## About IEIPSC

The Institution of Engineers (India), Puducherry State Centre was established on 31st July 2010 with the aim of promoting engineering excellence, professional development, and knowledge-sharing among engineers in the region. Since its inception, the centre has actively contributed to the advancement of the engineering profession through technical events, academic collaborations, and public service initiatives.

### **Our Vision**

To be the leading professional institution in India for the advancement of engineering and technology for the benefit of the community, nation and mankind.

### **Our Mission**

To promote and advance the science and practice of engineering and technology in all its branches and applications for the benefit of the community.

## Composition of IEI Committee

S.No	Name	Designation	Department	Member
1	Dr. Venkatachalapathy V.S.K.	Director cum Principal	Mechanical	Ex -Officio
2	Dr. Varalakshmi L. M	Professor &Head	ICE	Member Secretary
3	Dr. K. Naveenkumar	Assistant Professor	ICE	Member
4	Mrs. C. Kalpana	Assistant Professor	CSE	Member
5	Mrs. Arunthathi	Assistant Professor	BME	Member
6	Dr. Auxilia	Assistant Professor	AI & DS	Member
7	Ms. Meenakshi	Assistant Professor	AI & DS	Member
8	Mrs. Devika	Assistant Professor	CSBS	Member
9	Ms. Diviya	Assistant Professor	ECE	Member
10	Mrs. Gayathri	Assistant Professor	ECE	Member
11	Dr. N. Jothy	Assistant Professor	ECE	Member
12	Dr. Lenin	Assistant Professor	ECE	Member
13	Dr. Gayathri	Assistant Professor	EEE	Member
14	Mr. Gopinath	Assistant Professor	CCE	Member
15	Ms. Indhu	Assistant Professor	CCE	Member
16	Mr. Jagan	Assistant Professor	MCTR	Member
17	Mrs. Kalyani	Assistant Professor	Civil	Member
18	Mr. Santhoshkumar	Assistant Professor	Mechanical	Member
19	Mr. Vijayakumar	Assistant Professor	IT	Member
20	Mrs. Kalaiselvi	Assistant Professor	IT	Member

### Composition of committee:

- Head of the Institution
- Senior Faculty from each Department
- Professional Society members from each Department
- Students from each Department

### Meeting:

Professional societies meet: 1 / Semester

### Function of committee

Professional bodies serve several functions, including:

- Setting and maintaining standards of professional conduct and ethics
- Providing education and training opportunities
- Facilitating networking and collaboration among members
- Offering support and resources for members
- Representing the interests of members to government and other organizations
- Promoting the value and recognition of the profession to the public.

## Student Office Bearers

S. No	Convener / Member	Name of the student	Year / Sem / Batch
1	President	Divagar R	III / V / 2018-2022
2	Vice-President	Kishore kumar K	II / III / 2019-2024
3	Secretary	Vishal K	III / V / 2018-2022
4	Committee Members	Senga A	III / V / 2018-2022
5		Abinaya.K	II / III / 2019-2023
6		Kumaran .R	II / III / 2019-2023
7		Ragul K	I / I / 2020-2024
8		Swetha D	I / I / 2020-2024

\_\_\_\_\_  
Signature of the Faculty Advisor  
with date affixed with seal

\_\_\_\_\_  
Signature of the Principal  
with date affixed with seal

## Student Membership ID list

## SUMMARY

During the **academic year 2022–2023**, Sri Manakula Vinayagar Engineering College, through various departments and the **IEI Students' Chapter**, successfully organized a total of **59 academic, technical, and professional development events**. These activities were systematically planned and evenly distributed across all four quarters of the academic year, ensuring continuous student engagement, holistic learning, and alignment with outcome-based education practices.

The events covered a **broad spectrum of categories**, including **guest lectures, seminars, workshops, paper presentations, technical and project demonstrations, competitions, technical quizzes, aptitude tests, group discussions, industrial/technical visits, film shows, and displays of technical information**. Among these, **Guest Lectures/Lectures (18 events)** and **Seminars (17 events)** constituted the majority, highlighting the institution's strong focus on **expert interaction, industry exposure, and knowledge enrichment**. These sessions were delivered by professionals from reputed industries, research organizations, and academic institutions, providing students with insights into **emerging technologies, career opportunities, real-world applications, and professional ethics**.

Hands-on learning and experiential education were emphasized through **Workshops, Technical Demonstrations, and Project Expos**, enabling students to apply theoretical concepts in practical scenarios. **Technical and Industrial Visits (9 events)** offered firsthand exposure to industrial environments, tools, workflows, and safety practices, thereby bridging the gap between classroom learning and industry requirements. Student-centric assessment and enrichment activities such as **paper presentations, quizzes, aptitude tests, group discussions, and competitions** played a vital role in enhancing **communication skills, analytical thinking, teamwork, leadership, and research aptitude**.

Department-wise participation was strong and balanced, with active contributions from **Artificial Intelligence & Data Science, Computer Science & Business Systems, Information Technology, Electronics & Communication Engineering, Instrumentation & Control Engineering, Biomedical Engineering, and Computer & Communication Engineering**. The **third quarter (January–March)** recorded the highest number of events, reflecting peak academic and technical activity during the core semester period.

Overall, the organization of **59 diverse and meaningful events** during the academic year demonstrates a **vibrant academic ecosystem**, strong **industry–institute interaction**, and a sustained commitment to **student skill development, innovation, and professional excellence**. These activities significantly support **NBA, NAAC, IQAC, and IEI quality benchmarks**, contributing to the preparation of students as **competent, industry-ready, and socially responsible engineers**.

### Report

The II-year students in the Department of Artificial Intelligence and Data Science Organized an IEI student chapter event, where they conducted a Technical Discussion on Artificial Neural Network, the aim was to emphasize the fundamental role of Artificial Neural Network. The discussion began with an introduction to the core concepts and quickly evolved into an interactive exchange of ideas.

Event Highlights:

- **Real-World Applications**
- **Importance of ANN**
- **Working of ANN**

**Date :** 27.05.2023 **Duration:** 60 mins  
**No of Students Participated:** 53

**Photographs with caption:**

**Report**

The III-year students in the Department of Computer Science and Business Systems Organized a Club activity, where they gained knowledge on the recent domain of Machine Learning using Python. The students were tasked with experimenting with a real-world dataset and exploring how machine learning algorithms can be utilized to discover patterns in data. They had hands-on experience with Weka, a popular data-mining and machine-learning package, and were required to present a report on the dataset and the algorithms utilized. The students completed the necessary tasks on a dataset of their choosing.

**Key Highlights;**

- Machine Learning algorithm.
- Python programming.
- Implementation of Machine Learning algorithms using python.

**Report**

*(maximum 250 words)*

The document on hand is a narration of the details of the events and proceedings of the year 2022, the AIDS Day theme is “Equalize”, which emphasizes eliminating the inequalities that have slowed the fight against the disease. The inequalities, such as gender inequality, limit women’s access to HIV care and other forms of sexual and reproductive health care, which in turn affects their decision-making capabilities and their capacity to decline unwanted sexual encounters or negotiate for safer ones. We have only eight years left before the 2030 goal of ending AIDS as a global health threat. Economic, social, cultural, and legal inequalities must be addressed as a matter of urgency. In a pandemic, inequalities exacerbate the dangers for everyone. Indeed, the end of AIDS can only be achieved if we tackle the inequalities which drive it. The session was given to third-year students of CSE in third year A section Classroom.

The Department of Electronics and Communication Engineering of Sri Manakula Vinayagar Engineering College, an autonomous institution located in Puducherry, organized **Guest Lecture on “Cybersecurity in Networking”** on June 24, 2023.

The learning objectives of this Guest Lecture:

- Understand the fundamentals of cybersecurity in the context of networking.
- Explore the various types of cyber threats and attacks commonly encountered in networking.
- Gain insights into the techniques and strategies used to protect networks from cyber threats.
- Learn about the latest trends and advancements in cybersecurity practices for networking.
- Develop an awareness of the ethical and legal considerations associated with cybersecurity in networking.

The Department of Electronics and Communication Engineering of Sri Manakula Vinayagar Engineering College, an autonomous institution located in Puducherry, organized **Lecture on “Basics of Signals and systems”** on July 1, 2023. The learning objectives of this Lecture:

- Introduction to Signals and Systems: Understand what signals are and differentiate between continuous-time and discrete-time signals and define what systems are and differentiate between linear and nonlinear systems.
- Signal Representation: Learn how to mathematically represent signals and explore different signal domains.
- Basic Operations on Signals: Explore fundamental signal operations like scaling, shifting, and time reversal.
- Frequency Analysis: Introduce the concept of frequency analysis, including the Fourier transform, and understand its importance in signal processing.

These points provide a foundational understanding of the key concepts in signals and systems, serving as a solid starting point for further exploration in this field.

The guest lecture on blockchain technology was organized by the IT Dept. &IEI for the Second-year IT students. The session was led by Professor Chandra Mohan from the prestigious VIT in Chennai. The lecture aimed to introduce the concept of blockchain technology, explain its benefits, and showcase some real-world applications. The guest lecture on blockchain technology was informative and engaging. The speaker provided a clear and concise overview of blockchain technology, explained its benefits, and showcased some real-world applications. The lecture was well-received by the audience, and many attendees expressed their interest in learning more about blockchain technology and its potential applications.

The guest lecture on Metaverse Technology was organized by the IT Dept. &IEI for the third-year IT students. The speaker was an expert in the field in designing and developing virtual worlds and immersive experiences. The lecture was aimed at providing an overview of the concept of the metaverse, its potential applications, and the technical challenges involved in its development. After the lecture, there was a Q&A session where the students had the opportunity to ask the speaker questions about the metaverse. The questions ranged from technical issues such as the scalability of the metaverse to ethical issues such as privacy and security concerns. The speaker answered the questions in detail, providing insights and suggestions on how to address the challenges and make the metaverse a safe and inclusive environment.

**SMVEC IEI Student Chapter organizes Robotics club Activity organized by Mechatronics department on 11.02.23.** Providing education to students is not just limited to making them attend classes. A fair part of the learning process also includes participation in extracurricular activities. Teachers can encourage students to participate in club activities to learn new skills and develop their knowledge. These activities are gaining more relevance in recent times. Students can choose a club that matches their interests and take part in the activities voluntarily. A Robotics club is a gathering of students who are interested in learning about and working with robots .At robotics competitions, teams of students must design and build a robot that can compete against opponents in a series of specific challenges. The aim of the Robotic club is to inculcate within ourselves the habit of "thinking technologically".

**Objectives**

- To inspire young minds to be the driving force in the field of robotics
- It is an opportunity to apply knowledge creatively, to see how systems interact, both with each other and with the environment.
- To develop professional engineering skills among the students which will help them in the professional life.

**Activities of the Club:**

- Robotics awareness programs
- Short term trainings
- Workshop on basic of robotics

**Report**

*(maximum 250 words)*

**SMVEC IEI Student Chapter organizes Laser Cutting Workshop on 06.02.2023.** Laser cutting is a technology that uses a laser to vaporize materials, resulting in a cut edge. While typically used for industrial manufacturing applications, it is now used by schools, small businesses, architecture, and hobbyists. Laser cutting works by directing the output of a high-power laser most commonly through optics. The laser optics and CNC (computer numerical control) are used to direct the laser beam to the material. A commercial laser for cutting materials uses a motion control system to follow a CNC or G-code of the pattern to be cut onto the material. The focused laser beam is directed at the material, which then either melts, burns, vaporizes away, or is blown away by a jet of gas, leaving an edge with a high-quality surface finish.

CO<sub>2</sub> laser cutting is a sheet metal processing technique that uses an electrically driven gas laser. The laser cuts contours into metal sheet material such as steel, stainless steel or aluminium. CO<sub>2</sub> cutting technology is highly accurate and offers a lot of shaping freedom. This even makes it easy to cut complex shapes. cutting technology is highly accurate and offers a lot of shaping freedom. This even makes it easy to cut complex shapes. Laser cutting is a non-traditional machining method that uses an intensely focused, coherent stream of light called a laser to cut through the material. On the other hand, laser drilling is another type of laser machining process that produces a hole through the work piece achieved by different techniques. Based on this method of training students to learn the process also they become a Entrepreneur.

**SMVEC IEI Student Chapter organizes Hands-on Training electronic devises Trouble Shooting on 02.03.2023.** Troubleshooting is simply a process of diagnosis, or determining the exact cause of a particular problem. The main objective of this training Knowledge about construction and working of semiconductor, sensors diodes and their applications. Also to learn about functions, testing and specification of Electronic devices. The troubleshooting process is a logical one that is carried out in a step by step manner. Check out each suspected area and rule out components that are in good condition. Start with checking and testing the easiest components. Try isolating the problem. By applying basic troubleshooting skills on each electrical and electronics equipment's. End of this training courses Student to learn the following

- To know about commonly used active and passive electronic components.
- To learn the basic building blocks of day to day commonly used electronic devices
- To learn soldering and the use of testing of equipment
- To learn about circuit simulation using software
- To know about where and how to get different types of Electronic Devices

Technical Quiz

**Details:**  
**Report**  
*(maximum 250 words)*

The technical quiz on the theme of "Pollution-Free" for World Environment Day 2023 on 05.06.2023 successfully created awareness and engaged participants in meaningful discussions about pollution and its impact. The event provided a platform for knowledge-sharing, inspiration, and collaboration among individuals and organizations committed to building a pollution-free world. By increasing awareness and promoting sustainable practices, the quiz played a significant role in encouraging participants to become responsible stewards of the environment. Moving forward, it is essential to sustain this momentum and continue organizing similar events to empower individuals and communities in their quest for a pollution-free future.

**Report**

*(maximum 250 words)*

**SMVEC IEI Student Chapter organizes QUIZ WIZ on 07.01.2023.** A technical quiz is a type of quiz that focuses on testing knowledge and understanding of technical subjects, such as science, technology and engineering fields. It may include questions related to concepts, theories and problem-solving techniques. There will be 25 questions and each question carry 2 marks. A minimum of 50% marks is the eligibility to get e-certificate. Top 3 students will get the prizes. This quiz competition is a pursuit of technical knowledge and actually tests the students retention and accumulation of knowledge towards application of concepts. It would be greatly helpful in acknowledging their position on their journey to technical excellence. Technical quizzes may be used to assess the knowledge of students, professionals, or enthusiasts in a particular field, and may be conducted in various formats, such as online quizzes, written tests, or live competitions. The term technical quiz is a capacious one: it can refer to a single game consisting of just a few questions, or it can refer to a large-scale event involving dozens or hundreds of people.

The aptitude training program was organized by the IT Dept. &IEI for the third-year IT students. The program was designed to help students improve their problem-solving, critical thinking, and decision-making skills, which are essential for success in both academic and professional settings. The program consisted of a series of workshops and activities that focused on different aspects of aptitude training. The aptitude training program was a great success, and it provided the participants with valuable skills and knowledge that are essential for success in academic and professional settings. The program was well-organized and structured, and the workshops and activities were engaging and interactive. The program also provided the participants with valuable feedback and guidance on how to improve their skills further. Overall, the aptitude training program was a great learning experience for everyone involved, and it demonstrated the commitment of the career counseling center to helping students achieve their full potential.
