25.02.2021 | Recent advancements in Engineering | 1.Workshops on two-wheeler dismantling and assembling 2.Workshop on 3D Printing | 1.Dr.A.Thiagarajan 2.Dr.R.Ravishankar 3.Mr.E.Manikandan 4.Mr.K.Prakash |
| | I | Visit in | Local Areas | |
| 7 | 27.02.2021 | trial Visit | 1.Mr.A.Jeyachandran 2.Mr.P.Sathiaprathap 3.Mr.M.Gunasekar | |
| | | Extra-Curr | icular Activities | |
| 8 | 26.02.2021 | activities and | guration, Discussion on various divisions of club. Idents coordinators | 1.Dr.A.G.Ganeshkumar 2.Dr.L.Saravanan 2.Mr.L.Martin 3.Mr.G.Harish |
| | | Physi | cal activity | |
| 9 | 01.03.2021 & 02.03.2021 | Cricket, Football | Basketball | 1.Mr.B.R.Vengatesan Physical Director 2.Dr.A.Thiagarajan 3.Mr.K.Giriprasath |

Annexure 2

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE (An Autonomous Institution)

Puducherry

B.TECH. MECHANICAL ENGINEERING

ACADEMIC REGULATIONS 2019 (R-2019)

CURRICULUM AND SYLLABI

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting edge technologies with best practices.

M2: Research and Innovation:

To foster value-based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT VISION AND MISSION

Vision

The Mechanical Engineering department strives to be recognized as an excellent academic and research center for creating outstanding Engineers, Entrepreneurs and Leaders

Mission

M1: Professional Skills:

To provide quality education to enhance students inter-personal and intra-personal skills

M2: State-of-art facilities:

To render excellent infrastructure facilities and laboratories to excel as skilled professionals

M3: Research Exposure:

To Strengthen Research and Development within the department through industrial associations

M4: Employability:

To put enthusiastic exertions to enhance employability and entrepreneurship skills of students

M5: Human Values:

To empower students with professional ethics and human values to serve the society

PROGRAMME OUTCOMES (POs)

PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Technical knowledge

To foster our young graduates with cogent technical knowledge so as to make them employable

PEO2: Real-Time Applications

To apply the acquired knowledge in the field of Mathematics, Science and Engineering in developing real-time projects

PEO 3: Design Ability

To design a system, component or process to meet the desired needs within realistic constraints such as manufacturing, economy, environmental sustainability, social, health and safety

PEO 4: Ethics

To prepare the students to become entrepreneurs with professional attitude in the broader ethical perspective

PEO 5: Life - Long Learning

To craft curiosity among students for life-long learning through self-study

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO 1: Solving real time problems

To develop capability to identify, analyze and solve engineering problems in concern to mechanical engineering along with associated engineering streams.

PSO 2: Pursue Professional career

To bestow quality learning environment to pursue professional career in mechanical engineering with integrated knowledge

PSO 3: Concentrating on skill development

To enflame the student's technical capabilities in engineering design process, intra and inter personnel, linguistic and higher level professional skills required in engineering.

STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

| SI. No | Course Category | Breakdown of Credits |
|--------|--|-------------------------|
| 1 | Humanities and Social Science (HS) | 09 |
| 2 | Basic Sciences(BS) | 40 |
| 3 | Engineering Sciences (ES) | 30 |
| 4 | Professional Core (PC) | 65 |
| 5 | Professional Electives (PE) | 18 |
| 6 | Open Electives (OE) | 09 |
| 7 | Project Work and Internship (PW) | 12 |
| 8 | Employability Enhancement Courses (EEC*) | - |
| 9 | Mandatory courses (MC*) | - |
| | Total | 183 |

NUMERICAL METHODS AND STATISTICS

(Common to MECH & CCE)

Course Objectives

U19MET51

- Learn the techniques of solving algebraic and transcendental equations.
- To introduce the numerical techniques of differentiation and integration.
- To know the basic concepts of statistical parameters like mean, median, mode etc.
- To understand the concept of testing of hypothesis using statistical analysis.
- Identify the direction and strength of a linear correlation between two factors.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Solve algebraic and transcendental equations. (K3)

CO2 - Apply the knowledge of interpolation by using the numerical methods. (K3)

- CO3 Understand the basic concepts of Statistics. (K2)
- CO4 Apply the concept of testing of hypothesis for small and large samples. (K3)
- CO5 Know the applications of linear regression and correlation. (K2)

UNIT I SOLUTION OF EQUATIONS AND EIGEN VALUE PROBLEMS

Solution of algebraic and transcendental equations – Newton Raphson method – Gauss elimination method – Gauss Jordan method – Iterative methods of Gauss Jacobi and Gauss Seidel.

UNIT II NUMERICAL DIFFERENTIATION AND INTEGRATION

Interpolation: Interpolation by Newton's forward and backward difference formulae for equal intervals – Solution of ordinary differential equations – Single step methods – Taylor series method – Euler methods – Integration by Trapezoidal and Simpson's rules – Lagrange's method for unequal intervals.

UNIT III MEASURES OF DISPERSION

Standard deviation – Mean deviation – Quartile deviation – Range – Measures of Skewness and Pearson's coefficient of skewness – Moments about the arbitrary origin and moments based on measures of skewness and kurtosis.

UNIT IV TESTING OF HYPOTHESIS

Test of significance: Large sample test for single proportion, difference of proportions, single mean, difference of means and difference of standard deviations. Small samples: Test for single mean, difference of means and correlation coefficients – test for ratio of variances – Chi–Square test for goodness of fit and independence of attributes.

UNIT V CORRELATION AND REGRESSION

Curve fitting - Method of least squares – Correlation – Rank correlation – Regression – Multiple and partial correlation - Plane of regression – Coefficient of multiple correlation – Coefficient of partial correlation.

U19MET52

DESIGN OF MACHINE ELEMENTS

T P C Hrs L 2 2 3 60

Course Objectives

- To understand the design methodology for machine elements.
- To develop the Knowledge on basic failure mechanisms of riveted and welded joints.
- To learn the design Procedure for the different machine elements such as Keys, Cotters and Knuckle joints. •
- To develop knowledge on design dimensions and to compute the stress acting on machine components like • shafts and couplings
- To enable the students to understand the design procedure of springs with appropriate assumptions.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the design process and Compute the stress acting on various machine elements. (K2)
- CO2 Understand different welded and riveted joints structure and able to apply its knowledge to analyze its strength when subjected to axial and eccentric loading. (K2)
- CO3 Design and analyse of keys, cotters and knuckle Joints. (K4)
- CO4 Compute the dimensions, stress requirements of shaft and couplings based on various load conditions. (K5)
- CO5 Compute the dimensions of the springs for specific applications. (K5)

UNIT I DESIGN FUNDAMENTALS

Design Process - Computer aided design - Optimum design - Material Standards - Industrial design form and shape design, embodiment design and design for manufacture. Types of loads – Stresses – Static, varying, thermal, impact and residual. Factors of safety - Theories of failure - Stress concentration factors - S-N curves and its applications.

UNIT II DESIGN OF FASTENERS AND WELDED JOINTS

Riveted joints-methods of failure of riveted joints strength equations-efficiency of riveted joints- eccentrically loaded riveted joints. Design of fillet welds- axial loads-circular fillet welds-bending and torsion. Design of bolts with prestresses- design of joints under eccentric loading -bolts of uniform strength.

UNIT III DESIGN OF KEYS, COTTERS AND KNUCKLE JOINTS

Design of Keys-stresses in keys-cottered joints-spigot and socket, sleeve and cotter, jib and cotter joints-Knuckle joints.

UNIT IV DESIGN OF SHAFTS AND COUPLINGS

Design of solid and hollow shafts for strength and rigidity – Design of shafts for complex loads– Shaft sizes – BIS code- Design of shafts for gear and belt drives, Rigid couplings - Muff, Split muff and Flange couplings. Flexible couplings - Pin-Bush coupling.

UNIT V DESIGN OF SPRINGS

Stresses and deflections of helical springs-extension compression springs- spring for static and fatigue loadingnatural frequency of helical springs-energy storage capacity-helical torsion springs-co-axial springs.

Course Objectives

- To perform force analysis and balancing of reciprocating engines and to determine basic parameters of flywheel and its functions
- To understand the effects of free vibration in single degree of freedom systems
- To understand the dynamic effect of undesirable forced vibrations.
- To understand the principles in mechanisms used for speed control and stability control
- To perform balancing of rotating and reciprocating masses

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Carry out static and dynamic force analysis on various parts of reciprocating engine and to determine flywheel parameters by constructing turning moment diagram (K4)
- CO2 Compute the frequency of free vibration in single degree of freedom systems (K4)
- CO3 Compute the frequency of forced vibration in damped and undamped systems (K4)
- CO4 Calculate the speed, lift of the governor, and estimate the gyroscopic effect on automobiles, ships and airplanes. (K4)
- **CO5** Calculate the magnitude and position of reciprocating and rotating masses and thereby to balance them. (K4).

UNIT I DYNAMIC FORCE ANALYSIS

Dynamic force analysis - Inertia force and Inertia torque- D'Alembert's principle -Dynamic Analysis in reciprocating engines – Gas forces – Inertia effect of connecting rod– Bearing loads – Crank shaft torque – Turning moment diagrams – Fly Wheels – Flywheels of punching presses.

UNIT II VIBRATION – SINGLE DEGREE OF FREEDOM SYSTEMS

Introduction to vibration – Terminology – Classification of vibrations – Undammed and Damped free vibration of single degree of freedom systems – Viscous damping – Introduction to coulomb damping. Forced vibration – harmonic excitation - Magnification factor - Vibration isolation and Transmissibility.

UNIT III TRANSVERSE AND TORSIONAL VIBRATION SYSTEMS

Transverse vibrations of shafts and beams - Rayleigh's and Dunkerley's method - Whirling of shafts. Torsional vibrations - Single rotor, two rotors and three rotors system - Vibration of geared systems.

UNIT IV MECHANISM FOR CONTROL

Governors – Types – Centrifugal governors – Gravity controlled and spring controlled centrifugal governors – Characteristics - Effect of friction - Controlling force curves. Gyroscopes - Gyroscopic forces and torques -Gyroscopic stabilization - Gyroscopic effects in Automobiles, ships and airplanes

UNIT V BALANCING

Static and dynamic balancing of rotating masses in different planes - partial balancing of reciprocating masses of inline, V, W and radial engines

Course Objectives

- To provide knowledge on various metrological equipment's available in mechanical industry.
- To understand the basic construction and working of linear and angular measurement tools. ٠
- To understand the basics of modern inspection methods and computerized inspection.
- To acquire about the knowledge on form measurement.
- To understand the various measuring techniques for power, flow and temperature used in industries.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Describe the concepts of measurements to apply in various metrological instruments. (K1)

CO2 - Outline the principles of linear and angular measurement tools used for industrial applications. (K2)

- CO3 Explain the procedure for conducting computer aided inspection. (K2)
- CO4 Demonstrate the techniques of form measurement used for industrial components. (K2)
- CO5 Apply various measuring techniques of mechanical properties in industrial needs. (K3)

UNIT I BASICS OF METROLOGY

Introduction to Metrology – Need – Elements – Work piece, Instruments – Persons – Environment – their effect on Precision and Accuracy – Errors – Errors in Measurements – Types – Control – Types of standards.

UNIT II LINEAR AND ANGULAR MEASUREMENTS

Linear Measuring Instruments – Evolution – Types – Classification – Limit gauges – gauge design – terminology

- procedure - concepts of interchangeability and selective assembly - Angular measuring instruments - Types

- Bevel protractor clinometers angle gauges, spirit levels sine bar - Angle alignment telescope - Autocollimator

- Applications.

UNIT III ADVANCES IN METROLOGY

Basic concept of lasers Advantages of lasers – laser Interferometers – types – DC and AC Lasers interferometer Applications – Straightness – Alignment. Basic concept of CMM – Types of CMM – Constructional features – Probes - Accessories - Software - Applications - Basic concepts of Machine Vision System - Element -Applications.

UNIT IV FORM MEASUREMENT

Principles and Methods of straightness – Flatness measurement – Thread measurement, gear measurement, surface finish measurement, Roundness measurement - Applications.

UNIT V MEASUREMENT OF POWER, FLOW AND TEMPERATURE

Force, torque, power - mechanical, Pneumatic, Hydraulic and Electrical type. Flow measurement: Venturimeter, Orificemeter, rotameter, pitot tube - Temperature: bimetallic strip, thermocouples, electrical resistance thermometer - Reliability and Calibration - Readability and Reliability.

NUMERICAL METHODS LAB

U19MEP51

(Common to ICE & MECH)

L T P C Hrs 0 0 2 1 30

Course Objectives

- To learn the techniques of solving non-linear equation.
- To find the solutions of simultaneous equations.
- To introduce the numerical techniques of differentiation and integration.
- To understand the curve fitting techniques.
- To study about the single mean and difference of means.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Find out the root of the Algebraic and Transcendental equations. (K3)
- CO2 Solve the simultaneous equations. (K3)
- CO3 Know the iterative Interpolation formula of integration. (K3)
- CO4 Implement Simpsons Rule formula. (K3)
- CO5 Solve the Laplace equation using Numerical methods. (K3)

List of Experiments

- 1. Roots of non-linear equation using bisection method.
- 2. Roots of non-linear equation using Newton's method.
- 3. Solve the system of linear equations using Gauss Elimination method.
- 4. Solve the system of linear equations using Gauss Seidal iteration method.
- 5. Solve the system of linear equations using Gauss Jordan method.
- 6. Find the area by using trapezoidal rule.
- 7. Fit a straight line by method of least squares.
- 8. Fit a parabola by method of least squares.
- 9. Test for Single mean.
- 10. Test for difference of mean.

U19MEP52 METROLOGY AND MEASUREMENTS LAB

| L | т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 0 | 0 | 2 | 1 | 45 |

Course Objectives

- To acquaint practical knowledge on various measuring and calibrating devices.
- To familiarize with different measurement equipment's and its usage in industry for quality inspection.
- To explore the working principle of mechanical measuring devices.
- To understand the importance of accurate measurements in the industrial inspection.
- To give exposure and hands on experience about the metrology of tooling.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Calibrate the vernier, micrometer and slip gauges for the inspection. (K1)
- **CO2** Measure the gear tooth dimensions, angle using sine bar, straightness and flatness, thread parameters, temperature using thermocouple, force, displacement, torque and vibration. **(K1)**
- **CO3** Organize experimental investigation of performance of strain gauges, LVDT, Accelerometer, Stroboscope and profile projector. **(K3)**
- CO4 To relate measuring accuracy of different instruments according to the suitability. (K2)
- CO5 To extract the results of measurement performed by different equipment's. (K2)

List of Experiments

- 1. Calibration of Micrometer.
- 2. Measurement of taper using Sine Bar.
- 3. Tool Maker Microscope (inspection of screws)
- 4. Straightness and Flatness Measurement using Autocollimator.
- 5. Surface Roughness Measurement
- 6. Inspection of Screw Threads (Effective Diameter).
- 7. Measurement of Pressure using Strain Gauges.
- 8. Determination of the Time Constant of Thermocouples.
- 9. Measurement of Force using Transducers.
- 10. Measurement of Strain using Strain Gauges.
- 11. Study of Displacement using LVDT
- 12. Vibration Measurement using Accelerometer.
- 13. Measurement of speed using stroboscope
- 14. Inspection of gear tooth profile using profile projectors

| U19MEP53 | DYNAMICS LAB | L | Т | Ρ | С | Hrs |
|----------|--------------|---|---|---|---|-----|
| | | 0 | 0 | 2 | 1 | 45 |

Course Objectives

- To equip the students with the principle of working of various governor and gyroscopic effect
- To nurture the students with the different modes of balancing
- To equip the students with understanding of the various modes of vibration
- To inculcate the knowledge of understanding radius of gyration of given systems
- To instill the knowledge of pressure distribution in bearings and to study the motion analysis of CAM

Course Outcomes

After completion of the course, the students will be able to

- CO1 Demonstrate and perform analysis on various governor and understand the gyroscopic principles (K4)
- CO2 Recognize different modes of balancing (K4)
- CO3 Identify and analysis different modes of vibration (K4)
- CO4 Explain the gyration effect on given systems (K4)
- CO5 Interpret the pressure distribution in bearings and demonstrate the CAM motion (K4)

List of Experiments

- 1. Demonstration of four bar inversion mechanism
- 2. Natural frequency of single mass, single helical spring system
- 3. Natural frequency of combination of springs springs in parallel, springs in series
- 4. Natural frequency of undamped torsional single rotor, double rotor system Effect of inertia (I) and stiffness(k)
- 5. Determination of radius of gyration of a given compound pendulum
- 6. Determination of radius of gyration, moment of inertia bifilar suspension method trifilar suspension method
- 7. Damping coefficient of torsional single rotor system Effect of depth of immersion in oil and damping ratio
- 8. Resonance frequency of equivalent spring mass system undamped and damped condition a) To plot amplitude Vs frequency graph for different damping
- 9. Determination of characteristic curves of Watt, Porter, Proell and spring loaded governors
- 10. Static and Dynamic balancing
- 11. Whirling of shafts/ determination of critical speed with and without Rotors
- 12. Gyroscopic couple verification
- 13. Journal bearing pressure distribution of different loads at different Speeds
- 14. Cam motion analysis

U19MEP54

CAD/CAM LAB

Course Objectives

- To understand code of drawing practice as per BIS conventions for mechanical elements using CAD Software and exposure on CNC machines
- Prepare the 2-D and 3-D drawings using parametric solid software's as per industry templates.
- To familiarize on the Structural Analysis of 3D elements using Ansys
- To introduce the concepts of Tool path generation, integration of CAD/CAM with the production machine, and Computer control of machines and processes in manufacturing systems
- To create good understanding on reading, drafting, modeling and analyzing of the given component

Course Outcomes

After completion of the course, the students will be able to

CO1 - Interpret the given drawing as per BIS conventions and exposure in CNC machining. (K3)

- CO2 Generate 2-D and 3-D drawings using parametric solid software's as per industry templates. (K4)
- CO3 Perform structural analysis on 2D and 3D elements. (K4)
- CO4 Extend CAM software to generate NC code. (K4)
- CO5 Interpret the given component and perform analysis on 3D elements. (K4)

List of Experiments

- 1. Modeling a component using a 3D Modeling Software and Drafting
- 2. Model, Assemble and Draft a 3D Product using a 3D Modeling Package
- 3. Modeling a component and Importing to ANSYS and Meshing
- 4. Creating APDL in ANSYS for a parametric case study
- 5. Shear Force and Bending Moment diagram using ANSYS APDL or Workbench
- 6. Structural Analysis of a 3D Cantilever Beam and Validating the results with 1D and 2D options in ANSYS
- 7. Programming and machining of given component using CNC turning center.
- 8. Programming and simulation of given component using CAM software (Lathe).
- 9. Programming and machining of given component using CNC machining center.
- 10. Programming and simulation of given component using CAM software (Milling).
- 11. Programming and machining of given component using Universal Milling Machine.

THERMAL ENGINEERING

| L | Т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To study the components, systems and performance of internal combustion engines.
- To integrate the concepts, laws and methodologies from the first course in thermodynamics into analysis of Brayton cycle and steam power cycles
- · To provide knowledge on steam nozzles and steam turbines
- · To impart knowledge on working principles and performance of air compressors
- To apply the thermodynamic concepts into refrigeration and air conditioning

Course Outcomes

After completion of the course, the students will be able to

CO1 - Recognize the components and study the performance of internal combustion engines. (K2)

CO2 - Illustrate the working of Brayton and steam power cycles in T-S diagram and formulate its efficiency (K3)

- CO3 Analyze the problem relates to steam nozzles and steam turbines (K3)
- CO4 Compare the working performance of reciprocating and rotary compressors (K4)
- CO5 Estimate the performance of refrigeration and air conditioning (K4)

UNIT I IC ENGINES CLASSIFICATION

Classification of IC engines - petrol and diesel engines; two stroke and four stroke engines - scavenging in two stroke engines - port and valve timing diagram - fuel supply system in SI and CI engines - ignition system and its types - cooling system and its types - lubrication system and its types - - heat balance test for IC engines.

UNIT II GAS AND STEAM POWER CYCLES

Gas power cycle -Otto, Diesel, Dual, Brayton cycles, Calculation of mean effective pressure and air standard efficiency, Steam power cycles-Rankine cycle, Modifications with reheater and regenerator.

UNIT III STEAM NOZZLES AND TURBINES

Flow of steam through nozzles, shapes of nozzles, effect of friction - Nozzle efficiency- General relationship between area, velocity and pressure in nozzle flow. Critical pressure ratio - Impulse and reaction principles, compounding, and velocity diagrams for simple turbines, speed regulations - governors. Reheating the steam-Bleeding.

UNIT IV AIR COMPRESSOR

Classification - Reciprocating Air Compressor - working principle, work of compression with and without clearance. Multistage air compressor and inter cooling (Descriptive treatment only), Rotary Compressors -Centrifugal Compressor and axial flow compressor (Descriptive treatment only), Screw Compressors

UNIT V REFRIGERATION AND AIR-CONDITIONING

Fundamentals of refrigeration and air conditioning - Vapour compression refrigeration cycle- super heat, sub cooling- Performance calculations- Performance calculation of vapour absorption system: Ammonia- Water, Lithium boride- water systems- Alternate refrigerants- Air conditioning systems: types, working principles-Psychrometry - Cooling Load calculations - Concept of RSHF, GSHF, ESHF.

DESIGN OF TRANSMISSION SYSTEM

Course Objectives

- To study about various transmissions system like belt, ropes and chain drive.
- To correlate difference between spur gears and helical gears and to design.
- To design bevel gears, worm gears and skew gears.
- To select suitable gear box design for specific application.
- To understand different types of clutches and brakes, its failures, applications and determine standard design procedure for single and multi-plate clutches.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Apply the design procedure for belt, rope and chain Drives using Design Data Hand book. (K3)

- CO2 Understand the standard geometry, application, failures and design of Spur and Helical Gear. (K3)
- CO3 Understand the standard geometry, application, failures and design of Bevel and Worm Gear. (K3)
- CO4 Identify the gear box for specific applications (K3)
- CO5 Understand different types of clutches and brakes, its failures, applications and determine standard design procedure. (K3)

UNIT I BELT, CHAIN AND ROPES

Belt Drive: Introduction, types, Material, Design of Belts – Flat Belts and Pulleys – V Belts and Pulleys. Chain and Rope: Design of chain drives – Wire ropes.

UNIT II GEAR DRIVE: SPUR AND HELICAL

Spur gears: Introduction, Types of failure, design requirements, gear terminology, design analysis, stress concentration, dynamic load, surface compressive stress, beam strength, gear materials, design procedure, Gear Lubrication.

Helical Gears: Terminology of Helical Gears, Virtual number of teeth, Tooth proportions, Force analysis, Beam strength, Effective Load on gear tooth, design procedure.

UNIT III BEVEL AND WORM GEAR

Bevel gears - nomenclature, design of gears - based on bending and wear criteria- based on Lewis and Buckingham equation, worm and worm wheel - nomenclature - design procedure

UNIT IV GEAR BOX

Geometric Progression - standard step Ratio- Structural and ray diagrams - Design of sliding mesh gear boxes for machine tools – Design of Speed reducers by using spur and helical gears.

UNIT V MOTION CONTROL: CLUTCHES, BRAKES

Internal – Expanding Rim clutches and Brakes – External – Contracting Rim clutches and Brakes – Band type Clutches – Cone clutches and Brakes.

U19MET63

Course Objectives

- To learn the basic principles of finite element analysis procedure.
- To understand the concepts of discretization •
- To learn the theory and characteristics of finite elements that represent engineering structures.

FINITE ELEMENT ANALYSIS

- To understand the nature of iso-parametric and iso-perimetric elements
- To learn and apply finite element solutions to structural, thermal, dynamic problem

Course Outcomes

After completion of the course, the students will be able to

CO1 - Discuss the concepts behind various methods and weighted residual methods in FEM. (K2)

- CO2 Describe the discretization concepts. (K2)
- CO3 Identify the application and characteristics of FEA elements such as bars, beams, plane and isoperimetric elements, and 3-D element. (K4)
- CO4 Compare the iso-parametric and iso-perimetric elements. (K4)
- CO5 Identify how the finite element method expands beyond the structural domain, for problems involving in structural dynamics, heat transfer and fluid flow. (K4)

UNIT I INTRODUCTION

Finite element method, stress and equilibrium, strain - displacement relations, stress - strain relations, plane stress and plane strain conditions, various and weighted residual methods, concept of potential energy, one dimensional problems.

UNIT II DISCRETIZATION

Element shapes, discretization procedures, assembly of stiffness matrix, bandwidth, node numbering, mesh generation, interpolation functions, and local and global coordinates, convergence requirements, and treatment of boundary conditions.

UNIT III ANALYSIS OF TRUSSES

Finite element modeling coordinates and shape functions, assembly of global stiffness matrix and load vector, finite element equations, treatment of boundary conditions, stress, strain and support reaction calculations. Analysis of Beams: Element stiffness matrix for Hermit beam element, derivation of load vector for concentrated and UDL, simple problems on beams. Modeling of two dimensional stress analysis with constant strain triangles and treatment of boundary conditions, formulation of axisymmetric problems.

UNIT IV HIGHER ORDER AND ISOPARAMETRIC ELEMENTS

One dimensional quadratic and cubic elements in natural coordinates, two dimensional four nodded isoperimetric elements and numerical integration.

UNIT V STEADY STATE HEAT TRANSFER ANALYSIS

One-dimensional analysis of a fin and two dimensional analysis of thin plate, analysis of a uniform shaft subjected to torsion. Dynamic Analysis: Formulation of finite element model, element consistent and lumped mass matrices, evaluation of Eigen values and Eigen vectors, free vibration analysis.

ADVANCED MANUFACTURING TECHNOLOGY **U19MET64**

Course Objectives

- To study about the introduction of unconventional machining processes.
- To study about micro machining process and its material removal mechanism.
- To learn about the micro fabrication.
- To learn about the importance of numerical control machines.
- To impart the knowledge of group technology and flexible manufacturing system.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Acquire knowledge about unconventional machining process and advantages. (K2)

- CO2 Get a broad view about micro machining and simulation of atomic scale level (K2)
- CO3 Get knowledge about modern micro fabrication processes. (K3)
- CO4 Acquire knowledge about numerical control machines. (K2)
- CO5 Become familiarize with group technology and flexible manufacturing systems. (K3)

UNIT I NON TRADITIONAL MACHINING PROCESSES

Introduction to Non-traditional machining, Need for Non-traditional machining process, Comparison between traditional and non-traditional machining. Selection of non-traditional machining processes, Specific advantages, limitations and applications of non-traditional machining processes. Introduction, equipment and material process of EDM, ECM, ECG, AJM and USM

UNIT II MICRO MACHINING PROCESS

Micromachining - definition - principle of mechanical micromachining - Classification of micromachining and Nano finishing processes. Molecular dynamics simulations of machining at atomic scale. Diamond Turn Machining (DTM) - components of DTM - requirements of DTM - material removal mechanism - molecular dynamics - tool geometry

UNIT III MICRO FABRICATION

Materials for Microsystems manufacture - Substrates and Wafers, active substrate materials, silicon and silicon components. Photolithography based micro fabrication processes - Photo resist development. Additive and subtractive techniques - CVD - PVD - etching - chemical, plasma - resists removal. Large aspect ratio micro manufacturing - LIGA, Deep Reactive Ion Etching.

UNIT IV NUMERICAL CONTROL MACHINES

N.C. machines - Introduction. Types, Economics advantages and applications, CNC, DNC (Direct and Distributed). Turning and Machining centres- Description and Types of ATC, applications.NC part programming -Types – Introduction to programming languages, APT programming, Examples on CNC Turning, Milling & Drilling operations, Preliminary study on simulation of CAD based NC programming.

UNIT V GROUP TECHNOLOGY

Group Technology: Part families - parts classification and coding. Examples ROC Algorithm, Applications. Flexible Manufacturing systems - Types, components, planning and implementation Issues. Introduction of Learn and Agile Manufacturing systems – Comparison

THERMAL ENGINEERING LAB

Course Objectives

U19MEP61

- To provide knowledge on the performance of steam turbine and boiler
- To understand the function of orsat apparatus and steam calorimeter
- To understand the working principle of cooling tower, refrigeration and Air-conditioning system
- To apply the knowledge to conduct performance test on of IC engines.
- To provide knowledge on Assembly and Dismantle of IC Engines

Course Outcomes

After completion of the course, the students will be able to

CO1 - Explain the air conditioning, refrigeration system, cooling tower and conduct performance test (K1)

- CO2 Summarize the petrol engine and diesel engine performance (K2)
- CO3 Apply the theoretical and actual knowledge to draw valve timing and port timing diagram (K3)
- CO4 Analyse the heat balance test and retardation test on diesel engines (K4)
- CO5 Analyse the Engine exhaust gas analysis using Orsat apparatus (K4)

List of Experiments

- 1. Valve and port timing diagrams of 4-stroke and 2-stroke IC engines respectively
- 2. Performance test on Single/multi cylinder 4-stroke petrol engines
- 3. Performance test on Single/multi cylinder 4-stroke Diesel engines
- 4. Heat balance test on IC engines
- 5. Retardation and motoring test on 4-stroke engine
- 6. Performance test on Vapour compression Refrigeration system
- 7. Performance test on Air-conditioning system
- 8. Performance test on cooling Tower
- 9. Performance test on Vapour absorption Refrigeration system
- 10. Engine exhaust gas analysis using Orsat apparatus
- 11. Performance test on a boiler
- 12. Performance test on steam turbine
- 13. Determination of dryness fraction of steam using calorimeter
- 14. Assembly/Dismantling of Engines to identify the parts and their position in an engine

COMPUTATIONAL FLUID DYNAMICS LAB

Course Objectives

U19MEP62

- To introduce the students about the science of computational fluid dynamics and heat transfer.
- To teach the students on the concept of boundary layer flow, the principle of viscosity, pressure and flow measurement.
- To apply the simulation techniques on heat flow problems.
- To apply simulation techniques relates to thermal problems.
- To have a clear understanding on FEM software.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the pre and post processing steps in CFD study (K2)
- **CO2** Apply the concepts of boundary layer flow, the principle of viscosity, pressure and flow measurement (K3)
- CO3 Design Optimization using CFD for fluid flow Simulation (K4)
- CO4 Design Optimization using CFD for Thermal Simulation (K4)
- CO5 Evaluate the problems using FEM software (K4)

List of Experiments

- 1. Internal Pipe flow problem using theoretical FEM.
- 2. Analyzing Flow in a System of Pipes using ANSYS.
- 3. Simulate the drag coefficient of a circular cylinder immersed in a uniform fluid stream using ANSYS/Solid Works Flow Simulation.
- 4. Flow of water through a ball valve assembly using ANSYS/Solid Works Flow Simulation.
- 5. Heat Conduction within a Solid using ANSYS.
- 6. Temperature distribution in a fin cooled electronic component using ANSYS.
- 7. 3D Heat Conduction within a Solid-Cell Phone using ANSYS.
- 8. Calculation of the efficiency of the counter flow heat exchanger using ANSYS/Solid Works Flow Simulation.
- 9. Conjugate heat transfer problem using ANSYS/Solid Works Flow Simulation.
- 10. 3D Thermal Analysis, Finned Pipe using ANSYS.
- 11. Thermal stress analysis of piston

U19MEP63

Course Objectives

- To Study and acquire knowledge on various basic machining operations in special purpose machines and its applications in manufacturing of components in the industry.
- To acquire knowledge in operation of Milling machines and Hobbing machines.
- To understand the basic concepts of Tool grinding.
- To impart knowledge on dynamometers for measuring cutting force during milling.
- To acquire knowledge in operation of CNC machines.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Demonstrate the various milling operations. (K2)
- CO2 -. Demonstrate the gear generation profile. (K2)
- CO3 Understand the function and applications of tool cutter grinder. (K2)
- CO4 Distinguish different measuring devices according to the work. (K2)
- CO5 Apply G-code programs to CNC lathes and mills. (K3)

List of Experiments

- 1. Demonstrate of milling machine
- 2. Cube Milling & step milling
- 3. Contour Milling using vertical Milling machine
- 4. Spur Gear cutting in Milling machine
- 5. Helical Gear Cutting in Milling machine
- 6. Demonstrate of Gear hobbing machine
- 7. Gear generation in Hobbing machine
- 8. Tool grinding in tool and Cutter Grinder
- 9. Measurement of cutting forces in Milling / Turning Process
- 10. CNC Part Programming

PROFESSIONAL ELECTIVE - II

U19MEE51

TURBOMACHINERY

Course Objectives

- To study about the classification of turbo machinery in power generation, power absorption and transportation sectors and thermodynamics of fluid flow in turbo machines
- To learn about energy transfer mechanism in turbine, pumps and compressor and analysis of high speed machines
- To acquire knowledge in classification and operational characteristics of steam turbines
- To acquire knowledge in classification and operational characteristics of hydraulic turbines
- To learn about the classification and working of pumps, compressor and its efficiency

Course Outcomes

After completion of the course, the students will be able to

- CO1 Able to describe turbo machines and analysis the fluid flow in machines. (K1)
- CO2 Illustrate the energy exchange mechanism in all turbo machines such as Euler's equation for turbo machinery. (K1)
- CO3 Classify the operation and principle of steam turbines. (K2)
- CO4 Classify the hydraulic turbines and able to design turbine blades. (K6)
- CO5 Perform the preliminary design of turbo machines (pumps, rotary compressors and turbines) and analyse the performance of turbo machinery. (K6)

UNIT I INTRODUCTION

Introduction: Definition of turbo machine, parts of turbo machines, Comparison with positive displacement machines, Classification, Dimensionless parameters and their significance, Effect of Reynolds number, Unit and specific quantities, model studies.

Thermodynamics of fluid flow: Application of first and second law of thermodynamics to turbo machines, Efficiencies of turbo machines, Static and Stagnation states, Incompressible fluids and perfect gases, overall isentropic efficiency, stage efficiency (their comparison) and polytrophic efficiency for both compression and expansion processes. Reheat factor for expansion process

UNIT II ENERGY EXCHANGE IN TURBO MACHINES

Energy exchange in Turbo machines: Euler's turbine equation, Alternate form of Euler's turbine equation, Velocity triangles for different values of degree of reaction, Components of energy transfer, Degree of Reaction, utilization factor, Relation between degree of reaction and Utilization factor, Problems.

General Analysis of Turbo machines: Radial flow compressors and pumps – general analysis, Expression for degree of reaction, velocity triangles, Effect of blade discharge angle on energy transfer and degree of reaction, Effect of blade discharge angle on performance, Theoretical head – capacity relationship, General analysis of axial flow pumps and compressors, degree of reaction, velocity triangles, Problems.

UNIT III STEAM TURBINES

Steam Turbines: Classification, Single stage impulse turbine, condition for maximum blade efficiency, stage efficiency, Need and methods of compounding, Multi-stage impulse turbine, expression for maximum utilization factor. Reaction turbine – Parsons's turbine, condition for maximum utilization factor, reaction staging. Problems.

UNIT IV HYDRAULIC TURBINES

Hydraulic Turbines: Classification, various efficiencies. Pelton turbine – velocity triangles, design parameters, Maximum efficiency. Francis turbine - velocity triangles, design parameters, runner shapes for different blade speeds. Draft tubes- Types and functions. Kaplan and Propeller turbines - velocity triangles, design parameters.

UNIT V PUMPS AND COMPRESSORS

Centrifugal Pumps: Classification and parts of centrifugal pump, different heads and efficiencies of centrifugal pump, Minimum speed for starting the flow, Maximum suction lift, Net positive suction head, Cavitation, Need for priming, Pumps in series and parallel. Problems.

Centrifugal Compressors: Stage velocity triangles, slip factor, power input factor, Stage work, Pressure developed, stage efficiency and surging and problems. Axial flow Compressors: Expression for pressure ratio developed in a stage, work done factor, efficiencies and stalling. Problems.

U19MEE52 POWDER METALLURGY AND SURFACE COATING

Course Objectives

- To make students understand the different types of powder manufacturing methods and applications.
- · To teach the characterization techniques and testing of metal powders
- To make them understand the powder compaction methods and selection of methods
- · To learn about the different types of sintering techniques and uses
- · To understand powder metallurgy application in aerospace, automobile and machining materials

Course Outcomes

After completion of the course, the students will be able to

- CO1 Acquire the knowledge of Powder Metallurgy History, Applications and its manufacturing methods. (K1)
- CO2 Gain knowledge about powder characterizing techniques. (K2,K4)
- CO3 Classify the metal powder compaction methods, adhesives and Surface coatings. (K3)
- CO4 Exemplify the suitable sintering techniques for powder metallurgy. (K3,K4)
- CO5 Appraise the suitable material for different applications. (K5)

UNIT I POWDER MANUFACTURE AND CONDITIONING

Mechanical methods Machine milling, ball milling, atomization, shotting- Chemical methods, condensation, thermal decomposition, carbonyl Reduction by gas-hydride, dehydride process, electro deposition, precipitation from aqueous solution and fused salts, hydrometallurgical method. Physical methods: Electrolysis and atomisation processes, types of equipment, factors affecting these processes, examples of powders produced by these methods, applications, powder conditioning, heat treatment, blending and mixing, types of equipment, types of mixing and blending, Self- propagating high-temperature synthesis (SHS), sol-gel synthesis- Nano powder production methods.

UNIT II CHARACTERISTICS AND TESTING OF METAL POWDERS

Sampling, chemical composition purity, surface contamination etc. Particle size and its measurement, Principle and procedure of sieve analysis, microscopic analysis: sedimentation, elutriation, permeability. Adsorption methods and resistivity methods: particle shape, classifications, microstructure, specific surface area, apparent and tap density, green density, green strength, sintered compact density, porosity, shrinkage.

UNIT III POWDER COMPACTION

Pressure less compaction: slip casting and slurry casting. Pressure compaction- lubrication, single ended and double ended compaction, isostatic pressing, powder rolling, forging and extrusion, explosive compaction.

UNIT IV SINTERING

Stage of sintering, property changes, mechanisms of sintering, liquid phase sintering and infiltration, activated sintering, hot pressing and Hot isostatic Pressing (HIP), vacuum sintering, sintering furnaces-batch and continuous-sintering atmosphere, Finishing operations – sizing, coining, repressing and heat treatment, special sintering processes- microwave sintering, Spark plasma sintering, Field assisted sintering, Reactive sintering, sintering of nanostructured materials.

UNIT V APPLICATIONS

Major applications in Aerospace, Nuclear and Automobile industries- Bearing Materials-types, Self-lubrication and other types, Methods of production, Properties, Applications. Sintered Friction Materials-Clutches, Brake linings, Tool Materials- Cemented carbides, Oxide ceramics, Cermets- Dispersion strengthened materials

U19MEE53

Course Objectives

- To describe about sustainable manufacturing, green product and process
- To study the various principles of green manufacturing
- To study about the semiconductor manufacturing and closed loop production systems
- To study about the nano manufacturing and its technologies
- To describe about the packaging and supply chain

Course Outcomes

After completion of the course, the students will be able to

- **CO1 -** Describe the basic design concepts, methods, tools, the key technologies and the operation of sustainable green manufacturing. **(K1)**
- **CO2** Appropriate the principles, techniques and methods to customize the learned generic concepts to meet the needs of a particular Industry/enterprise. **(K3)**
- CO3 Recognize the strategies for the purpose of satisfying a set of given sustainable green manufacturing requirements. (K1)
- CO4 Use the nanotechnologies in real time applications. (K3)
- CO5 Design the rules and processes to meet the market need and the green manufacturing requirements by selecting and evaluating suitable technical, managerial / project management and supply chain management scheme. (K5,K6)

UNIT I

Introduction to Green Manufacturing: Why Green Manufacturing, Motivations and Barriers to Green Manufacturing, Environmental Impact of Manufacturing, Strategies for Green Manufacturing, Sustainable green manufacturing The Social, Business, and Policy Environment for Green Manufacturing: Introduction, The Social Environment-Present Atmosphere and Challenges for Green Manufacturing, The Business Environment: Present Atmosphere and Challenges, The Policy Environment - Present Atmosphere and Challenges for Green Manufacturing

UNIT II

Metrics for Green Manufacturing" Introduction, Overview of Currently Used Metrics, Overview of LCA Methodologies, Metrics Development Methodologies, Outlook and Research Needs.

Green Supply Chain: Motivation and Introduction, Definition, Issues in Green Supply Chains (GSC), Techniques/Methods of Green Supply Chain, Future of Green Supply Chain.

Principles of Green Manufacturing: Introduction, Background, and Technology Wedges, Principles, Mapping Five Principles to Other Methods and Solutions.

UNIT III

Closed-Loop Production Systems: Life Cycle of Production Systems, Economic and Ecological Benefits of Closed Loop Systems, Machine Tools and Energy Consumption, LCA of Machine Tools, Process Parameter Optimization, Dry Machining and Minimum Quantity Lubrication, Remanufacturing, Reuse, Approaches for Sustainable Factory Design.

Semiconductor Manufacturing: Overview of Semiconductor Fabrication, Micro fabrication Processes, Facility Systems, and Green Manufacturing in the Semiconductor Industry: Concepts and Challenges, Use-Phase Issues with Semiconductors, Example of Analysis of Semiconductor Manufacturing.

UNIT IV

Environmental Implications of Nano-manufacturing: Introduction, Nano-manufacturing Technologies, Conventional Environmental Impact of Nano-manufacturing, Unconventional Environmental Impacts of Nano-manufacturing, Life Cycle Assessment (LCA) of Nanotechnologies. Green Manufacturing Through Clean Energy Supply Introduction, Clean Energy Technologies, Application Potential of Clean Energy Supplying Green Manufacturing

UNIT V

Packaging and the Supply Chain: A Look at Transportation Introduction, Background, Recommended Method to Determine Opportunities for Improved Pallet Utilization, Discussion.

Enabling Technologies for Assuring Green Manufacturing: Motivation, Process Monitoring System, Applying Sensor Flows in Decision Making: Automated Monitoring, Case Study.

U19MEE54

Course Objectives

- To recognize the performance of hydraulic components.
- To recognize the performance of pneumatic components.
- To understand the circuit design methodology and various types of fluid power circuits.
- To identify the various components related to electro-pneumatic and hydraulic circuits.
- To demonstrate the application, basic troubleshooting and maintenance for fluid power system.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Demonstrate the components and performance of hydraulic fluid power system. (K2)
- CO2 Demonstrate the components and performance of pneumatic fluid power system. (K2)
- CO3 Illustrate the circuit design for fluid power system using various types of circuits. (K5)
- CO4 Apply the various components to design electro-pneumatic and hydraulic circuits. (K3)
- CO5 Perform basic maintenance and troubleshooting in fluid power systems. (K2)

UNIT I HYDRAULIC COMPONENTS

Introduction to fluid power system-Pascal's Law-Hydraulic fluids-Hydraulic pumps - Gear, Vane and Piston pumps-Pump Performance-Characteristics and Selection-actuators-valves-pressure control-flow control and direction control valves-Hydraulic accessories-Hydraulic Accumulator.

UNIT II PNEUMATIC COMPONENTS

Introduction to Pneumatics-Compressors-types-Air treatment-FRL unit-Air dryer-Control valves-Logic valves-Time delay valve and quick exhaust valve-Pneumatic Sensors-types-characteristics and applications.

UNIT III FLUID POWER CIRCUITS

Circuit Design Methodology-Sequencing circuits-Overlapping signals - Cascade method - KV Map method-Industrial Hydraulic circuits - Double pump circuits-Speed control Circuits-Regenerative circuits-Safety circuits-Synchronizing circuits - Accumulator circuits.

UNIT IV ELECTRO - PNEUMATICS AND HYDRAULICS

Relay, Switches-Solenoid - Solenoid operated valves -Timer-Counter - Servo and proportional control - Microcontroller and PLC based control-Design of electro-pneumatic and hydraulic circuits.

UNIT V APPLICATION, MAINTENANCE AND TROUBLE SHOOTING

Development of hydraulic / pneumatic circuits applied to machine tools-Presses-Material handling systems-Automotive systems-Packaging industries-Manufacturing automation-Maintenance and troubleshooting of Fluid Power circuits-Safety aspects involved.

| U19MEE55 | IOT AND SMART MANUFACTURING | L | Т | Ρ | С | Hrs | |
|-------------------|-----------------------------|---|---|---|---|-----|--|
| UT9WIEE35 | IOT AND SWART WANUFACTURING | 3 | 0 | 0 | 3 | 45 | |
| Course Objectives | | | | | | | |

- To present a problem oriented in depth knowledge of IOT and Smart Manufacturing.
- To address the underlying concepts and methods behind IOT and Smart Manufacturing.
- To learn about the smart manufacturing distinguish its signification in comparison to conventional manufacturing.
- To Study about tools for Smart Manufacturing and its application.
- To study about Smart and Empowered working.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Identify different areas of IOT and Smart Manufacturing. (K1)

- CO2 Acquire a broad view about automatic storage management and its governance. (K2)
- CO3 Get a knowledge about smart manufacturing. (K1)
- CO4 Attain knowledge about smart design and find applications of all the areas in daily life. (K6)
- CO5 Become familiarize with elimination of error with smart tools in operations. (K5)

UNIT I INTERNET OF THINGS

The Internet of Things: An overview; Design Principles for Connected Devices; Internet Principles. Thinking about Prototyping – Costs versus ease of prototyping, prototyping and Production, open source versus Closed Source. Proto typing Embedded devices - Electronics, Embedded Computing Basics, Arduino/ Raspberry Pi/ Beagle Bone Black/ etc., Electric Imp and other notable platforms Prototyping of Physical Design. Prototyping online Components - Getting Started with an API, Writing a New API, Real Time Reactions, Other Protocols. Techniques for Writing Embedded Code – Memory Management, Performance and Battery Life, Libraries and debugging.

UNIT II AUTOMATIC STORAGE MANAGEMENT AND SECURITY

Automatic Storage Management in a Cloud World - Introduction to Cloud, Relational Databases in the Cloud, Automatic Storage Management in the Cloud. Smart Connected System Design Case Study Internet of Things Privacy, Security and Governance Introduction, Overview of Governance, Privacy and Security Issues, Contribution from FP7 Projects, Security, Privacy and Trust in IoT-Data-Platforms for Smart Cities, First Steps Towards a Secure Platform, Smartie Approach. Data Aggregation for the IoT in Smart Cities, Security

UNIT III INTRODUCTION TO SMART MANUFACTURING

What is "smart manufacturing" really and how does it differ from conventional/legacy manufacturing-Smart Manufacturing Processes- Three Dimensions: (1) Demand Driven and Integrated Supply Chains; (2) Dynamically Optimized Manufacturing Enterprises (plant + enterprise operations);(3) Real Time, Sustainable Resource Management (intelligent energy demand management, production energy optimization and reduction of GHG)

UNIT IV SMART DESIGN/FABRICATION

Smart Design/Fabrication - Digital Tools, Product Representation and Exchange Technologies and Standards, Agile (Additive) Manufacturing Systems and Standards. Mass Customization, Smart Machine Tools, Robotics and Automation (perception, manipulation, mobility, autonomy), Smart Perception - Sensor networks and Devices. Smart Applications: Online Predictive Modelling, Monitoring and Intelligent Control of Machining/Manufacturing and Logistics/Supply Chain Processes; Smart Energy Management of manufacturing processes and facilities

UNIT V SMART AND EMPOWERED WORKERS

Eliminating Errors and Omissions, Deskilling Operations, Improving Speed/Agility, Improving Information Capture/Traceability, Improving Intelligent Decision Making under uncertainty Assisted/Augmented Production, Assisted/Augmented Assembly, Assisted/Augmented Quality, Assisted/Augmented Maintenance, Assisted/Augmented Warehouse Operations and Assisted Training

U19MEE61

AUTOMOBILE ENGINEERING

| L | Т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To explain various types of automobiles, their power packs and types of vehicle bodies.
- To analyze the various types of transmission systems for vehicle.
- To analyze the working parameters of various braking and suspension system in a vehicle.
- To study various alternate fuels and its properties.
- To understand various electric, hybrid vehicles and Bharat standards.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Demonstrate the functions chassis, body and frame. (K3)

- CO2 Interrupt the knowledge on the types of transmission systems. (K4)
- CO3 Establish the different suspension and braking systems. (K4)
- CO4 Obtain detailed knowledge about alternate fuels. (K3)
- CO5 Acquire knowledge about Bharat standards. (K3)

UNIT I INTRODUCTION TO AUTOMOBILE AND TYPES

An overview of different types of automobiles - Trends in automobile design - Classification of internal combustion engines - Engine components, Materials and functions - Electronic engine management system for SI and CI engines - Car body construction - General consideration relating to chassis layout - Frame types & materials -Rolling, wind and gradient resultant-factors affecting resistance - Mono point and Multi point injection system -Supercharging - Turbo Chargers – EGR - Catalytic converter - Pollution Norms.

UNIT II CLUTCH AND TRANSMISSION SYSTEMS

Requirement of transmission system - clutches - plate clutches - semi automatic & automatic clutches - Gear box: manual shift four speed and positive speed gear boxes - synchromesh devices -fluid transmission - fluid flywheel and torque converter-automatic transmission - drive line - differential, conventional and non-slip types - drive axle-Propeller shaft-Universal joint - Tyres: materials and types - Battery: types.

UNIT III SUSPENSION AND BRAKING SYSTEMS

Suspension system - requirements - rigid axle and independent suspension - types of suspension - leaf spring coil spring - torsion rod and air suspension - shock absorbers. Front axle: types - front wheel geometry conditions for true rolling. Ackerman and Davis steering -steering linkages - steering gearbox-power and power assisted steering - Wheel alignment - Braking system - hydraulic braking systems - drum type and disc type brakes - power and power assisted brakes - factors affecting brake performance - tests on brakes -ABS- skid and skid prevention.

UNIT IV ALTERNATE FUELS

Fuels: classification, properties - Liquid and gaseous fuels - Alternate fuels - Alcohol, LPG, Natural gas, CNG, Gasohol, Bio-diesel and Hydrogen - Combustion & emission characteristics of alternative fuels in SI and CI engines.

UNIT V RECENT TRENDS IN AUTOMOBILE TECHNOLOGY

Electric vehicles: classification, Hybrid vehicles - Automotive Sensors & ECU - HCCI and RCCI engines -Autonomous vehicle - Bharath Standards (BS) and its norms - Automotive transmission - Exhaust emissions analysis and its control - Manufacturing trends in automobile industry.

U19MEE62

| L | Т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To expose student to widely used techniques in the numerical solution of fluid equations. •
- To develop an understanding for the major theories, approaches and methodologies used in CFD.
- To understand the transformation of coordinates and principles of grid generation.
- To gain experience in the application of CFD analysis to real engineering designs.
- To expose students to various case studies applied to heat and fluid flow.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Solve numerically the governing equations for fluid flow. (K3)
- CO2 Analyze the numerical integration the linear algebra methods in various methods. (K4)
- CO3 Apply grid generation principles for various problems in CAD interface. (K3)
- CO4 Solve numerically a heat transfer and fluid flow problem. (K3)
- CO5 Acquire FEM problems in fluid flow and heat transfer by various case studies. (K3)

UNIT I EQUATIONS OF FLUID DYNAMICS

Basic concepts Eulerarian and Lagrangian methods of describing fluid flow motion, acceleration and deformation of fluid particle, vorticity. Laws governing fluid motion, continuity, Navier - stokes & energy equations. Boundary layer equation, Euler equations, potential flow equations, Bernoulli's equation and vorticity transport equation. Initial and boundary conditions. Classification of equation of motions – hyperbolic, parabolic, elliptic.

UNIT II MATHEMATICAL PRELIMINARIES

Numerical integration. Review of linear algebra, solution of simultaneous linear algebraic equations - matrix inversion, solvers - direct methods, elimination methods, ill conditioned systems; Gauss- Sidel method, successive over relaxation method.

UNIT III GRID GENERATION

Transformation of coordinates. General principles of grid generation - structured girids in two and three dimensions, algebraic grid generation, differential equations based grid generation; Elliptic grid generation, algorithm, Grid clustering, Grid refinement, Adaptive grids, Moving grids. Algorithms, CAD interfaces to grid generation. Techniques for complex and large problems: Multi block methods.

UNIT IV FINITE DIFFERENCE DISCRETIZATION

Elementary finite difference coefficients, basic aspects of finite difference equations, consistency, explicit and implicit methods, errors and stability analysis. Stability of elliptic and hyperbolic equations. Fundamentals of fluid flow modelling-conservative property, upwind scheme, transporting property, higher order unwinding. Finite difference applications in heat transfer – conduction, convection.

UNIT V FINITE VOLUME METHOD

Introduction, Application of FVM in diffusion and convection problems, NS equations - staggered grid, collocated grid, SIMPLE algorithm. Solution of discretised equations using TDMA. Finite volume methods for unsteady problems - explicit schemes, implicit schemes. Finite Element Method: Introduction. Weighted residual and variational formulations. Interpolation in one-dimensional and two-dimensional cases. Application of FEM to ID and 2D problems in fluid flow and heat transfer

Course Objectives • To expose the concepts of fuzzy set theory and its operations. To provide adequate knowledge about modeling and control of fuzzy logic. To understand the different hybrid control schemes and its case study. To provide adequate knowledge about modeling and control of neural networks. To understand the ANN structures and online learning algorithms. **Course Outcomes** After completion of the course, the students will be able to CO1 - Generalize the concept of fuzziness involved in various systems and fuzzy set theory. (K2) CO2 - Apply the fuzzy logic control and adaptive fuzzy logic to design the fuzzy control. (K3) CO3 - Utilize the hybrid control schemes in Neuro Fuzzy Systems. (K3) CO4 - Acquire the concepts of Neural Networks for modeling and controls. (K3) CO5 - Execute the knowledge of ANN structures and online training algorithms. (K3) UNIT I FUZZY SET THEORY (9 Hrs) Fuzzy set theory- fuzzy sets- operation on fuzzy sets- Scalar cardinality, fuzzy cardinality, union and intersection

complement (Yeger and sugeno), equilibrium points, aggregation, projection, composition, cylindrical extension, fuzzy relation- fuzzy membership functions

UNIT II FUZZY LOGIC FOR MODELING AND CONTROL

Modelling of nonlinear systems using fuzzy models – TSK model – fuzzy logic controller- fuzzification – knowledge base- decision making logic - de fuzzification - adaptive fuzzy systems - Familiarization with fuzzy logic toolbox

UNIT III HYBRID CONTROL SCHEMES

Fuzzification and rule base using ANN - Neuro fuzzy systems ANFIS - Fuzzy neuron - Introduction to GA -Optimization of membership function and rule base using Genetic algorithm - Introduction to support vector machine - particle swarm optimization - case study - familiarization with ANFIS toolbox

UNIT IV NEURAL NETWORKS FOR MODELLING AND CONTROL

Modelling of non-linear systems using ANN- generation of training data – optimal architecture – model validation - control of non-linear systems using ANN - direct and indirect neuro control schemes - adaptive neuro controller - familiarization with neural network toolbox

UNIT V ANN STRUCTURES AND ONLINE TRAINING ALGORITHMS

Recurrent neural network (RNN) - Adaptive resonance theory (ART) based network- Radial basis function network-Online learning algorithms: BP through time - RTRL algorithms - Least Mean square algorithm - Reinforcement learning.

U19MEE64

Course Objectives

- To understand the basic needs, principle and applications of rapid prototyping.
- To understand the design tools of additive manufacturing.
- To identify the materials, process and application of Photo polymerization and Powder Bed Fusion.
- To learn the principles of Extrusion Based and Sheet Lamination process.
- To understand the application of Beam Deposition process.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the role of additive manufacturing in the design process and the implications for design. (K2)
- CO2 Apply the design tools in additive manufacturing for medical applications. (K3)
- CO3 Analyze the processes of Photo polymerization and Powder Bed Fusion. (K4)
- CO4 Illustrate extrusion based process systems. (K4)
- CO5 Develop the additive manufacturing process and materials applications. (K5)

UNITI INTRODUCTION

Overview – Need - Development of Additive Manufacturing Technology - Principle – AM Process Chain-Classification – Rapid Prototyping- Rapid Tooling – Rapid Manufacturing – Applications- Benefits –Case studies.

UNIT II DESIGN FOR ADDITIVE MANUFACTURING

Design tools: Data processing - CAD model preparation – Part orientation and support structure generation – Model slicing –Tool path generation- Design for Additive Manufacturing: Concepts and objectives- AM unique capabilities – DFAM for part quality improvement- Customised design and fabrication for medical applications.

UNIT III PHOTO POLYMERIZATION AND POWDER BED FUSION PROCESSES

Photo polymerization: SLA-Photo curable materials – Process - Advantages and Applications. Powder Bed Fusion: SLS-Process description – powder fusion mechanism – Process Parameters – Typical Materials and Application. Electron Beam Melting.

UNIT IV EXTRUSION BASED AND SHEET LAMINATION PROCESSES

Extrusion Based System: FDM-Introduction – Basic Principle – Materials – Applications and Limitations – Bioextrusion. Sheet Lamination Process: LOM- Gluing or Adhesive bonding – Thermal bonding.

UNIT V PRINTING PROCESSES AND BEAM DEPOSITION PROCESSES

Droplet formation technologies – Continuous mode – Drop on Demand mode – Three Dimensional Printing – Advantages – Bioplotter - Beam Deposition Process: LENS- Process description – Material delivery – Process parameters – Materials – Benefits – Applications.

Course Objectives

U19MEE65

- · To impart knowledge on the global warming, the impact of climate change on society
- To recommend adaptation and mitigation measures
- To understand about the climate change effects on environment
- To provide knowledge on mitigating climate change
- · To differentiate alternate and renewable fuels

Course Outcomes

After completion of the course, the students will be able to

- **CO1** An insight into carbon cycle, physical basis of the natural greenhouse effect, including the meaning of the term radiative forcing, climate change, global warming and measures **(K3)**
- CO2 Adapt and mitigate the impacts of climate change. (K2)
- **CO3** Understand the growing scientific consensus established through the IPCC as well as the complexities and uncertainties (K3)
- CO4 Plan climate change mitigation and adaptation projects (K2)
- CO5 Use of alternate fuels and renewable energy (K2)

UNIT I INTRODUCTION

Atmosphere – weather and Climate – climate parameters – Temperature, Rainfall, Humidity, Wind – Global ocean circulation – El Nino and its effect – Carbon cycle

UNIT II ELEMENTS RELATED TO CLIMATE

Greenhouse gases – Total carbon dioxide emissions by energy sector – industrial, commercial, transportation, residential – Impacts – air quality, hydrology, green space – Causes of global and regional climate change – Changes in patterns of temperature, precipitation and sea level rise – Greenhouse effect

UNIT III IMPACTS OF CLIMATE CHANGE

Effects of Climate Changes on living things – health effects, malnutrition, human migration, socioeconomic impacts- tourism, industry and business, vulnerability assessment- infrastructure, population and sector – Agriculture, forestry, human health, coastal areas

UNIT IV MITIGATING CLIMATE CHANGE

IPCC Technical Guidelines for Assessing Climate Change Impact and Adaptation -Identifying adaption options – designing and implementing adaption measures – surface albedo environment reflective roofing and reflective paving enhancement of evapotranspiration – tree planting programme – green roofing strategies – energy conservation in buildings – energy efficiencies – carbon sequestration.

UNIT V ALTERNATE FUELS AND RENEWABLE ENERGY

Energy source – coal, natural gas – wind energy, hydropower, solar energy, nuclear energy geothermal energy – biofuels – Energy policies for a cool future – Energy Audit.

| Outcomes: | 2. | Acquire knowledge about battery design, properties | |
| • • • • • • • • • • | 3. | To gain knowledge about performance of DC and AC electrical m | achines |
| | 4. | Acquire knowledge about transmission and braking system | |
| | 5. | To gain knowledge about hybrid electric vehicles. | |
| UNIT I ELECTRIC V | EHICLE | S | 9 Hours |

UNIT I 9 Introduction, Components, vehicle mechanics - Roadway fundamentals, vehicle kinetics, Dynamics of vehicle motion - Propulsion System Design. **UNITII BATTERY** 9 Hours

Basics – Types, Parameters – Capacity, Discharge rate, State of charge, state of Discharge, Depth of Discharge, Technical characteristics, Battery pack Design, Properties of Batteries.

UNIT III DC & AC ELECTRICAL MACHINES

Motor and Engine rating, Requirements, DC machines, Three phase A/c machines, Induction machines, permanent magnet machines, switched reluctance machines.

UNITIV ELECTRIC VEHICLE DRIVE TRAIN & HYBRID VEHICLES

Transmission configuration, Components – gears, differential, clutch, brakes regenerative braking, motor sizing. Types – series, parallel and series, parallel configuration – Design – Drive train, sizing of components. UNITV MASS RAPID TRANSIT SYSTEM (MRTS) 9 Hours

MRTS Introduction – Types of MRTS – Metro rail transmit system - Mono rail transmit system - Light rail transmit Total: 45 hours system

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE (An Autonomous Institution)

Puducherry

B.TECH. MECHANICAL ENGINEERING

ACADEMIC REGULATIONS 2020 (R-2020)

CURRICULUM AND SYLLABI

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting edge technologies with best practices.

M2: Research and Innovation:

To foster value-based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT VISION AND MISSION

Vision

The Mechanical Engineering department strives to be recognized as an excellent academic and research center for creating outstanding Engineers, Entrepreneurs and Leaders

Mission

M1: Professional Skills:

To provide quality education to enhance students inter-personal and intra-personal skills

M2: State-of-art facilities:

To render excellent infrastructure facilities and laboratories to excel as skilled professionals

M3: Research Exposure:

To Strengthen Research and Development within the department through industrial associations

M4: Employability:

To put enthusiastic exertions to enhance employability and entrepreneurship skills of students

M5: Human Values:

To empower students with professional ethics and human values to serve the society

PROGRAMME OUTCOMES (POs)

PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Technical knowledge

To foster our young graduates with cogent technical knowledge so as to make them employable

PEO2: Real-Time Applications

To apply the acquired knowledge in the field of Mathematics, Science and Engineering in developing real-time projects

PEO 3: Design Ability

To design a system, component or process to meet the desired needs within realistic constraints such as manufacturing, economy, environmental sustainability, social, health and safety

PEO 4: Ethics

To prepare the students to become entrepreneurs with professional attitude in the broader ethical perspective

PEO 5: Life - Long Learning

To craft curiosity among students for life-long learning through self-study

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO 1: Solving real time problems

To develop capability to identify, analyze and solve engineering problems in concern to mechanical engineering along with associated engineering streams.

PSO 2: Pursue Professional career

To bestow quality learning environment to pursue professional career in mechanical engineering with integrated knowledge

PSO 3: Concentrating on skill development

To enflame the student's technical capabilities in engineering design process, intra and inter personnel, linguistic and higher level professional skills required in engineering.

STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

| SI. No | Course Category | Breakdown of Credits |
|--------|--|----------------------|
| 1 | Humanities and Social Science (HS) | 7 |
| 2 | Basic Sciences(BS) | 22 |

Professional Electives are to be selected from the list given in Annexure I

\$ Open electives are to be selected from the list given in Annexure II

** Certification courses are to be selected from the list given in Annexure III

* Skill Development Courses (2 and 4) are to be selected from the list given in Annexure IV

ANNEXURE - II

OPEN ELECTIVE COURSES

| S. No | Course Code | Course Title | Offering Department | Permitted Departments | |
|--|-------------|---|------------------------|--|--|
| Open Elective – I (Offered in Semester IV) | | | | | |
| 1 | U20EEO401 | Solar Photovoltaic Fundamental and applications | EEE | ECE, ICE, MECH, CIVIL, Mechatronics, CCE | |
| 2 | U20EEO402 | Electrical Safety | EEE | ECE, ICE, MECH, CIVIL, Mechatronics, CCE, BME, IT, CSE, FT | |
| 3 | U20ECO401 | Engineering Computation with MATLAB | ECE | EEE, ICE, MECH, CIVIL, CCE, BME, AI&DS, Mechatronics | |
| 4 | U20ECO402 | Consumer Electronics | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics, FT | |
| 5 | U20CSO401 | Web Development | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics | |
| 6 | U20CSO402 | Analysis of Algorithms | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics | |
| 7 | U20ITO401 | Database System: Design & Development | IT | EEE, ECE, ICE, CCE, BME | |
| 8 | U20ITO402 | R programming | IT | EEE, ECE, ICE, CCE, BME, MECH, Mechatronics | |
| 9 | U20ICO401 | Sensors and Transducers | ICE | ECE, CSE, IT, MECH, CIVIL, CCE, AI&DS, FT | |
| 10 | U20ICO402 | Control System Engineering | ICE | CSE, IT, MECH, CCE, AI&DS | |
| 11 | U20MEO401 | Rapid Prototyping | MECH | EEE, ECE, ICE, CIVIL, BME, FT | |
| 12 | U20MEO402 | Material Handling System | MECH | EEE, ICE, CIVIL, Mechatronics | |
| 13 | U20MEO403 | Industrial Engineering for Textile | MECH | FT | |
| 14 | U20CEO401 | Energy and Environment | CIVIL | EEE, ECE, MECH, BME, IT, Mechatronics, FT | |
| 15 | U20CEO402 | Building Science and Engineering | CIVIL | EEE, MECH, BME | |
| 16 | U20BMO401 | Medical Electronics | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, Mechatronics, AI&DS | |
| 17 | U20BMO402 | Telemedicine | BME | EEE, ECE, CSE, IT, ICE, CCE, AI&DS | |
| 18 | U20CCO401 | Basic DBMS | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME | |
| 19 | U20CCO402 | Introduction to Communication Systems | CCE | EEE, CSE, IT, MECH, CIVIL, ICE, Mechatronics | |
| 20 | U20ADO401 | Knowledge Representation and Reasoning | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics | |
| 21 | U20ADO402 | Introduction to Data Science | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics | |

| Open | Elective – II / Ope | en Elective – III | | |
|--------|-------------------------|--|-------|--|
| 1 | U20HSO501/ U20HSO601 | Product Development and Design | MBA | Common to B. Tech |
| 2 | U20HSO502/ U20HSO602 | Intellectual Property and Rights | MBA | (Offered in Semester V for EEE, ECE, ICE, CIVIL, |
| 3 | U20HSO503/ U20HSO603 | Marketing Management and Research | MBA | BME, CCE, FT) |
| 4 | U20HSO504/ U20HSO604 | Project Management for Engineers | MBA | (Offered in Semester VI for |
| 5 | U20HSO505/ U20HSO605 | Finance for Engineers | MBA | CSE, IT, MECH, Mechatronics, AI&DS) |
| (Offer | | en Elective – III for CSE, IT, MECH, Mechatronics, AI&D for EEE, ECE, ICE, CIVIL, BME, CCE, F1 | , | |
| 1 | U20EEO503/ U20EEO603 | Conventional and Non-Conventional Energy Sources | EEE | ECE, ICE, MECH, CIVIL, BME, Mechatronics, CCE, AI&DS, FT |
| 2 | U20EEO504/ U20EEO604 | Industrial Drives and Control | EEE | ECE, ICE, MECH, Mechatronics, AI&DS |
| 3 | U20ECO503/ U20ECO603 | Electronic Product Design and Packaging | ECE | EEE, CSE, IT, ICE, MECH, CCE, BME, Mechatronics |
| 4 | U20ECO504/ U20ECO604 | Automotive Electronics | ECE | EEE, ECE, ICE, MECH |
| 5 | U20CSO503/ U20CSO603 | Platform Technology | CSE | EEE, ECE, ICE, MECH, CIVIL, CCE, BME, AI&DS |
| 6 | U20CSO504/ U20CSO604 | Graphics Designing | CSE | EEE, ECE, ICE, MECH, CIVIL, BME, FT |
| 7 | U20ITO503/ U20ITO603 | Essentials of Data Science | IT | EEE, ECE, ICE, MECH, CIVIL, BME |
| 8 | U20ITO504/ U20ITO604 | Mobile App Development | IT | EEE, ECE, ICE, MECH, CIVIL, BME, Mechatronics, AI&DS |
| 9 | U20ICO503/ U20ICO603 | Fuzzy logic and neural networks | ICE | CSE, IT, CIVIL, BME, AI&DS |
| 10 | U20ICO504/ U20ICO604 | Measurement and Instrumentation | ICE | ECE, Mechatronics |
| 11 | U20MEO504/ U20MEO604 | Heating, ventilation and air conditioning system (HVAC) | MECH | EEE, ECE, ICE, CIVIL |
| 12 | U20MEO505/ U20MEO605 | Creativity Innovation and New Product Development | MECH | EEE, ECE, ICE, CIVIL, BME, Mechatronics |
| 13 | U20CEO503/ U20CEO603 | Disaster Management | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 14 | U20CEO504/ U20CEO604 | Air Pollution and Solid Waste Management | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 15 | U20BMO503/ U20BMO603 | Biometric Systems | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, Mechatronics |
| 16 | U20BMO504/ U20BMO604 | Medical Robotics | BME | EEE, ECE, CSE, IT, ICE, CCE, MECH, CIVIL , Mechatronics |

| 17 | U20CCO503/ U20CCO603 | Network Essentials | CCE | EEE, MECH, CIVIL, ICE, Mechatronics, BME |
|------|-------------------------|--|--------------|--|
| 18 | U20CCO504/ U20CCO604 | Web Programming | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 19 | U20ADO503/ U20ADO603 | Principle of Artificial Intelligence and Machine Learning | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE |
| 20 | U20ADO504/ U20ADO604 | Data science Application of Vision | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| 21 | U20MCO501/ U20MCO601 | Industrial Automation for Textile | Mechatronics | FT |
| Open | Elective – IV (Offe | red in Semester VII) | | |
| 1 | U20EEO705 | Hybrid and Electrical Vehicle | EEE | ECE, Mechatronics, MECH |
| 2 | U20EEO706 | Electrical Energy Conservation and auditing | EEE | ECE, ICE, MECH, CIVIL, BME, Mechatronics, CCE, AI&DS |
| 3 | U20ECO705 | IoT and its Applications | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, FT |
| 4 | U20ECO706 | Cellular and Mobile Communications | ECE | EEE, ICE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics |
| 5 | U20CSO705 | Artificial Intelligence | CSE | EEE, ICE, CIVIL, CCE, MECH, FT |
| 6 | U20CSO706 | Cloud Technology and its Applications | CSE | EEE, ICE, MECH, CIVIL, CCE, BME, Mechatronics |
| 7 | U20ITO705 | Automation Techniques & Tools- DevOps | IT | EEE, ECE, ICE, CSE, MECH, CIVIL, CCE, BME, Mechatronics, AI&DS |
| 8 | U20ITO706 | Augmented and Virtual Reality | IT | EEE, ICE, MECH, CIVIL, CCE, BME, AI&DS |
| 9 | U20ICO705 | Process Automation | ICE | EEE, ECE, CSE, MECH, IT, CIVIL, CCE, BME, Mechatronics |
| 10 | U20ICO706 | Virtual Instrumentation | ICE | EEE, ECE, MECH, Mechatronics |
| 11 | U20MEO706 | Principles of Hydraulic and Pneumatic System | MECH | EEE, ECE, ICE, CIVIL |
| 12 | U20MEO707 | Supply Chain Management | MECH | EEE, ECE, CIVIL, Mechatronics |
| 13 | U20CEO705 | Energy Efficient Buildings | CIVIL | EEE, ECE, MECH |
| 14 | U20CEO706 | Global Warming and Climate Change | CIVIL | EEE, ECE, CSE, IT, ICE, MECH, BME, CCE, AI&DS, FT |
| 15 | U20MCO702 | Building Automation | Mechatronics | MECH, CIVIL |
| 16 | U20MCO703 | Automation in Manufacturing Systems | Mechatronics | MECH, CIVIL |

| 17 | U20BMO705 | Internet of Things for Healthcare | BME | EEE, ECE, ICE, CCE |
|----|-----------|--|-------|--|
| 18 | U20BMO706 | Telehealth Technology | BME | EEE, ECE, ICE, CCE |
| 19 | U20CCO705 | Data Science using python | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 20 | U20CCO706 | Mobile Applications Development using Android | CCE | EEE, ECE, MECH, CIVIL, ICE, Mechatronics, BME |
| 21 | U20ADO705 | Data Science Application of NLP | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics. |
| 22 | U20ADO706 | Artificial Intelligence Applications | AI&DS | EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME |
| 23 | U20HSO706 | Industrial Safety and Human Resource Management | MBA | FT |
| 24 | U20HSO707 | Operation Research in Textile Industry | MBA | FT |
| 25 | U20HSO708 | Global marketing and Sourcing Strategies | MBA | FT |
| 26 | U20HSO709 | Fashion Advertising and sales promotions | MBA | FT |
| 27 | U20HSO710 | Luxury Brand management | MBA | FT |
| 28 | U20HSO711 | Fashion Retail Store Operations | MBA | FT |

ANNEXURE-III

EMPLOYABILITY ENHANCEMENT COURSES - (A) CERTIFICATION COURSES

| SI. No. | Course Code | Course Title |
|---------|-------------|---|
| 1 | U20MECX01 | 3ds Max |
| 2 | U20MECX02 | Advance Structural Analysis of Building using ETABS |
| 3 | U20MECX03 | Advanced Java Programming |
| 4 | U20MECX04 | Advanced Python Programming |
| 5 | U20MECX05 | Analog System Lab Kit |
| 6 | U20MECX06 | Android Medical App Development |
| 7 | U20MECX07 | Android Programming |
| 8 | U20MECX08 | ANSYS -Multiphysics |
| 9 | U20MECX09 | Artificial Intelligence |
| 10 | U20MECX10 | Artificial Intelligence and Edge Computing |
| 11 | U20MECX11 | Artificial Intelligence in Medicines |
| 12 | U20MECX12 | AutoCAD for Architecture |
| 13 | U20MECX13 | AutoCAD for Civil |
| 14 | U20MECX14 | AutoCAD for Electrical |
| 15 | U20MECX15 | AutoCAD for Mechanical |
| 16 | U20MECX16 | Azure DevOps |

| 17 | U20MECX17 | Basic Course on ePLAN |
|----|------------------------|--|
| 17 | U20MECX17 | Basic Electro Pneumatics |
| 18 | U20MECX18 U20MECX19 | |
| 20 | U20MECX19 | Basic Hydraulics Bio Signal and Image Processing Development System |
| 20 | U20MECX20 | Blockchain |
| | U20MECX21 | |
| 22 | U20MECX22 | Bridge Analysis |
| 23 | U20MECX23 | Building Analysis and Construction Management Building Design and Analysis Using AECO Sim Building Designer |
| 24 | U20MECX24 | |
| 25 | U20MECX25 | |
| 26 | U20MECX26 | CCNA (Routing and Switching) |
| 27 | U20MECX27 | CCNA (Wireless) |
| 28 | U20MECX28 | Cloud Computing |
| 29 | | Computer Programming for Medical Equipments |
| 30 | U20MECX30 | Corel Draw |
| 31 | U20MECX31 | Creo (Modeling and Simulation) |
| 32 | U20MECX32 | Cyber Security |
| 33 | U20MECX33 | Data Science and Data Analytics |
| 34 | U20MECX34 | Data Science using Python |
| 35 | U20MECX35 | Data Science using R |
| 36 | U20MECX36 | Deep Learning |
| 37 | U20MECX37 | Design and Documentation using ePLAN Electric P8 |
| 38 | U20MECX38 | Design of Biomedical Devices and Systems |
| 39 | U20MECX39 | Digital Marketing |
| 40 | U20MECX40 | Digital Signal Processing Development System |
| 41 | U20MECX41 | DigSILENT Power Factory |
| 42 | U20MECX42 | Electro Hydraulic Automation with PLC |
| 43 | U20MECX43 | Embedded System using Arduino |
| 44 | U20MECX44 | Embedded System using C |
| 45 | U20MECX45 | Embedded System with IoT |
| 46 | U20MECX46 | ePLAN Data Portal |
| 47 | U20MECX47 | ePLAN Electric P8 |

COMPLEX ANALYSIS AND APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS

Т Ρ С Hrs

3

60

2 2 0

(Common to EEE, ICE, MECH, MECHATRONICS)

Course Objectives

- To understand the analytic functions of complex variables.
- To apply the analytic function techniques to transform irregular geometry into regular geometry.
- Expose to the concept of complex integration.
- To understand the nature of wave equations.
- To know the solutions of one dimensional and two-dimensional heat flow equations.

Course Outcomes

After completion of the course, the students will be able to

- CO1- Understand the concepts of function of a complex variable. (K2)
- CO2 Transform complex functions from one plane to another plane. (K3)
- CO3 Apply the concepts of complex integration over contour. (K3)
- CO4 Understand the concept of initial and boundary value problems (K2)
- CO5 Solve the one and two dimensional heat equation using Fourier series. (K3)

UNIT I FUNCTION OF A COMPLEX VARIABLE

Continuity, derivative and analytic functions - Necessary conditions - Cauchy-Riemann equations and sufficient conditions - Harmonic and orthogonal properties of analytic function - Construction of analytic function

UNIT II CONFORMAL MAPPINGS

Conformal mapping – Simple and standard transformations like w = z+c, cz, z^2 , e^z , sin z, cosh z and z+1/z – Bilinear transformation and cross ratio property - Taylor's and Laurent's theorem - Series expansion of complex valued functions - classification of singularities.

UNIT III COMPLEX INTEGRATION

Cauchy's integral theorem and its application - Cauchy's integral formula and problems - Residues and evaluation of residues - Cauchy's residue theorem - Contour integration: Cauchy's and Jordan's Lemma - Application of residue theorem to evaluate real integrals - unit circle and semicircular contour.

UNIT IV APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS

Solution of partial differential equation by the method of separation of variables - Boundary value problems -Fourier series solutions of one dimensional wave equation – Transverse vibration of an elastic string.

UNIT V ONE AND TWO DIMENSIONAL HEAT EQUATIONS

Fourier series solutions of one dimensional heat flow equation - Fourier series solutions of two dimensional heat flow equation under steady state conditions.

DATA STRUCTURES

U20EST356

(Common to ECE, EEE, IT, ICE, MECH, CIVIL, BME, MECHATRONICS,CCE)

Course Objectives

- To impart the basic concepts of data structures and its terminologies.
- To understand concepts about stack and queue operations.
- To understand basic concepts about linked list and its various operations.
- To understand concepts about Tree and its applications.
- To understand basic concepts about Sorting, Hashing and Graph.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Compute time and space complexity for given problems (K3)

- CO2 Demonstrate stack, queue and its operation. (K3)
- CO3 Illustrate the various operations of linked list. (K3)
- CO4 Use the concepts of tree for various applications. (K3)
- CO5 Outline the various sorting, hashing and graph techniques. (K3)

UNIT I BASIC TERMINOLOGIES OF DATA STRUCTURES

Introduction: Basic Terminologies – Elementary Data Organizations. Data Structure Operations: Insertion – Deletion – Traversal. Analysis of an Algorithm. Asymptotic Notations. Time-Space trade off. Array and its operations. Searching: Linear Search and Binary Search Techniques – Complexity analysis.

UNIT II STACK AND QUEUE OPERATIONS

Stacks and Queues: ADT Stack and its operations. Applications of Stacks: Expression Conversion and evaluation. ADT Queue and its operations. Types of Queue: Simple Queue – Circular Queue – Priority Queue – Deque.

UNIT III LINKED LIST OPERATIONS

Linked Lists: Singly linked list: Representation in memory. Algorithms of several operations: Traversing – Searching – Insertion – Deletion. Linked representation of Stack and Queue. Doubly linked list: operations. Circular Linked Lists: operations.

UNIT IV TREES

Trees: Basic Tree Terminologies. Different types of Trees: Binary Tree – Threaded Binary Tree – Binary Search Tree – Binary Tree Traversals – AVL Tree. Introduction to B-Tree and B+ Tree.

UNIT V SORTING, HASHING AND GRAPHS

Sorting: Bubble Sort – Selection Sort – Insertion Sort – Heap Sort – Shell Sort and Radix Sort. Performance and Comparison among the sorting methods. Hashing: Hash Table – Hash Function and its characteristics. Graph: Basic Terminologies and Representations – Graph traversal algorithms.

ELECTRONIC DEVICES AND CIRCUITS

Course Objectives

U20EST358

- Understand the structure of basic electronic devices.
- Be exposed to active and passive circuit elements.
- Familiarize the operation and applications of transistor like BJT and FET.
- Explore the characteristics of amplifier gain and frequency response.
- Learn the required functionality of positive and negative feedback systems.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Explain the structure and working operation of basic electronic devices. (K1)
- CO2 Describe the working principle of BJT, FET, UJT and Thyristors. (K2)
- **CO3** Analyze the behavior of Bipolar Junction Transistors and Field Effect Transistors at different frequency Conditions. **(K3)**
- CO4 Design multistage amplifiers using Bipolar Junction Transistors. (K4)
- CO5 Employ the acquired knowledge in design and analysis of oscillators. (K3)

UNIT I PN JUNCTION DEVICES

PN junction diode –structure, operation and V-I characteristics, diffusion and transition capacitance - Rectifiers – Half Wave and Full Wave Rectifier, – Display devices- LED, Laser diodes, Zener diode characteristics- Zener Reverse characteristics – Zener as a Voltage regulator

UNIT II TRANSISTORS AND THYRISTORS

BJT, JFET, MOSFET- structure, operation, Biasing and characteristics. UJT - Characteristics and equivalent circuit – intrinsic standoff ratio –UJT relaxation oscillator, Thyristors- SCR - Two transistor model, DIAC and TRIAC - Operation, Characteristics and their applications.

UNIT III AMPLIFIERS

BJT small signal model – Analysis of CE, CB, CC amplifiers- Gain and frequency response. Small signal model of JFET and MOSFET – Analysis of CS and Source follower – Gain and frequency response- High frequency analysis.

UNIT IV MULTISTAGE AMPLIFIERS

RC-coupled amplifier, Operation and Frequency response, Power amplifier – Series fed and transformer coupled Class A amplifiers, Class B amplifier, Circuit and Operation, conversion efficiency, amplifier distortion, Class C and D amplifiers.

UNIT V FEEDBACK AMPLIFIERS AND OSCILLATORS

Advantages of negative feedback – voltage / current, series, Shunt feedback – positive feedback – Condition for oscillations, phase shift – Wien bridge, Hartley, Colpitts and Crystal oscillators.

MECHANICS OF SOLIDS

| L | Т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To understand the fundamental concepts of stress, strain, principal stresses and principal planes.
- To study the concept of shearing force and bending moment due to external loads in determinate beams and their effect on stresses.
- To compute slopes and deflections in determinate beams by various methods.
- To understand the effect of torsion on shafts and springs
- To learn about the buckling failure in columns and calculate the stresses, deformations induced in thin and thick shells.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Compute the concepts of stress and strain in simple and compound bars and understand the importance of principal stresses and principal planes.(K2)
- CO2 Comprehend the load transferring mechanism in beams and stress distribution due to shearing force and bending moment.(K2)
- CO3 Calculate the slope and deflection in beams using different methods.(K3)
- CO4 Estimate the effect of torsion in shafts and helical spring.(K3)
- CO5 Calculate the stresses and strains associated with thin and thick cylinder. (K3)

UNIT I STRESSES AND STRAINS

Stress and Strain: Basic of stress & strain, Elastic constant, Stress-strain diagram - Hook's law- Factor of safetystresses and strain in uniformly varying sections- stresses in composite bar- Relation between the modulus and Poisson's ratio - Thermal stresses.

Biaxial state of stress – Stress at a point – stresses on inclined planes – Principal stresses and Principal strains and Mohr's circle of stress.

UNIT II BEAMS AND SIMPLE BENDING

Beams: Cantilever, Simply supported: Shear Force and Bending Moment Diagrams. Theory of simple bending -Bending stress and shear stress in beams.

UNIT III DEFLECTION OF BEAMS

Deflection of beams: Cantilever and simply supported beam by Double integration method – Macaulay's method - Area moment theorems for computation of slopes and deflections in beams.

UNIT IV TORSION & SPRING

Torsion: Introduction - Derivation of torsion equation - stresses and deformations in circular and hollow shafts -Shafts in Series and parallel - Combined bending and torsion- Strain energy due to axial force - Resilience. Spring: Open and closed coil helical springs, Leaf Springs, Application of Torsion springs.

UNIT V COLUMNS AND CYLINDERS

Theory of columns - Long column and short column - Euler's formula - Rankine's formula. Thin cylinders and shells – Deformation of thin cylinders and shells; Thick Cylinders, Compound Cylinder.

| COMPUTER | AIDED | DESIGN |
|----------|-------|--------|
| | | |

U20MET306

- To understand the basics of CAD and its applications.
- To gain exposure over the algorithms and transformation techniques used in CAD.
- To learn about the geometric and surface modelling concepts of CAD
- To understand the rendering of models used in various software.
- To understand the standards and database in CAD

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the importance of CAD and its hardware's. **(K2)**

- CO2 Perform transformation techniques and apply algorithm for modifying various CAD drawings. (K3)
- CO3 Develop various model using geometric and surface modelling techniques. (K3)
- CO4 Illustrate the working of rendering of CAD models. (K3)
- CO5 Apply various standards and database models to exchange CAD data models. (K3)

UNIT I INTRODUCTION TO CAD AND DISPLAY DEVICES

Introduction: Fundamentals of CAD, Design process, Applications of computer for design, Benefits of CAD, Computer peripherals for CAD work station, Graphic terminal, CAD software, CAD database and structure.

Display Devices: Video display devices-Raster scan display, CRT, DVST, Inherent memory display devices, Random Scan Display, Raster scan systems - Video controller, Random scan systems - Graphic monitors and work station, Input devices.

UNIT II TRANSFORMATIONS

Bresenham's line and circle algorithms. Transformation in Graphics: co-ordinate system used in Graphics and windowing and view port transformations, Clipping, hidden line elimination, 2D transformations - rotation, scaling, translation, mirror, reflection and shear - homogeneous transformations - concatenation, 3D Transformation orthographic and Perspective Projections.

UNIT III GEOMETRIC AND SURFACE MODELLING

Geometric Modelling: 2D wire frame modelling, 3D Wire frame modelling, Wireframe models, Entities and their definitions. Concept of Parametric and nonparametric representation of curve, Curve fitting techniques, Definitions of cubic splines.

Surface Modelling: Surface modelling and entities, Algebraic and geometric form, Parametric space of Surface, Blending functions, parameterization of surface patch, Subdividing cylindrical surface, Ruled surface, Surface of revolution, Spherical surface, Composite surface.

UNIT IV RENDERING IN CAD

Hidden line-surface-solid removal algorithm-shading - colouring-animation Parametric and variational modeling, Feature based modeling, An overview of modeling software like PRO-E, CATIA, IDEAS, SOLID EDGE and other advanced Software's.

UNIT V STANDARDS AND DATABASE IN CAD

Standards for computer graphics (GKS) and Data exchange standards - IGES, STEP. Standard for exchange images (open GL) Data structures for Entity storage - Data structures for interactive modelling- Relational databases

FLUID MECHANICS AND MACHINERY

Course Objectives

U20MET307

- To understand the properties of the fluid and flow characteristics.
- To emphasize the concept of dimensional analysis.
- To understand the concept of flow through circular pipes and boundary layer flows.
- To provide knowledge on the working principle and performance curves of hydraulic turbines.
- To educate the working principles and performance analysis of fluid pumps.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the basic fluid property and its application. (K2)
- CO2 To apply the concepts of dimensional analysis on the fluid structure. (K3)
- CO3 To solve the rate of flow and energy losses in flow through pipes. (K3)
- CO4 To evaluate the operating characteristics of hydraulic turbines. (K3)
- CO5 Understand the working principles of hydraulic pumps and performances(K2)

UNIT I FLUID PROPERTIES AND FLUID STATICS

Units and dimensions - Properties of fluids - mass density, specific weight, specific volume, specific gravity, viscosity, compressibility, vapour pressure, surface tension and capillarity, fluid statics, manometers, Hydrostatic Forces, buoyancy, forces on submerged bodies, stability of floating bodies

UNIT II FLUID KINEMATICS AND FLUID DYNAMICS

Flow characteristics – concept of control volume - application of continuity equation, energy equation and momentum equation. Bernoulli's equation, applications - Venturi meter, Orifice meter, Pitot tube - dimensional analysis -Buckingham's π theorem applications - similarity laws and models.

UNIT III INCOMPRESSIBLE FLUIDS AND FLOW THROUGH PIPES

Viscous flow - laminar flow between parallel plates, - Laminar and Turbulent flow, Reynold's experiment flow through Circular pipes - Darcy - Weisbach equation - friction factor minor losses - flow through pipes in series and in parallel - power transmission - boundary layer flows, boundary layer thickness, boundary layer separation.

UNIT IV HYDRAULIC MACHINE AND TURBINES

Principles of Turbo Machinery: Fluid Machines - Classification - Introduction to Impact of jet Stationary plates, Moving Plates and Vanes - Construction of Velocity Vector Diagram- Unit and Specific Quantities. Turbine -Classification - Impulse Turbine - Pelton Wheel - Reaction Turbines - Francis and Kaplan Turbines - Draft Tube Theory – Velocity Triangle – Estimation of force, Power and efficiency – General Characteristics of Turbine Similarity Study – Governing of Turbine – Cavitation in Turbine.

UNIT V HYDRAULIC PUMPS

Classification - Centrifugal Pump - Velocity Triangle - Estimation of Power Required and efficiency - General characteristics - Similarity study - Cavitation in Pump - Reciprocating Pump - Air Vessels - Ideal and Actual Indicator Diagram – Estimation of Power Required, percentage Slip and Efficiency – Cavitation - special purpose pumps.

U20HSP301

GENERAL PROFICIENCY – I

(Common to all branches except CSBS)

Course Objectives

- To enrich strong vocabulary and decoding skills through comprehension analysis. •
- To advance communication and leadership skills pragmatically.
- To pronounce English sounds in isolation and in connected speech.
- To expand effective written communication skills to meet organizational goals.
- To extend knowledge on verbal aptitude and prepare for interviews.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Interpret meaning and apply reading strategies in technical and non-technical context. (K2)

CO2 - Develop interpersonal communication skills professionally. (K3)

CO3 - Infer the distinct speech sounds and overcome native language influence. (K2)

CO4 - Demonstrate various forms of formal writing. (K2)

CO5 - Apply the techniques of verbal aptitude in competitive exams. (K3)

UNIT I COMPREHENSION ANALYSIS

Listening: Listening Comprehension (IELTS based) - Speaking: Break the iceberg - Reading: Reading technical passage (IELTS based) - Writing: Writing Task: 1 (IELTS: Graph/ Process /Chart Description) Vocabulary: Synonyms (IELTS)

UNIT II PERSONALITY DEVELOPMENT

Listening: Interview Videos- Speaking: Extempore& Presentation (Soft Skills) - Reading: British & American Vocabulary, Read and review (Books, Magazines) - Writing: SWOT Analysis Vocabulary: Idioms (IELTS)

UNIT III INFERENTIAL LEARNING

Listening: Listening Speech sounds to overcome Mother Tongue Influence, Anecdotes- Speaking: Interpersonal Interaction & Situational attribution -Reading: Distinguish between facts & opinions - Writing: Writing Conversation to different context Vocabulary: Phrasal Verbs (IELTS)

UNIT IV INTERPRETATION AND FUNCTIONAL WRITING

Listening: Group Discussion videos - Speaking: Group Discussion Practice - Reading: Interpretation of data -Graph, table, chart, diagram (IELTS based) -Writing: Writing Task: 2 (IELTS) Vocabulary: Collocations (IELTS)

UNIT V APTITUDE

Language Enhancement: Articles, Preposition, Tenses

Verbal Ability Enhancement: Blood Relation, Completing Statements - Cloze test, Spotting Errors – Sentence Improvement, One Word Substitution, Word Analogy, Word Groups(GATE)

| DATA | STRUCTL | JRES LAB |
|------|---------|----------|
|------|---------|----------|

(Common to CSE, ECE, EEE, IT, ICE, MECH, CIVIL, BME,

MECHATRONICS, CCE)

Course Objectives

U20ESP357

- To understand the basic concepts of Data Structures.
- To learn about the concepts of Searching Techniques.
- To explore about the concepts of Sorting Techniques.
- To know about the linear Data Structures.
- To study about non-linear Data Structures.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Analyze the algorithm's / program's efficiency in terms of time and space complexity.(K3)

- CO2 Solve the given problem by identifying the appropriate Data Structure.(K3)
- CO3 Solve the problems of searching and sorting techniques. (K3)
- CO4 Solve problems in linear Data Structures.(K4)
- CO5 Solve problems in non-linear Data Structures. (K4)

List of Experiments

- 1. Write a C program to implement recursive and non-recursive i) Linear search ii) Binary Search.
- 2. Write a C program to implement i) Bubble sort ii) Selection sort iii) Insertion sort iv) Shell sort v) Heap sort.
- 3. Write a C program to implement the following using an array. a) Stack ADT b) Queue ADT
- 4. Write a C program to implement list ADT to perform following operations a) Insert an element into a list. b) Delete an element from list c) Search for a key element in list d) count number of nodes in list.
- 5. Write a C program to implement the following using a singly linked list. a) Stack ADT b) Queue ADT.
- 6. Write a C program to implement the dequeue (double ended queue) ADT using a doubly linked list and an array.
- 7. Write a C program to perform the following operations:
 - a) Insert an element into a binary search tree.
 - b) Delete an element from a binary search tree.
 - c) Search for a key element in a binary search tree.
- 8. Write a C program that use recursive functions to traverse the given binary tree in
 - a) Preorder b) Inorder and c) Postorder.
- 9. Write a C program to perform the AVL tree operations.
- 10. Write a C program to implement Graph Traversal Techniques.

| U20MEP302 | MATERIAL TESTING AND METALLURGY LAB | L | Т | Ρ | С | Hrs |
|-------------|-------------------------------------|---|---|---|---|-----|
| 0201111 302 | | 0 | 0 | 2 | 1 | 30 |

Course Objectives

- To make student familiar with modern and conventional tools for material testing.
- To present real world engineering examples of solid mechanics.
- To understand mechanical behavior of various engineering materials by conducting standard tests.
- To perform the characterization of materials like microstructures.
- To learn the concepts of improving the mechanical properties of materials by different methods like heat treatment process.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Evaluate the strength and behavior of materials. (K3)
- CO2 Examine the hardness of materials. (K3)
- CO3 Develop the theoretical understanding of the mechanical properties of materials. (K3)
- CO4 Analysis the procedure of microstructure studies of various materials. (K3)
- CO5 Execute the various heat treatment processes for different stages. (K3)

List of Experiments

Materials Testing Laboratory

- 1. Tension test
- 2. Torsion test
- 3. Compression test
- 4. Impact test on a metallic specimen Izod test
- 5. Impact test on a metallic specimen Charpy test
- 6. Hardness test on metallic specimen (Brinell, Rockwell)
- 7. Ductility test: Sheet metals (AI, GI and MS)

Metallurgy Laboratory

- 8. Identification of the Metals using optical microscope
- 9. Jominy end quenching test

U20MEP303 FLUID MECHANICS AND MACHINERY LAB

Course Objectives

- To understand the properties of the fluid.
- To impart training to use various flow measuring devices.
- To understand the conservation of laws to flow through pipes.
- To understand the principles and working of hydraulics machines and its applications.
- To provide practice in estimating friction losses.

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Analyse and Interpret fluid flow parameters by conducting experiments on venture and orifice experimental setups. **(K3)**
- CO2 Interpret the flow structures through various models. (K3)
- CO3 Analyse the performance characteristic of various types of pumps. (K3)
- CO4 Correlate the characteristics curves of gear and turbine pump. (K3)
- CO5 Evaluate the performance characteristic of various types of turbine. (K4)

List of Experiments

- 1. Evaluate the coefficient of discharge of given Orifice meter.
- 2. Evaluate the coefficient of discharge of given Venturi meter.
- 3. Visualizing the flow structures through various models.
- 4. Conducting experiments and drawing the characteristics curves of centrifugal pump.
- 5. Conducting experiments and drawing the characteristics curves of submersible pump.
- 6. Conducting experiments and drawing the characteristics curves of jet pump.
- 7. Conducting experiments and drawing the characteristics curves of pump in series and parallel.
- 8. Conducting experiments and drawing the characteristics curves of reciprocating pump.
- 9. Conducting experiments and drawing the characteristics curves of Gear pump.
- 10. Conducting experiments and drawing the characteristics curves of Turbine pump
- 11. Conducting experiments and drawing the characteristics curves of Pelton wheel.
- 12. Conducting experiments and drawing the characteristics curves of Francis turbine.

| LIDODOTADD | PROBABILITY AND QUEUEING THEORY | L | Т | Ρ | С | Hrs |
|-------------------|---------------------------------|---|---|---|---|-----|
| U20BST433 | (Common to MECH & BME) | 2 | 2 | 0 | 3 | 60 |
| Course Objectives | | | | | | |

- To know the fundamental knowledge of the basic probability concepts.
- To introduce knowledge of standard discrete distributions.
- To acquire knowledge on Probability Distributions. •
- To understand strengths and weaknesses of Queuing model.
- To gain strong knowledge in principles of Queuing theory. •

Course Outcomes

After completion of the course, the students will be able to

CO1 - Understand the fundamental knowledge of the probability concepts. (K2)

CO2 - Apply the basic rules of discrete random variables. (K3)

CO3 - Apply the fundamentals of probability theory and random processes. (K3)

CO4 - Understand and extend Queuing models to analyze real world systems. (K2)

CO5 - Apply the knowledge of Queuing theory in computer field. (K3)

UNIT I PROBABILITY AND RANDOM VARIABLE

Axioms of probability - Conditional probability - Total probability – Baye's theorem– Moments–Moment generating functions and their properties

UNIT II DISCRETE RANDOM VARIABLES

Random Variables and their event spaces, Random variable - Probability mass function - Probability density function - Distribution functions, Binomial - Geometric - Negative Binomial and Poisson.

UNITIII CONTINUOUS RANDOM VARIABLES

Some important distributions: Uniform, Exponential, Gamma, Weibull and Normal distributions and their properties – Functions of a random variable.

UNIT IV QUEUING MODELS

Markovian queues – Birth and Death processes – Single and multiple server queuing models – Little's formula – Queues with finite waiting rooms – Queues with impatient customers: Balking and reneging.(M/M/I):(∞ /FIFO), (M/M/I):(N/FIFO), (M/M/C):(∞/FIFO), (M/M/C):(N/FIFO)

UNIT V ADVANCED QUEUING MODELS

Finite source models – M/G/1 queue – PollaczekKhinchin formula – M/D/1 and M/EK/1 as special cases – Series queues - Open Jackson networks.

U20EST467

- **Course Objectives**
- To gain and explore the knowledge of java programming
- To know the principles of inheritances, packages, interfaces
- To get familiarized to generic programming, multithreading concepts. ٠
- To gain and explore the advanced concepts in Java. •
- To explore database connectivity

Course Outcomes

After completion of the course, the students will be able to

CO1 - Write a maintainable java Program for a given algorithm and implement the same. (K2)

- CO2 Demonstrate the use of inheritance, interface and package in relevant applications. (K3)
- CO3 Create java applications using exception handling, thread and generic programming. (K3)
- CO4 Build java distributed applications using Collections and IO streams. (K3)
- CO5 Exemplify simple graphical user interfaces using GUI components and database programs. (K3)

UNIT I INTRODUCTION TO JAVA PROGRAMMING

The History and Evolution of Java – Byte code – Java buzzwords – Data types – Variables – Arrays – operators - Control statements - Type conversion and casting. Concepts of classes and objects: Basic Concepts of OOPs - constructors - static keyword - Final with data - Access control - This key word -Garbage collection - Nested classes and inner classes - String class

UNIT II INHERITANCE, PACKAGES AND INTERFACES

Inheritance: Basic concepts - Forms of inheritance - Super key word - method overriding - Abstract classes Dynamic method dispatch – The Object class. Packages: Defining – Creating and Accessing – importing packages. Interfaces: Defining - Implementing - Applying - Variables and extending interfaces

UNIT III EXCEPTION HANDLING, MULTITHREADING

Concepts of Exception handling - Types of exceptions - Creating own exception - Concepts of Multithreading – creating multiple threads – Synchronization – Inter thread communication. Enumeration: Autoboxing - Generics.

UNIT IV COLLECTIONS, I/O STREAMS

Collections: List - Vector - Stack - Queue - Dequeue - Set - Sorted Set. Input / Output Basics - Streams - Byte streams and Character streams - Reading and Writing Console - Reading and Writing Files.

UNIT V EVENT DRIVEN PROGRAMMING AND JDBC

Events - Delegation event model - Event handling - Adapter classes. AWT: Concepts of components - Font class - Color class and Graphics. Introduction to Swing: Layout management - Swing Components. Java Database Connectivity. Develop real time applications.

Course Objectives

U20MET408

- To understand the basics components and layout of linkages in the assembly of a system and machine to visualize simple mechanisms and its applications
- To Illustrate students about Kinematic Analysis (Instantaneous center method and relative velocity method) • of simple mechanisms
- To provide students an understanding of different types of mechanisms. •
- To teach students about different types of specified contour and derived contour cams and its kinematic analyses.
- To explain about kinematic advantages, problems and explain about epicyclic gear train and its speed calculation.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Demonstrate an understanding of the concepts of various mechanisms and pairs. (K2)

- CO2 Solve velocity and acceleration in simple mechanism by Graphical Method. (K3)
- CO3 Develop a simple mechanism such as Four Bar and slider crank Mechanism. (K4)
- CO4 Design a layout of cam for specified motion. (K4)
- CO5 Solve problem on gears and gear Train. (K4)

UNIT I BASICS OF MECHANISMS

Mechanisms and machines; Elements of kinematic chain, mobility and range of movements, Definition & Concept - inversion of single and double slider chain and four bar chain and its applications Mechanism with lower pairs -Pantograph, Straight line mechanism- exact and approximate Motion-Mini projects.

UNIT II KINEMATIC ANALYSIS OF MECHANISMS

Analysis of displacement, velocity & acceleration diagrams of simple planar mechanisms by graphical (Instantaneous center method and relative velocity method), analytical and computer aided methods (for fourbar and slider crank mechanism only.

UNIT III KINEMATIC SYNTHESIS OF MECHANISMS

Kinematic synthesis, graphical method using relative pole method, Inversion method and overlay 3 point synthesis problems - Motion, path & function generation, Chebyshev's spacing of accuracy points -Freudenstein Method of 3 point synthesis of four link mechanism and slider crank Mechanism- Coupler curves.

UNIT IV CAMS

Classification-Displacement diagrams-Uniform velocity, SHM, uniform acceleration and retardation and cycloidal motions-layout of profile of plate cams of the above types with reciprocating, oscillating, knife edge, roller and flat faced followers.

UNIT V GEARS AND GEAR TRAIN

Classification and terminology used Fundamental law of gearing - friction wheel, teeth for positive action and condition for constant velocity ratio. Conjugate profiles cycloidal and involute teeth profiles. Involute construction, properties and computation of path of contact and contact ratio. Interference and undercutting- Minimum number of teeth to avoid Interference, methods to avoid Interference. Introduction, classification, examples, gear ratio in simple and compound gear trains.

HEAT AND MASS TRANSFER

| L | т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 2 | 2 | 0 | 3 | 60 |

Course Objectives

- To understand the conduction type of heat transfer in steady and transient condition.
- To enable the students to expose the mechanisms of free and forced convection type of heat transfer.
- To develop the radiation shape factor for black and grey body radiations.
- To demonstrate the phase change heat transfer and calculate the performance of heat exchanging devices.
- To provide the knowledge on diffusion and convective mass transfer.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the basic concepts of heat transfer and solve steady and unsteady conduction heat transfer problems. (K2)
- CO2 Determine the temperature variation and rate of heat flow in convection heat transfer problems. (K4)
- **CO3 -** Explain basic laws for Radiation and Determine the radiation properties of a black and grey body Radiation. **(K2)**
- CO4 Integrate the concepts of phase change heat transfer and compare the thermal performance of heat exchangers using LMTD and NTU approach. (K5)
- **CO5** Apply diffusive and convective mass transfer equations and correlations to solve problems for different applications. **(K3)**

UNIT I CONDUCTION

Introduction of heat transfer – conduction - convection and radiation – Laws – General equation of heat conduction – Derivation in Cartesian - cylindrical and spherical coordinates – One dimensional steady state heat conduction in simple geometries – plane wall - cylinder and sphere – Heat transfer composite walls - composite cylinders and composite spheres – Conduction with Internal Heat Generation – Extended Surfaces – Unsteady Heat Conduction – Lumped Analysis – Semi Infinite and Infinite Solids –Use of Heisler's charts.

UNIT II CONVECTION

Boundary layer theory – Hydrodynamic and Thermal Boundary Layer- Dimensional Analysis-Flow over a flat– Flow over cylinders -spheres - tube bank – Internal flow through pipes in forced heat transfer – Natural convection in vertical - inclined and horizontal surfaces – Mixed convection.

UNIT III RADIATION

Radiation heat transfer –Thermal radiation – Laws of radiation – Black body concept – Grey body radiation - Emissive power – Radiation shape factor-radiation heat exchange between surfaces – Electrical Analogy – Radiation Shields-Radiation through gases.

UNIT IV PHASE CHANGE HEAT TRANSFER AND HEAT EXCHANGERS

Condensation and Boiling – Film wise and drop wise condensation – Film condensation on a Vertical plate – Regimes of Boiling – Forced convection boiling. Heat Exchangers – Types and practical applications – Use of LMTD – Effectiveness – NTU method – Compact heat exchangers – Plate heat exchangers – Fouling factor.

UNIT V MASS TRANSFER

Introduction of Mass Transfer – Diffusion Mass Transfer – Fick's Law of Diffusion – Steady state Molecular Diffusion – Convective Mass Transfer – Momentum, Heat and Mass Transfer Analogy –Convective Mass Transfer Correlations-Evaporation of water into air.

GENERAL PROFICIENCY – II

(Common to all branches except CSBS)

Course Objectives

U20HSP402

- To examine various standardized test in English language
- To recognize the key features of various technical writing
- To integrate LSRW skills to endorse multifarious skill set in practical situation
- To understand the factors that influence the usage of grammar
- · To understand the basic concepts of logical reasoning skills

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Infer ideas to attend international standardized test by broadening receptive and productive skills. (K2)
- CO2 Interpret the types of writing in different state of affairs. (K2)
- CO3 Develop language skills professionally to groom the overall personality through sensitizing various etiquettes in real time situation. (K3)
- **CO4** Identify the rules of grammar in academic discourse settings. (K3)
- CO5 Extend the skills to compete in various competitive exams like GATE, GRE, CAT, UPSC, etc. (K2)

UNIT I CAREER SKILLS

Listening: Listening at specific contexts Speaking: Mock interview (Personal & Telephonic) - Reading: Read and Review - Newspaper, Advertisement, Company Handbooks, and Guidelines (IELTS based) Writing: Essay Writing (TOEFL) Vocabulary: Words at specified context (IELTS)

UNIT II CORPORATE SKILLS

Listening: Listening and replicating Speaking: Team Presentation (Work Place Etiquettes) Reading: Short texts (signs, emoticons, messages) Writing: E-mail writing- Hard skills -Resume' Writing, Job Application Letter, Formal Letter Vocabulary: Glossary (IELTS)

UNIT III FUNCTIONAL SKILLS

Listening: Listening TED Talks - Speaking: Brainstorming &Individual Presentation, Persuasive Communication -- Reading: Text Completion (GRE Based) Writing: Expansion of Compound Words Vocabulary: Expansion of vocabulary (IELTS)

UNIT IV TRANSFERABLE SKILLS

Listening: Listening Documentaries and making notes - Speaking: Conversation practice at formal & informal context Reading: Read and transform- report, memo, notice and advertisement, Writing: Euphemism, Redundancy, and Intensifiers Vocabulary: Refinement of vocabulary (IELTS)

UNIT V APTITUDE

Transformational Grammar: Phrases & Clauses, Concord, Conditional Clauses, Voice, Modals. Verbal Ability Enhancement: Letter Series, Coding and Decoding, Sentence Completion (GATE), Critical Reasoning and Verbal Deduction (GATE), Syllogism.

PROGRAMMING IN JAVA LAB

U20ESP468

(Common to CSE, ECE, EEE, IT, ICE, MECH, CIVIL, BME,

MECHATRONICS, CCE)

L T P C Hrs

1

30

2

0

Course Objectives

- To acquire programming skill in core java.
- To learn how to design java program and applications.
- To acquire object oriented skills in java.
- To develop the skill of designing applications.
- To explore database connectivity.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Apply and practice logical formulations to solve simple problems leading to specific applications. (K3)
- CO2 Demonstrate the use of inheritance, interface and package in relevant applications. (K3)
- CO3 Create java applications using exception handling, multithread. (K3)
- CO4 Build java distributed applications using Collections and IO streams. (K3)

CO5 - Develop simple database programs. (K3)

List of Exercises

- 1. Develop simple programs using java technologies and testing tools.
- 2. Develop a java program that implements class and object.
- 3. Write a java program to demonstrate inheritance.
- 4. Develop a simple real life application program to illustrate the use of Multi Threads.
- 5. Implement simple applications using Collections.
- 6. Develop a simple application and use JDBC to connect to a back-end database.
- 7. Create a student application with Add, Edit, Delete, Show functions using JDBC.
- 8. Create a Bill Application to store sales details using JDBC.
- 9. Create java applications using Exception Handling for error handling.
- 10. Develop a java program that implements the Packages.

U20MEP404 COMPUTER AIDED MACHINE DRAWING LAB

Course Objectives

- To expose the students to CAD /CAE software in the design and drawing of machine components
- To create assembly models of simple machine elements
- To draw various permanent and temporary joints
- To read and interpret the diagrams drawn by draughtsman by familiarizing on GD&T
- To familiarize on analysis of engineering drawing

Course Outcomes

After completion of the course, the students will be able to

- CO1 Design and drawing of machine using suitable software. (K3)
- CO2 Draw 2D Assembly models of simple machine elements. (K3)
- CO3 Draw various joints using in machine assembly. (K3)
- CO4 Apply the concept of GD&T in drawings. (K3)
- CO5 Analyze the drawings using engineering skills. (K4)

List of Experiments

- Preparation of Drawings for Parts and Assembly of the following by using Drafting software. Gear coupling, spring loaded safety valve, lever safety valve, blow-off cock, cast iron flange joint, hydraulic joint, feed check valve, foot step bearing, ball valve, stuffing box- minimum 5 exercises
- 2. Preparation of Production Drawings with tolerances limits and fits using Drafting software Minimum 1 exercise
- 3. Introduction to Geometric Dimensioning and Tolerancing, Geometric Tolerances Symbols- Tolerance Zone, Run-out, Feature Control Frame and its components, Straightness, Flatness, Circularity and Cylindricity, Parallelism, Perpendicularity and Angularity, Material Conditions- MMC and LMC, Position Tolerance & Datums, Twelve Degrees of Freedoms & Datum Planes, Surface Symbols – Roughness- Applying Feature Control Frame usage in drawings - minimum 5 exercises

HEAT TRANSFER LAB

Course Objectives

- To define the fundamental concepts in the area of heat transfer and its applications.
- To recognize the practical significance of various parameters involved with different modes of heat transfer.
- To apply conduction and convection mode of heat transfer with heat transfer equipment.
- To understand radiation heat transfer concept to find Stefan Boltzmann constant and emissivity.
- To teach the principle of parallel flow, Counter flow and Plate type heat exchangers

Course Outcomes

After completion of the course, the students will be able to

- CO1 Analyse and Interpret heat transfer parameters by conducting experiments on conduction and convection experimental set-up. (K4)
- CO2 Analyse and Interpret heat transfer parameters by conducting experiments on radiation experimental set-up. (K4)
- CO3 Analyse and Interpret heat transfer parameters by conducting experiments on Heat exchanger experimental set-up. (K4)
- **CO4** Analyse and Interpret the surface emissivity of a test plate and Stefan Boltzmann's constant and compare with theoretical value. **(K4)**
- CO5 Analyse and Interpret the thermal conductivity and transient heat conduction experiments. (K4)

List of Experiments

- 1. Heat transfer on cylindrical surface by natural convection
- 2. Heat transfer on cylindrical surface by forced convection
- 3. Heat transfer from Pin fin by natural convection.
- 4. Heat transfer from Pin fin by forced convection.
- 5. Heat transfer on a composite wall.
- 6. Experiment to evaluate Stefan Boltzmann constant.
- 7. Experiment to evaluate the emissivity of a specimen.
- 8. Experiment on Parallel flow heat exchanger
- 9. Experiment on Counter flow heat exchanger
- 10. Experiment on plate type heat exchanger

PROFESSIONAL ELECTIVES - I

GAS DYNAMICS AND JET PROPULSION **U20MEE401**

Course Objectives

- To understand the basic difference between incompressible and compressible flow.
- To analyze the effect of Mach number on compressibility.
- To examine the flow properties in variable area and constant area ducts.
- To understand the phenomenon of shock waves and its effect on flow. •
- To understand the basic knowledge about jet propulsion and rocket propulsion system.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Explain the basic concepts of compressible fluid flows. (K1)
- CO2 Describe the behaviour of fluid flow in constant area ducts. (K1)
- **CO3** Interpret the equations governing normal shock. **(K2)**
- CO4 Define the performance metrics of turbo jet, ram jet and pulse jet engines. (K3)

CO5 - Explain the basics of rocket propulsion systems. (K1)

UNIT I BASIC CONCEPTS AND ISENTROPIC FLOWS

Energy and momentum equations for compressible fluid flows, various regions of flows, reference velocities, stagnation state, velocity of sound, critical states, Mach number, critical Mach number, types of waves, Mach cone, Mach angle, effect of Mach number on compressibility- Isentropic flow through variable ducts - Nozzle and Diffusers Use of Gas tables.

UNIT II FLOW THROUGH DUCTS

Flow in constant area ducts with friction (Fanno flow) - Fanno curves and Fanno flow equation, variation of flow properties, variation of Mach number with duct length. Flow in constant area ducts with heat transfer (Rayleigh flow), Rayleigh line and Rayleigh flow equation, variation of flow properties, maximum heat transfer- Applications.

UNIT III NORMAL SHOCK

Governing equations, variation of flow parameters like static pressure, static temperature, density, stagnation pressure and entropy across the normal shock, Prandtl – Meyer equation, impossibility of shock in subsonic flows, flow in convergent and divergent nozzle with shock- Use of tables and charts.

UNIT IV JET PROPULSION

Theory of jet propulsion – types of jet engines – study of turbojet engine components – diffuser, compressor, combustion chamber, turbine and exhaust systems, performance of jet engines - thrust, thrust power, propulsive and overall efficiencies.

UNIT V SPACE PROPULSION

Theory of rocket propulsion -types of rocket engines – Propellants-feeding systems – Ignition and combustion – rocket engines thrust equation - effective jet velocity specific impulse - rocket engine performance - Staging -Terminal and characteristic velocity – Applications – space flights.

U20MEE402 GEOMETRIC TOLERANCE AND DIMENSIONING

Course Objectives

- To understand Geometric Dimensioning and Tolerance standards to communicate design Intent.
- To Learn how the dimensioning and tolerance can affect part design and documentation
- To Learn Symbols, Geometric Characteristic of dimension
- To understand how dimensional variation can affect a design.
- To Gain added insight on working in a team design environment.

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Explain the geometrical requirements on engineering drawings. **(K1)**
- CO2 Interpret and specify dimensions and tolerance in professional manner. (K3)
- CO3 Explain geometric symbols and rules. (K1)
- CO4 Specify straightness, circularity and cylindricity tolerance. (K3)
- CO5 Define the orientation and profile of plane surfaces. (K1)

UNIT I INTRODUCTION TO GEOMETRIC DIMENSIONING AND TOLERANCE

Geometric product definitions principles, Geometric characteristics symbols, Chart symbols, Rules sheet, introduction to Geometric Tolerance, Coordinate tolerance, Geometric dimensioning, , Allowance and Clearance, GT & D Terms, GT & D rules, Concepts, Value of Tolerance, flat tolerance, straight tolerance, circularity and cylindricity tolerance.

UNIT II DIMENSIONING AND TOLERANCE FUNDAMENTALS

Fundamental Drawing Rules, Units of Linear Measurement, Specifying Linear Dimensions, Specifying Linear Tolerances, Interpreting Dimensional Limits, Specifying Angular Dimensions, Specifying Angular Tolerances, Dimensioning and Tolerancing for CAD/CAM Database Models.

UNIT III SYMBOLS, TERMS AND RULES

Symbols, Geometric Characteristic Symbols, Datum Feature Symbol, Feature Control Frame, Reading the Feature Control Frame, Other Symbols Used with Geometric Tolerancing, Terms, Rules, Limits of Size Prescribe Variations of Form, Applicability of Modifiers in Feature Control Frames, Pitch Diameter Rule.

UNIT IV FLATNESS AND STRAIGHTNESS

Definition, Specifying Straightness of Surface Tolerance, Specifying Straightness of Median Line, Circularity: Definition, Specifying Circularity Tolerance, Cylindricity: Definition, Specifying Cylindricity Tolerance, Free-State Variation- Problems.

UNIT V ORIENTATION, POSITION, LOCATION AND PROFILE

Definition, Specifying Perpendicularity of a Flat Surface, Tangent Plane, Specifying the Perpendicularity of an Axis to a Plane Surface, Parallelism, Angularity, Floating Fasteners, Fixed Fasteners, Projected Tolerance Zones, Multiple Patterns of Features, Specifying Profile Tolerance, Application of Datum Features, A Radius Refinement with Profile, Combining Profile Tolerances with other Geometric Controls.

PRODUCT DESIGN AND DEVELOPMENT

Course Objectives

U20MEE403

- To study the basic concepts of product design and features.
- To understand the quality function deployment tool for identifying customer needs.
- To demonstrate knowledge of Brain dominance theory.
- To understand the approach of material selection for design.
- To get the knowledge about problem solving tools and codes.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Explain conceptual product design techniques. (K1)

- CO2 Identify Customer needs and products design specifications. (K1)
- CO3 Use different systematic concept generation techniques in product design. (K3)
- CO4 Use the embodiment design principles for environment aware design. (K3)
- CO5 Solve ethical conflicts and issues in engineering environment. (K3)

UNIT I INTRODUCTION

Design versus Scientific method, Considerations of a Good Design, Product Development process cycles, Organizations for Product Design, Technological Innovation and Business Strategies, Modern Product development and design theories, Reverse engineering and redesign methodology.

UNIT II PROBLEM DEFINITION

Identifying Customer needs, Kano Diagram, Establishing Engineering Characteristics, Quality Function Deployment (QFD), Product Design Specification (PDS) Design information and sources, Professional societies and Trade associations, Codes and Standards, Patents and Intellectual Property

UNIT III CONCEPT GENERATION

Freud's model, Brain dominance theory, Creative thinking techniques and barriers, Systematic methods: Tear down and experimentation, Function structure, Morphological methods, Theory of Inventive Problem solving (TRIZ), Axiomatic Design (AD) Decision Theory, Evaluation methods, Comparison based on absolute criteria, Pugh's concept, Measurement scales, Weighted decision Matrix, Analytic Hierarchy process (AHP).

UNIT IV EMBODIMENT DESIGN

Product Portfolios and Architecture, Configuration and Parametric design, detailed design, Ergonomics and Design for Environment, Modeling and Simulation, Material selection for Design, Quality assessment and Robust Design.

UNIT V TOOLS AND ETHICAL ISSUES IN ENGINEERING

Team Roles and Dynamics, Effective Team meeting, Robert rules and Parliamentary procedures, Problem solving tools, planning and scheduling, Time management. Origin of laws, Contracts, Product Liability, Tort Law, Codes of Ethics, and solving ethical conflicts.

| U20MEE404 | INDUSTRIAL CASTING TECHNOLOGY | _ | - | - | - | Hrs 45 | |
|--------------------------|---------------------------------|---|---|---|---|-----------|--|
| Course Objectives | | | | | | | |
| • To understand the basi | ic principles of metal casting. | | | | | | |

- To know the various types of melting practices.
- To learn about the various casting techniques
- To broaden the understanding of casting design principles.
- To know about casting defects and its remedial measures and automation.

Course Outcomes

After completion of the course, the students will be able to

CO1 - Explain the activities of foundry shop. (K1)

- CO2 Describe melting process for various alloys. (K1)
- CO3 Identify suitable casting techniques for specific applications. (K1)

CO4 - Design of gates and risers in castings. (K6)

CO5 - Recognize the casting defects and describe foundry automation. (K1)

UNIT I MOLDING PRACTICES

Introduction to casting and Foundry industry, Basic principles of casting process- Sequence in foundry operation, Pattern materials, Types – Mold core and its types, core making process.

UNIT II MELTING FURNACES

Types of Furnaces used in Foundry – Cupola furnace, Melting practice for cast iron, Aluminium alloy, Copper alloy, and Magnesium alloy – Safety considerations.

UNIT III SPECIAL CASTING TECHNIQUES

Investment casting, Shell mould casting, Pressure Die casting – centrifugal casting – Types, CO2 mold casting, Continuous casting, Full mould casting, Evaporative pattern castings.

UNIT IV SOLIDIFICATION OF CASTINGS

Concept of solidification, Directional solidification – Gating and Risering design and analysis – Solidification of pure metals – Rate of solidification, Macro and Micro structure – Solidification contraction.

UNIT V CASTING DEFECTS AND AUTOMATION

Defects in casting and its remedies – Melting and Quality control of various steels and non-ferrous alloys – Fettling, Cleaning and Inspection of casting – Foundry automation – Mould machine automation of sand plant – moulding and fettling section of foundry.

U20MEE405 NON - CONVENTIONAL ENERGY SOURCES

Course Objectives

- To introduce the basics of NCES and statistical data on conventional energy resources.
- To study about the concept of solar energy and its types
- · To learn the wind energy conversion systems
- To provide knowledge on geothermal energy resources and biomass energy conversion systems
- To impart knowledge about tidal, wave and OTEC energy power generation system

Course Outcomes

After completion of the course, the students will be able to

- CO1 Explain the basics of NCES. (K1)
- CO2 Extract on the solar energy and its conversion systems. (K2)
- CO3 Describe the concepts of Wind energy conversion systems. (K1)
- CO4 Describe the harnessing of Geothermal, Ocean energies. (K1)
- CO5 Compare the tidal, wave and OTEC energy power generation system. (K2)

UNIT I STATISTICS ON CONVENTIONAL ENERGY SOURCES

Statistics on conventional energy sources and supply in developing countries, Definition Concepts of NCES, Limitations of RES, Criteria for assessing the potential of NCES. Classification of NCES – Solar, Wind, Geothermal, Bio-mass, Ocean Energy Sources, comparison of these energy sources.

UNIT II SOLAR ENERGY

Solar Energy-Energy available form Sun, Solar radiation data, Solar energy conversion into heat, Flat plate and Concentrating collectors, Mathematical analysis of Flat plate collectors and collector efficiency, Principle of Natural and Forced convection, Solar engines-Stirling, Brayton engines, Photovoltaic, p-n junction, solar cells, PV systems, Stand-alone, Grid connected solar power satellite.

UNIT III WIND ENERGY

Wind energy conversion, General formula -Lift and Drag- Basis of wind energy conversion – Effect of density, frequency variances, angle of attack, and wind speed. Windmill rotors Horizontal axis and vertical axis rotors. Determination of torque coefficient, Induction type generators- working principle.

UNIT IV GEOTHERMAL SOURCES

Nature of Geothermal sources, Definition and classification of resources, Utilization for electric generation and direct heating, Well Head power generating units, Basic features Atmospheric exhaust and condensing, exhaust types of conventional steam turbines. Pyrolysis of Biomass to produce solid, liquid and gaseous fuels, Biomass gasification, Construction details of gasifier, usage of biogas for chulhas, various types of chulhas for rural energy needs

UNIT V WAVE, TIDAL AND OTEC ENERGY

Wave, Tidal and OTEC energy- Difference between tidal and wave power generation, Principles of tidal and wave power generation, OTEC power plants, Operational of small cycle experimental facility, Design of 5 MW OTEC pro-commercial plant, Economics of OTEC, Environmental impacts of OTEC. Status of multiple product OTEC systems.

L IOT AND SMART MANUFACTURING **U19MEE55** 3

Course Objectives

- To present a problem oriented in depth knowledge of IOT and Smart Manufacturing. •
- To address the underlying concepts and methods behind IOT and Smart Manufacturing. •
- To learn about the smart manufacturing distinguish its signification in comparison to conventional • manufacturing.
- To Study about tools for Smart Manufacturing and its application.
- To study about Smart and Empowered working.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Identify different areas of IOT and Smart Manufacturing. (K1)
- CO2 Acquire a broad view about automatic storage management and its governance. (K2)
- CO3 Get a knowledge about smart manufacturing. (K1)
- CO4 Attain knowledge about smart design and find applications of all the areas in daily life. (K2,K6)
- CO5 Become familiarize with elimination of error with smart tools in operations. (K5)

UNIT I INTERNET OF THINGS

The Internet of Things: An overview; Design Principles for Connected Devices; Internet Principles. Thinking about Prototyping - Costs versus ease of prototyping, prototyping and Production, open source versus Closed Source. Proto typing Embedded devices - Electronics, Embedded Computing Basics, Arduino/ Raspberry Pi/ Beagle Bone Black/ etc., Electric Imp and other notable platforms Prototyping of Physical Design. Prototyping online Components - Getting Started with an API, Writing a New API, Real Time Reactions, Other Protocols. Techniques for Writing Embedded Code - Memory Management, Performance and Battery Life, Libraries and debugging.

UNIT II AUTOMATIC STORAGE MANAGEMENT AND SECURITY

Automatic Storage Management in a Cloud World - Introduction to Cloud, Relational Databases in the Cloud, Automatic Storage Management in the Cloud. Smart Connected System Design Case Study Internet of Things Privacy, Security and Governance Introduction, Overview of Governance, Privacy and Security Issues, Contribution from FP7 Projects, Security, Privacy and Trust in IoT-Data-Platforms for Smart Cities, First Steps Towards a Secure Platform, Smarty Approach. Data Aggregation for the IoT in Smart Cities, Security

UNIT III INTRODUCTION TO SMART MANUFACTURING

Introduction to "smart manufacturing"- conventional/legacy manufacturing-Smart Manufacturing Processes-Three Dimensions: (1) Demand Driven and Integrated Supply Chains;(2) Dynamically Optimized Manufacturing Enterprises (plant + enterprise operations);(3) Real Time, Sustainable Resource Management (intelligent energy demand management, production energy optimization and reduction of GHG)

UNIT IV SMART DESIGN/FABRICATION

Smart Design/Fabrication - Digital Tools, Product Representation and Exchange Technologies and Standards, Agile (Additive) Manufacturing Systems and Standards. Mass Customization, Smart Machine Tools, Robotics and Automation (perception, manipulation, mobility, autonomy), Smart Perception - Sensor networks and Applications: Online Predictive Modelling, Monitoring and Intelligent Control Devices. Smart Machining/Manufacturing and Logistics/Supply Chain Processes: Smart Energy Management of manufacturing processes and facilities

ENERGY AND CLIMATE CHANGE

| L | Т | Ρ | С | Hrs |
|---|---|---|---|-----|
| 3 | 0 | 0 | 3 | 45 |

Course Objectives

- To impart knowledge on the global warming, the impact of climate change on society •
- To recommend adaptation and mitigation measures
- To understand about the climate change effects on environment
- To provide knowledge on mitigating climate change
- To differentiate alternate and renewable fuels

Course Outcomes

After completion of the course, the students will be able to

- CO1 An insight into carbon cycle, physical basis of the natural greenhouse effect, including the meaning of the term radioactive forcing, climate change, global warming and measures (K3)
- CO2 Adapt and mitigate the impacts of climate change. (K2)
- CO3 Understand the growing scientific consensus established through the IPCC as well as the complexities and uncertainties (K3)
- CO4 Plan climate change mitigation and adaptation projects (K2)
- CO5 Use of alternate fuels and renewable energy (K2)

UNIT I INTRODUCTION

Atmosphere - weather and Climate - climate parameters - Temperature, Rainfall, Humidity, Wind - Global ocean circulation - El Nino and its effect - Carbon cycle

UNIT II ELEMENTS RELATED TO CLIMATE

Greenhouse gases - Total carbon dioxide emissions by energy sector - industrial, commercial, transportation, residential - Impacts - air quality, hydrology, green space - Causes of global and regional climate change -Changes in patterns of temperature, precipitation and sea level rise - Greenhouse effect

UNIT III IMPACTS OF CLIMATE CHANGE

Effects of Climate Changes on living things - health effects, malnutrition, human migration, socioeconomic impacts- tourism, industry and business, vulnerability assessment- infrastructure, population and sector -Agriculture, forestry, human health, coastal areas

UNIT IV MITIGATING CLIMATE CHANGE

IPCC Technical Guidelines for Assessing Climate Change Impact and Adaptation -Identifying adaption options - designing and implementing adaption measures - surface albedo environment reflective roofing and reflective paving enhancement of evapotranspiration - tree planting programme - green roofing strategies energy conservation in buildings - energy efficiencies - carbon sequestration.

UNIT V UP-SCALING RENEWABLE ENERGY: POLICY INCENTIVES

Energy source - Biofuels - Energy policies for a cool future - Energy Audit - Energy and climate governance. Global Energy - Energy - Geopolitics - Energy Security - Energy Production - Energy Consumption - Energy Markets - Energy Policy.

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting edge technologies with best practices.

M2: Research and Innovation:

To foster value-based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT VISION AND MISSION

Vision

The Mechanical Engineering department strives to be recognized as an excellent academic and research center for creating outstanding Engineers, Entrepreneurs and Leaders

Mission

M1: Professional Skills:

To provide quality education to enhance students inter-personal and intra-personal skills

M2: State-of-art facilities:

To render excellent infrastructure facilities and laboratories to excel as skilled professionals

M3: Research Exposure:

To Strengthen Research and Development within the department through industrial associations

M4: Employability:

To put enthusiastic exertions to enhance employability and entrepreneurship skills of students

M5: Human Values:

To empower students with professional ethics and human values to serve the society

PROGRAMME OUTCOMES (POs)

PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Technical knowledge

To foster our young graduates with cogent technical knowledge so as to make them employable

PEO2: Real-Time Applications

To apply the acquired knowledge in the field of Mathematics, Science and Engineering in developing real-time projects

PEO 3: Design Ability

To design a system, component or process to meet the desired needs within realistic constraints such as manufacturing, economy, environmental sustainability, social, health and safety

PEO 4: Ethics

To prepare the students to become entrepreneurs with professional attitude in the broader ethical perspective

PEO 5: Life - Long Learning

To craft curiosity among students for life-long learning through self-study

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO 1: Solving real time problems

To develop capability to identify, analyze and solve engineering problems in concern to mechanical engineering along with associated engineering streams.

PSO 2: Pursue Professional career

To bestow quality learning environment to pursue professional career in mechanical engineering with integrated knowledge

PSO 3: Concentrating on skill development

To enflame the student's technical capabilities in engineering design process, intra and inter personnel, linguistic and higher level professional skills required in engineering.

Annexure 8

Diploma lateral entry - more courses to be added as per TNEA /CENTAC / PTU revised guidelines

- 1. Mechanical and Rural Engineering
- 2. Mechanical Engineering (Sandwich)
- 3. Tool Design Mechanical Engineering (Tool Die)
- 4. Agricultural engineering and Farm Equipment Technology
- 5. Electronics (Robotics) (Sandwich)
- 6. Mechanical Design and Drafting
- 7. Foundry Technology (Sandwich)
- 8. Mechanical Engineering (Refrigeration and A/C)
- 9. Production Engineering (Sandwich)
- 10. Metallurgy Mechatronics Engineering
- 11. Machine Tool Maintenance and Repairs Tool and Die Making
- 12. Machine Tool Maintenance and Repairs (Sandwich) Tool and Die Making (Sandwich)
- 13. Electronics (Robotics)
- 14. Mechatronics Engineering (Sandwich)

Annexure 10

| 13 | Dr. Anand Gurupatham Deputy General Manager, CAE-Department Head at Renault Nissan, Technology & Business Center, Chennai, Tamil Nadu, India | Industrial Member |
| Alumni | | I |
| 14 | Mr.P.Madavan, Research Scholar MIT, Anna university, Chennai. | Alumni Member |

Agenda of the Meeting

- 1. Consideration of confirmation of minutes of the previous meeting held on 17.07.2020 and ratify the note on action taken on the decisions PG programmes of the previous meeting
- 2. To consider and ratify the Common Course introduced in PG programmes from the Academic Year 2020-21
- 3. Consideration and approve the students admitted in the Academic Year 2020-21.
- 4. Approval for the panel of examiners
- 5. Consideration and approve of Ph. D Course Work in Mechanical Engineering.
- 6. Consideration of Name change of M.Tech Program from Manufacturing Engineering to M.Tech Automation and Robotics Production
- 7. Any other item with the permission of chair

PG and Ph.D Minutes of the Meeting

Dr. K.Velmurugan, Chairman, BoS opened the meeting by welcoming and introducing the external members, to the internal and co-opted members and thanked them for accepting to become the member of the Board of Studies and the meeting thereafter deliberated on agenda items that had been approved by the Chairman.

D.O.No.F.1-1/2018(Journal/CARE)

Respected Sir/Madam,

University Grants Commission in its 543rd meeting held on 9th August, 2019 approved two Credit Courses for awareness about publication ethics and publication misconducts entitled "Research and Publication Ethics (RPE)" to be made compulsory for all Ph.D. students for pre-registration course work (attached as Annexure).

In view of the above, you are requested to ensure that the above two Credit courses may be made compulsory for all Ph.D. students for pre-registration course work undertaken in your University from the forthcoming academic session.

With regards,

TO THE VICE-CHANCELLORS OF ALL UNIVERSITIES

Prof. Rajnish Jain Secretary

Yours

sincerely, sh Jain)

ANNEXURE

Course Title:

Sec. P

 Research and Publication Ethics (RPE)-Course for awareness about the publication ethics and publication misconducts.

Course Level:

2 Credit course (30 hrs.)

Eligibility:

 M.Phil., Ph.D. students and interested faculty members (It will be made available to post graduate students at later date)

Fees:

As per University Rules

Faculty:

Interdisciplinary Studies

Qualifications of faculty members of the course:

Ph.D. in relevant subject areas having more than 10 years' of teaching experience

About the course

Course Code: CPE- RPE

and some

Overview

 This course has total 6 units focusing on basics of philosophy of science and ethics, research integrity, publication ethics. Hands-on-sessions are designed to identify research misconduct and predatory publications. Indexing and citation databases, open access publications, research metrics (citations, h-index, Impact Factor, etc.) and plagiarism tools will be introduced in this course.

Pedagogy:

Class room teaching, guest lectures, group discussions, and practical sessions.

Evaluation

 Continuous assessment will be done through tutorials, assignments, quizzes, and group discussions. Weightage will be given for active participation. Final written examination will be conducted at the end of the course.

Course structure

The course comprises of six modules listed in table below. Each module has 4-5 units.

| Modules | Unit title | Teaching hours |
|----------|--------------------------------|-------------------|
| Theory | | |
| RPE 01 | Philosophy and Ethics | 4 |

Syllabus in detail

THEORY

• RPE 01: PHILOSOPHY AND ETHICS (4 hrs.)

- 1. Introduction to philosophy: definition, nature and scope, concept, branches
- 2. Ethics: definition, moral philosophy, nature of moral judgements and reactions

• RPE 02: SCIENTIFICCONDUCT (4hrs.)

- 1. Ethics with respect to science and research
- 2. Intellectual honesty and research integrity
- 3. Scientific misconducts: Falsification, Fabrication, and Plagiarism (FFP)
- 4. Redundant publications: duplicate and overlapping publications, salami slicing
- 5. Selective reporting and misrepresentation of data

• RPE 03: PUBLICATION ETHICS (7 hrs.)

- 1. Publication ethics: definition, introduction and importance
- 2. Best practices / standards setting initiatives and guidelines: COPE, WAME, etc.
- 3. Conflicts of interest
- 4. Publication misconduct: definition, concept, problems that lead to unethical behavior and vice versa, types
- 5. Violation of publication ethics, authorship and contributorship
- 6. Identification of publication misconduct, complaints and appeals
- 7. Predatory publishers and journals

PRACTICE

• RPE 04: OPEN ACCESS PUBLISHING(4 hrs.)

- 1. Open access publications and initiatives
- SHERPA/RoMEO online resource to check publisher copyright & self-archiving policies
- 3. Software tool to identify predatory publications developed by SPPU
- Journal finder / journal suggestion tools viz. JANE, Elsevier Journal Finder, Springer Journal Suggester, etc.

• RPE 05: PUBLICATION MISCONDUCT (4hrs.)

A. Group Discussions (2 hrs.)

- 1. Subject specific ethical issues, FFP, authorship
- 2. Conflicts of interest
- 3. Complaints and appeals: examples and fraud from India and abroad

B. Software tools (2 hrs.)

Use of plagiarism software like Turnitin, Urkund and other open source software tools

RPE 06: DATABASES AND RESEARCH METRICS (7hrs.)

A. Databases (4 hrs.)

- 1. Indexing databases
- 2. Citation databases: Web of Science, Scopus, etc.

B. Research Metrics (3 hrs.)

- Impact Factor of journal as per Journal Citation Report, SNIP, SJR, IPP, Cite Score
- 2. Metrics: h-index, g index, i10 index, altmetrics

Ph.D Course Work guidelines: Mandatory for Ph.D scholars

Compulsory Course Work:

- > As per UGC Minimum Standards and Procedure for Award of Ph.D Degree Regulations 2020, a Ph.D scholar shall be required to undertake course work for a minimum period of one semester which is compulsory pre-requisite for both full time and part time candidates.
- > It shall consist of one or more courses on **Research & Publication Ethics and Research Methodology** which shall cover areas such as quantitative methods, computer applications, research ethics and review of published research in the relevant field, training, and field work and other areas found relevant to the discipline concerned. Other courses shall be advanced level areas in the subjects concerned for enabling the students to acquire deep knowledge in the preparation for Ph. D degree.
- All the candidates admitted to the Ph. D programme shall be required to complete the Ph. D \geq course work prescribed by the Institute & respective Department during the initial / first semester. Research Supervisor along with Research Advisory Committee shall prescribe the courses and recruit faculty to teach candidates prescribed courses.
- > The concerned Department must be involved in teaching of Course Work, especially related to selection of Title and preparation of Synopsis.
- > A candidate will complete his Course Work of six months through intensive classes, assignments, review of literature, short studies under the recognized Supervisor & Research Advisory Committee.
- After the completion of Course Work, examination will be conducted by Examination section of the Institute. In case candidate fails or drops in examination, one more chance will be given for the compulsory Course Work Examination.
- > However, if the student is not in a position to complete the course work in the prescribed time limit as above, due to genuine reasons, may file an appeal and on the recommendation of the Research Advisory Committee, the Dean may grant extension up to additional one semester. Failing to complete the course work within the extended period (within first year of admission) may lead to cancellation of candidature.
- > Scholars admitted to the Ph.D programme shall be required to complete the course work prescribed by the respective departments during the initial one year from the date of registration, failing which the registration shall be automatically cancelled.

Ph. D Course Work

Scheme and Syllabus

| | COMPULSORY | | | | |
|--------|-------------|--|--------|--|--|
| Sl. No | Course Code | Course Title | Credit | | |
| 1. | 20RPE01 | RESEARCH AND PUBLICATION ETHICS (RPE) | 2 | | |
| 2. | 20RRM02 | RESEARCH METHODOLGY | 2 | | |
| | | ELECTIVE ADVANCE LEVEL (Any Two) | | | |
| 4. | 20RME 01 | ELECTIVE-1 | 4 | | |
| 5. | 20RME 02 | ELECTIVE-2 | 4 | | |
| 6. | 20RME 03 | ELECTIVE-3 | 4 | | |
| 7. | 20RME 04 | ELECTIVE-4 | 4 | | |

Scheme of Examination and Passing:

- This course will have 100% external (Institution written examination of 3 hours duration for each course paper). All external examinations will be held at the end of course work and will be conducted by the Institute as per the existing norms.
- ➤ Each question paper will be of 100 Marks.
- Each question paper will consist of 10 questions of 20 marks each and student should answer Any Five questions out of 10 questions.

Standard point scale for grading:

| Grade | Marks | Grade Points |
|---------|---------------|--------------|
| 0 | 70 & above | 7 |
| А | 60-69.99 | 6 |
| В | 55-59.99 | 5 |
| С | 50-54.99 | 4 |
| D | 45-49.99 | 3 |
| Е | 40-44.99 | 2 |
| F(Fail) | 39.99 & below | 1 |

A Ph.D. scholar has to obtain a **minimum of 55% of marks** or its equivalent grade in the UGC7- point scale (or an equivalent grade/CGPA in a point scale wherever grading system is followed) in the course work in order to be eligible to continue in the program and submit the dissertation/thesis.

Question paper pattern:

- The question paper will have Ten questions.
- Each full question consists of 20 marks.
- There will be 2 full question (with a maximum of four sub questions) from each module.
- Each full question will have sub questions covering all the topics under a module.
- The students will have to answer 5 full questions, selecting one full question from each module.

|----------------|---------|---------------------|------------------|
| Exam Hours: 03 | | `Exam Marks: 100 | Credit-2 |
| | | | (30Hrs) |

Module - 1 (4Hrs)

Research Methodology: Introduction, Meaning of Research, Objectives of Research, Types of Research, Research Approaches, Significance of Research, Research Methods versus Methodology, Research and Scientific Method, Research Process, Criteria of Good Research, Problems Encountered by Researchers in India. Defining the Research Problem: Research Problem, Selecting the Problem, Necessity of Defining the Problem, Technique Involved in Defining a Problem, An Illustration.

Module -2(4Hrs)

Reviewing the literature: Place of the literature review in research, bringing clarity and focus to research problem, improving research methodology, broadening knowledge base in research area, Enabling contextual findings, Review of the literature, searching the existing literature, reviewing the selected literature, Developing a theoretical framework, Developing a conceptual framework, Writing about the literature reviewed. Research Design: Meaning of Research Design, Need for Research Design, Features of a Good Design, Important Concepts Relating to Research Design, Different Research Designs, Basic Principles of Experimental Designs, Important Experimental Designs.

Module – 3 (6Hrs)

Design of Sample Surveys: Design of Sampling: Introduction, Sample Design, Sampling and Non-Sampling Errors, Sample Survey versus Census Survey, Types of Sampling Designs. Measurement and Scaling: Qualitative and Quantitative Data, Classifications of Measurement Scales, Goodness of Measurement Scales, Sources of Error in Measurement, Techniques of Developing Measurement Tools, Scaling, Scale Classification Bases, Scaling Technics, Multidimensional Scaling, Deciding the Scale. Data Collection: Introduction, Experimental and Surveys, Collection of Primary Data, Collection of Secondary Data, Selection of Appropriate Method for Data Collection, Case Study Method.

Module -4(6Hrs)

Testing of Hypotheses: Hypothesis, Basic Concepts Concerning Testing of Hypotheses, Testing of Hypothesis, Test Statistics and Critical Region, Critical Value and Decision Rule, Procedure for Hypothesis Testing, Hypothesis Testing for Mean, Proportion, Variance, for Difference of Two Mean, for Difference of Two Proportions, for Difference of Two Variances, P-Value approach, Power of Test, Limitations of the Tests of Hypothesis. Chi-square Test: Test of Difference of more than Two Proportions, Test of Independence of Attributes, Test of Goodness of Fit, Cautions in Using Chi Square Tests.

Module -5(10Hrs)

Interpretation and Report Writing: Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation, Significance of Report Writing, Different Steps in Writing Report, Layout of the Research Report, Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Precautions for Writing Research Reports. Intellectual Property: The Concept, Intellectual Property System in India, Development of TRIPS Complied Regime in India, Patents Act, 1970, Trade Mark Act, 1999, The Designs Act, 2000, The Geographical Indications of Goods (Registration and Protection) Act1999, Copyright Act,1957, The Protection of Plant Varieties and Farmers' Rights Act, 2001, The Semi-Conductor Integrated Circuits Layout Design Act, 2000, Trade Secrets, Utility Models, IPR and Biodiversity, The Convention on Biological Diversity (CBD) 1992, Competing Rationales for Protection of IPRs, Leading International Instruments Concerning IPR, World Intellectual Property Organization (WIPO), WIPO and WTO, Paris Convention for the Protection of Industrial Property, National Treatment, Right of Priority, Common Rules, Patents, Marks, Industrial Designs, Trade Names, Indications of Source, Unfair Competition, Patent Cooperation Treaty (PCT), Advantages of PCT Filing, Berne Convention for the Protection of Literary and

Artistic Works, Basic Principles, Duration of Protection, Trade Related Aspects of Intellectual Property

Rights(TRIPS) Agreement, Covered under TRIPS Agreement, Features of the Agreement, Protection of Intellectual Property under TRIPS, Copyright and Related Rights, Trademarks, Geographical indications, Industrial Designs, Patents, Patentable Subject Matter, Rights Conferred, Exceptions, Term of protection, Conditions on Patent Applicants, Process Patents, Other Use without Authorization of the Right Holder, Layout-Designs of Integrated Circuits, Protection of Undisclosed Information, Enforcement of Intellectual Property Rights, UNSECO.

Question paper pattern:

- The question paper will have ten questions.
- Each full question consists of 20 marks.
- There will be 2 full questions (with a maximum of four sub questions) from each module.
- Each full question will have sub questions covering all the topics under a module.
- The students will have to answer 5 full questions, selecting one full question from each module.
