ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Regulation-2023

CURRICULUM AND SYLLABI

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of lives to serve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting-edge technologies with best practices.

M2: Research and Innovation:

To foster value- based research and innovation in collaboration with industries and institutions globally for creating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill-based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT VISION AND MISSION

Vision

Incorporating the Data Science skills and applying the acquired analytical knowledge in the heterogeneous domains through Artificial Intelligence

Mission

M1: Understand Data Science:

Amalgamation of Programming Knowledge, Mathematical Skill Set and Knowledge of Business Domains to face the challenges of the real-world requirement

M2: Applying the Acquired Knowledge:

Inculcating the spirit of applying the acquired knowledge, innovation and creativity among students to work in heterogeneous domains

M3: Capstone Project:

Providing forum to carry out a capstone project through collaborations with the industries

M4: Be socially beneficial and other moral concerns:

Inspiring the educational experience in the field of application development and ensure the design, principle and ethic to be followed in the society.

M5: Continuous Learning for keen Initiative:

Affording continuous learning in the field of current trends in Artificial Intelligence and Data Science for keen initiative and enterprise focused.

PROGRAMME OUTCOMES (POs)

PO1: Engineering knowledge:

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis:

Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions:

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability:

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication:

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance:

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning:

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Acquiring the data:

To create an essential knowledge for extracting data from heterogeneous domains.

PEO2: Information Inferring and Knowledge representation:

To equip the student with knowledge, through different programming skills and creating a knowledge representation for the inferred data, so that it can be applied in the real time scenario.

PEO3: Design method:

To enable the student as a Data Analyst by designing a right Machine Learning algorithm and seamless programming skill to solve any sort of application.

PEO4: Systematic Enhancement:

To provide them with a keen knowledge on current trends and to enhance its impact periodically on the existing applications to meet the future scenario.

PROGRAM SPECIFIC OBJECTIVES (PSOs)

PSO 1: Mathematical Foundation and Data Procuring:

To utilize the knowledge of Mathematical concept in procured Data from various Data sources.

PSO 2: Intellect Applications and Research Technologies:

To utilize the technical concepts, ideas, methodologies and the new emerging technologies in Artificial Intelligence and use this knowledge in their analytic skill to solving the current and future Data Analytics real time applications.

PSO 3: Developments of Real Time Applications:

To utilize the knowledge acquired and create a forum to carry out a capstone project through collaborations with the industries

STRUCTURE FOR UNDERGRADUATE ENGINEERING PROGRAM

Sl. No	Course Category	Breakdown of Credits
1	Humanities and Social Sciences including Management courses (HS)	16
2	Basic Science Courses (BS)	17
3	Engineering Science Courses (ES)	41
4	Professional Core Courses (PC)	58
5	Professional Elective Courses (PE)	18
6	Open Elective Courses (OE)	09
7	Project Work and Internship (PA)	13
8	Ability Enhancement Courses (AEC*)	-
9	Mandatory Courses (MC*)	-
Total		172

SCHEME OF CREDIT DISTRIBUTION – SUMMARY

Sl.No	Course Category	Credits per Semester								Total Credits
		I	II	III	IV	V	VI	VII	VIII	
1	Humanities and Social Science Courses (HS)	4	3	3	1	2	-	-	3	16
2	Basic Science Courses (BS)	4	4	5	4		-	-	-	17
3	Engineering Science Courses (ES)	12	12	6	11	-	-	-	-	41
4	Professional Core Courses (PC)	4	4	8	4	12	15	11	-	58
5	Professional Elective Courses (PE)	-	-	-	3	3	3	3	6	18
6	Open Elective Courses (OE)	-	-	-		3	3	3	-	09
7	Project Work (PA)	-	-	-	-	1	1	2	8	12
8	Internship (PA)	-	-	-	-	-	-	1	-	01
9	Ability Enhancement courses (AEC*) Courses (AEC*)	-	-	-	-	-	-	-	-	-
10	Mandatory Courses (MC*)	-	-	-	-	-	-	-	-	-
Total		22	23	22	23	21	22	20	17	172

* AEC and MC course Credits are not included for CGPA calculation

HONOURS DEGREE PROGRAMME:

The student is permitted to opt for earning an honours degree in the same discipline of engineering in addition to the degree in his/her own discipline. To earn an honours degree the student is required to earn an additional 18 - 20 credits (over and above the total 170 credits prescribed in the curriculum) starting from fourth semester onwards by completing 5 additional courses offered in respective semesters. A student is eligible to exercise this option if he/she has passed all the courses offered upto third semester in the first attempt itself and has earned a CGPA / GPA* (*for lateral entry) of not less than 8.0. The prescribed courses offered for Honours degree are given in **Annexure V**.

2-18/1-

ANNEXURE - I
PROFESSIONAL ELECTIVE COURSES (18 CREDITS)

Sl. No.	Course Code	Course Title
Professional Elective – I (Offered in Semester IV)		
1	U23CSDC01	Automata and Compiler Design
2	U23ADE401	Introduction to Computer Vision
3	U23ADE402	R Programming
4	U23ADE403	Tools and Techniques of Data Science
5	U23ADE404	Data Handling and Preprocessing
Professional Elective – II (Offered in Semester V) *		
1	U23ADE505	Text Mining and Sentiment Analysis
2	U23ADE506	User Experience Design
3	U23ADE507	Java Programming: Essential Concepts to Advanced Mastery
4	U23ADE508	Exploratory Data Analysis
5	U23ADE509	Designing Machine Learning Systems
Professional Elective – III (Offered in Semester VI) *		
1	U23ADE610	Speech Processing and Analytics
2	U23ITEC05	Augmented Reality and Virtual Reality
3	U23ADE611	Advanced Java Programming
4	U23ADE612	Predictive Data Analytics
5	U23ADE613	Advanced Natural Language Processing
Professional Elective – IV (Offered in Semester VII) *		
1	U23ADE714	AI Ethics
2	U23ADE715	Prompt Engineering
3	U23ADE716	Ethics in Data Science
4	U23ADE717	Cloud based Machine Learning Platforms
5	U23ADE718	Quantum AI
Professional Elective – V (Offered in Semester VIII) *		
1	U23ADE819	AI in Agriculture
2	U23ADE820	AI in Healthcare
3	U23ADE821	Stream Processing
4	U23ADE822	Sustainable AI
5	U23ADE823	AI in Finance
Professional Elective – VI (Offered in Semester VIII) *		
1	U23ADE824	Augmented Analytics
2	U23ADE825	Modern Cryptography
3	U23ADE826	AI in Automobile Industry
4	U23ADE827	AI in E-Commerce
5	U23ADE828	AI in Smart Cities

ANNEXURE - II

OPEN ELECTIVE COURSES (09 CREDITS)

S. No	Course Code	Course Title	Offering Department	Permitted Departments
Open Elective – I / Open Elective-II (Offered in Semester V/VI) (Offered in Semester V for CSE, IT, MECH, Mechatronics, AI&DS) (Offered in Semester VI for EEE, ECE, ICE, CIVIL, BME, CCE)				
1	U23ADDC02	Principle of Artificial Intelligence and Machine Learning	AI&DS	EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics
2	U23ADOC01	Introduction to Data Science	AI&DS	EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics
Open Elective – III (Offered in Semester VII)				
3	U23ADOC02	Data science Application of Vision	AI&DS	EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE
4	U23ADOC03	Artificial Intelligence Applications	AI&DS	EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics

ANNEXURE - IV

ABILITY ENHANCEMENT COURSES-(B) SKILL ENHANCEMENT COURSES

Sl. No.	Course Code	Course Title
1.	U23ADS301	SKILL ENHANCEMENT COURSE - I
		a) Clean code
		b) Exploring of GITHUB
		c) Aptitude - I
2.	U23ADS402	SKILL ENHANCEMENT COURSE - II
		a) API design - I
		b) Exploring of Research Tools
		c) Aptitude - II

*** Choose any one SKILL ENHANCEMENT COURSE in the list for SEC - I, SEC - II**

5-18/1-

Annexure – V

HONOURS PROGRAMME – Artificial Intelligence and Machine Learning

COURSE DETAILS											
Sl. No.	Semester	Course Code	Course Title	Category	Periods			Credits	Max. Marks		
					L	T	P		CAM	ESM	Total
Theory											
1	IV	U23MXT401	Parallel Programming and High Performance Computing	PC	3	0	0	3	25	75	100
2	V	U23MXB501	Advanced Deep Learning	PC	3	0	2	4	50	50	100
3	VI	U23MXB602	Reinforcement Learning	PC	3	0	2	4	50	50	100
4	VII	U23MXT702	Image and Video Analytics	PC	3	0	0	3	25	75	100
5	VIII	U23MXT803	Prompt Engineering	PC	3	0	0	3	25	75	100
6	VIII	U23MXW801	Project	PA	0	0	4	2	50	50	100
	Total							19	225	375	600
Equivalent NPTEL courses##											
1	IV	U23MXTN01	Parallel Programming	3	NPTEL *Students can opt for any of these courses instead of theory papers in IV, VII and VIII semesters				12 Weeks Course		
2	VII	U23MXTN02	Deep Learning for Computer Vision	3							
3	VIII	U23MXTN03	Introduction to Large Language Models (LLMs)	3							

^{##} The student shall be given an option to earn 3 credits through one equivalent 12-week NPTEL course instead of any one course listed for honours degree programme that should be completed before the commencement of eighth semester. The equivalent courses are subject to change based on its availability as per NPTEL course list.

5-12/1-

AI & DS Syllabi

Department	Mathematics				Programme: B.Tech.							
Semester	I				Course Category: BS		End Semester Exam Type: TE					
Course Code	U23MATC01				Periods/Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	Engineering Mathematics – I				3	1	-	4	25	75	100	
(Common to ALL Branches Except CSBS)												
Prerequisite	Basic Mathematics											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Understand the concept of Eigen values and Eigen vectors, Diagonalization of a Matrix										K3
	CO2	Solve higher order differential equations										K3
	CO3	Understand the different types of partial differential equations										K3
	CO4	Know about the Applications of double and triple integrals										K3
	CO5	Gain the knowledge about Vector Calculus and its Applications										K3
UNIT – I	Matrices							Periods:12				
Rank of a Matrix – Systems of Linear Equations – Characteristic equation – Cayley Hamilton Theorem – Eigen values and Eigen vectors of a real Matrix – Diagonalization of Matrices.												CO1
UNIT – II	Differential Equations (Higher Order)							Periods:12				
Linear Differential equations of higher order with constant coefficients – Euler's linear equation of higher order with variable coefficients – Method of Variation of parameters.												CO2
UNIT – III	Functions of Several Variables							Periods:12				
Partial derivatives – Total derivatives – Maxima and Minima of two variables – Lagrange's Method of multipliers.												CO3
UNIT – IV	Multiple Integrals							Periods:12				
Multiple Integrals – Change of order of integration (Cartesian form). Applications: Area as a double integral (Cartesian form) – Volume as a triple integral (Cartesian form).												CO4
UNIT – V	Vector Calculus							Periods:12				
Gradient – Divergence and Curl – Directional derivatives – Irrotational and Solenoidal vector fields – Properties (Statement only) – Gauss Divergence Theorem and Stoke's Theorem (without proofs).												CO5
Lecture Periods: 45			Tutorial Periods: 15			Practical Periods:			Total Periods: 60

Department	EEE and ECE			Programme: B.Tech.							
Semester	I/II			Course Category : ES			End Semester Exam Type: TE				
Course Code	U23ESTC03			Periods/Week		Credit	Maximum Marks				
				L	T	P	C	CAM	ESE	TM	
Course Name	Basics of Electrical and Electronics Engineering			3	-	-	3	25	75	100	
(Common to CSE, IT, MECH, CIVIL, MCTR, CCE, AI&DS, FT and CSBS Branches)											
Prerequisite	Mathematics and Physics										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Apply the basic concepts and various laws in DC circuits.								K3	
	CO2	Analyze the AC circuits and develop resonance conditions for transmitter and receiver circuits.								K3	
	CO3	Gain the knowledge of power system components, importance of electrical safety measures and real time applications of transformer and motor.								K2	
	CO4	Understand the operation of semiconductor diode and its applications.								K2	
	CO5	Explain the characteristics and operation of BJT and FET.								K2	
	CO6	Relate and Explain Different Communication Systems.								K2	
Section A – Electrical Engineering											
UNIT - I	DC Circuits					Periods: 8					
Concept of Potential Difference, Current, Resistance, Inductance and Capacitance, Work, Power, Energy, Current and Voltage sources - ideal and practical sources - concept of dependent and independent sources, Ohm's law, Kirchhoff's law, Series parallel combination of R, L, C components, Voltage Divider and Current Divider Rules, Mesh and Nodal analysis, Star/Delta transformation, Network Theorems - Superposition, Thevenin, Norton and Maximum Power Transfer.										CO1	
UNIT - II	AC Circuits					Periods: 8					
AC waveform definitions - form factor, peak factor, R-L, R-C, RLC series circuit, R-L-C parallel circuit, phasor representation in polar and rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, Resonance in series and parallel circuits, band-width and quality factor, Three Phase balanced AC Circuits (Y-Δ and Y-Y) - Power Measurement – Two Wattmeter method.										CO2	
UNIT - III	Electrical Safety and Electrical Machines					Periods: 7					
Layout of electrical power system and its functions, Wiring Accessories, Types of domestic wiring, Necessity of earthing, insulators and cables, Safety devices - fuse, relay and circuit breaker - Sensors and its types. Faraday's Law of electromagnetic induction, Fleming's Right and Left hand rule - DC Generator and DC Motor - construction, principle, load test and performance characteristics - Auto transformer, Single phase transformer- construction, principle, load test - Single phase capacitor start and run induction motor – Load test.										CO3	
Section B – Electronics Engineering											
UNIT - IV	Semiconductor Diodes And Applications					Periods: 7					
Introduction semiconductor materials – Doping - Intrinsic and Extrinsic Semiconductor – PN junction diode, structure, characteristics - diffusion and depletion capacitance - Rectifier, Half wave and Full wave rectifier - zener diode characteristics - zener diode as regulator – Light Emitting Diode (LED) - Solar Cell.										CO4	
UNIT - V	Transistors					Periods: 7					
Bipolar Junction Transistor - construction – operation - Common Base, Common Emitter, Common collector Configuration – characteristics – Biasing - numerical application. Junction Field Effect Transistor (JFET), Metal oxide semiconductor Field Effect Transistor, EMOSFET-DMOSFET operation characteristics - Numerical application.										CO5	
UNIT - VI	Communication Systems					Periods: 8					
Need for Modulation – Block diagram of analog communication System - AM, FM, PM Definitions and Waveforms – Comparison of digital and analog communication system- Block diagram of digital communication system – Electromagnetic Spectrum. Wired and wireless Channel – Block diagram of communication systems – satellite communication – Cellular Mobile Communication – Fibre Optical Communication System.										CO6	
Lecture Periods: 45			Tutorial Periods:			Practical Periods:			Total Periods: 45		
Text Books

Semester	I/II				Course Category: ES			End Semester Exam Type: TE			
Course Code	U23CSTC01				Periods / Week		Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM
Course Name	Programming in C				3	-	-	3	25	75	100
(Common to All Branches)											
Prerequisite	NIL										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Comprehend the basics of Computers.									K2
	CO2	Illustrate the concepts of control structures and looping.									K2
	CO3	Implement programs using arrays and functions.									K3
	CO4	Demonstrate programs using Structure and Pointers.									K3
	CO5	Build the programs using Union and File management Operations.									K3
UNIT-I	Introduction						Periods: 09				
Generation and Classification of Computers - Block Diagram of a Computer –Categories of Software – Network Structure - Number System – Binary – Decimal – Conversion – Algorithm – Pseudo code – Flow Chart.											CO1
UNIT-II	C Programming Basics						Periods: 09				
Introduction to ‘C’ Programming – Basic structure of a ‘C’ program – compilation and linking processes – Constants, Variables – Data Types – Expressions using operators in ‘C’ – Managing Input and Output operations – Decision Making and Branching – Looping statements.											CO2
UNIT-III	Arrays and Functions						Periods: 09				
Arrays – Initialization – Declaration – One dimensional and Two dimensional arrays. String- String operations – String Arrays. Simple programs- sorting- searching – matrix operations- Function – definition of function – Declaration of function – Pass by value – Pass by reference – Recursion											CO3
UNIT-IV	Structure and Pointers						Periods: 09				
Structure Introduction – Structure definition – Structure declaration – Structure within a structure –Self Referential Structure. Pointers - Definition – Initialization – Pointers arithmetic – Pointers and arrays -Pointer to Function –Pointer and Structure- Simple programs.											CO4
UNIT-V	Unions and Files						Periods: 09				
Union Introduction - Programs Using Structures and Unions – Introduction to File - File Operations - File Input and Output Functions - Random Access to Files - File System Functions - Command Line Arguments- Storage Classes - Pre-Processor Directives- Dynamic Memory Functions.											CO5

					L	T	P	C	CAM	ESE	TM	
Course Name	Digital System Design				3	-	-	3	25	75	100	
(Common to All Branches)												
Prerequisite	NIL											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Review the knowledge of Number systems and simplifications of Boolean functions.									K2	
	CO2	Design and understand the various combinational logic circuits.									K3	
	CO3	Design and understand the various sequential circuits.									K3	
	CO4	Analyze and design the reconfiguration circuits.									K3	
	CO5	Review the knowledge of Number systems and simplifications of Boolean functions.									K3	
UNIT-I	Review of Number Systems							Periods: 9				
Review of Number systems – Conversion of Number systems – Binary addition and subtractions – Binary representation: Signed magnitude representation and Compliment representations – Binary codes – Boolean Algebra – Boolean functions – canonical forms.												CO1
UNIT-II	Boolean Function and Combinational Logic Design							Periods: 9				
Simplifications of Boolean function: Theorems and laws – K"Map and QuineMcCluskey method – Introduction to combinational circuits – Design procedures of Combinational circuits – Adders - Subtractors – Binary parallel Adder – Decoder – Encoder – Priority Encoder. Multiplexer – Demultiplexer.												CO2
UNIT-III	Sequential Logic Design							Periods: 9				
Introduction to Sequential Circuits – Latches – Types of Latches: SR Latch and D Latch – Flip-Flop – Types of Flip-Flops: RS, JK, D, and T Flip-Flops – Excitation table of Flip-Flops. Counters: Asynchronous Counters – Synchronous counters – Mod counters. Shift registers – Types of Shift registers.												CO3
UNIT-IV	Reconfiguration Digital Circuits							Periods: 9				
Introduction to Reconfiguration Digital Circuits – Memory – Hierarchy of Memory – RAM – Types of Ram – Memory Decoding of RAM – ROM. Programmable Logic Devices: Programmable Logic Array – Programmable Array Logic – Implementation of combinational circuits using RAM, ROM, PLA and PAL.												CO4
UNIT-V	VHDL							Periods: 9				
Introduction to Hardware Description Language and VHDL – Design flow – Entity, architecture, process, configuration and package declarations – Signals and data types.												CO5

Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Infer the Real world data and information.							K2	
	CO2	Applying Data Science using Excel.							K3	
	CO3	Make use of Mathematical Knowledge for problem solving.							K3	
	CO4	Interpret the various Tools and its advantage.							K3	
	CO5	Illustrate the different opportunities in Industries.							K3	
UNIT-I	Introduction to Data Science						Periods: 9			
Introduction to Data Science – History of Data Science – Relationship between Data Warehouse – Big Data and Data Science – Scope of Data Science – Data Science with other Fields – Relationship between Data Science and Information Science. Data: Data types – Structured vs Unstructured data – Quantitative vs Qualitative data – The four levels of data – Data Collection – Data Preprocessing.										CO1
UNIT-II	Data Science in Excel						Periods: 9			
Introduction to Excel basic functions – Data Collection and Preparation – Importing Data into Excel from Different Data Sources – Data Cleaning and Preliminary Data Analysis – Correlation and Importance of Variables Technical Requirements. Data Visualization in Excel – Pivot Tables and Charts – VLOOKUP – Dashboard in Excel.										CO2
UNIT-III	Mathematical Preliminaries						Periods: 9			
Probability: Probability vs. Statistics – Compound Events and Independence – Conditional Probability – Probability Distribution. Descriptive Statistics: Centrality Measures – Variability Measures – Interpreting Variance – Characterizing Distributions. Correlation Analysis: Correlation Coefficient – The Power and Significance – Detection Periodicities. Logarithms: Logarithms and Multiplying Probabilities – Logarithms and Ratios – Logarithms and Normalizing Skewed Distributions										CO3
UNIT-IV	Data Science Tools						Periods: 9			
Introduction to Data Science Tool – Data Cleaning Tools – Data Munging and Modelling Tools – Data Visualization Tools – Tools for Data Science.										CO4
UNIT-V	Industrialization, Opportunities and Applications						Periods: 9			
Data Economy and Industrialization – Introduction: Data Economy – Data Industry – Data Services – Data Science Application: Introduction – General Application Guidance – Different Domain – Advertising – Aerospace and Astronomy – Arts – Creative Design and Humanities – Bioinformatics – Consulting Services – Ecology and Environment – Ecommerce and Retail – Education – Engineering – Finance and Economy – Gaming. Department	English		Programme: B.Tech.							
Semester	I		Course Category : HS			End Semester Exam Type: TE				
Course Code	U23ENBC01		Periods/Week			Credit	Maximum Marks			
			L	T	P	C	CAM	ESE	TM	
Course Name	Communicative English - I		2	-	2	3	50	50	100	
(Common to ALL Branches except CSBS)										
Prerequisite	Basics of English Language									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Understand the communication flow in organization and its objectives							K2	
	CO2	Write the technical contents with grammatically precise sentences							K2	
	CO3	Articulate with correct pronunciation and overcome vernacular impact in speaking							K3	
	CO4	Express opinions confidently in formal and informal communicative contexts							K2	
	CO5	Attend interview with assertiveness							K3	
UNIT- I	Work stead Communication					Periods:10				
Communication, Definition, Process, Channels, Barriers, Strategies for Effective Communication,, Verbal and Nonverbal Communication - Listening, Types, Barriers, Enhancing Listening Skills - Bibliography: Book, Journal and Internet References									CO1	
UNIT- II	Common Errors in Writing and Comprehension Strategies					Periods:10				
Subject Verb Agreement, Misplaced Modifiers, Squinting Modifiers, Dangling Modifier, Fused Sentence, Comma Splice, Sentence Fragment - Reading Comprehension: Technical passage, Strategies: Skimming, Scanning, Intensive and Extensive Reading, Prediction, and Contextual Meaning									CO2	
UNIT- III	Phonetics					Periods:10				
Pronunciation Guidelines to consonants and vowels, Sounds Mispronounced, Silent and Non-silent Letters, Intonation, Spelling Rules and Words often misspelled, Mother Tongue Influence (MTI), Various Techniques for Neutralization of Mother Tongue									CO3	
UNIT- IV	Communication Practice-I					Periods:15				
List of Exercises									CO4	
Listening: Self Introduction videos										
Speaking: Self-Introduction, Extempore, and Role Play										
Reading: Non-Technical Comprehension Passage										
Writing: Common Errors in Writing										
UNIT-V	Interpersonal Communication-I					Periods:15				
List of Exercises									CO5	
Listening: Speech Sounds, Interview Videos										
Speaking: Debate, Structured Group Discussion, and Conversation										
Reading: Commonly Confused Words										
Writing: Transcription

Department	Computer Science and Engineering	Programme: B.Tech.						
Semester	I/II	Course Category: ES			End Semester Exam Type: LE			
Course Code	U23CSPC01	Periods / Week			Credit	Maximum Marks		
		L	T	P	C	CAM	ESE	TM
Course Name	Programming in C Laboratory	0	0	2	1	50	50	100

(Common to All Branches)

Prerequisite	NIL							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Implement logical formulations to solve simple problems leading to specific applications.						K3
	CO2	Execute C programs for simple applications making use of basic constructs, arrays and strings.						K3
	CO3	Experiment C programs involving functions, recursion, pointers, and structures.						K3
	CO4	Demonstrate applications using sequential and random access file processing.						K3
	CO5	Build solutions for online coding challenges.						K3

List of Exercises

- Write a C program to find the Area of the triangle.
- Develop a C program to read a three digit number and produce output like
1 hundreds
7 tens
2 units
For an input of 172.
- Write a C program to check whether a given character is vowel or not using Switch – Case statement.
- Write a C program to print the numbers from 1 to 10 along with their squares.
- Demonstrate do—While loop in C to find the sum of 'n' numbers.
- Find the factorial of a given number using Functions in C.
- Write a C program to check whether a given string is palindrome or not?
- Write a C program to check whether a value is prime or not?
- Develop a C program to swap two numbers using call by value and call by reference.
- Construct a C program to find the smallest and largest element in an array.
- Implement matrix multiplication using C program.
- Write a C program to perform various string handling functions like strlen, strcpy, strcat, strcmp.
- Develop a C program to remove all characters in a string except alphabets.
- Write a C program to find the sum of an integer array using pointers.
- Write a C program to find the Maximum element in an integer array using pointers.
- Construct a C program to display Employee details using Structures
- Write a C program to display the contents of a file on the monitor screen.
- Write a File by getting the input from the keyboard and retrieve the contents of the file using file operation commands.
- Write a C program to create two files with a set of values. Merge the two file contents to form a single file
- Write a C program to pass the parameter using command line arguments.

Semester	I			Course Category: ES			End Semester Exam Type: LE			
Course Code	U23ESPC03			Periods / Week			Credit	Maximum Marks		
				L	T	P	C	CAM	ESE	TM
Course Name	Engineering Graphics using AutoCAD			0	0	2	1	50	50	100
(Common to all Branches)										
Prerequisite										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Familiarize with the fundamentals and standards of engineering graphics.							K2	
	CO2	Perform drawing of basic geometrical constructions and multiple views of objects.							K2	
	CO3	Visualize the isometric and perspective sections of simple solids.							K3	
	CO4	Connect side view associate on front view.							K4	
	CO5	Correlate sectional views and lateral surface developments of various solids.							K4	
List of Experiments										
1. Study of capabilities of software for Drafting and Modeling – Coordinate systems (absolute, relative, polar, etc.) –Creation of simple figures like polygon and general multi-line figures. 2. Drawing a Title Block with necessary text and projection symbol. 3. Drawing 2D sketch by applying modify tools like fillet, mirror, array, etc., 4. Drawing front view and top view of simple solids like prism, pyramid, cylinder, cone, etc., and Dimensioning. 5. Drawing front view, top view and side view of objects from the given pictorial views (eg. Simple stool, V-block, Mixie Base). 6. Drawing a plan of residential building (Two bed rooms, kitchen, hall, etc.) 7. Drawing sectional views of prism, pyramid, cylinder, cone, etc, 8. Drawing lateral surface development of prism, pyramid, cylinder, cone, etc, 9. Drawing isometric projection of simple objects. 10. Creating 3D model of simple object and obtaining 2D multi-view drawings. 11. Note: Plotting of drawings must be made for each exercise and attached to the records written by Students.

Prerequisite	-											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Develop holistic attitude and harmony in the individual, family, and Society										K2
	CO2	Acquire grammar skills and capable to write and speak English confidently										K2
	CO3	Understand the basic concepts in Mathematics and Programming										K2
	CO4	Know about the art and culture, language and literature of this vast secular nation										K2
	CO5	Identify the inherent talent and develop it professionally										K3
UNIT-I	Universal Human Values								Periods: 12			
Welcome and Introductions - Getting to know each other, Aspirations and Concerns - Individual Academic and Career, Expectations of Family, Peers, Society, Nation, Fixing one's Goals, Self-Management - Self-confidence, Peer Pressure, Time Management, Anger, Stress Personality Development, Self-improvement, Health - Health issues, Healthy diet, Healthy lifestyle, Hostel life, Relationships - Home sickness, Gratitude towards Parents, Teachers and others Ragging and interaction, Competition and Cooperation, Peer Pressure, Society - Participation in Society, Natural Environment - Participation in Nature, Sum Up - Role of Education, Need for a Holistic Perspective, Self-evaluation and Closure - Sharing and feedback.											CO1	
UNIT-II	Proficiency in English								Periods: 12			
Communication skills -Prognostic test on Grammar -Synonyms, Antonyms, Tenses, Sentence Completion, Idioms and Phrases, One-word Substitution, Homophones, Homonyms, Use of Prepositions, Subject-verb Agreement -Writing - Paragraph writing, Letter writing, Essay writing, Story Development.											CO2	
UNIT-III	Bridge Course in Mathematics and C Programming								Periods: 12			
Mathematics: Fundamentals of differential and integral calculus: Theory and Practice, Limit of function - Fundamental results on limits - Continuity of a function - Concept of differentiation - Concept of derivative - Slope of a curve -Differentiation Techniques - Derivatives of elementary functions from first principle - Derivatives of inverse functions - Logarithmic differentiation - Method of substitution - Differentiation of parametric functions -Differentiation of implicit functions - Higher order derivatives. Integrals of functions containing linear functions -Method of integration (Decomposition method, method of substitution, integration by parts) - Definite integrals. Simple definite integrals - Properties of Definite integrals - Reduction formulae - Area and volume - Length of curve - surface area of a solid.											CO3	
C Programming: Features of C and its basic Structure - Keywords - constants - variables - operators - Data types - Formatted input and output statements - Control and Looping statement - Arrays - Functions - Strings - writing simple C programs.												
UNIT-IV	Literary Activities								Periods: 12			
Team building activities - Quiz - Oral Exercises - Group discussion, Debate, Extempore, Role play, சிறப்பு சொற்பொழிவு - தமிழர் மரபு மற்றும் தமிழர் தொழில்நுட்பம்.											CO4	
UNIT-V	Creative Arts								Periods: 12			
Introduction to painting and renowned artworks -Documentary and Short films -Music -Vocal, Instrumental - Dance - Classical, Cinematic - Mimicry - Mime.											CO5	
Lecture Periods: 60			Tutorial Periods:			Practical Periods:			Total Periods: 60

Department	Physics / Chemistry			Programme: B.Tech.						
Semester	I/II			Course Category: BS			End Semester Exam Type: TE			
Course Code	U23BSTC01			Periods/Week			Credit	Maximum Marks		
				L	T	P	C	CAM	ESE	TM
Course Name	Physical Science for Engineers			3	-	-	3	25	75	100
(Common to all Branches)										
Prerequisite	Physics of 12 th standard or equivalent / Chemistry of 12 th standard or equivalent.									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Understand the basic of properties of magnetic, dielectric and superconductors.							K2	
	CO2	Identify the wave nature of the particles, physical significance of wave functions							K3	
	CO3	Understand the basic principles of laser and fiber optics communication							K2	
	CO4	Understand and familiar with the water treatment.							K2	
	CO5	Understand the electrode potential for its feasibility in electrochemical reaction and uses of various batteries.							K2	
	CO6	Understand the specific operating condition under which corrosion occurs and suggest a method to control corrosion.							K2	
SECTION A - PHYSICS										
UNIT-I	Magnetic, Dielectric, and Superconducting Materials						Periods: 8			
Introduction to magnetic materials, Ferromagnetism- Domain theory-Types of energy-Hysteresis-Hard and Soft magnetic materials-ferrites-Dielectric materials-Types of polarization – Langevin-Debye equation-Frequency effects on polarization-Dielectric breakdown- Ferroelectric materials-Superconducting materials and their properties.										CO1
UNIT-II	Quantum Mechanics						Periods: 7			
Matter Waves - de Broglie Wavelength - Uncertainty Principle –Physical Significance of wave functions - Schrodinger wave Equation - Time Dependent - Time Independent - Application to Particle in a One Dimensional Box - Tunnel Diode.										CO2
UNIT-III	Laser and Fiber Optics						Periods: 7			
Lasers - Principles of Laser - Spontaneous and Stimulated Emissions - Einstein's Coefficients - Population Inversion and Laser Action –components of laser - Types of Lasers - NdYAG, CO ₂ laser, GaAs Laser Fiber Optics - Principle and Propagation of light in optical fiber - Numerical aperture and acceptance angle - Types of optical fibers (material, refractive index, mode)										CO3
SECTION B – CHEMISTRY										
UNIT-IV	Water and its Treatment						Periods: 8			
Water: Sources and impurities, Water quality parameters: Definition and significance of-color, odour, turbidity, pH, hardness, alkalinity, TDS, COD and BOD. Desalination of brackish water: Reverse osmosis-disadvantages of using hard water in boiler - Treatment of boiler feed water: Internal treatment (phosphate, colloidal, sodium aluminate and Calgon conditioning) and External treatment–Ion exchange demineralization and zeolite process.										CO4
UNIT-V	Electrochemical Cells and Storage Devices						Periods: 8			
Galvanic cells, single electrode potential, standard electrode potential, electrochemical series. EMF of a cell and its measurement. Nernst equation. Electrolyte concentration cell. Reference electrodes-hydrogen, calomel and Ag/AgCl. Batteries and fuel cells: Types of batteries- alkaline battery-lead storage battery- nickel-cadmium battery- fuel cell H ₂ -O ₂ fuel cell-applications.										CO5
UNIT-VI	Corrosion						Periods: 7			
Corrosion –Introduction - factors – types – chemical, electrochemical corrosion (galvanic, differential aeration), corrosion control – material selection and design aspects – electrochemical protection – sacrificial anode method and impressed current cathodic method. Uses of inhibitors, metallic coating – anodic coating, cathodic coating. Metal cladding, Electroplating of Copper and electroless plating of nickel.										CO6
Lecture Periods: 45			Tutorial Periods:			Practical Periods:			Total Periods: 45

Semester	II				Course Category : ES			End Semester Exam Type: TE				
Course Code	U23ADTC01				Periods / Week			Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM	
Course Name	Programming in Python				3	0	0	3	25	75	100	
(Common to All Branches)												
Prerequisite	NIL											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Interpret the basic concepts of Python programs.									K3	
	CO2	Articulate the concepts of Sets, Dictionaries and Object-Oriented concepts.									K3	
	CO3	Experiment with Numpy package.									K3	
	CO4	Apply and analyze Data Manipulation with Pandas.									K3	
	CO5	Illustrate programming concept for Visualization with Matplotlib.									K3	
UNIT-I	Introduction to Python							Periods: 9				
Structure of Python Program – Underlying mechanism of Module Execution – Branching and Looping – Problem Solving Using Branches and Loops – Functions – Lambda Functions – Lists and Mutability – Problem Solving Using Lists and Functions.												CO1
UNIT-II	Sequence Datatypes and Object-Oriented Programming							Periods: 9				
Sequences – Mapping and Sets – Dictionaries. Classes: Classes and Instances – Inheritance – Exception Handling – Introduction to Regular Expressions using “re” module.												CO2
UNIT-III	Using Numpy							Periods: 9				
Basics of NumPy – Computation on NumPy – Aggregations – Computation on Arrays – Comparisons – Masks and Boolean Arrays – Fancy Indexing – Sorting Arrays – Structured Data: NumPy’s Structured Array.												CO3
UNIT-IV	Data Manipulation with Pandas							Periods: 9				
Introduction to Pandas Objects – Data indexing and Selection – Operating on Data in Pandas – Handling Missing Data – Hierarchical Indexing – Combining Data Sets. Aggregation and Grouping – Pivot Tables –Vectorized String Operations – Working with Time Series – High Performance Pandas – eval() and query().												CO4
UNIT-V	Visualization With Matplotlib							Periods: 9				
Basic functions of Matplotlib – Simple Line Plot – Scatter Plot – Density and Contour Plots – Histograms – Binnings and Density – Customizing Plot Legends – Colour Bars – Three-Dimensional Plotting in Matplotlib.												CO5
Lecture Periods: 45			Tutorial Periods: -			Practical Periods: -			Total Periods: 45

Department	Computer Science and Engineering			Programme: B.Tech.							
Semester	II/III			Course Category: PC				End Semester Exam Type: TE			
Course Code	U23CSTC03			Periods / Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	Data Structures			3	-	-	3	25	75	100	
(Common to all Branches)											
Prerequisite	Any Programming Knowledge										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Compute time and space complexity for given problems								K3	
	CO2	Demonstrate stack, queue and its operation.								K3	
	CO3	Illustrate the various operations of linked list.								K3	
	CO4	Use the concepts of tree for various applications.								K3	
	CO5	Outline the various Tables, Graphs and Sets techniques.								K3	
UNIT-I	Basic Terminologies of Data Structures						Periods: 9				
Introduction: Basic Terminologies – Asymptotic Notations: Complexity analysis. Array and its operations - Searching: Linear Search and Binary Search Techniques. Sorting: Bubble Sort – Selection Sort – Insertion Sort – Heap Sort – Shell Sort. Performance and Comparison among the sorting methods.									CO1		
UNIT-II	Stack and Queue Operations						Periods: 9				
Stacks and Queues: ADT Stack and its operations. Applications of Stacks: Expression Conversion and evaluation. ADT Queue and its operations. Types of Queue: Simple Queue – Circular Queue – Priority Queue – Deque.									CO2		
UNIT-III	Linked List Operations						Periods: 9				
Linked Lists: Singly linked list: Representation in memory. Algorithms of several operations: Traversing – Searching – Insertion – Deletion. Linked representation of Stack and Queue. Doubly linked list: operations. Circular Linked Lists: operations.									CO3		
UNIT-IV	Trees						Periods: 9				
Trees: Basic Tree Terminologies. Different types of Trees: Binary Tree – Threaded Binary Tree – Binary Search Tree – Binary Tree Traversals – AVL Tree- Red Black Tree.									CO4		
UNIT-V	Graphs, Tables and Sets						Periods: 9				
Graph: Basic Terminologies and Representations – Graph traversal algorithms. Tables: Different types of tables – Hash Table and its operations - Applications. Sets: Representation of Sets- Operations and its applications.									CO5

Prerequisite	NIL										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Develop conceptual data model using Entity Relationship Diagram									K3
	CO2	Analyze and design Relational Database									K3
	CO3	Understand and realize Transaction and Concurrency control									K2
	CO4	Build Non-Relational Databases									K3
	CO5	Understand and Analyze Emerging Trends in database technologies									K2
UNIT-I	Introduction							Periods: 09			
Database System Application – Purpose of Database Systems – View of Data – Database Languages – Relational Database – Database Design – System Structure – Database Architecture. Database Design and E-R Model: Overview of the Design Process – The E-R Model – Constraints – E-R Diagrams – E-R Design Issues –Extended E-R features – Reduction to Relational Schemas – Other aspects of Database Design											CO1
UNIT-II	Relational Database Management Systems (RDBMS) and Design							Periods: 09			
Relational database concepts: Tables, rows, columns, keys, constraints- Fundamental Relational Algebra Operations – Extended Relational Algebra Operations- SQL (Structured Query Language) fundamentals- Features of Good Relational Designs – Database Dependencies-1NF – 2NF – 3NF – 4NF											CO2
UNIT-III	Transaction and Concurrency Control							Periods: 09			
Transaction Management: Transaction Concept – Storage Structure – Transaction Atomicity and Durability – Transaction Isolation and Atomicity – Serializability – Recoverability – Transaction Isolation Levels – Implementation of Isolation Levels. Concurrency Control: Lock Based Protocols – Timestamp Based Protocols – Validation Based Protocols. Recovery System: Failure Classification – Remote Backup Systems.											CO3
UNIT-IV	Non-relational databases (NOSQL)							Periods: 09			
Introduction to NoSQL databases: MongoDB-Cassandra- Redis-Key-value stores-document stores-column-family stores-graph databases											CO4
UNIT-V	Emerging Trends and Technologies							Periods: 09			
New database technologies and trends- Blockchain databases-Time-series databases: Time Series Data- A New World for Time Series Databases- Storing and Processing Time Series Data-Time Series Tools											CO5

Department	English		Programme: B.Tech.							
Semester	II		Course Category: HS			End Semester Exam Type: TE				
Course Code	U23ENBC02		Periods/Week			Credit	Maximum Marks			
			L	T	P	C	CAM	ESE	TM	
Course Name	Communicative English - II		2	-	2	3	50	50	100	
(Common to ALL Branches except CSBS)										
Prerequisite	Basics of English Language									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Draft effective written communication in professional environment							K2	
	CO2	Apply the mechanics of creative writing with precision and clarity							K3	
	CO3	Acquire language skills professionally to groom the overall personality through sensitizing various etiquettes in real time situation							K2	
	CO4	Develop language fluency and gain self-confidence							K3	
	CO5	Express thoughts and ideas with clarity and focus							K2	
UNIT-I	Business Correspondence					Periods:10				
Business Writing: Circular, Agenda, Memoranda, Notice, Instruction, Minutes, Email Writing ,Report Writing- Official and Demi Official Letters : Applying for Educational / Car / Home Loans / Joining Report, Leave Letter, Industrial Visit, In plant Training, Letter to the Editor, Calling for a quotation, Placing Order, Letter of Complaints, Letter seeking Clarification, Resume', Job Application Letter, Bio-data, CV									CO1	
UNIT-II	Functional Writing Skills					Periods:10				
Four Modes of Writing, Sentence Structure , Art of condensation: Summary Writing and Note Making, Use of phrase and clause in sentence, Principles of paragraph writing, Techniques of Essay Writing, Jumbled Sentence, Paraphrasing									CO2	
UNIT-III	Etiquettes					Periods:10				
Etiquette: Meaning, Kinds: Corporate Etiquette, Meeting Etiquette, Telephone Etiquette, Email Etiquette, Social Media Etiquette, Dining Etiquette, Communication Etiquette									CO3	
UNIT-IV	Communication Practice-II					Periods:15				
List of Exercises Listening: Letter writing tips Speaking: Just a Minute, Impromptu Speech, Contemporary Issues Reading: Variety of examples for Modes of Writing Writing: Different types of letters									CO4	
UNIT-V	Interpersonal Communication-II					Periods:15				
List of Exercises Listening: Videos on different types of Etiquettes Speaking: Team Presentation, Negotiation Skills Reading: Phrases and Clauses Writing: Free writing on any given topic, Paraphrasing Practice									CO5

				L	T	P	C	CAM	ESE	TM
Course Name	Design Thinking and Idea Lab			-	-	2	1	50	50	100
(Common to ALL Branches)										
Prerequisite	Basic Knowledge of Science									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Demonstrate a comprehensive understanding of the tools and inventory associated with the IDEA Lab.							K2	
	CO2	Develop proficiency in ideation techniques to generate creative and innovative solutions for various design challenges and problems							K3	
	CO3	Acquire practical knowledge of mechanical and electronic fabrication processes, including hands-on experience with machinery, tools, and techniques used in the manufacturing and assembly of physical components.							K3	
	CO4	Cultivate the skills necessary for developing innovative and desirable products, including the ability to integrate user needs, market trends, and technological advancements into the design process.							K4	
	CO5	Apply iterative design methodologies to refine and improve solutions based on feedback, user testing, and evaluation of functional, aesthetic, and usability aspects							K4	
Design process: Traditional design, Design thinking, Existing sample design projects, Study on designs around us, Compositions/structure of a design, Innovative design: Breaking of patterns, Reframe existing design problems, Principles of creativity Empathy: Customer Needs, Insight-leaving from the lives of others/standing on the shoes of others, Observation Design team-Team formation, Conceptualization: Visual thinking, Drawing/sketching, New concept thinking, Patents and Intellectual Property, Concept Generation Methodologies, Concept Selection, Concept Testing, Opportunity identification Prototyping: Principles of prototyping, Prototyping technologies, Prototype using simple things, Wooden model, Clay model, 3D printing; Experimenting/testing. Sustainable product design, Ergonomics, Semantics, Entrepreneurship/business ideas, Product Data Specification, Establishing target specifications, Setting the final specifications. Design projects for teams. List of Lab Activities and Experiments 1. Schematic and PCB layout design of a suitable circuit, fabrication and testing of the circuit. 2. Machining of 3D geometry on soft material such as softwood or modelling wax. 3. 3D scanning of computer mouse geometry surface. 3D printing of scanned geometry using FDM or SLA printer. 4. 2D profile cutting of press fit box/casing in acrylic (3 or 6 mm thickness)/cardboard, MDF (2 mm) board using laser cutter & engraver. 5. 2D profile cutting on plywood /MDF (6-12 mm) for press fit designs. 6. Familiarity and use of welding equipment. 7. Familiarity and use of normal and wood lathe. 8. Embedded programming using Arduino and/or Raspberry Pi. 9. Design and implementation of a capstone project involving embedded hardware, software and machined or 3D printed enclosure. 10. Discussion and implementation of a mini project. 11. Documentation of the mini project (Report and video).

					L	T	P	C	CAM	ESE	TM	
Course Name	Programming in Python Laboratory				0	0	2	1	50	50	100	
(Common to All Branches)												
Prerequisite	NIL											
Course Outcome	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Describe common Python functionality and features used for data science.									K2	
	CO2	Query Data Frame structures for cleaning and processing.									K2	
	CO3	Configure your programming environment									K3	
	CO4	Experiment the concept using data visualization.									K3	
	CO5	Analyze real time datasets,									K3	
List of Exercises												
1. Build a python program to implement Fibonacci series. 2. Build a python program to get a range of numbers from user and to separate even numbers and odd numbers respectively. 3. Build a function in Python to check duplicate letters. It must accept a string, i.e., a sentence. The function should return True if the sentence has any word with duplicate letters, else return False. 4. Build a program to perform arithmetic operations using lambda function. 5. Build a Python program that takes a list of numbers as input and returns a new list containing only the even numbers from the input list. 6. Build a python program to create a class called Car with attributes Company, model, and year. Implement a method that returns the age of the car in years. 7. Build a python program to create a base class called Shape that has a method called area which returns the area of the shape (set it to 0 for now). Then, create two derived classes Rectangle and Circle that inherit from the Shape class to calculate the area of derived classes. 8. Build a python program to implement aggregation using Numpy. 9. Build a python program to perform Indexing and Sorting. 10. Build a python program to perform Handling of missing data. 11. Build a python program to perform usage of Pivot table using Titanic datasets 12. Build a python program to perform use of eval () and query () 13. Build a python program to perform Scatter Plot 14. Build a python program to perform 3D plotting 15. Implement an application to process a real time data.

				L	T	P	C	CAM	ESE	TM
Course Name	Data Structures Laboratory			0	0	2	1	50	50	100
(Common to all Branches)										
Prerequisite	Basic Programming Knowledge									
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Analyse the algorithm's / program's efficiency in terms of time and space complexity.							K3	
	CO2	Solve the given problem by identifying the appropriate Data Structure.							K3	
	CO3	Solve the problems of searching and sorting techniques.							K3	
	CO4	Solve problems in linear Data Structures.							K4	
	CO5	Solve problems in non-linear Data Structures.							K4	
List of Experiments										
1. Write a C program to implement recursive and non-recursive i) Linear search ii) Binary Search. 2. Write a C program to implement i) Bubble sort ii) Selection sort iii) Insertion sort iv) Shell sort v) Heap sort. 3. Write a C program to implement the following using an array. a) Stack ADT b) Queue ADT 4. Write a C program to implement list ADT to perform following operations a) Insert an element into a list. a) Delete an element from list b) Search for a key element in list c) count number of nodes in list. 5. Write a C program to implement the following using a singly linked list. a) Stack ADT b) Queue ADT. 6. Write a C program to implement the dequeue (double ended queue) ADT using a doubly linked list and an array. 7. Write a C program to perform the following operations: a) Insert an element into a binary search tree. b) Delete an element from a binary search tree. c) Search for a key element in a binary search tree. 8. Write a C program that use recursive functions to traverse the given binary tree in a) Preorder b) Inorder c) Postorder. 9. Write a C program to perform the AVL tree operations. 10. Write a C program to implement Graph Traversal Techniques. 11. Write a C program to implement the Set operations. 12. a) Union b) Intersection c) Difference.

(Common to all Branches)											
Prerequisite	Database Technology										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Implement the DDL statements and DML commands.									K2
	CO2	Experiment the built-in functions in SQL									K2
	CO3	Implement PL/SQL programs.									K2
	CO4	Experiment Non-Relational Databases using NoSQL									K3
	CO5	Explore Timeseries Databases using OpenTSDB									K3
List of Experiments:											
1. Create Table using Data Definition Language (DDL). - 2. Modify Table using Data Manipulation Language (DML). 3. Store and Retrieve data through Data Control Language (DCL). 4. Implement Constraints and Built-in functions in various tables. 5. Perform Joins and Group-by functions. 6. Implement Simple Programs in PL/SQL. 7. Create PL/SQL programs using functions. 8. Create PL/SQL programs using procedures. 9. Create PL/SQL programs using triggers. 10. Create real time applications for gathering and listing of reviews using any of the NoSQL Databases 11. Create a real time application for monitoring oil well using IoT databases for capturing the metrics for predictive maintenance.

		L	T	P	C	CAM	ES E	TM
Course Name	Ability Enhancement Courses	-	-	4	-	100	-	100
Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence. Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.								

Evaluation methods

				L	T	P	C	CAM	ESE	TM	
Course Name	Sports Yoga and NSS			0	0	2	Non-Credit	100	-	100	
Prerequisite	-										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Practice Physical activities and Hatha Yoga focusing on yoga for strength, flexibility and relaxation.								K3	
	CO2	Understand basic skills associated with yoga and physical activities including strength and flexibility, balance and coordination.								K2	
	CO3	Develop understanding of psychological problems associated with age and lifestyle.								K3	
	CO4	Recognize the importance of national service in community development.								K3	
	CO5	Convert existing skills into socially relevant life skills.								K3	
UNIT-I	Introduction to Physical Education						Periods: 06				
Definition, Aims and Objectives of Physical Education - Changing trends in Physical Education Physical Fitness, Wellness and Lifestyle: Importance of Physical Fitness and Wellness - Components of Physical fitness - Components of Health related fitness - Components of wellness - Preventing Health Threats through Lifestyle Change - Concept of Positive Lifestyle.											CO1
UNIT-II	Yoga and Lifestyle						Periods: 06				
Importance of Yoga - Elements of Yoga - Introduction - Asanas, Pranayama, Meditation and Yogic Kriyas - Yoga for concentration and related Asanas (Sukhasana, Tadasana, Padmasana and Shashankasana) - Relaxation Techniques for improving concentration - Yog-nidra. Asanas as preventive measures – Hypertension – Obesity - Back Pain-Diabetes - Asthema.											CO2
UNIT-III	Training and Planning in sports						Periods: 06				
Training - Warming up and limbering down-Skill, Technique and Style - Objectives of Planning – Tournament - Knock-Out, League/Round Robin and Combination. Psychology and Sports - Important of Psychology in Physical Education and Sports - Differentiate Between Growth and Development - Adolescent problems and their Management - Emotion: Concept, Type and Controlling of emotions - Concepts and Types of Aggressions in Sports - Psychological benefits of exercise - Anxiety and Fear and its effects on Sports Performance - Motivation, its type and techniques - Understanding Stress and Coping strategies											CO3
UNIT-IV	Introduction to National Service Scheme						Periods: 06				
Orientation of NSS volunteers: History, motto, symbol, awards, structure and activities of NSS - Days of National and International Importance - Sensitizing about the thrust areas and awareness activities - Importance of tree plantation and voluntary blood donation - The role of SHGs and NGOs in community development – CSR - Life skills and youth development-extension activities in HEIs - various clubs and schemes like RRC, ELC, YRC, UBA, SBA, etc.,											CO4
UNIT-V	Community Issues and the use of technology						Periods: 06				
Common Problems of rural India - Technology development and its suitability – Sustainability - Value addition to agricultural products - Service learning and youth volunteering – Shramdaan - Campus cleaning - Field visit to nearby communities - village survey - Initiatives to clean and green environment - preservation of water bodies in adopted villages.											CO5
Lecture Periods: -			Tutorial Periods: -			Practical Periods: 30		Total Periods: 30

Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Perform Software engineering processes.									K2
	CO2	Make use of software design.									K2
	CO3	Apply different software testing strategies.									K2
	CO4	Illustrate different Agile Methodology.									K2
	CO5	Make use of different process of Agile Methodology.									K2
UNIT-I	SOFTWARE ENGINEERING PROCESSES							Periods: 9			
Software engineering concepts – Development activities – Software development lifecycle models –Software project management – Project planning – Estimation – Scheduling – Risk management – Software configuration management - Project Planning – Empirical Estimation Techniques – Staffing Level Estimation – Scheduling – Organization and Team structures – Staffing – Software Requirements specification.											CO1
UNIT-II	SOFTWARE DESIGN							Periods: 9			
Characteristics of a Good Software Design – Coupling and Cohesion – Structured Analysis – Data Flow Diagrams – Structured and Detailed Design – Object oriented concepts – UML Diagrams – Use case model – Class diagrams – Interaction diagrams – Activity diagrams – State chart diagrams – Object Oriented Analysis and Design methodology – Characteristics of a good User Interface – Types – A User Interface Design methodology.											CO2
UNIT-III	SOFTWARE TESTING							Periods: 9			
Introduction to Software testing – Psychology of Testing – Principles of Software Testing – Defects – Defect Prevention Strategies – Role of a tester – Software Testing Life Cycle.											CO3
UNIT-IV	AGILE METHODOLOGY							Periods: 9			
Theories for Agile Management – Agile Software Development – Traditional Model vs. Agile Model – Classification of Agile Methods – Agile Manifesto and Principles – Agile Project Management – Agile Team Interactions – Ethics in Agile Teams – Agility in Design, Testing – Agile Documentations – Agile Drivers, Capabilities and Values.											CO4
UNIT-V	AGILE PROCESSES							Periods: 9			
Lean Production – SCRUM, Crystal, Feature Driven Development – Adaptive Software Development – Extreme Programming: Method Overview – Lifecycle – Work Products, Roles and Practices.											CO5
Lecture Periods: 45			Tutorial Periods: -			Practical Periods: -			Total Periods: 45

Semester	III				Course Category Code: PC		*End Semester Exam Type: TE					
Course Code	U23ADT305				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CA M	ESE	TM	
Course Name	Artificial Intelligence & Expert System				3	-	-	3	25	75	100	
Prerequisite	-											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Understand the concepts of AI.									K2	
	CO2	Acquire various Problem-solving techniques.									K2	
	CO3	Explore the concepts of knowledge representation and uncertain knowledge.									K2	
	CO4	Understand the concepts of Expert system.									K2	
	CO5	Explore about knowledge representation and inference method.									K2	
UNIT-I	INTRODUCTION TO AI							Periods: 9				
Introduction: Introduction to Artificial Intelligence – Various definitions of AI – AI Applications and Techniques – Turing Test and Reasoning – forward and backward chaining. Intelligent Agents: Introduction to Intelligent Agents – Rational Agent – their structure – reflex – model-based – goal-based and utility-based agents – behavior and environment in which a particular agent operates.												CO1
UNIT-II	PROBLEM SOLVING TECHNIQUES							Periods: 9				
Problem Solving and Search Techniques: Problem Characteristics – Production Systems – Control Strategies – Breadth First Search – Depth First Search – iterative deepening – uniform cost search – Hill climbing and its Variations – simulated annealing – genetic algorithm search. Heuristics Search Techniques: Best First Search – A* algorithm – AO* algorithm – Min Max and game trees – refining Minmax– Alpha – Beta pruning – Constraint Satisfaction Problem – Means-End Analysis.												CO2
UNIT-III	KNOWLEDGE REPRESENTATION AND UNCERTAIN KNOWLEDGE							Periods: 9				
Knowledge Representation: Introduction to First Order Predicate Calculus – Resolution Principle – Semantic Nets – Conceptual Dependencies – Semantic networks – Frames system –Production Rules – Conceptual Graphs – Ontologies. Reasoning with Uncertain Knowledge: Different types of uncertainty — various probability constructs –Bayes' rule – Other approaches to modeling uncertainty such as Dempster-Shafer theory and Fuzzy sets/logic.												CO3
UNIT-IV	INTRODUCTION TO EXPERT SYSTEM							Periods: 9				
The meaning of an expert system - problem domain and knowledge domain - the advantages of an expert system - general stages in the development of an expert system - general characteristics of an expert system- history and uses of expert systems today - rule-based expert systems - procedural and nonprocedural paradigms - characteristics of artificial neural systems.												CO4
UNIT-V	KNOWLEDGE REPRESENTATION AND INFERENCE							Periods: 9				
Representation of Knowledge: The study of logic - difference between formal logic and informal logic - meaning of Knowledge – how knowledge can be represented. Methods of Inference: Trees – lattices - and graphs - state and problem spaces - AND-OR trees and goals - methods -Rule-limitation of inference -g - additional methods of Inference - Meta knowledge - the Markov decision process – Decision Making – Decision Making using ML, Decision Support System – Role of Artificial Intelligence in Intelligent Decision Support System.												CO5

Course Name	Basic Machine Learning Techniques			3	-	-	3	25	75	100	
Prerequisite	Python Programming										
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Understand the concepts of machine learning algorithms.								K2	
	CO2	Explore the classification models								K2	
	CO3	Acquire knowledge on regression models.								K2	
	CO4	Analyze the clustering algorithms.								K3	
	CO5	Demonstrate the dimensionality reduction techniques.								K3	
UNIT I	INTRODUCTION TO MACHINE LEARNING						Periods: 9				
Basics of Machine Learning – Using data to make decisions – Types of Machine Learning Algorithms – Workflow: from data to deployment – Data Preprocessing and Feature Engineering – Outlier Detection – Performance Evaluation										CO1	
UNIT-II	REGRESSION MODELS						Periods: 9				
Introduction of Regression Algorithms – Linear Regression – Multivariate Linear Regression – Logistic Regression – sigmoid function – Applications - Performance Evaluation.										CO2	
UNIT-III	CLASSIFICATION MODELS						Periods: 9				
Basics of Classification Algorithms – Building a Classifier and making Predictions – Support Vector Machine – separating data with maximum margin – Bayes theorem – Naive Bayes – classifying with conditional probabilities – K-Nearest Neighbor – Classifying with distance measurements – Applications - Performance Evaluation										CO3	
UNIT-IV	CLUSTERING MODELS						Periods: 9				
Basics of Clustering Algorithms – K-Means improving cluster performance with postprocessing – K-Medians – Expectation Maximization – Hierarchical Clustering – Applications										CO4	
UNIT-V	DIMENSIONALITY REDUCTION TECHNIQUES						Periods: 9				
Introduction– Subset Selection - Principal Component Analysis (PCA) – Factor analysis – Multidimensional Scaling - Linear Discriminant Analysis (LDA) – Generalized Discriminant Analysis(GDA) – Case Study.										CO5

AI & DS Syllabi

Department	Artificial Intelligence and Data Science				Programme: B. Tech.						
Semester	III				Course Category: HS			End Semester Exam Type: TE			
Course Code	U23HSTC01				Periods / Week			Credit	Maximum Marks		
					L	T	P	C	CA M	ESE	TM
Course Name	UNIVERSAL HUMAN VALUES - II				2	0	0	2	25	75	100
(Common to all Branch)											
Prerequisite	UHV - I										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Evaluate the significance of value inputs in formal education and start applying them in their life and profession									K2
	CO2	Distinguish between values and skills, happiness and accumulation of physical facilities, the Self and the Body, Intention and Competence of an individual, etc.									K2
	CO3	Analyze the value of harmonious relationship based on trust and respect in their life and profession									K2
	CO4	Examine the role of a human being in ensuring harmony in society and nature.									K2
	CO5	Apply the understanding of ethical conduct to formulate the strategy for ethical life and profession.									K2
UNIT - I	Introduction To Value Education							Periods: 06			
Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education) - Understanding Value Education- Self-exploration as the Process for Value Education - Basic Human Aspirations - Happiness and Prosperity - Current Scenario- Method to Fulfill the Basic Human Aspirations											
UNIT - II	Harmony In The Human Being							Periods: 06			
Understanding Human being as the Co-existence of the Self and the Body-Distinguishing between the Needs of the Self and the Body-The Body as an Instrument of the Self-Understanding Harmony in the Self-Harmony of the Self with the Body- Programme to ensure self- regulation and Health											
UNIT - III	Harmony In The Family And Society							Periods: 06			
Harmony in the Family - Basic Unit of Human Interaction- 'trust' - Foundational Value in Relationship - 'Respect' - as the Right Evaluation - Other Feelings, Justice in Human-to-Human Relationship - Understanding Harmony in the Society-Vision for the Universal Human Order.											
UNIT - IV	Harmony In The Nature / Existence							Periods: 06			
Understanding Harmony in the Nature-Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders of Nature - Realizing Existence as Co-existence at All Levels - Holistic Perception of Harmony in Existence											
UNIT - V	Implications Of The Holistic Understanding - A Look At Professional Ethics							Periods: 06			
Natural Acceptance of Human Values - Definitiveness of (Ethical) Human Conduct - Basis for Humanistic Education, Humanistic Constitution and Universal Human Order-Competence in Professional Ethics-Holistic Technologies, Production Systems and Management Models- Typical Case Studies-Strategies for Transition towards Value - based Life and Profession											
Lecture- Periods: 30			Tutorial Periods: -			Practical Periods: -			Total Periods: 30

Department	Computer Science and Engineering				Programme: B.Tech.						
Semester	III				Course Category: PC		End Semester Exam Type: TE				
Course Code	U23CSBC01				Periods/Week		Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM
Course Name	Design and Analysis of Algorithms				2	-	2	3	50	50	100
(Common to All Branches)											
Prerequisite	Programming (C or C++), Data Structures and Problem Solving Approaches.										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Analyze and improve the efficiency of algorithms and estimate the performance of algorithm and Divide and Conquer.									K2
	CO2	Determine the Greedy paradigms, Dynamic Programming and explain when an algorithmic design situation calls for it.									K3
	CO3	Interpret the Backtracking paradigms, Branch and Bound, NP-Hard paradigms and explain when an algorithmic design situation calls for it.									K3
	CO4	Demonstrate programs using Divide and Conquer, Greedy paradigms.									K3
	CO5	Build the programs using Dynamic Programming, Backtracking and Branch and Bound.									K2
UNIT - I	Introduction To Algorithm and Divide and Conquer						Periods:10				
Introduction – Algorithm – Pseudo code for expressing algorithms – Performance Analysis – Time complexity – Space complexity – Asymptotic Notation – Big oh notation – Omega notation – Theta notation and Little oh notation. Divide and Conquer method: Binary search – Merge sort – Quick sort											CO1
UNIT - II	Greedy Method and Dynamic Programming						Periods:10				
Greedy method: General method – applications– Knapsack problem – Minimum cost spanning trees –Single source shortest path problem. Dynamic Programming: Applications – Multistage graphs – 0/1 knapsack problem, All pairs shortest path problem – Traveling sales person problem											CO2
UNIT - III	Backtracking and Branch and Bound						Periods:10				
Backtracking: General method. Applications – N – queen problem – Sum of subsets problem – Graph coloring – Hamiltonian cycle – 0/1 Knapsack Problem. Branch and Bound: General method – Applications – Traveling sales person problem – 0/1 knapsack problem – LC Branch and Bound solution –FIFO Branch and Bound solution											CO3
UNIT - IV	Laboratory Exercises						Periods:15				
- Implementation of binary search using Divide-and-Conquer technique - Implementation of Finding Maximum and Minimum using Divide-and-Conquer technique. - Implementation of Knapsack using Greedy technique. - Implementation of Minimum Spanning Tree using Prim's and Kruskal's Algorithm using Greedy technique. - Implementation of Single-Source Shortest Paths algorithms using Greedy technique.											CO4
UNIT - V	Laboratory Exercises						Periods:15				
- Implementation of All Pairs Shortest Paths using Dynamic Programming technique. - Implementation of Traveling Salesman algorithms using Dynamic Programming technique. - Implementation of 8 Queens with the design of Backtracking. - Implementation of sum of subsets with the design of Backtracking. - Implementation of Traveling Salesman problems with Branch-and-Bound technique.											CO5

Semester	III			Course Category Code: HS			*End Semester Exam Type: LE			
Course Code	U23ENPC02			Periods/Week			Credit	Maximum Marks		
				L	T	P	C	CAM	ESE	TM
Course Name	General Proficiency- I			0	0	2	1	50	50	100
(Common to ALL Branches except CSBS)										
Prerequisite	Basics of English Language									
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Interpret meaning and apply reading strategies in technical and non-technical context							K3	
	CO2	Develop interpersonal communication skills professionally							K4	
	CO3	Demonstrate various forms of formal writing							K3	
	CO4	Decode graphical data coherently							K2	
	CO5	Apply the techniques of verbal aptitude in competitive exams							K3	
UNIT- I	COMPREHENSION ANALYSIS						Periods:6			
Listening: Dialogue based on social contexts (IELTS based) - Speaking: Break the iceberg (IELTS based) Submitting Video Recording - Reading: Reading technical passage (IELTS based) - Writing: Writing Task: 2 (IELTS Academic) - Vocabulary: Synonyms (IELTS)										
UNIT- II	PERSONALITY DEVELOPMENT						Periods:6			
Listening: Monologue about the everyday social issues (IELTS based) - Interview Videos - Speaking: Speak about the topic in the Flash Card (IELTS based) - Reading: British & American Vocabulary - Writing: SWOT Analysis - Vocabulary: Idioms and Phrases (IELTS)										
UNIT- III	INFERENTIAL LEARNING						Periods:6			
Listening: Conversation between 4 people regarding education (IELTS based), Anecdotes - Speaking: Structure Discussion (IELTS based) - Reading: Distinguish between facts & opinions (IELTS based), - Writing: Writing Conversation to different context - Vocabulary: Phrasal Verbs (IELTS)										
UNIT- IV	INTERPRETATION AND FUNCTIONAL WRITING						Periods:6			
Listening: Monologue on an academic subject (IELTS based), Group Discussion videos - Speaking: Group Discussion Practice - Reading: Read and review (Books, Magazines) - Writing: Writing Task 1: (IELTS Academic: Graph/ chart/tables description) - Vocabulary: Collocations (IELTS)										
UNIT-V	VERBAL APTITUDE - I						Periods:6			
Language Enhancement: Articles, Preposition, Conjunction										
Verbal Ability Enhancement: Ordering of sentences, Blood Relation, Completing Statements- Cloze test, Spotting Errors - Sentence Improvement, Word Analogy, Word Groups (GATE)										
Lecture Periods: -			Tutorial Periods: -			Practical Periods:30		Total Periods:30

Semester	III		Course Category Code: CC			*End Semester Exam Type: LE				
Course Code	U23MAPC01		Periods/Week			Credit	Maximum Marks			
			L	T	P	C	CA M	ESE	TM	
Course Name	Engineering Mathematics Laboratory		0	0	2	1	50	50	100	
(Common to all Branches Except CSBS)										
Prerequisite	Matrices, Fourier Transforms, Laplace Transforms									
Course Outcome	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Perform and evaluate Matrix Operations							K3	
	CO2	Solve Differential and Integral Equations							K3	
	CO3	Construct Fourier series and Fourier Transforms of the given function							K3	
	CO4	Find the Measures of Central tendency							K3	
	CO5	Analyze Correlation and Regression lines							K3	
List of Experiments:										
1. Find the Inverse, Rank, Eigen values and Eigen Vectors of the matrix. 2. Solve the first order differential equation. 3. Find the integration of $\int_a^b f(x)dx$. 4. Find the Fourier series of f(x). 5. Find the Fourier Transform of f(x). 6. Find the Laplace Transform of f(x). 7. Find the Mean, Median and Mode. 8. Construct the Pie and Bar Diagram. 9. Find the Correlation coefficient. 10. Find the Regression lines.

Course Name	Artificial Intelligence & Expert System Laboratory	0	0	2	1	50	50	100
(Common to All Branches)								
Prerequisite	Data Structures							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Describe the basics of PROLOG programming.						K2
	CO2	Implement the concepts using BFS and A* algorithm.						K2
	CO3	Implement the concepts using Means End Analysis.						K3
	CO4	Ability to Describe the basics of Expert System.						K3
	CO5	Ability to develop specific expert system problems.						K3
List of Exercises								
1. Study of PROLOG. Write the following programs using PROLOG. 2. Write simple fact for the statements using PROLOG. 3. Implementation of toy problems 4. Developing Best first search and A* Algorithm for real world problems 5. Implementation of knowledge representation schemes - use cases 6. Solve Robot (traversal) problem using means End Analysis. 7. Develop an Expert system for Categorize disease. 8. Develop an Expert System that asks you a couple of questions about a certain flower, and answers with its name as a result 9. Combine a machine learning model with an expert system for decision support. 10. Develop an intelligent system for personalized recommendations.

Course Name	CERTIFICATION COURSE-III	-	-	4	-	100	-	100
Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence. Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.

1. CLEAN CODE

Course Content:

1. Introduction to Clean Code.
2. Bad Code - The Total Cost of Owning a Mess: The Grand Redesign in the Sky – Attitude.
3. The Primal Conundrum.
4. The Art of Clean Code - Schools of Thought - The Boy Scout Rule - Prequel and Principles.
5. Introduction to Naming Convention - Meaningful Names – Introduction - Use Intention-Revealing Names - Avoid Disinformation - Make Meaningful Distinctions - Use Pronounceable Names - Use Searchable Names - Avoid Encodings.
6. Hungarian Notation - Member Prefixes - Interfaces and Implementations.
7. Avoid Mental Mapping - Class Names - Method Names - Use Solution Domain Names - Use Problem Domain Names.
8. Functions - Blocks and Indenting - Sections within Functions - One Level of Abstraction per Function.
9. Reading Code from Top to Bottom: The Stepdown Rule - Switch Statements - Use Descriptive Names.
10. Function Arguments - Common Monadic Forms - Flag Arguments - Dyadic Functions – Triads - Argument Objects.
11. Comments - Comments Do Not Make Up for Bad Code - Explain Yourself in Code - Good Comments - Legal Comments.
12. Formatting - The Purpose of Formatting - Different Formatting Types.
13. Error Handling - Use Exceptions Rather Than Return Codes.

2. EXPLORING OF GITHUB

Course Content:

1. Introduction to Version Control - Keeping Historical Copies - Diffing Files - Applying Changes.
2. Practical Application of diff and patch.
3. Version control - Version Control and Automation.
4. Git - Installing Git - Installing Git on Windows (Optional) - First Steps with Git - Tracking Files - The Basic Git Workflow - Anatomy of a Commit Message.
5. Introduction to Git Locally - Using Git Locally.
6. Skipping the Staging Area - Getting More Information About Our Changes - Deleting and Renaming Files.
7. Undoing Changes Before Committing - Amending Commits – Rollbacks - Identifying a Commit
8. Introduction to branch - Creating New Branches - Working with Branches.
9. Merging - Merge Conflicts. Working with Remotes.
10. Introduction to GitHub - Basic Interaction with GitHub – Introduction to remote - Working with Remotes - Fetching New Changes - Updating the Local Repository.
11. The Pull-Merge-Push Workflow - Pushing Remote Branches - Rebasing the Changes - Rebasing Example.
12. Collaboration Introduction to Collaboration - Simple Pull Request on GitHub - The Typical Pull Request Workflow on GitHub - Updating an Existing Pull Request - Squashing Changes.
13. Code reviews - Code Review Workflow - Uses of Code Reviews in GitHub. Managing Collaboration.
14. Tracking Issues.
15. Continuous Integration.Collaboration.

3. APTITUDE - I

Course Content:

1. Number System - Basics, Properties & Type of Numbers - Divisibility Rules
2. LCM & HCF - Unit Digit Concept [Cyclicity Method]
3. Decimals, Simplification. Ratio & Proportion - Compounded & Duplicate Ratio - Inverse Ratio - Shortcut to Find Ratio - Continuous Proportion - Mean & Divisibility Proportion.
4. Ages - Both Data is in Ratio or Time Format - One Data in Ratio or Time Format & Other Data in Sum, Difference or Product
5. Logical [Puzzles] Method.
6. Average - Basics & Finding Average in Complex - Replacement & Alteration Method - Average Speed Finding Problems.
7. Allegation & Mixtures
8. Ratio of Mixture - Finding the Kilogram through Ratio
9. Mean Value Method
10. Ratio Mixture [Fraction Method] - Iteration Method.

				L	T	P	C	CAM	ESE	TM
Course Name	Climate Change			0	0	2	-	100	-	100
UNIT-I		ATMOSPHERE AND ITS COMPONENTS					(8Hrs)			
Importance of Atmosphere-Physical Chemical Characteristics of Atmosphere- Vertical structure of the atmosphere-Composition of the atmosphere-Atmospheric stability-Temperature profile of the atmosphere-Lapse rates-Temperature inversion-effects of inversion on pollution dispersion.										CO1
UNIT-II		GLOBAL CLIMATE					(8Hrs)			
Account of past climate – Environmental indicators and instrumental records – Human Footprints on global warming- Predicting future climates- Temperature regime – Extreme climate events.										CO2
UNIT-III		IMPACTS OF CLIMATE CHANGE					(8Hrs)			
Causes of Climate change: Change of Temperature in the environment-Melting of ice Pole-sea level rise-Impacts of Climate Change on various sectors — Agriculture, Forestry and Ecosystem — Water Resources — Human Health — Industry, Settlement and Society — Methods and Scenarios — Projected Impacts for Different Regions— Uncertainties in the Projected Impacts of Climate Change — Risk of Irreversible Changes.										CO3
UNIT- IV		OBSERVED CHANGES AND ITS CAUSES					(8Hrs)			
Climate change and Carbon credits- Initiatives in India-Kyoto Protocol-Intergovernmental Panel on Climate change- Climate Sensitivity and Feedbacks —The Montreal Protocol — UNFCCC — IPCC _Evidences of Changes in Climate and Environment — on a Global Scale and in India.										CO4
UNIT- V		CLIMATE CHANGE AND MITIGATION MEASURES					(8Hrs)			
Clean Development Mechanism —Carbon Trading- examples of future Clean Technology — Biodiesel — Natural Compost — Eco-Friendly Plastic —I Alternate Energy — Hydrogen — Bio-fuels —Mitigation Efforts in India and Adaptation funding. Key Mitigation Technologies and Practices—Carbon sequestration — Carbon capture and storage (CCS) — International and Regional cooperation- Remedial measures.										CO5

Prerequisite	Digital System Design and Programming Logic											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Analyze and evaluate the cyber security needs of an organization									K2	
	CO2	Analyze the security issues in networks and computer systems to secure an infrastructure.									K2	
	CO3	Design operational cyber security strategies and policies.									K3	
	CO4	Apply critical thinking and problem-solving skills to detect current and future attacks on an organization's computer systems and networks.									K3	
	CO5	Examine the various network security threats and solutions									K3	
UNIT-I	Introduction to Computer Networks							Periods: 9				
Introduction to computer networks-Basics of data communication-Types of networks: LAN, WAN, MAN-Network topologies: bus, star, ring, mesh-Network architectures: client-server, peer-to-peer-OSI model overview-TCP/IP protocol suite-Network addressing and subnetting												CO1
UNIT-II	Network Security Fundamentals							Periods: 9				
Understanding the need for network security-Common security threats: malware, phishing, DoS attacks-Vulnerability assessment and risk management-Security policies and best practices-Principles of cryptography: encryption, decryption, hashing-Types of encryption algorithms: symmetric, asymmetric-Public Key Infrastructure (PKI)-Digital signatures and certificates												CO2
UNIT-III	Authentication and Access Control							Periods: 9				
Authentication methods: passwords, tokens, biometrics-Single Sign-On (SSO) and multi-factor authentication-Role-based access control (RBAC) and discretionary access control (DAC)-Access control lists (ACLs)-Identity management systems-Secure authentication protocols: Kerberos, OAuth, SAML-Federation and identity federation												CO3
UNIT-IV	Network Defense Techniques							Periods: 9				
Firewall technologies: stateful, stateless, next-generation-Intrusion Detection Systems (IDS) and Intrusion-Prevention Systems (IPS)-Network segmentation and DMZ (Demilitarized Zone)-Virtual Private Networks (VPNs): site-to-site, remote access-Secure communication protocols: SSL/TLS, SSH, IPsec-Endpoint security measures: antivirus, anti-malware, endpoint detection and response (EDR)-Security information and event management (SIEM) systems												CO4
UNIT-V	Wireless Network Security							Periods: 9				
Wireless networking standards: Wi-Fi, Bluetooth, Zigbee-Wireless security protocols: WEP, WPA, WPA2, WPA3-Wireless encryption techniques: TKIP, AES-Security challenges in wireless networks: rogue access points, evil twin attacks-Wireless Intrusion Detection Systems (WIDS) and Wireless Intrusion Prevention Systems (WIPS)-Mobile device security considerations												CO5

Department	Information Technology			Programme: B.Tech.						
Semester	IV			Course Category Code: ES		*End Semester Exam Type: TE				
Course Code	U23ITTCO2			Periods / Week		Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM
Course Name	Programming in Java			3	-	-	3	25	75	100
Prerequisite	-									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Articulate the concept of Java fundamentals, OOPs and Strings							K2	
	CO2	Demonstrate the principles of inheritance, packages and interfaces with real time applications							K2	
	CO3	Create real time applications using exception handling and thread programming.							K3	
	CO4	Build distributed applications using Collections and IO streams							K3	
	CO5	Design and build simple GUI programs using AWT, Swings and build database applications							K3	
UNIT-I	Introduction						Periods: 9			
Introduction: Java: History – Features – JVM - JRE - JDK – Data Types - Variables, Types, Expressions, Assignment Statements, Conditional and Iterative Control Structures - Arrays										CO1
OOPs with Java: Class – Objects – Methods - Access Modifiers – Abstraction – Encapsulation - Constructors - this – static - Garbage Collection – Nested Classes.										
String: String Class– Built-in Methods – StringBuffer - StringBuffer										
UNIT-II	Inheritance, Interfaces and Packages						Periods: 9			
Inheritance: Types of Inheritance – is-a Relationship, has-a Relationship – super keyword – final keyword – Polymorphism - Method overloading and Method overriding – Abstract Class										CO2
Interfaces: Define – Extend – Implement – Access - Interfaces vs Abstract classes										
Packages: Define – Create – Access – Import – Autoboxing and Auto unboxing										
UNIT-III	Exception Handling and Multithreading						Periods: 9			
Exception Handling: Exception Hierarchy – Checked and Unchecked Exceptions – try, catch, throws, throw and finally – User Defined Exceptions.										CO3
Multithreading: Thread – Life cycle – Defining and Running – Implementation Types – Thread Priorities – Thread Synchronization - Inter-Thread Communication										
UNIT-IV	Collections and I/O Streams METHODOLOGY						Periods: 9			
Collections: List: ArrayList and LinkedList. Set: HashSet and TreeSet. Map: HashMap – Stack – Queue. Lambda Expressions.										CO4
I/O Streams: Streams – Byte Streams and Character Streams – FileInputStream and FileOutputStream – FileReader and FileWriter.										
UNIT-V	GUI and JDBC						Periods: 9			
AWT: Components – Controls – Event Handling										CO5
SWING: Swing Components – Layout Management.										
JDBC: JDBC Architecture – JDBC Driver Types – Implementation of JDBC.										
Lecture Periods: 45			Tutorial Periods: -		Practical Periods: -			Total Periods: 45		
Text Books

Semester	IV				Course Category Code: PC		*End Semester Exam Type: TE					
Course Code	U23ADT407				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	Advanced Machine Learning Techniques				3	-	-	3	25	75	100	
Prerequisite	Basic Machine Learning Techniques											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand the concepts of Decision learning algorithm.									K2	
	CO2	Explore the rule-based learning.									K2	
	CO3	Acquire knowledge on ensemble learning.									K2	
	CO4	Explore and Analyze the Neural Network.									K2	
	CO5	Demonstrate the backpropagation Neural Network.									K3	
UNIT- I	DECISION TREES							Periods: 9				
Decision tree representation – Basic decision tree algorithm – Hypothesis space search – Inductive bias – Issues in decision tree – Case studies with C4.5 and CART – Incremental decision tree induction – ID3 – Hidden Markov Model.											CO1	
UNIT- II	RULE BASED LEARNING							Periods: 9				
Rule Induction – One Rule in Rule Learning – Association rule mining – Association rules – Case studies with Apriori and Equivalence Class Transformation Algorithm.											CO2	
UNIT- III	ENSEMBLE LEARNING							Periods: 9				
Introduction – Bayesian methods – Bagging: Random Forest – Boosting: Adaboost and XGBoost Algorithms Light GBM – Stacking											CO3	
UNIT- IV	ARTIFICIAL NEURAL NETWORK							Periods: 9				
Neural Network Representation – Types of activation functions - Network Topology – Perceptrons – Learning rule: Hebbian – Perceptron and Delta – Single Layer Neural Network.											CO4	
UNIT- V	FEED FORWARD NEURAL NETWORK							Periods: 9				
Multi-Layer Feedforward Network – MLP Architecture – Error Metrics: Mean Square Error (MSE) – Cross-Entropy (CE) – Minimum Classification Error (MCE) – Learning by Backpropagation – Enhancing backpropagation –Generalization Issues.											CO5

Department	Artificial Intelligence and Data Science				Programme: B.Tech.							
Semester	IV				Course Category: ES		End Semester Exam Type: TE					
Course Code	U23ADB401				Periods / Week		Credit		Maximum Marks			
					L	T	P	C	CAM	ESE	TM	
Course Name	Linux Internals				2	-	2	3	50	50	100	
(Common to all Branches)												
Prerequisite	Any Programming Knowledge											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Understand concepts of OS basics									K2	
	CO2	Learn various Linux basics and shell programming									K2	
	CO3	Learn about inter process communication and socket programming									K2	
	CO4	Apply various Linux commands and shell programming concepts									K3	
UNIT-I	Overview of Operating Systems and Process Management							Periods: 10				
	Introduction to System Software – Objectives and functions of OS – Evolution of OS – Operating system components – Interrupts – System calls, Management: Processes – Operations on Processes – CPU Scheduling. Threads – Overview – Multithreading models – Threading issues - Paging – Segmentation – Segmentation with paging, Virtual Memory: Background – Demand Paging – Page Replacement – Thrashing.										CO1	
	UNIT-II							Linux Basics and Shell Programming			Periods: 10	
	Linux Basics: Introduction to Linux: History, GNU Movement, System Organization (Kernel and Shell), Difference between CLI OS & GUI OS, Windows v/s Linux, Importance of Linux Kernel, Files and Directories. Concept of Open-Source Software, Linux, Linux Architecture, Linux File System. Shell programming with Bourne Again Shell (bash): Introduction, Shell responsibilities, Pipes and redirection, here documents, Running a shell script, Shell as a programming language, Shell meta characters, File-name substitution, Shell variables, Command. substitution, Shell commands.										CO2	
	UNIT-III							Inter Process Communication, and Socket Programming			Periods: 10	
Introduction to IPC-The Critical-section problem – Synchronization hardware – Mutex locks – Semaphores – Classic problems of synchronization – Critical regions – Monitors, IPC between processes on a single computer system, IPC between processes on different systems, Pipes-creation between related processes using FIFOs (Named pipes), Introduction to Berkley Sockets, IPC over a network, client – server model, Socket address structures (Unix domain and internet domain), Socket system calls for connection-oriented protocol and connectionless protocol										CO3		
UNIT-IV		Laboratory Exercises						Periods: 15				
- Study and Practice on various commands like man, passwd, tty, script, clear, date, cal, cp, mv, ln, rm, unlink, mkdir, rmdir, du, df, mount, umount, find, unmask, ulimit, ps, who, - Study and Practice on various commands like cat, tail, head , sort, nl, uniq, grep, egrep,fgrep, cut, paste, join, tee, pg, comm, cmp, diff, tr, awk, tar, cpio. - Write a Shell Program to print all .txt files and .c files - Write a Shell program to move a set of files to a specified directory. - Write a Shell program to display all the users who are currently logged in after a specified time. - Write a Shell Program to wish the user based on the login time. - Simulate cat command. b) Simulate cp command. - Simulate head command. b) Simulate tail command.										CO4		
UNIT-V		Laboratory Exercises						Periods: 15				
- Write a program to handle the signals like SIGINT, SIGQUIT, SIGFPE. - Implement the following IPC forms a) FIFO b) PIPE - Implement message queue form of IPC. - Implement shared memory form of IPC. - Write a C program, using sockets create client and server socket programs. Write a TCP iterative server program, in server program take user input for port number and bind the port address. Server waits for clients to connect. When client connects, communication can happen using recv and sent functions.										CO5

Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)	
	CO1	Infer ideas to attend international standardized test by broadening receptive and productive skills								K2	
	CO2	Interpret the types of writing in different state of affairs								K3	
	CO3	Acquire meticulous exposure in speaking and get rid of performance anxiety								K2	
	CO4	Articulate the ideas and opinions effectively and coherently								K2	
	CO5	Progress the skills to compete in various competitive exams like GATE, GRE, UPSC, etc.								K4	
UNIT-I	CAREER SKILLS							Periods: 9			
Listening: Listening at specific contexts - Speaking: Demonstrative speaking practice using visual aids (charts, graphs, maps) - Reading: Read and Review -Newspaper, Advertisement, Company Handbooks, and Guidelines (IELTS based) - Writing: Integrated Writing Task (TOEFL) - Vocabulary: Synonyms and Antonyms (IELTS)											CO1
UNIT-II	CORPORATE SKILLS							Periods: 9			
Listening: Listening English news and reproducing in own words - Speaking: Team Presentation - Reading: Short texts and Longer Passages (cloze reading) - Writing: Analytical Writing: Analyzing an issue and Argument task (GRE based) - Vocabulary: Prefix and Suffix											CO2
UNIT-III	FUNCTIONAL SKILLS							Periods: 9			
Listening: Listening TED Talks - Speaking: Brainstorming & Individual Presentation - Reading: Text Completion (GRE Based) - Writing: Picture Inference - Vocabulary: Word Formation											CO3
UNIT-IV	TRANSFERRABLE SKILLS							Periods: 9			
Listening: Listening Documentaries and making notes - Speaking: Mock Interview - Reading: Read texts on emerging trends - Writing: Agreeing & Disagreeing Essay (IELTS) - Vocabulary: Euphemism, Redundancy, Clichés and Intensifiers											CO4
UNIT-V	VERBAL APTITUDE - II							Periods: 9			
Transformational Grammar: Tenses, Change of Voice, Concord											CO5
Verbal Ability Enhancement: Letter Series, Coding &Decoding, Sentence Equivalence (GRE)Analytical Reasoning and Logical Reasoning (GATE), Syllogism, One-word Substitution, Jumbled Sentences

					L	T	P	C	CAM	ESE	TM	
Course Name	Computer Networks and Security Laboratory				-	-	2	1	50	50	100	
Prerequisite	Digital System Design and Programming Logic											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand and interpret network traffic patterns effectively using tools like Wireshark.									K3	
	CO2	Configure firewalls, IDS, and VPNs to protect networks from various cyber threats.									K3	
	CO3	Detect and respond to security incidents promptly by analyzing network logs and implementing appropriate measures.									K2	
	CO4	Conduct comprehensive security assessments of networks, including wireless networks and web applications, to identify vulnerabilities.									K3	
	CO5	Apply practical network security skills learned through experimentation to bolster the security of systems and organizations.									K3	
List of Experiments												
1. Analyze network traffic using Wireshark. 2. Set up and test firewall rules using software like iptables. 3. Deploy and test open-source IDS like Snort. 4. Assess Wi-Fi network security using tools like Aircrack-ng. 5. Simulate DoS attacks and evaluate their impact. 6. Set up and test VPN connections for security and performance. 7. Analyze network protocols using packet capture tools. 8. Demonstrate DNS spoofing attacks using tools like Ettercap. 9. Test web applications for common vulnerabilities. 10. Analyze network logs and packet captures to investigate security incidents.

Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Apply and practice logical formulations to solve simple problems leading to specific applications.							K3	
	CO2	Demonstrate the use of inheritance, interface and package in relevant applications							K3	
	CO3	Implement robust application programs in Java using exception handling and multithreading							K3	
	CO4	Build java distributed applications using Collections and IO streams.							K3	
	CO5	Implement Graphical User Interface based application programs by utilizing event handling features and Swing in Java.							K3	
List of Exercises										
1. Develop simple programs using java										
2. Develop a java program that implements class and object.										
3. Write a java program to find the frequency of a given character in a string										
4. Write a java program to demonstrate inheritance and interfaces.										
5. Develop a java program that implements the Packages.										
6. Create java applications using Exception Handling for error handling.										
7. Develop a simple real life application program to illustrate the use of Multi-Threads.										
8. Implement simple applications using Collections.										
9. Develop application using the concept of I/O Streams										
10. Write a Java Program to demonstrate AWT and Swing Components										
11. Develop a simple application and use JDBC to connect to a back-end database.

					L	T	P	C	CAM	ESE	TM	
Course Name	Advanced Machine Learning Techniques Laboratory				-	-	2	1	50	50	100	
Prerequisite	Basic Machine Learning Techniques, Python											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand the basics of machine learning algorithms.									K2	
	CO2	Implement decision and rule based learning models.									K2	
	CO3	Experiment the Equivalence class transformation algorithm.									K3	
	CO4	Implement ensemble models.									K2	
	CO5	Implement the neural network.									K3	
List of Experiments												
Implementation the following algorithms with suitable applications using Python.												
1. ID.3 algorithm												
2. C4.5 algorithm												
3. CART Decision Tree Algorithm												
4. Apriori												
5. Equivalence Class Transformation Algorithm												
6. Naïve Bayes ensemble												
7. Random forests												
8. Adaboost												
9. XGBoost												
10. Simple Neural Network

Course Code	U23CSDC01				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	Automata and Compiler Design				3	-	-	3	25	75	100	
(Common to AI & DS, CSE)												
Prerequisite	-											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand the concept of Finite Automata, NFA and DFA.									K2	
	CO2	Understand about Context Free Language and Normal Forms									K2	
	CO3	Construct Push Down Automata and Turing Machine									K3	
	CO4	Explain the concept of Lexical Analysis and Syntax Analysis									K3	
	CO5	Describe the Intermediate code generation, Code Optimization and Code Generation									K3	
UNIT-I	FINITE AUTOMATA AND REGULAR EXPRESSIONS						Periods: 9					
Introduction: Finite Automata – Deterministic Finite Automata – Non-Deterministic Finite Automata – Conversion from NFA to DFA – NFA with epsilon transition - Eliminating epsilon transition -Regular Expression- Conversion from Regular Expression to NFA- Conversion from Regular Expression to DFA (Direct / Indirect method) – Minimized DFA.										CO1		
UNIT-II	CONTEXT-FREE GRAMMAR AND NORMAL FORMS						Periods: 9					
Types of Grammar - Chomsky_s hierarchy of languages -Context-Free Grammar (CFG) – Derivations and Parse trees – Ambiguity in grammars – Normal Forms – Chomsky Normal Form – Greibach Normal Form.										CO2		
UNIT-III	PUSHDOWN AUTOMATA AND TURING MACHINES						Periods: 9					
Push Down Automata (PDA): Definition of the Pushdown Automata - Languages of pushdown automata – CFG to PDA - Turing Machine - Turing machines for regular languages- Turing machine construction for Palindrome, Addition, Subtraction.										CO3		
UNIT-IV	LEXICAL ANALYSIS AND SYNTAX ANALYSIS						Periods: 9					
Compilers: The Phases of compiler – Lexical analysis – The role of the lexical analyser – Input buffering – Parser: Top Down Parser – Predictive Parser, Bottom up Parser – Shift Reduce Parser - Operator Precedence Parser-SLR Parser.										CO4		
UNIT-V	INTERMEDIATE CODE GENERATION, CODE OPTIMIZATION AND CODE GENERATION						Periods: 9					
Intermediate Code Generation: Intermediate Languages. Code Optimization: Principle sources of optimization – Loop Optimization. Code Generation: Issues in the design of code generator – Simple code generator – Basic blocks and flow graphs – The DAG representation of Basic Block - Generating code form DAGs - Peephole optimization.										CO5

Semester	IV					Course Category: PE			End Semester Exam Type: TE				
Course Code	U23ADE401					Periods / Week		Credit	Maximum Marks				
						L	T	P	C	CAM	ESE	TM	
Course Name	Introduction to Computer Vision					3	0	0	3	25	75	100	
Prerequisite	Basic understanding of linear algebra, calculus, probability, programming, and machine learning is essential for understanding computer vision.												
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)		
	CO1	Understand basic knowledge, theories and methods in image processing and computer vision.										K2	
	CO2	Implement basic and some advanced image processing techniques in OpenCV.										K2	
	CO3	Apply 2D a feature-based based image alignment, segmentation, and motion estimations.										K3	
	CO4	Apply 3D image reconstruction techniques										K3	
	CO5	Design and develop innovative image processing and computer vision applications.										K3	
UNIT- I	Introduction To Image Formation and Processing							Periods: 9					
Computer Vision - Geometric primitives and transformations - Photometric image formation - The digital camera - Point operators - Linear filtering - More neighborhood operators - Fourier transforms - Pyramids and wavelets - Geometric transformations - Global optimization.										CO1			
UNIT- II	Feature Detection, Matching and Segmentation							Periods: 9					
Points and patches - Edges - Lines - Segmentation - Active contours - Split and merge - Mean shift and mode finding - Normalized cuts - Graph cuts and energy-based methods.										CO2			
UNIT- III	Feature-Based Alignment & Motion Estimation							Periods: 9					
2D and 3D feature-based alignment - Pose estimation - Geometric intrinsic calibration - Triangulation - Two-frame structure from motion - Factorization - Bundle adjustment - Constrained structure and motion - Translational alignment - Parametric motion - Spline-based motion - Optical flow - Layered motion.										CO3			
UNIT- IV	3D Reconstruction							Periods: 9					
Shape from X - Active rangefinding - Surface representations - Point-based representations Volumetric representations - Model-based reconstruction - Recovering texture maps and albedosos.										CO4			
UNIT- V	Image-Based Rendering and Recognition							Periods: 9					
View interpolation Layered depth images - Light fields and Lumigraphs - Environment mattes - Video-based rendering-Object detection - Face recognition - Instance recognition - Category recognition - Context and scene understanding- Recognition databases and test sets.										CO5			
Lecture Periods:45				Tutorial Periods:-				Practical Periods:-			Total Periods:45

Semester	IV			Course Category Code: PE		End Semester Exam Type: TE				
Course Code	U23ADE402			Periods/Week		Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM
Course Name	R Programming			3	-	-	3	25	75	100
Prerequisite	Python, Mathematics and Statistics									
Course Outcome	On completion of the course, the students will be able to					BT Mapping (Highest Level)				
	CO1	Understand and use basic fundamental concepts to solve the real-world problem using R programming language				K2				
	CO2	Design and implement the solution using scalar, vectors, matrices and statistical problems in R program				K2				
	CO3	Design and implement the program using data frame, list to provide the solution for various problem				K2				
	CO4	Understand about factors and objects to solve statistical problems				K2				
	CO5	Implement Minimize and maximize functions, simulation , visualization and statistical analysis using R				K3				
Unit-I	Introduction					Periods: 9				
Overview of R- R data types and objects,-Reading and writing data-Essentials of the R Language- Installing R and Running R- Packages in R- Calculations and Complex numbers in R- Rounding Arithmetic and Modulo and integer quotients- Variable names and assignment- Operators, Integers, Factors and Logical operations.										CO1
Unit-II	Control Structures and Vectors					Periods:9				
Control structures and functions: Introduction to Functions-Preview of Some Important R Data Structures, Vectors, Character Strings, Matrices, Lists-Data Frames and Classes Vectors-Generating sequences-Vectors and subscripts:-Extracting elements of a vector using subscripts- Working with logical subscripts, Scalars, Vectors, Arrays, and Matrices- Adding and Deleting Vector Elements-Obtaining the Length of a Vector, Matrices and Arrays as Vectors -Vector Arithmetic and Logical Operations.										CO2
Unit-III	Lists and Data Frames					Periods:9				
Lists: Creating Lists-General List Operations, List Indexing Adding and Deleting List Elements- Getting the Size of a List,-Extended Example- Text Concordance Accessing List Components and Values- Applying Functions to Lists-Data Frames: Creating Data Frames and Accessing Data Frames- Other Matrix-Like Operations.										CO3
Unit-IV	Factors and Object-Oriented Programming					Periods:9				
Knowledge representation - Statistical pattern recognition - Syntactic pattern recognition - Mathematical Morphology - Morphological transformation–S Classes, S Generic Functions, and Writing S Classes- Implementing a Generic Function on an S Class- Visualization, Simulation and code profiling- Statistical Analysis with R data manipulation										CO4
Unit-V	Data Visualization Using R					Periods:9				
Introduction,-Types of Data Visualization- Statistical graphs: Scatter Plots, Box Plots, Scatter Plots and Box and Histograms- Advanced Visualization: Using the ggplot2 package to visualize data-Applying themes from ggthemes to refine and customize charts and graphs-Building data graphics for dynamic reporting, advantages and disadvantages.										CO5
Lecture Periods:45			Tutorial Periods:-		Practical Periods:-			Total Periods:45

Semester	IV				Course Category Code: PE		End Semester Exam Type: TE					
Course Code	U23ADE403				Periods/Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	Tools and Techniques of Data Science				3	-	-	3	25	75	100	
Prerequisite	Machine Learning											
Course Outcome	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Demonstrate the basic knowledge of data science process.										K2
	CO2	Setup the software environment for python and R Language and apply various techniques to work with data.										K2
	CO3	Manipulate and visualize the data using tools like pandas and matplotlib.										K3
	CO4	Develop simple data science applications.										K4
	CO5	Analyze the various data science related projects.										K3
UNIT-I	Introduction to Data Science							Periods: 9				
IThe data science process – Roles in data science project – Stages of Data Science Project – Defining the goal – Data collection and Management – Modelling – Model evaluation – Presentation and documentation – Model deployment and Maintenance.											CO1	
UNIT-II	Data Extraction using Python							Periods:9				
Machine learning: Defining Machine Learning and Its Processes- steps of the machine learning process -machine learning terms- Learning Styles-Modeling with instances-Instance-based classifiers-K-Nearest Neighbor-Self-Organizing Map (SOM)- Locally weighted learning-Python – overview: Numbers in Python-Strings in Python-Lists in Python-Tuples in Python-Sets in Python-Dictionaries in Python -NumPy module in python-Setting up Data science toolbox											CO2	
UNIT-III	Data Science Tools and Environment							Periods:9				
Essential concepts and tools-Executing a Command-Line Tool-Five Types of Command-Line Tools-Working with Files-Obtaining Data: Copying Local Files to the Data Science Toolbox-Local Version of Data Science Toolbox-Decompressing Files-Converting Microsoft Excel Spreadsheets-Querying Relational Databases-Downloading from the Internet-Managing Data Workflow-Introducing Drake-Techniques using Python Tools: K-Nearest Neighbor (KNN) Algorithm-Naïve Bayes Algorithm.											CO3	
UNIT-IV	Techniques using R Tools							Periods:9				
R programming overview - Features of R Programming-Advantages of R-Loading data into R – Modeling methods –choosing and evaluating models –Mapping problems to machine learning tasks-Solving classification problems-Solving scoring problems-Linear and logistic Regression.											CO4	
UNIT-V	Data Manipulation and Data Visualization							Periods:9				
Data Manipulation using pandas: Installing and using Pandas- Introducing pandas objects- Data Indexing and selection – handling missing data, merge and joining sets, Aggregation and grouping.											CO5	
Data Visualization using Matplotlib – Simple Line Plots- Simple Scatter plots, Multiple subplots, Visualization with seaborn.

		L	T	P	C	CAM	ESE	TM
Course Name	Certification Course-IV	-	-	4	-	100	-	100
Students shall choose an International certification course offered by the reputed organizations like Google, Microsoft, IBM, Texas Instruments, Bentley, Autodesk, Eplan and CISCO, etc. The duration of the course is 40-50 hours specified in the curriculum, which will be offered through Centre of Excellence. Pass /Fail will be determined on the basis of participation, attendance, performance and completion of the course. If a candidate Fails, he/she has to repeat the course in the subsequent years. Pass in this course is mandatory for the award of degree.								
Lecture Periods: -		Tutorial Periods: -		Practical Periods: 50		Total Periods: 50

		L	T	P	C	CAM	ESE	TM
Course Name	Skill Enhancement Course-II	-	-	2	-	100	-	100

1. API DESIGN – I

Course Content:

1. REST – What You Didn't Know
2. A brief history of REST
3. Principle 1 – everything is a resource
4. Principle 2 – each resource is identifiable by a unique identifier
5. Principle 3 – use the standard HTTP methods
6. Principle 4 – resources can have multiple representations
7. Principle 5 – communicate statelessly
8. The REST goals
9. Separation of the representation and the resource
10. Visibility and Reliability
11. Scalability and performance
12. Working with WADL
13. Taking advantage of the existing infrastructure
14. Getting Started with Node.js
15. Installing Node.js
16. Node Package Manager
17. Installing the Express framework and other modules
18. Setting up a development environment
19. Handling HTTP requests
20. Modularizing code
21. Testing Node.js
22. Working with mock objects
23. Deploying an application

2. EXPLORING OF RESEARCH TOOLS

Course Content:

1. Bit.ai
2. elink.io
3. GanttPRO
4. Grammarly
5. Typeset.io
6. Scrivener
7. Endnote
8. Evernote
9. Mendeley
10. ContentMine
11. ResearchGate
12. Google Scholar

3. APTITUDE – II

1. Number System – II [Advanced Level].
2. Factors [Sum, Product, odd, Even].
3. Remainder Theorem - No of Zeros at End -Highest Power - Finding the Last two Digits.
4. Time & Work, Chain Rule - Working Together.
5. Combination Method - Before, After & Alternative Method.
6. Men & Days - Men, Days & Work - Efficiency & Wages.
7. Equation Method.
8. Profit & Loss - Basics & Short Cuts - Passing Through Successive Hands.
9. Purchase & Selling - Dishonest Shopkeeper.
10. Successive Discount into Single Equivalent Discount - Dealing with two or more Parts.
11. Percentage - Conversion & Shortcuts - Population, Depreciation Methods.
12. Percentage Savings & Expenditure - Reduction in Consumption - Percentage Relationship.
13. Time, Speed & Distance, Trains, Boats - Relationship between T/S/D.
14. Train in same Direction - Opposite Direction.
15. Boats along with Streams - Against the Stream

Lecture Periods:

Tutorial Periods:

Practical Periods: 30

Total Periods: 30

Marks	10	30	60	100

Department	Artificial Intelligence and Data Science			Programme: B.Tech.						
Semester	IV			Course Category: MC		*End Semester Exam Type: -				
Course Code	U23ADM404			Periods / Week		Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM
Course Name	Right to Information and Good Governance			-	-	2	-	100	-	100
UNIT-I	Introduction					Periods: 9				
Conceptual background — Right to know — Open Government — Transparency in governance and accountability — Right to information under the Indian Constitution - Article 19 (I)(a) and Article 21 of the Constitution — Role of NGOs and movement for right to information — Right to Information Act, 2005 — Scope and objectives.										CO1
UNIT-II	Obligation of Public Authorities					Periods: 9				
Obligations of public authorities: Section 4, Designation of Public Information Officers: Section 5, Disposal of request: Section 7, Exemption from disclosure of information: Section 8 Grounds for rejection to access in certain cases: Section 9, Severability: Section 10, Third party information: Section 11										CO2
UNIT-III	Central and State Information Commission					Periods: 9				
Constitution of Central and State Information Commissions Terms of office and conditions of service, Removal of Chief Information Commissioner or Information Commissioner. Powers and functions of Information Commissions.										CO3
UNIT- IV	Judiciary and Right to Information Act					Periods: 9				
Protection of right to access the information — Role of the Supreme Court and High Courts — Recent attempts of dilution of the right to information Law										CO4
UNIT- V	Right to Information Act, 2005 and its relevance to other laws					Periods: 9				
Public Records Act, 1993, Whistle Blowers Protection Act, 2014, Official Secrets Act, 1923										CO5
Text Books

Evaluation methods

Assessment	Continuous Assessment Marks (CAM)			Total Marks
	Attendance	MCQ Test	Presentation / Activity / Assignment	
Marks	10	30`	60	100

Department	Artificial Intelligence and Data Science			Programme : B.Tech						
Semester	V			Course Category Code: HS		*End Semester Exam Type: TE				
Course Code	U23HSTC02	Periods/Week			Credit	Maximum Marks				
		L	T	P	C	CAM	ESE	TM		
Course Name	Research Methodology			2	-	-	2	25	75	100
Prerequisite	Nil									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Students will be able to explain the differences between various types of research and describe how different research methods are used to address engineering problems.							K2	
	CO2	Students will develop the ability to identify research problems, perform comprehensive literature reviews, and use various tools and services for effective information retrieval.							K2	
	CO3	Students will gain proficiency in designing experiments, analyzing data, and interpreting results using both numerical and graphical methods.							K4	
	CO4	Students will be able to apply ethical guidelines to structure and write research papers and dissertations, avoiding plagiarism.							K3	
	CO5	Students will understand the fundamentals of intellectual property rights, including how to protect and enforce them, which is crucial for innovation and entrepreneurship in engineering.							K3	
UNIT-I	Introduction to Research						Periods: 6			
Meaning and Importance of Research, Types of Research: Overview of Basic, Applied, and Developmental Research, Overview of the Research Process, Defining a Research Problem: Key Considerations, Setting Research Objectives and Research Questions, Introduction to Research Design: Basic Concepts, Approaches to Research: Quantitative vs. Qualitative.									CO1	
UNIT-II	Problem Formulation and Literature Review						Periods: 6			
Identifying and Formulating Research Problems, conducting a Literature Review: Essential Steps, Referencing and Citation Methods: Basic Techniques. Sources of Information: Overview of Libraries and Online Databases.									CO2	
UNIT-III	Research Methods and Data Analysis						Periods: 6			
Introduction to Experimental Research, Developing Hypotheses: Basic Approach. Data Collection Methods: Sampling and Surveys, Basics of Data Analysis: Numerical and Graphical Analysis, Introduction to Inferential Statistics.									CO3	
UNIT-IV	Writing and Presenting Research						Periods: 6			
Preparing a Research Report: Key Sections (Abstract, Introduction, Methodology, Results, Discussion, Conclusion). Referencing and Citation: Brief Overview.									CO4	
UNIT-V	Ethics and Legal aspects in research						Periods: 6			
Ethical Considerations in Research: Introduction to Scientific Misconduct. Basics of Intellectual Property Rights - Introduction to Patents, Copyrights, and Trademarks – Case studies on ethical dilemmas in research.									CO5	
Lecture Periods: 30		Tutorial Periods:		Practical Periods:		Total Periods: 30

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Programme: B.Tech.						
Semester	V			Course Category Code: PC		End Semester Exam Type: TE				
Course Code	U23ADT508			Periods/Week		Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM
Course Name	CLOUD COMPUTING AND DATA MANAGEMENT ARCHITECTURES			3	0	0	3	25	75	100
AI&DS										
Prerequisite	Database Technologies									
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)
	CO1	Interpret the concepts of Cloud Computing and realize it in real world								K2
	CO2	Describe and realize the virtualization techniques to scale up for resources								K2
	CO3	Apply various cloud technologies and advancements for their real-world scenarios								K3
	CO4	Interpret various types of data available in the real world and apply architecture based on the type of data								K2, K3
	CO5	Apply the perfect data management architecture for distributed architecture and cloud								K3
Unit-I	Introduction to Cloud Computing					Periods: 9				
Introduction to Cloud Computing – Definition of Cloud – Evolution of Cloud Computing –Underlying Principles of Parallel and Distributed Computing – Cloud Characteristics – Elasticity in Cloud – On-demand Provisioning.										CO1
UNIT-II	Cloud Enabling Technologies					Periods:9				
Service Oriented Architecture – REST and Systems of Systems – Web Services – Basics of Virtualization – Types of Virtualization – Implementation Levels of Virtualization – Virtualization Structures – Tools and Mechanisms – Virtualization of CPU –Memory – I/O Devices –Virtualization Support and Disaster Recovery										CO2
UNIT-III	Cloud Technologies and Advancements					Periods:9				
Hadoop–MapReduce–VirtualBox–Google App Engine–Programming Environment for Google App Engine–Open Stack –Federation in the Cloud– Four Levels of Federation –Federated Services and Applications Future of Federation.										CO3
UNIT-IV	Data Management Architectures					Periods:9				
Introduction to relational databases, -Database normalizations- Limitations of relational databases- Structured vs. Unstructured data- Design of MapReduce, Dataflow and Vertex-centric models for processing volume, velocity and linked datasets-Storing and querying over NoSQL datasets										CO4
UNIT-V	Applications of Architecture for Management					Periods:9				
Distributed Systems Architecture- Database Management Systems- Data Warehousing- Cloud Computing- Data Integration and Processing Pipelines- Data Indexing and Search- Data Visualization- Data Security and Privacy										CO5
Lecture Periods:45			Tutorial Periods:-		Practical Periods:-			TotalPeriods:45

Course Name	DEEP LEARNING			3	0	0	3	25	75	100	
AI&DS											
Prerequisite	Machine Learning										
Course Outcome	On completion of the course, the students will be able to									BT Mapping (Highest Level)	
	CO1	Interpret Neural Network basic Architecture and various Activation functions.									K2
	CO2	Interpret CNN and different Neural network model									K2
	CO3	Apply different optimization techniques to fine tune the deep learning models									K3
	CO4	Interpret various deep learning models and apply them for predicting next word, spelling correction									K2
	CO5	Interpret various deep reinforcement techniques for learning from feedback									K2
UNIT-I	Foundations of Neural Networks						Periods: 9				
Neural Networks: The Biological Neuron-The Perceptron Multilayer Feed Forward Networks - Training Neural Networks: Backpropagation Learning Activation Functions: Linear Sigmoid Tanh - Hard Tanh Softmax -Rectified Linear Loss Functions: Loss Function Notation Loss Functions for Regression - Loss Functions for Classification Loss Functions for Reconstruction Hyperparameters: Learning Rate Momentum - Sparsity-Understanding Convolutions.										CO1	
UNIT-II	Convolutional Neural Network						Periods:9				
CNN Building Blocks: Layer Type Convolutional Layer - Activation Layer - Pooling Layer - Fully Connected Layer -Batch Normalization Dropout Common architecture and Training Pattern LeNet-5 - AlexNet VGG16 net - ResNet.										CO2	
UNIT-III	Regularization and Optimization						Periods:9				
Regularization Dropout Regularization Normalizing Inputs- Bootstrap Aggregating (Bagging)- Dropout- Pros and Cons- Multitask Learning- Data Augmentation- Adversarial Training- Vanishing / Exploding Gradients - Weight Initialization Numerical Approximation of Gradients-Gradient Checking. Gradient Descent and its Types- Mini-batch Gradient Descent-Exponentially Weighted Averages-Bias Correction in Exponentially Weighted Averages-Gradient Descent with Momentum- Optimizers:AdaGrad-RMSProp-Adam- optimizer selection.										CO3	
UNIT-IV	Recurrent Neural Network						Periods:9				
Building and improving Feed Forward Language Model - RNN - Bidirectional RNN - LSTM-GRU - Seq2Seq paradigm – multilength - Seq2Seq.										CO4	
UNIT-V	Deep Reinforcement Learning						Periods:9				
Value iteration Q Learning Basic Deep Q Learning Policy gradient method actor critic method - Experience replay - Basic autoencoding convolutional autoencoding - variational autoencoding - Generative Adversarial Network (GAN).										CO5

Department	Artificial Intelligence and Data Science				Programme: B.Tech.						
Semester	V				Course Category Code: PC		End Semester Exam Type: TE				
Course Code	U23ADT510				Periods/Week		Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM
Course Name	DATA VISUALIZATION				3	0	0	3	25	75	100
AI&DS											
Prerequisite	Python, Excel and Data Science										
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Interpret various charts used and apply them according to the problem given								K2, K3	
	CO2	Describe various features used in seaborn and Bokeh and apply them for data visualization								K2, K3	
	CO3	Interpret how the data can be visualized using Tableau								K2	
	CO4	Customize and fine tune map aesthetics using Tableau								K3	
	CO5	Apply Power BI basics for generating interactive reports effectively								K3	
UNIT-I	Introduction to Visualization						Periods: 9				
Introduction to data visualization - Importance of data visualization - data wrangling - tools and libraries for visualization - types of data – Plots – line - bar - relation – scatter – bubble – heatmap – pie - Stacked Bar Chart - Venn diagram – histogram - box plot – geo plot.										CO1	
UNIT-II	Seaborn and Bokeh						Periods:9				
Seaborn: Introduction - Controlling Figure Aesthetics - Seaborn Figure Styles -Removing Axes Spines - Colour Palettes - Kernel Density Estimation - Plotting Bivariate Distributions -Pairwise Relationships - Violin Plots - Multi-Plots in Seaborn - Facet Grid - Regression Plots. Bokeh: Introduction - Interfaces in Bokeh - Bokeh Server – Presentation – Integrating - Design - Principles of Geoplotlib - Geospatial Visualizations.										CO2	
UNIT-III	Visualization using Tableau						Periods:9				
Connecting to data source – Creating Univariate Charts: Tables – Bar graphs – Pie charts – Sorting the graphs – Histograms – Line Charts – Using the Show Me toolbar – Stacked Bar Graphs – Box Plots –Showing Aggregate Measures. Creating Bivariate Charts: Tables – Scatter Plots – Swapping Rows and Columns – Adding trend lines – Selecting color Palettes – Using dates. Creating Multivariate Charts –Acets – Area Charts – Bullet Graphs – dual axes charts – Gantt charts – heat maps.										CO3	
UNIT-IV	Maps using Tableau						Periods:9				
Introduction to Maps - Setting Geographic Roles – Placing marks on a Map – Overlaying Demographic data – Creating choropleth Maps – Using polygon shapes – Customizing Maps – Creating Dashboards – Creating Storyboard.										CO4	
UNIT-V	Power BI						Periods:9				
Power BI – Creating Power BI Reports – Auto Filters – Report Visualization and Properties – Chart and map Report Properties – hierarchies and Drilldown reports – Power Query and M Language – DAX Expressions - Data modelling – Data Transformation - Power BI Deployment and Cloud – PowerBI Cloud Operations – Improving Power BI Reports – Power BI Integration Elements. Semester	V	Course Category Code: PC				End Semester Exam Type: LE		
Course Code	U23ADP507	Periods / Week			Credit	Maximum Marks		
Course Name	CLOUD COMPUTING AND DATA MANAGEMENT ARCHITECTURES LABORATORY	L	T	P	C	CAM	ESE	TM
		0	0	2	1	50	50	100

AI&DS

Prerequisite	Database Technologies							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Configure various virtualization tools such as Virtual Box, VMware workstation						K3
	CO2	Simulate a cloud environment to implement new schedulers.						K3
	CO3	Set up multi-node Hadoop Clusters.						K3
	CO4	Apply Map Reduce algorithms for various algorithms						K3
	CO5	Apply instructed data processing using NoSQL and data processing using R programming						K3

List of Experiments

1. Create a Collaborative learning environment for a particular learning topic using Google Apps. Drive, Google Docs and Google Slides must be used for hosting e-books, important articles and presentations respectively.
2. Install Virtual box and create a windows/linux virtual image and analyze the virtual configuration.
3. Install Google App Engine. Create hello world app and other simple web applications using python/java
4. Find a procedure to transfer the files from one virtual machine to another virtual machine.
5. Installation, Configuration, and Running of Hadoop and HDFS
6. Create a application for Page Rank Computation
7. Develop a MapReduce program to find the maximum temperature in each year
8. Develop a Java application to find the maximum temperature using Spark
9. Unstructured data into NoSQL data and do all operations such as NoSQL query with API.
10. Application to adjust the Number of Bins in the Histogram using R Language

AI&DS												
Prerequisite	Machine Learning											
Course Outcomes	On completion of the course, the students will be able to											BT Mapping (Highest Level)
	CO1	Apply neural network techniques to develop and implement simple feedforward neural networks for basic classification tasks.										K3
	CO2	Utilize convolutional neural networks (CNN) to build deep learning models capable of classifying images										K3
	CO3	Implement recurrent neural networks (RNN) and LSTM models to predict time series data										K3
	CO4	Apply generative and transfer learning techniques to create artistic outputs										K3
	CO5	Apply deep learning architectures like RNNs, LSTMs, and CNN for developing AI models for domain-specific applications.										K3
List of Experiments												
1. Build a simple Neural Network. 2. Build a deep learning model to Classify cat and dog using CNN 3. Build a deep learning model to predict Stock Prices using Recurrent Neural Network 4. Build a deep learning model to Forecast Sales using LSTM 5. Build a deep learning model to predict Movie box office using GRU model 6. Build a deep learning model to predict Sports result Prediction using RNN and LSTM 7. Build a deep learning model to predict cardiovascular disease using ANN 8. Build a deep learning model to create an art using Style Transfer technique 9. Build a deep learning model to a identify traffic signs from the image 10. Build a deep learning model for Fashion Recommendation System

					L	T	P	C	CAM	ESE	TM	
Course Name	DATA VISUALIZATION LABORATORY				0	0	2	1	50	50	100	
AI&DS												
Prerequisite	Python and Excel											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Apply data visualization techniques using Python libraries (Matplotlib, Seaborn) to create graphs									K3	
	CO2	Implement advanced visualization methods in Python to generate histograms, box plots, and density plots for interpreting complex data like rainfall, apartment price distributions, and tips.									K3	
	CO3	Develop interactive visualizations using Bokeh for in-depth analysis of financial, demographic, and market datasets									K3	
	CO4	Apply Tableau to create complex data visualizations for analyzing stock markets, government budgets, and demographic structures.									K3	
	CO5	Apply Power BI dashboards to present insights on population data, business trends, and geographic distributions.									K3	
List of Experiments 1. Create a bar graph and analyze on different social media platforms over the past month using Python. 2. Create a pie chart to split the equal halves of Demographic analysis using Python. 3. Create a line graph showing a diabetes using Seaborn. 4. Display a Dot Chart in Titanic dataset using Seaborn. 5. Create a Histogram and analyze a rainfall over month using Seaborn. 6. Create a Box Plots and analyze a Tips dataset using Bokeh. 7. Create a Density Plot and evaluate a Price distribution of Apartment in Airbnb Apartments using Bokeh. 8. Build a Scatter Plot and analyze a financial status of bank over the past month using Bokeh. 9. Create a Chart Tables in Government Budget using Tableau. 10. Create a Heat Map in Stock Market using Tableau. 11. Build a Population Pyramid in Tableau. 12. Create maps using Power BI. 13. Build a Web Analytics Dashboard using Power BI.

				L	T	P	C	CAM	ESE	TM
Course Name	TEXT MINING AND SENTIMENT ANALYSIS			3	0	0	3	25	75	100
AI&DS										
Prerequisite	Data Science, Natural Language Processing (NLP)									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Understand and apply key text mining techniques for extracting useful information from unstructured text							K2	
	CO2	Design sentiment analysis using both lexicon-based and machine learning-based approaches							K2	
	CO3	Implement machine learning models for text classification and sentiment analysis							K3	
	CO4	identify various libraries and frameworks used in text processing and sentiment analysis							K2	
	CO5	Apply advanced text mining techniques to solve real-world problems							K3	
UNIT – I	Introduction to Text Mining and Text Preprocessing					Periods:9				
Introduction to Text Mining - Importance, challenges and Applications of text mining - Introduction to NLP and its role in text mining – Text Preprocessing - Tokenization, stemming, and lemmatization - Stop word removal, text normalization and case folding - Part -of-Speech (POS) tagging, Named Entity Recognition (NER) - Text Cleaning: Removing noise, special characters, punctuation, and unnecessary symbols.										CO1
UNIT – II	Text Representation and Feature Extraction					Periods:9				
Text Representation Models - Bag-of-Words (BoW) model: Construction and limitations - Term Frequency - Inverse Document Frequency (TF-IDF) - Word Embeddings - Introduction to Word2Vec - Differences between traditional BoW / TF- IDF and Word Embeddings - Sentence Embeddings - N-grams (bigrams, trigrams) and their significance - Dimensionality reduction techniques – PCA and LDA.										CO2
UNIT – III	Text Classification and Topic Modelling					Periods:9				
Supervised Learning for Text Classification - Machine learning algorithms for text classification (Naïve Bayes, Support Vector Machines, Logistic Regression) - Latent Dirichlet Allocation (LDA) for topic modelling - Identifying hidden topics in text data - Deep Learning for Text Classification - Handling Imbalanced Text Datasets.										CO3
UNIT – IV	Introduction to Sentiment Analysis					Periods:9				
Overview of Sentiment Analysis - applications, and challenges in sentiment analysis - Types of sentiment - Lexicon-Based Sentiment Analysis - Sentiment lexicons: SentiWordNet - Rule-based sentiment analysis techniques - Sentiment Analysis Tools - Evaluation Metrics										CO4
UNIT – V	Machine Learning - Based Sentiment Analysis					Periods:9				
Supervised Machine Learning for Sentiment Analysis - Training machine learning models for sentiment analysis - Deep learning approaches to sentiment analysis. Aspect-Based Sentiment Analysis (ABSA) - Analyzing sentiments toward specific aspects of a product or service - Multilingual Sentiment Analysis - Real-World Applications of Sentiment Analysis										CO5

Course Name	USER EXPERIENCE DESIGN			3	0	0	3	25	75	100
AI&DS										
Prerequisite	Software Engineering, Aesthetic sense									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Interpret and apply the fundamental principles of user experience design to create user-centric digital products.							K2, K3	
	CO2	Conduct effective user research, develop user personas, and utilize usability testing to inform design decisions.							K3	
	CO3	Employ design thinking and strategy to align user needs with business goals, demonstrating the ability to develop a comprehensive UX strategy.							K3	
	CO4	Implement interaction design principles across various devices and platforms, ensuring accessible and inclusive design practices.							K3	
	CO5	Evaluate user experience through appropriate metrics and KPIs, employing an iterative design process for continuous improvement and user feedback integration.							K3	
UNIT – I	Introduction to User Experience Design					Periods:9				
Principles of UX design - Importance of user-centric design - Overview of UX design process - Role of UX in product development- Accessibility in UX Design- Ethical Considerations in UX Design-Human-Computer Interaction (HCI)- Industry Trends and Future Directions.										CO1
UNIT – II	Research in UX Design					Periods:9				
Research in Design - Techniques for user research - Developing user personas - Conducting usability testing - Analyzing research data for design insights-Developing a Research Plan- Data Collection and Analysis- Synthesizing Research Findings- Applying Research to Design- Tools and Resources.										CO2
UNIT – III	Design Thinking and Strategy					Periods:9				
Fundamentals of design thinking - Frameworks for UX strategy - Aligning business goals with user needs - Case studies on successful UX strategies- The Design Thinking Process, Design Thinking Tools and Techniques- Strategic Design Thinking- Implementation and Scaling- Ethical Considerations in Design Thinking.										CO3
UNIT – IV	Interaction Design					Periods:9				
Principles of interaction design - Designing for different devices and platforms - Prototyping methods - Accessibility and inclusive design- Prototyping and Wireframing- Usability Testing, Responsive and Adaptive Design- Advanced Interaction Techniques- Accessibility and Inclusive Design- Design Systems and Style.										CO4
UNIT – V	UX Evaluation					Periods:9				
Methods for evaluating user experience - Metrics and KPIs for UX - Iterative design process - Implementing feedback and continuous improvement- Usability Testing, Analytics and Metrics- User Feedback and Support, Accessibility Evaluation- Integrating Evaluation into the Design Process- Case Studies and Real-World Applications.										CO5

					L	T	P	C	CAM	ESE	TM	
Course Name	JAVA PROGRAMMING: ESSENTIAL CONCEPTS TO ADVANCED MASTERY				3	0	0	3	25	75	100	
AI&DS												
Prerequisite	Basic understanding of Java programming, Concepts of object-oriented Programming, web development basics, database fundamentals											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Implementing Java collections to manage and solve data-related problems.										K3
	CO2	Interpret unit testing and mocking techniques to assess and ensure code quality.										K2
	CO3	Apply JDBC to interact with and manage relational databases through SQL queries.										K3
	CO4	Apply various techniques to create web applications for handling requests, sessions, and data presentation.										K3
	CO5	Implement AJAX to improve web application performance through asynchronous data loading and interactions.										K3
UNIT- I	Java Collections Framework							Periods: 9				
List Interface: Dynamic User Profile Management – Sorted Interface: Leaderboard Rankings – Queue Interface: Task Scheduling System – Dequeue Interface: Undo/Redo Functionality - Map Interface: User Authentication Caching using HashMap – Set Interface: Adding an Elements to a HashSet of Integers.										CO1		
UNIT- II	Java Testing Frameworks							Periods: 9				
Introduction to JUnit: Overview and purpose of JUnit in unit testing - JUnit Features: Key features and functionalities - JUnit with Eclipse: Setting up and using JUnit in the Eclipse IDE - Assert Methods and Annotations: Common assert methods and annotations in Junit - Test Suite: Creating and managing test suites - Introduction to Mockito: Mockito for mocking objects in tests with Real-Time Examples.										CO2		
UNIT- III	Database Management and SQL with JDBC							Periods: 9				
Introduction to RDBMS: Basics of relational database management systems - Oracle 11g Introduction: Key features and functionalities of Oracle 11g - SQL Statements: Select Statement - Restricting and Sorting Data - DML (Data Manipulation Language) - DDL (Data Definition Language) - Introduction to JDBC: Establishing Connection - Executing Queries and Processing Results - Using Prepared Statements - Using Meta Data Objects - Using Callable Statements and Transactions.										CO3		
UNIT- IV	Web Development with Servlets and JSP							Periods: 9				
Introduction to Servlets: Basics of servlet technology and lifecycle - Servlets Get and Post Requests: Handling GET and POST requests in servlets - Servlets Config and Context: Configuration and context handling in servlets - Servlets Cookies and Session Management: Managing cookies and sessions in servlets - Introduction to JSP (Java Server Pages): Basics of JSP - JavaBeans in JSP: Using JavaBeans in JSP for encapsulating data.										CO4		
UNIT- V	Mastering AJAX: Asynchronous Data Loading and Integration							Periods: 9				
Introduction to AJAX: Overview of AJAX and its benefits - How AJAX Works: Mechanisms of asynchronous data loading - AJAX Application: Practical uses of AJAX in web applications - AJAX Database Application: Implementing AJAX for interacting with databases.										CO5		
Lecture Periods: 45		Tutorial Periods:-		Practical Periods:-		Total Periods: 45

	CO1	Interpret the need of exploratory data analysis								K2
	CO2	Identify the usage of various python libraries and functions for EDA								K2
	CO3	Apply univariate data exploration and analysis for EDA								K3
	CO4	Apply bivariate data exploration and analysis for EDA								K3
	CO5	Identify various techniques needed for time series analysis								K2
UNIT-I	Introduction to Exploratory Data Analysis						Periods: 9			
EDA fundamentals – Understanding data science – Significance of EDA – Making sense of data – Comparing EDA with classical and Bayesian analysis – Software tools for EDA - Visual Aids for EDA- Data transformation techniques-merging database, reshaping and pivoting, Transformation techniques.										CO1
UNIT-II	EDA Using Python						Periods:9			
Data Manipulation using Pandas – Pandas Objects – Data Indexing and Selection – Operating on Data – Handling Missing Data – Hierarchical Indexing – Combining datasets – Concat, Append, Merge and Join – Aggregation and grouping – Pivot Tables – Vectorized String Operations.										CO2
UNIT-III	Univariate Analysis						Periods:9			
Introduction to Single variable: Distribution Variables – Numerical Summaries of Level and Spread – Measures of Central Tendency – Measures of Spread – Shape of the Distribution – Data Visualization – Scaling and Standardizing – Inequality – Data Transformation – Univariate Analysis for Categorical Data.										CO3
UNIT-IV	Bivariate Analysis						Periods:9			
Relationships between Two Variables – Percentage Tables – Analyzing Contingency Table – Handling Several Batches – Scatterplots and Resistant Lines – Bivariate Analysis Methods – types – Non-Linear Relationships – Cross-Tabulation and Chi-Square Test.										CO4
UNIT-V	Multivariate and Time Series Analysis						Periods:9			
Introducing a Third Variable – Causal Explanations – Three-Variable Contingency Tables and Beyond – Fundamentals of TSA – Characteristics of time series data – Data Cleaning – Time based indexing – Visualizing – Grouping – Resampling.										CO5
Lecture Periods:45			Tutorial Periods:-		Practical Periods:-			TotalPeriods:45

Course Code	U23ADE509			Periods/Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	DESIGNING MACHINE LEARNING SYSTEMS			3	0	0	3	25	75	100	
AI&DS											
Prerequisite	Basic understanding of machine learning concepts and Proficiency in Python programming										
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Interpret the fundamental components and design principles of machine learning systems.								K2	
	CO2	Interpret effective data preprocessing and feature engineering techniques.								K2	
	CO3	Deploy machine learning models to production environments and monitor system performance.								K3	
	CO4	Deploy machine learning models with appropriate evaluation metrics.								K3	
	CO5	Optimize, maintain, and scale machine learning systems, culminating in a capstone project.								K3	
UNIT-I		Introduction to Machine Learning Systems Design					Periods: 9				
Overview of machine learning systems- Fundamentals of Machine Learning Systems- Key Components of ML Systems- ML System Design Principles- Case Studies: Successful ML Systems										CO1	
UNIT-II		Data Management and Feature Engineering					Periods:9				
Data Collection: Data types, sources, and formats - Data storage solutions: relational databases, data lakes, and warehouses- Data Preprocessing for ML Systems: Dimensionality reduction techniques (PCA, t-SNE), Data augmentation techniques - Feature Engineering and transformation: Feature extraction and selection- Dealing with categorical vs. numerical features- Scaling, normalization, and encoding -Data Pipelines for ML										CO2	
UNIT-III		Model Building and Training					Periods:9				
Model Architectures and Algorithms: Overview of different ML models (regression, decision trees, neural networks)- choosing the right mode l- Model Training and Hyperparameter Tuning: Training process overview-Grid search, random search, and advanced tuning techniques-Cross-validation techniques- Handling Overfitting and Underfitting: Regularization techniques (L1, L2)- Early stopping, dropout, and data augmentation										CO3	
UNIT-IV		Model Evaluation and Deployment					Periods:9				
Model Evaluation Metrics: Regression & classification- Model Validation and Testing: Train-test split, K-fold cross-validation- Model generalization and robustness- Model Deployment Pipelines: Preparing models for production- ML deployment tools and frameworks (Docker, Kubernetes, TensorFlow Serving										CO4	
UNIT-V		Monitoring, Optimization, and Scaling					Periods:9				
Post-Deployment Monitoring- Scaling Machine Learning Systems: Distributed training and inference-Cloud-based ML platforms (AWS, GCP, Azure)- Optimization Techniques: Performance optimization (batch processing, memory management) - Latency and throughput optimization										CO5

		L	T	P	C	CAM	ESE	TM
Course Name	MICRO PROJECT	0	0	2	1	100	-	100

AI & DS

Prerequisite	Artificial Intelligence, Machine Learning, Deep Learning, Programming in C, Python, Java							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Identify the problem statement for the micro project work through the literature survey						K2
	CO2	Choose the proper components as per the requirements of the design/ system.						K2
	CO3	Apply the acquainted skills to develop final model/system						K3

There shall be a Micro Project, which the student shall pursue as a team consists of maximum 4 students during the third year, fifth semester. The aim of the micro project is that the student has to understand the real time hardware / software applications. The student should gain a thorough knowledge in the problem he/she has selected and in the hardware / software he/she using in the Project. The Micro-project is an application that should be formally initiated and should be developed and also to be implemented by the respective team.

The Micro Project shall be submitted in a report form along with the hardware model / software developed, duly approved by the department internal evaluation committee. It shall be evaluated for 100 marks as Continuous Assessment. The department internal evaluation committee shall consist of faculty coordinator, supervisor of the project and a senior faculty member of the department. There shall be two reviews that will be considered for assessing a Micro Project work with weightage as indicated evaluation Methods.

		L	T	P	C	CAM	ESE	TM
Course Name	CERTIFICATION COURSE - V	0	0	4	-	100	-	100

Prerequisite	-
--------------	---

Students shall choose an International / Reputed organization certification course of 40-50 hours duration specified in the curriculum (It is mandatory to do a minimum of six courses) which will be offered through the Centre of Excellence. These courses have no credit and will not be considered for CGPA calculation.

- (i) Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.
- (ii) The Course coordinator handling the course will assess the student through attendance and MCQ test, and declare the student as “pass” on satisfactory completion. A letter grade “P” is awarded to declare pass.
- (iii) The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Programme: B.Tech.							
Semester	VI			Course Category Code: PC			End Semester Exam Type: TE				
Course Code	U23ADTC02			Periods/Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	NLP AND CHATBOT			3	0	0	3	25	75	100	
Common to AI & DS, CSE & BS											
Prerequisite	Machine Learning, Deep Learning and Programming in Python										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Interpret fundamental concepts of NLP and apply them for text processing								K2	
	CO2	Apply different parsing techniques for syntactic and semantic analysis								K3	
	CO3	Apply machine translation techniques for summarizing text and question answering.								K3	
	CO4	Understand the structure and technology behind human-computer conversations for building chatbots								K2	
	CO5	Determine various techniques to build a conversational interface								K3	
UNIT-I	Introduction						Periods: 9				
Introduction to NLP – NLP preprocessing steps – NLP Feature Engineering - Words - Structure - spellcheck, morphology using FSTs - Semantics - Lexical Semantics, word count vector, WordNet and WordNet based similarity measures, Distributional measures of similarity, Concept Mining - Word Sense Disambiguation - supervised, unsupervised and semi-supervised approaches - Parts of Speech.									CO1		
UNIT-II	Language Modelling						Periods:9				
Sentences - Basic ideas in compositional semantics, Classical Parsing – different types of parsing - Bottom up, top down, Dynamic Programming - Parsing using Probabilistic Context Free Grammars and Expectation - Maximization based approaches for learning PCFG parameters. Language Modelling.									CO2		
UNIT-III	Machine Translation						Periods:9				
Machine Translation - rule-based techniques, Statistical Machine Translation, parameter learning using Expectation - Maximization - Information Extraction - Introduction to Named Entity Recognition and Relation Extraction - Natural Language Generation - the potential of using ML - Advanced Language Modelling – Applications - summarization, question answering.									CO3		
UNIT-IV	Chatbot						Periods:9				
Chatbot – Design of a Chatbot - Introduction to Conversational Interface - Preliminaries, developing a speech based Conversational Interface, Conversational Interface and devices - Technology of Conversation: Introduction - Conversation as Action - The structure of Conversation - The language of Conversation.									CO4		
UNIT-V	Conversational Interface						Periods:9				
Developing a Speech-Based Conversational Interface - Implementing Text to Speech - Text Analysis - Wave Synthesis - Implementing Speech Recognition - Language Model, Acoustic Model - Decoding - Speech Synthesis Mark-up Language - Advanced voice user interface design – Advanced Chatbots.									CO5		
Lecture Periods:45			Tutorial Periods:-			Practical Periods:-			TotalPeriods:45

AI & DS											
Prerequisite	Machine Learning										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Describe RPA, where it can be applied and how it's implemented								K2	
	CO2	Describe the different types of variables, Control Flow and data manipulation techniques.								K2	
	CO3	Identify and understand Image, Text and Data Tables Automation.								K2	
	CO4	Describe how to handle the User Events and various types of Exceptions and strategies.								K2	
	CO5	Examine the research areas in Artificial Intelligence with respect to RPA.								K3	
UNIT-I	Introduction To Robotic Process Automation						Periods: 9				
Scope and techniques of automation, Robotic process automation - What can RPA do?, Benefits of RPA, Components of RPA, RPA platforms, The future of automation.										CO1	
UNIT-II	RPA Basics						Periods:9				
History of Automation - What is RPA - RPA vs Automation - Processes & Flowcharts - Programming Constructs in RPA - What Processes can be Automated - Types of Bots - Workloads which can be automated - RPA Advanced Concepts - Standardization of processes - RPA Development methodologies - Difference from SDLC - Robotic control flow architecture - RPA business case - RPA Team - Process Design Document/Solution Design Document - Industries best suited for RPA - Risks & Challenges with RPA - RPA and emerging ecosystem.										CO2	
UNIT-III	UI Path Introduction and Exploration						Periods:9				
Introduction: Installing UiPath Studio community edition - The User Interface - Keyboard Shortcuts About Updating - About Automation Projects - Introduction to Automation Debugging - Managing Activation Packages - Reusing Automations Library - Installing the Chrome Extension – Variables - Control Flow - Data Manipulation - Recording and Advanced UI Interaction - Selectors.										CO3	
UNIT-IV	UI Path Advanced Automation						Periods:9				
Image, Text and Advanced Citrix Automation - Excel Data Tables and PDF - Email Automation -Debugging and Exception Handling - Project Organization. Orchestrator: Tenants – Authentication– Users – Roles – Robots – Environments - Queues and Transactions - Schedules.										CO4	
UNIT-V	Artificial Intelligence and RPA						Periods:9				
Research on application of RPA for Machine Learning, Agent awareness - Natural Language Processing - Computer Vision, etc, Case studies and projects on applying RPA for designing and developing robots for real-world problems.										CO5

Course Code	U23ADB602				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	BLOCKCHAIN AND CRYPTOGRAPHY				2	0	2	3	50	50	100	
AI & DS												
Prerequisite	Basic Networking Concepts and Good Mathematical Skills											
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)	
	CO1	Describe the use of distributed systems in blockchain technology and write smart contracts										K2
	CO2	Describe the technologies behind cryptocurrencies.										K2
	CO3	Acquire knowledge on standard algorithms used to provide confidentiality, integrity, and authenticity.										K2
	CO4	Apply and Implement the Blockchain Concepts and creating basic blocks, Markle tree, Crypto-currency Wallet.										K3
	CO5	Apply and implement the algorithms DES, RSA and Diffie-Hellman.										K3
UNIT-I	Introduction to Blockchain Technology						Periods: 10					
Distributed systems – The history of blockchain – CAP theorem and blockchain – Benefits and limitations of blockchain – Decentralization using blockchain - Methods of decentralization – Routes to decentralization-Consensus Algorithms. Smart Contract: History of Smart Contract – Ricardian contracts - The DAO.											CO1	
UNIT-II	Cryptocurrency (Bitcoin)						Periods: 10					
Bitcoin - Introduction – Transactions – Structure - Transactions types – The structure of a block– The genesis block – The bitcoin network– Wallets and its types– Bitcoin payments– Bitcoin investment and buying and selling bitcoins – Bitcoin installation – Bitcoin programming and the command-line interface – Bitcoin improvement proposals (BIPs).											CO2	
UNIT-III	Cryptography Techniques and Authentication Algorithms						Periods: 10					
Symmetric Key Encryption- Simple DES, Linear and Differential cryptanalysis, DES, Modes of operation, Triple DES, AES – Public Key Cryptography - Factorization problem and RSA, Diffie Hellman Key Exchange, Elliptic curve cryptography. Authentication Algorithms: Message Digest- SHA-1, MD5.											CO3	
UNIT-IV	Laboratory Exercises						Periods: 15					
- Creating Merkle tree - Creation of Block - Implementation of blockchain in Merkle Trees - Implementation of peer-to-peer network using block chain - Creating a Crypto-currency Wallet											CO4	
UNIT-V	Laboratory Exercises						Periods: 15					
- Implementation of the following cipher techniques to perform encryption and decryption: a) Caesar Cipher, b) Substitution Cipher, c) Hill Cipher. - Implementation of DES algorithm logic. - Implementation of RSA Encryption algorithm - Applythe Diffie-Hellman Key Exchange mechanism using HTML and JavaScript. Consider the end user as one of the parties (Alice) and the JavaScript application as other party (bob). - Applythe message digest of a text using the MD5 algorithm											CO5	
Lecture Periods: 30		Tutorial Periods:				Practical Periods:		30	Total Periods: 60

Course Code	U23ADP611				Periods / Week			Credit	Maximum Marks		
					L	T	P	C	CAM	ESE	TM
Course Name	ROBOTIC PROCESS AUTOMATION – UI PATH LABORATORY				0	0	2	1	50	50	100
AI & DS											
Prerequisite	UI Path Tools										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Implementation of RPA – UI path									K3
	CO2	Develop an application for web scraping, data mitigation and entry process.									K3
	CO3	Apply query processing in email and customer support emails.									K3
	CO4	Develop credit card applications.									K3
	CO5	Apply the automation process in excel and pdf.									K3
List of Exercises											
1. Extract data from Google Contacts using an API and store it in a structured file format (e.g., CSV, Excel). 2. Extract data from an Excel file based on specific conditions and store the results in a new Excel file. 3. Segregate emails based on email IDs and organize them into respective folders within Outlook using automation. 4. Extract data from various invoice documents, store the data in an Excel file, and automatically send an email to the specified email addresses. 5. Develop a system to send automated replies to emails that contain specific text in the subject line. 6. Automate the scheduling and processing of daily financial reports using UiPath to streamline reporting for a company. 7. Automate the approval process of corporate expense reports using UiPath to enhance efficiency in expense management. 8. Automate the process of credit card application processing, including validation and approval workflows, using UiPath. 9. Automate the calculation of employee payroll by extracting data from Excel sheets, applying business rules, and generating the final payroll. 10. Extract data from PDF invoices and automate the process of storing this information in an organized format (e.g., Excel) using UiPath.

Department	Computer Science and Engineering		Programme: B.Tech.							
Semester	III/ V		Course Category: PC			End Semester Exam Type: P				
Course Code	U23CSPC06		Periods/Week			Credit	Maximum Marks			
Course Name	WEB DESIGNING LABORATORY		L	T	P	C	CAM	ESE	TM	
			0	0	2	1	50	50	100	
(Common to CSE and AI&DS)										
Prerequisite	Basic knowledge in Programming and Database									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Construct and display webpage with HTML and CSS elements							K3	
	CO2	Implement JavaScript programming for website creation							K3	
	CO3	Design PHP Forms							K3	
	CO4	Implement Database connectivity using PHP							K3	
	CO5	Web hosting PHP applications.							K3	
List of Exercises										
1. (a) Design a home page which displays information about your college department using headings, HTML entities and paragraphs. (b) Create a webpage for any clinic using marquee and HTML formatting tags. 2. Design a timetable and display it in tabular format. 3. Design an admission form for any course in your college with text, password fields, drop-down list, checkboxes, radio buttons, submit and reset button etc. 4. Design a web page of your home town with an attractive background color, text color, an image, font face by using Inline CSS formatting. 5. (a) Design a web page by using different CSS border styles. (b) Demonstrate the use of CSS Box Model. 6. Write a JavaScript program to remove a character at the specified position of a given string and return the new string. 7. Develop and demonstrate a HTML file that includes JavaScript script for taking a number n as input using prompt and display first n Fibonacci numbers in a paragraph. 8. Design HTML form for keeping student record, apply JavaScript validation in it for restriction of mandatory fields, numeric field, email-address field, specific value in a field etc. 9. Write a program in PHP for processing a simple form (use controls like checkbox, radio buttons and options). 10. Write a program in PHP for a simple POST and GET functions 11. Design a login form using cookies, bootstrap, PHP, Database. 12. Design a student form with add, update, delete, display all and search option using student database.

				L	T	P	C	CAM	ESE	TM
Course Name	SPEECH PROCESSING AND ANALYTICS			3	0	0	3	25	75	100
AI & DS										
Prerequisite	Natural Language Processing									
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)
	CO1	Identify the different linguistic components of natural language								K2
	CO2	Interpret a morphological analyzer for a given natural language and apply it for analyzing speech effectively								K2
	CO3	Decide on the appropriate parsing techniques necessary for a given language and application								K2
	CO4	Apply new tag set and a tagger for a given natural language								K3
	CO5	Interpret various techniques in speech recognition and apply them for text to speech conversion								K2
UNIT-I	Speech Processing						Periods: 9			
Phonetics –Articulatory Phonetics -Phonological Categories -Acoustic Phonetics and Signals Speech Synthesis –Text Normalization –Phonetic and Acoustic Analysis -Diphone Waveform synthesis –Evaluation-Automatic Speech Recognition –Architecture -Hidden Markov Model to Speech -MFCC vectors -Acoustic Likelihood Computation -Evaluation. Triphones –Discriminative Training -Modeling Variation. Computational Phonology- Finite-State Phonology –Syllabification -Learning Phonology and Morphology										CO1
UNIT-II	Speech Analysis						Periods:9			
Features, Feature Extraction and Pattern Comparison Techniques: Speech distortion measures – mathematical and perceptual – Log Spectral Distance, Cepstral Distances, Weighted Cepstral Distances and Filtering, Likelihood Distortions, Spectral Distortion using a Warped Frequency Scale, LPC, PLP and MFCC Coefficients, Time Alignment and Normalization – Dynamic Time Warping, Multiple Time – Alignment Paths										CO2
UNIT-III	Speech Modeling						Periods:9			
Large Vocabulary Continuous Speech Recognition: Architecture of a large vocabulary continuous speech recognition system – acoustics and language models – n-grams, context dependent sub-word units, Applications and present status.										CO3
UNIT-IV	Speech Recognition						Periods:9			
Introduction, Homomorphic Systems for Convolution: Properties of the Complex Cepstrum, Computational Considerations, The Complex Cepstrum of Speech, Pitch Detection, Formant Estimation, The Homomorphic Vocoder.										CO4
UNIT-V	Speech Synthesis						Periods:9			
Text-to-Speech Synthesis: Concatenative and waveform synthesis methods, sub-word units for TTS, intelligibility and naturalness – role of prosody, Applications and present status.										CO5
Lecture Periods:45			Tutorial Periods:-		Practical Periods:-			TotalPeriods:45

Semester	VIII/VI				Course Category Code: PE		*End Semester Exam Type: TE					
Course Code	U23ITEC05				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	Augmented Reality and Virtual Reality				3	0	0	3	25	75	100	
(Common to IT, AIDS and ECE)												
Prerequisite	Computer Graphics											
Course Outcome	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand the fundamentals of Virtual reality									K2	
	CO2	Explain the concepts of motion and tracking in VR systems									K2	
	CO3	Describe the importance of interaction and audio in VR systems									K2	
	CO4	Understand and work on Augmented Reality environment									K2	
	CO5	Explore the application area of augmented and virtual reality									K3	
Unit- I	Introduction							Periods: 09				
Definition - History - Bird's-Eye View - The Geometry of Virtual Worlds - Geometric Models - Changing Position and Orientation - Axis-Angle Representations of Rotation - Viewing Transformations - Chaining the Transformations - Human Eye - The Physiology of Human Vision : Eye movements - Implications for VR.										CO1		
Unit- II	Visual Perception & Rendering							Periods: 09				
Visual Perception - Visual Rendering - Ray Tracing and Shading Models – Rasterization - Correcting Optical distortions - Improving Latency and Frame Rates - Motion in Real and Virtual Worlds – Tracking - Tracking 2D & 3D Orientation, Tracking Position and Orientation, Tracking Attached Bodies.										CO2		
Unit- III	Interaction & Audio							Periods: 09				
Interaction - Motor Programs and Remapping – Locomotion – Manipulation - Social Interaction - Audio - The Physics of Sound - The Physiology of Human Hearing - Auditory Perception – Auditory Rendering - Case Studies: Side effects of using VR systems/ VR sickness										CO3		
Unit- IV	Fundamentals of AR							Periods: 09				
Introduction to Augmented Reality – Origin of AR – Definition - The Relationship Between Augmented Reality and Other Technologies – AR Concepts – AR Content – Interaction – Mobile AR.										CO4		
Unit- V	Applications of Augmented and Virtual Reality							Periods: 09				
Applications - Gaming and Entertainment - Science and Engineering - Health and Medicine - Aerospace and Defence – Education.										CO5

				L	T	P	C	CAM	ESE	TM	
Course Name	ADVANCED JAVA PROGRAMMING			3	0	0	3	25	75	100	
AI & DS											
Prerequisite	Fundamentals of Java Programming, Web Technology										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Interpret and apply the concepts of Java utility packages to create data structures								K2	
	CO2	Apply proficiency in data structures using Java Collection Framework								K3	
	CO3	Apply Spring framework in Java for building enterprise Java Applications and auto configure it using YAML								K3	
	CO4	Interpret various Spring Databases to handle databases at the backend								K2	
	CO5	Interpret how microservices are helpful in communication using API								K2	
UNIT-I	Java Utility Package						Periods: 9				
Introduction to java utility package – Array list – List Interface – HashMap Interface – Set Interface – Queue Interface – Dequeue Interface – Key classes – Utility classes									CO1		
UNIT-II	Java Collection Framework						Periods: 9				
Data Augmentation using java collection – linked list – queue – stack – graph – tree – stream API and Functional Programming: Introduction to Streams - Functional Interfaces and Lambda Expression - Optional Class									CO2		
UNIT-III	Spring Framework						Periods: 9				
Introduction to spring – bean – dependency injection – inversion of control – bean factory – application context – concepts of auto configuration – properties – yaml									CO3		
UNIT-IV	Spring Databases						Periods: 9				
Introduction to spring data – Spring databases – Spring data access - Spring data access– Spring data JPA – MongoDB – spring data JDBC – Spring Boot Integration – Spring Data REST – Spring AOP									CO4		
UNIT-V	Microservices in Java						Periods: 9				
Microservices: spring cloud gateway – spring cloud circuit breakers – Open Feign – spring cloud sleuth – Microservices Patterns: aggregators – SAGA-CQRS-event sourcing – Rest API – HTTP method: post-get-put-delete-options-trace – HTTP status codes									CO5

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Programme: B.Tech.							
Semester	VI			Course Category Code: PE			End Semester Exam Type: TE				
Course Code	U23ADE612			Periods/Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	PREDICTIVE DATA ANALYTICS			3	0	0	3	25	75	100	
AI & DS											
Prerequisite	Mathematics and Statistics, Python or R, Problem solving skill, Data visualization										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Interpret basic principles of predictive analytics and apply it for building models and applications								K2	
	CO2	Differentiate various statistical methods used for prediction and evaluate model performance								K2	
	CO3	Apply classification methods for predictive modeling								K3	
	CO4	Apply Specialized Techniques to forecast future trends and feature engineering								K3	
	CO5	Apply Model Interpretability and Integration into Decision-Making								K3	
UNIT-I	Introduction to Predictive Analytics						Periods: 9				
The power of data: Transforming data into predictive insights - Applications of Predictive Analytics in business, finance, healthcare, and more - Understanding the Predictive Analytics workflow: Data exploration, model building, and evaluation Ethical considerations in using predictive models										CO1	
UNIT-II	Statistical Foundations for Prediction						Periods: 9				
Review of core statistical concepts: Descriptive statistics, hypothesis testing, correlation analysis - Introduction to Probability and Distributions: Understanding data variability for prediction - Linear Regression: Building the foundation for predictive modeling Evaluating Model Performance: Metrics like R-squared and Mean Squared Error										CO2	
UNIT-III	Classification for Predictive Modeling						Periods: 9				
Logistic Regression: Predicting binary outcomes (yes/no) - Classification Algorithms: Decision Trees, Support Vector Machines (SVM) for complex relationships - Model Selection and Regularization Techniques: Preventing overfitting for better predictions Ensemble Methods: Combining multiple models for improved accuracy										CO3	
UNIT-IV	Advanced Predictive Techniques						Periods: 9				
Time Series Analysis: Forecasting future trends based on historical data - Association Rule Learning: Identifying relationships between variables - Clustering for Segmentation: Grouping data points based on similarities for targeted predictions - Introduction to Feature Engineering: Transforming data for better model performance										CO4	
UNIT-V	Deployment and Impact of Predictive Models						Periods: 9				
Model Interpretability: Understanding how models make predictions - Model Monitoring and Evaluation: Ensuring model performance over time - Integrating Predictive Models into Decision Making Processes: Using insights for informed actions - The Future of Predictive Analytics: Exploring trends like Deep Learning and Explainable AI.										CO5

Semester	VI				Course Category Code: PE		End Semester Exam Type: TE				
Course Code	U23ADE613				Periods/Week		Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM
Course Name	ADVANCED NATURAL LANGUAGE PROCESSING				3	0	0	3	25	75	100
AI & DS											
Prerequisite	Python and Natural Language Processing										
Course Outcomes	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Describe the fundamentals of natural language processing and apply it for language modeling									K2
	CO2	Interpret various word level analysis for syntactic parsing									K2
	CO3	Interpret various techniques for handling word senses and semantics									K2
	CO4	Apply different and advanced techniques for handling discourses and Lexical Resources.									K3
	CO5	Interpret the modern NLP concepts and apply in it in building real time applications.									K2,K3
UNIT-I	Introduction							Periods: 9			
Origins and challenges of NLP – Language Modeling: Grammar-based LM, Statistical LM - Regular Expressions, Finite-State Automata – English Morphology, Transducers for lexicon and rules, Tokenization, Detecting and Correcting Spelling Errors, Minimum Edit Distance.											CO1
UNIT-II	Word Level Analysis							Periods:9			
Unsmoothed N-grams, Evaluating N-grams, Smoothing, Interpolation and Backoff – Word Classes, Part-of-Speech Tagging, Rule-based, Stochastic and Transformation-based tagging, Hidden Markov and Maximum Entropy models. syntactic analysis-Context-Free Grammars, Grammar rules for English, Dynamic Programming, Parsing – Shallow 85 parsing –PCFG, Probabilistic Lexicalized CFGs - Feature structures, Unification of feature structures.											CO2
UNIT-III	Semantics and Pragmatics							Periods:9			
Requirements for representation, First-Order Logic, Description Logics – Syntax-Driven Semantic analysis, Semantic attachments – Word Senses, Relations between Senses, Thematic Roles, selectional restrictions – Word Sense Disambiguation, WSD using Supervised, Dictionary & Thesaurus, Bootstrapping methods – Word Similarity using Thesaurus and Distributional methods.											CO3
UNIT-IV	Discourse Analysis and Lexical Resources							Periods:9			
Discourse segmentation, Coherence – Reference Phenomena, Anaphora Resolution using Hobbs and Centering Algorithm – Coreference Resolution – Resources: Porter Stemmer, Lemmatizer, Penn Treebank, Brill's Tagger, WordNet, PropBank, FrameNet, Brown Corpus, British National Corpus (BNC).											CO4
UNIT-V	Modern NLP							Periods:9			
Language encoding and decoding - Multilingual multimedia Encoding - Deep Neural Networks for NLP - Meta-learning for NLP - Joint Neural Networks For Information Extraction - Multilingual Information Extraction - Multimedia Information Extraction - Open DDomain Information Extraction - Schema Induction and Knowledge Acquisition - Misinformation detection - Question Answering - Natural Language Generation - Knowledge Controlled Language Generation.											CO5

		L	T	P	C	CAM	ESE	TM
Course Name	MINI PROJECT	0	0	2	1	100	-	100

AI & DS

Prerequisite	Artificial Intelligence, Machine Learning, Deep Learning, Programming in C, Python, Java							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Identify the problem statement for the mini project work through the literature survey						K2
	CO2	Choose the proper components as per the requirements of the design/ system.						K2
	CO3	Apply the acquainted skills to develop final model/system						K3

There shall be a Mini Project, which the student shall pursue as a team consists of maximum 4 students during the third year, fifth semester. The aim of the mini project is that the student has to understand the real time hardware / software applications. The student should gain a thorough knowledge in the problem he/she has selected and in the hardware / software he/she using in the Project. The Mini-project is an application that should be formally initiated and should be developed and also to be implemented by the respective team.

The Mini Project shall be submitted in a report form along with the hardware model / software developed, duly approved by the department internal evaluation committee. It shall be evaluated for 100 marks as Continuous Assessment. The department internal evaluation committee shall consist of faculty coordinator, supervisor of the project and a senior faculty member of the department. There shall be two reviews that will be considered for assessing a Mini Project work with weightage as indicated evaluation Methods.

Course Name	CERTIFICATION COURSE - VI	0	0	4	-	100	-	100

AI & DS

Prerequisite	-
--------------	---

Students shall choose an International / Reputed organization certification course of 40-50 hours duration specified in the curriculum (It is mandatory to do a minimum of six courses) which will be offered through the Centre of Excellence. These courses have no credit and will not be considered for CGPA calculation.

- (i) Certification Courses are required to be completed to fulfil the degree requirements. All Certification courses are assessed internally for 100 marks.
- (ii) The Course coordinator handling the course will assess the student through attendance and MCQ test, and declare the student as “pass” on satisfactory completion. A letter grade “P” is awarded to declare pass.
- (iii) The marks scored in these courses will not be taken into consideration for the SGPA / CGPA calculations in the grade sheet.

					L	T	P	C	CAM	ESE	TM	
Course Name	GENDER EQUALITY				2	0	0	-	100	-	100	
Prerequisite	-											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Describe the general identity, social construction of gender roles.									K2	
	CO2	Illustrate the causes and issues of gender discrimination in Indian society.									K2	
	CO3	Describe the workplace discrimination, media influences on gender and culture.									K2	
	CO4	Familiarize with international and Indian frameworks on gender equality.									K2	
	CO5	Illustrate the current challenges in gender equality, including the glass ceiling and the role of technology.									K2	
UNIT – I	Introduction to Gender Equality							Periods:06				
Gender equality – exploring gender identity and expression, Understanding the social construction of general roles and norms, historical perspectives on gender roles, Analyzing key milestones in the fight for gender equality.										CO1		
UNIT – II	Gender Inequality and Its Manifestations							Periods:06				
Gender discrimination in Indian society – causes of gender inequality – Illiteracy, patriarchal set up, lack of awareness, social beliefs, practice and custom – Issues of gender discrimination – Child marriage, child domestic work, poor education and health, violence and exploitation in workplace.										CO2		
UNIT – III	Gender and Culture							Periods:06				
Workplace discrimination, Media influences on gender and culture, Gender and power dynamics in society. Strategies for promoting gender equality and cultural understanding.										CO3		
UNIT – IV	Promoting Gender Equality							Periods:06				
Gender Equality and Human Rights – International frameworks and Conventions on Gender Equality – Equality under the Indian Constitution – Policies and initiatives for gender mainstreaming – Strategies for promoting Gender Equality in various contexts.										CO4		
UNIT – V	Contemporary Challenges and Future Directions							Periods:06				
Current challenges and emerging issues in gender equality – Glass ceiling – role of technology in continuing or challenging gender inequality – Exploring possibilities for transformative change and envisioning a gender-equal future.										CO5		
Lecture Periods: 30		Tutorial Periods: -			Practical Periods: -			Total Periods: 30				
Text Books												
1. "Gender and Society" by Raewyn Connell – This book provides a comprehensive overview of gender roles, power dynamics, and the social construction of gender. 2. "The Second Sex" by Simone de Beauvoir – A historical and philosophical examination of women's oppression and gender inequality. 3. "Women and Gender in the Indian Society" by Neera Desai and Usha Thakkar – Focuses on the context of gender roles, inequality, and feminist movements in India.

5.15/1

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Programme: B.Tech.						
Semester	VI			Course Category Code: PC			End Semester Exam Type: TE			
Course Code	U23ADT714			Periods/Week			Credit	Maximum Marks		
				L	T	P	C	CAM	ESE	TM
Course Name	IMAGE PROCESSING AND COMPUTER VISION			3	0	0	3	25	75	100
AI & DS										
Prerequisite	Artificial Intelligence, Quantum Mechanics									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Recognize and describe both the theoretical and practical aspects of computing with images.							K2	
	CO2	Explain object segmentation methods.							K2	
	CO3	Describe shape representation methods.							K2	
	CO4	Implement deep learning techniques for vision tasks.							K3	
	CO5	Apply emerging trends and advanced applications in computer vision.							K3	
UNIT-I	Foundations of Image Processing						Periods: 9			
Digital image representation (grayscale, RGB, HSV) – Sampling - quantization and color spaces – Histograms - point operations and contrast enhancement - Linear/non-linear filtering (Gaussian, median, bilateral).										CO1
UNIT-II	OBJECT SEGMENTATION						Periods:9			
Image smoothing - Edge Detectors – Scaling - Canny Edge Detector - Image Segmentation: Thresholding, Region-Based Segmentation – Contour Detection and Shape Analysis – Morphological Operations: Dilation, Erosion, Opening, Closing.										CO2
UNIT-III	Shape Representation						Periods:9			
Region identification - contour based shape representation - simple geometric border representation - Fourier transform of boundaries - region based shape representation - convex hull - region decomposition - region neighbourhood graphs.										CO3
UNIT-IV	Deep Learning for Computer Vision						Periods:9			
Deep Learning Frameworks (TensorFlow, PyTorch) – Autoencoders and GANs – Image Segmentation using Deep Learning (U-Net, Mask R-CNN) – Video Processing and Action Recognition – 3D Computer Vision – Face Detection and Recognition.										CO4
UNIT-V	Advanced Topics and Applications						Periods:9			
Explainable AI in Computer Vision – Vision Transformers (ViTs) – Augmented and Virtual Reality – Robotics and Autonomous Systems – Real-time Applications – Ethical Considerations and Bias in Computer Vision – Research Trends.										CO5
Lecture Periods:45		Tutorial Periods:-		Practical Periods:-			TotalPeriods:45

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science				Programme: B.Tech.							
Semester	VII				Course Category Code: PC			End Semester Exam Type: LE				
Course Code	U23ADP712				Periods / Week			Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM	
Course Name	INTELLIGENT SYSTEMS AND CONTROL LABORATORY				0	0	2	1	50	50	100	
AI & DS												
Prerequisite	Machine Intelligence											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Implement fundamental AI and ML algorithms for controlling a system									K3	
	CO2	Apply supervised and unsupervised learning techniques to solve real-world programs									K3	
	CO3	Optimize deep learning models for improved performance and efficiency									K4	
	CO4	Utilize natural language processing (NLP) tools for text analysis and language understanding									K3	
	CO5	Implement and simulate intelligent robotic systems for automated decision-making									K3	
List of Experiments												
1. Develop a fuzzy logic controller for a simple dynamic system.												
2. Train an artificial neural network (ANN) to approximate a nonlinear system												
3. Design and analyze a Proportional-Integral-Derivative (PID) controller for a DC motor.												
4. Implement an adaptive control system that adjusts parameters in real time.												
5. Use a genetic algorithm to optimize PID parameters for a given system.												
6. Develop a Q-learning algorithm for an autonomous agent in a simulated environment.												
7. Implement MPC for trajectory optimization in robotic control.												
8. Implement A* or Dijkstra’s algorithm for robot navigation.												
9. Use OpenCV and deep learning for real-time object detection in a robotic system.												
10. Simulate swarm intelligence (e.g., ant colony or particle swarm optimization) for collaborative robotics.

Department	Artificial Intelligence and Data Science		Name of the Programme: B.Tech							
Semester	VII		Course Category: PC			*End Semester Exam Type: LE				
Course Code	U23ADP713		Periods / Week			Credit	Maximum Marks			
			L	T	P	C	CAM	ESE	TM	
Course Name	IOT SYSTEMS AND ANALYTICS LABORATORY		0	0	2	1	50	50	100	
AI&DS										
Prerequisite	Basic knowledge of electronics, programming (C/C++ for Arduino, Python for Raspberry Pi)									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Implement the fundamentals of the Internet of Things (IoT) and its hardware and software components in a simple application							K3	
	CO2	Interface I/O devices, sensors, and communication modules with microcontrollers and microprocessors.							K3	
	CO3	Implement wireless communication between IoT devices for data exchange.							K3	
	CO4	Utilize cloud platforms to upload, retrieve, and analyze sensor data							K3	
	CO5	Develop an IoT-based real-time system integrating devices, gateways, and data management techniques.							K4	
List of Experiments										
1. Introduction to Arduino platform and programming 2. Interfacing of temperature sensor LM35 with Arduino. 3. Interfacing of the Active Buzzer with Arduino 4. Building Intrusion Detection System with Arduino and Ultrasonic Sensor. 5. Interfacing Arduino to Bluetooth Module. 6. Introduction to Raspberry PI platform and python programming 7. Interfacing sensors to Raspberry PI. 8. Communicate between Arduino and Raspberry PI using any wireless medium 9. Interface on Raspberry Pi to retrieve temperature and humidity data from thingspeak cloud. 10. Design a real time IOT based system.

Semester	VII			Course Category Code: PE			End Semester Exam Type: TE				
Course Code	U23ADE714			Periods/Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	AI ETHICS			3	0	0	3	25	75	100	
AI&DS											
Prerequisite	Basic understanding of AI, Basic knowledge of Ethics, Computer science and Engineering Fundamental, data science or data analytics knowledge, Social implication Knowledge										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Explain the ethical considerations in Artificial Intelligence (AI)								K2	
	CO2	Differentiate between human intelligence and machine intelligence.								K2	
	CO3	Describe privacy concerns related to AI applications								K2	
	CO4	Identify and explain bias in AI decision-making								K2	
	CO5	Apply ethical principles to assess the impact of AI in real-life scenarios.								K3	
UNIT- I	Introduction						Periods: 9				
The AI Hype and Fears – The Real and Pervasive Impact of AI – Ethical and Societal Problems – Superintelligence and Transhumanism – Frankenstein’s New Monster – Transcendence and the AI Apocalypse									CO1		
UNIT- II	AI and Humans						Periods:9				
Fundamental Differences between Humans and Machines – Modernity, Posthumanism, and Postphenomenology – Questioning the Moral Status of AI – Moral Agency – Moral Patency – Toward More Practical Ethical Issues									CO2		
UNIT- III	Privacy and the Other Usual Suspects						Periods:9				
Privacy and Data Protection – Manipulation, Exploitation, and Vulnerable Users – Negative use of AI – Safety and Security – Moral Responsibility – Transparency and Explainability									CO3		
UNIT- IV	Bias and Challenges of Policymakers						Periods:9				
Bias, Challenges, and Solutions – Future of Work and Life – Key Questions for Policymakers – Ethical Principles and Justifications – Technological Solutions and Implementation – Proactive and Practice-Oriented Ethics – Positive Ethics – Interdisciplinarity and Transdisciplinarity – Risk of AI Winter and Unregulated AI Use – Solutions for Bias Mitigation, Ethical AI Governance, and Sustainable AI Policies.									CO4		
UNIT- V	AI in Everyday Life						Periods:9				
The Integration of AI in Daily Activities - AI in Healthcare, Education, and Entertainment - The Role of AI in Consumer Behavior and Personalization - Ethical Concerns in Everyday AI Applications-The Future of AI in Personal Life and Society.									CO5

Semester	VIII				Course Category: PE		*End Semester Exam Type: TE					
Course Code	U23ADE715				Periods / Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	PROMPT ENGINEERING				3	0	0	3	25	75	100	
AI & DS												
Prerequisite	Strong understanding of Natural Language Processing, familiarity with Machine Learning models and techniques.											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Interpret the basic concepts and importance of prompt engineering, including various types of prompts and their applications.									K2	
	CO2	Apply skills in designing effective prompts with clear structure and contextual relevance, avoiding common pitfalls.									K3	
	CO3	Apply various metrics and feedback, and improve prompt effectiveness.									K3	
	CO4	Apply advanced techniques in prompt engineering for handling different types of prompts									K3	
	CO5	Apply prompt engineering concepts in various for building interactive systems.									K3	
UNIT-I	Introduction to Prompt Engineering						Periods: 9					
Introduction – Importance and Applications – Types of Prompts – Components of Effective Prompts – Challenges and Solutions – Case Studies in Prompt Engineering.										CO1		
UNIT-II	Designing Effective Prompts						Periods: 9					
Principles of Prompt Design – Structuring Prompts – Contextual Relevance – Clarity and Precision – Examples and Best Practices – Common Pitfalls and How to Avoid Them.										CO2		
UNIT-III	Evaluating Prompt Performance						Periods: 9					
Metrics for Prompt Effectiveness – User Feedback and Iteration – Testing and Validation Methods – Analyzing User Engagement – Improving Prompt Responsiveness – Tools for Evaluation and Optimization.										CO3		
UNIT-IV	Advanced Techniques in Prompt Engineering						Periods: 9					
Adaptive Prompting Techniques – Leveraging Machine Learning for Prompt Improvement – Multi-turn Prompts and Conversations – Personalization and Customization – Integrating Prompts with AI Systems – Ethical Considerations and Bias Mitigation.										CO4		
UNIT-V	Case Studies and Applications						Periods: 9					
Industry-Specific Prompt Engineering Applications – Healthcare, Finance, Education, and Customer Service – Building Interactive Systems with Prompts – Real-world Case Studies and Success Stories – Future Trends in Prompt Engineering – Capstone Project: Designing a Prompt System.										CO5

						L	T	P	C	CAM	ESE	TM
Course Name	CLOUD BASED MACHINE LEARNING PLATFORMS					3	0	0	3	25	75	100
AI & DS												
Prerequisite	Programming Skills (Python), Basics of Machine Learning, Cloud Computing basics											
Course Outcomes	On completion of the course, the students will be able to											BT Mapping (Highest Level)
	CO1	Describe the basics of cloud computing and its role in machine learning.										K2
	CO2	Describe the fundamental cloud-based machine learning platforms and tools.										K2
	CO3	Apply cloud-based machine learning models using AWS, Google Cloud, and Azure.										K3
	CO4	Deploy and manage machine learning models on cloud platforms.										K3
	CO5	Implement a cloud-based ML project with real-world applications.										K3
UNIT-I	Introduction to Cloud and Machine Learning							Periods: 9				
Basics of Cloud Computing – Why use Cloud for Machine Learning? – Introduction to Cloud Services (AWS, Google Cloud, Azure) – Basics of Machine Learning (Supervised, Unsupervised, Deep Learning) – Setting up a Cloud ML environment.											CO1	
UNIT-II	Building Machine Learning Models on Cloud							Periods: 9				
Uploading and Managing Data on the Cloud – Training Simple ML Models using Cloud Tools (Google Colab, AWS SageMaker, Azure ML) – AutoML: Training Models Without Coding – Understanding Cloud Storage and Databases.											CO2	
UNIT-III	Cloud-Based ML Platforms							Periods: 9				
Overview of AWS, Google Cloud, and Azure ML Services – Hands-on with Google Vertex AI and AWS SageMaker – Running Jupyter Notebooks on the Cloud – Introduction to Cloud AI APIs (Vision, Speech, Translation).											CO3	
UNIT-IV	Deploying and Using ML Models on Cloud							Periods: 9				
Model Deployment – Deploying ML Models on Google Cloud and AWS – Using Pre-trained AI Models – Creating a Simple Web App for ML Predictions – Basics of Cloud Security for ML Applications.											CO4	
UNIT-V	Mini Project: Cloud ML Application							Periods: 9				
Choosing a Simple ML Problem – Building and Training a Model on Cloud – Deploying the Model as a Web Application – Testing and Improving the Model – Real-world Case Studies of Cloud ML Applications.											CO5	
Lecture Periods: 45			Tutorial Periods:			Practical Periods:			Total Periods: 45

Department	Artificial Intelligence and Data Science				Programme: B.Tech.							
Semester	VI				Course Category Code: PE		End Semester Exam Type: TE					
Course Code	U23ADE718				Periods/Week		Credit	Maximum Marks				
					L	T	P	C	CAM	ESE	TM	
Course Name	QUANTUM AI				3	0	0	3	25	75	100	
AI & DS												
Prerequisite	Artificial Intelligence, Quantum Mechanics											
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Comprehend key concepts of quantum computing.									K2	
	CO2	Explain quantum algorithms and apply their efficiency in comparison to classical algorithms									K2, K3	
	CO3	Apply quantum computing to accelerate machine learning tasks									K3	
	CO4	Apply quantum computing tools like Qiskit and explore practical applications of Quantum AI in real-world scenarios.									K3	
	CO5	Apply quantum AI concepts to address decoherence, hybrid systems, optimization, and future research trends									K3	
UNIT-I	Introduction to Quantum Computing						Periods: 9					
Introduction to Quantum Computing, Quantum Mechanics Basics: Qubits, quantum states, quantum gates. Quantum Circuits: Building simple circuits, quantum measurement. Quantum Computers and Architectures: Gate-based models, quantum processors (D-Wave, IonQ), coherence time, and error correction.										CO1		
UNIT-II	Quantum Algorithms						Periods:9					
Quantum vs. Classical Algorithms, Quantum Superposition and Interference in Algorithms. Quantum Search Algorithms: Grover's Algorithm, Quantum Fourier Transform (QFT), Shor's Algorithm. Variational Quantum Algorithms (VQA): Quantum variational circuits, Quantum Approximate Optimization Algorithm (QAOA), AI applications in optimization.										CO2		
UNIT-III	Quantum Machine Learning (QML)						Periods:9					
Introduction to QML: Classical ML vs. Quantum ML, Quantum-enhanced learning models, Quantum Data Encoding. Quantum Neural Networks (QNN): Quantum perceptron, hybrid QNN architectures, applications in pattern recognition. Quantum Support Vector Machines (QSVM).										CO3		
UNIT-IV	Quantum AI Tools and Platforms						Periods:9					
Introduction to Quantum Development Platforms: Overview of Qiskit and Cirq, Building Quantum Circuits in Qiskit, Implementing Quantum Teleportation. Quantum AI Use Cases: Applications in finance and healthcare. Quantum Noise and Error Mitigation: Decoherence and error correction techniques.										CO4		
UNIT-V	Challenges and Future Directions in Quantum AI						Periods:9					
Current Limitations: Quantum decoherence, scalability issues. Hybrid Quantum-Classical Systems: Combining classical and quantum AI. Quantum AI for Optimization Problems: Applications in logistics and supply chain. Future Directions: Research trends in Quantum AI.										CO5

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science	B.Tech						
Semester	VII	Course Category Code: PA			End Semester Exam Type: LE			
Course Code	U23ADW703	Periods / Week			Credit	Maximum Marks		
		L	T	P	C	CAM	ESE	TM
Course Name	PROJECT PHASE-I	0	0	4	2	50	50	100

AI & DS

Prerequisite	Artificial Intelligence, Machine Learning, Deep Learning, Programming in C, Python, Natural Language Processing							
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)
	CO1	Identify and define a real-world problem relevant to their field of study.						K2
	CO2	Formulate clear problem objectives and project requirements.						K2
	CO3	Apply appropriate concepts and techniques to design a preliminary solution.						K3
	CO4	Develop an initial model or prototype using selected tools and technologies.						K4
	CO5	Document and present the project proposal and preliminary findings effectively.						K6

The project work involves developing a solution to a real-world problem using emerging technologies and engineering principles. Students will work in teams to analyze, design, develop, and evaluate a functional prototype or software application. The project must demonstrate the application of theoretical knowledge to practical challenges, integrating concepts from the core areas of the curriculum.

The project spans an academic term and includes multiple reviews to assess progress, quality, and implementation. Students are expected to conduct literature reviews, define clear objectives, apply suitable methodologies, perform data collection and analysis, and present their findings in a comprehensive report.

		L	T	P	C	CAM	ESE	TM
Course Name	INTERNSHIP / IN PLANT TRAINING	0	0	2	1	100	-	100
AI & DS								
The student is required to undergo 'internship' in industry / research laboratory / higher learning institution for a minimum period of 4 weeks during vacations and shall complete the internship before the completion of 7th semester. i) The internship carries 1 credit. ii) Each spell of internship shall be for a period not less than 2 weeks. iii) The main purpose of internship is to enhance the general professional outlook and capability of the student to advance his/her chances of improving the career opportunities. The student should get prior approval from the Head of the Department and Training and Placement cell at the college before undertaking the internship and submit a detailed report after completion for the purpose of assessment. The internship marks will be given in 7th semester mark sheet. iv) The project work carried out in industry in the eighth semester is not to be treated as internship.

AI&DS

Prerequisite	Data Science, Natural Language Processing (NLP)		
	On completion of the course, the students will be able to		BT Mapping (Highest Level)
Course Outcomes	CO1	Understand the role and scope of AI in healthcare	K2
	CO2	Analyze healthcare datasets using AI techniques	K4
	CO3	Apply machine learning models for healthcare prediction tasks	K3
	CO4	Understand real-world AI-based healthcare applications	K2
	CO5	Identify ethical, privacy, and regulatory challenges in healthcare AI	K2

UNIT – I	INTRODUCTION TO AI IN HEALTHCARE	Periods:9
-----------------	---	------------------

Overview of Artificial Intelligence – Evolution of AI in healthcare – Healthcare ecosystem and stakeholders – Types of healthcare data (EHR, EMR, clinical, imaging data) – Data quality issues and challenges in healthcare – AI workflow for healthcare applications – Introduction to clinical decision support systems – Role of AI in preventive and predictive healthcare	CO1
--	-------------------

UNIT – II	HEALTHCARE DATA ANALYSIS AND STATISTICS	Periods:9
------------------	--	------------------

Healthcare data collection and data sources – Data preprocessing and data cleaning techniques – Handling missing values and noisy data – Descriptive statistics for healthcare data – Inferential statistics in healthcare – Correlation and regression analysis – Data visualisation techniques for healthcare analytics	CO2
---	------------

UNIT – III	MACHINE LEARNING FOR HEALTHCARE	Periods:9
-------------------	--	------------------

Introduction to machine learning in healthcare – Supervised learning techniques (classification and regression) – Unsupervised learning techniques (clustering) – Feature extraction and feature selection – Model training and validation – Performance evaluation metrics for healthcare models – Overfitting and underfitting in healthcare datasets	CO3
---	------------

UNIT – IV	DEEP LEARNING AND AI APPLICATIONS IN HEALTHCARE	Periods:9
------------------	--	------------------

Introduction to deep learning – Artificial neural networks and architectures – Convolutional neural networks for medical imaging – Deep learning for disease detection and diagnosis – AI in personalised medicine – AI-based healthcare monitoring systems – Predictive analytics for healthcare outcomes	CO4
--	------------

UNIT – V	ETHICAL, PRIVACY AND REGULATORY ISSUES IN AI HEALTHCARE	Periods:9
-----------------	--	------------------

Ethical principles of AI in healthcare – Bias and fairness in healthcare AI systems – Explainable and interpretable AI – Data privacy and security issues – Healthcare data protection laws and regulations – Regulatory standards for medical AI systems – Responsible and trustworthy AI in healthcare	CO5

				L	T	P	C	CAM	ESE	TM	
Course Name	Stream Processing			3	-	-	3	25	75	100	
Prerequisite	Data preprocessing, Python										
Course Outcome	On completion of the course, the students will be able to									BT Mapping (Highest Level)	
	CO1	Understand the fundamentals and characteristics of stream processing and distinguish it from batch processing.								K2	
	CO2	Explain stream processing models, time semantics, windowing mechanisms, and core operators.								K2	
	CO3	Design and implement real-time data ingestion and event-driven pipelines using platforms like Apache Kafka.								K2	
	CO4	Analyze stateful stream processing techniques, including fault tolerance and handling late or out-of-order events.								K3	
	CO5	Apply advanced frameworks such as Apache Flink and Spark Structured Streaming for scalable real-time analytics.								K3	
UNIT-I	Foundations of Stream Processing Systems						Periods: 9				
Introduction to Data Streams and Continuous Data – Batch Processing vs Stream Processing – Characteristics of Streaming Data – Stream Processing Architectures and Applications – Stream Processing Models: Event Streams, Record Streams –Event Time vs Processing Time– Stream Operators– Windowing Basics: Tumbling, Sliding, Session Windows –Introduction to Stream Processing Frameworks										CO1	
UNIT-II	Streaming Platforms and Event-Driven Systems						Periods:9				
Event-Driven Architecture and Real-Time Pipelines – Apache Kafka Architecture – Producers, Consumers, Consumer Groups – Message Delivery Semantics – Stream Ingestion and Data Serialization – Kafka Streams API and Stream Processing Basics – Stream Joins and Aggregations –Case Study: Implement Real-Time Log/Event Streaming Pipeline using Kafka										CO2	
UNIT-III	Stream Analytics and Stateful Processing						Periods:9				
Introduction to Stateful vs Stateless Processing – Stream Aggregations and Incremental Computation – Complex Event Processing (CEP) – Handling Late and Out-of-Order Events – Watermarks and Triggers in Stream Analytics – Stream Joins – Fault Tolerance and Checkpointing Mechanisms – Real Time Analytics Use Cases (Fraud Detection, IoT Monitoring)										CO3	
UNIT-IV	Advanced Stream Processing Frameworks						Periods:9				
Stream Processing with Apache Flink Architecture – Flink DataStream API and Operators – Stream Processing with Spark Structured Streaming – Unified Batch + Streaming Models – Scalable Stream Execution and Parallelism – State Management and Backend Storage – Integration with Data Lakes and Warehouses										CO4	
UNIT-V	Modern Stream Processing Engineering and Applications						Periods:9				
End-to-End Stream Processing System Design – Building Real-Time Data Products and Streaming ML Pipelines – Stream Processing in Cloud Platforms – Monitoring and Observability – Stream Security, Privacy, and Access Control – Optimization Techniques – Emerging Trends: Streaming AI, Real-Time RAG Pipelines, Digital Twins										CO5

Department	Artificial Intelligence and Data Science			Programme: B.Tech.							
Semester	VIII			Course Category Code: PC				End Semester Exam Type: TE			
Course Code	U23ADE822			Periods/Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	Sustainable AI			3	-	-	3	25	75	100	
Prerequisite	Artificial Intelligence										
Course Outcome	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Understand the fundamentals of Sustainable AI and its societal and environmental impact								K2	
	CO2	Analyze energy-efficient machine learning models and resource-aware AI systems								K3	
	CO3	Apply sustainable data engineering practices and green AI pipelines								K3	
	CO4	Examine ethical, fair, and responsible AI frameworks for social sustainability								K2	
	CO5	Evaluate future Sustainable AI systems for climate innovation and carbon neutrality								K3	
UNIT-I	Introduction to Sustainable AI and Responsible Computing						Periods: 9				
Introduction to Artificial Intelligence and its Societal Impact – Need for Sustainability in AI Systems – Energy Consumption and Carbon Footprint – AI Lifecycle and Sustainability Challenges – Green Computing Fundamentals and Resource Aware Systems – Basics of Responsible AI and Sustainable Development Goals (SDGs) – Overview of Sustainable AI Applications in Industry										CO1	
UNIT-II	Energy-Efficient Machine Learning Models						Periods:9				
Model Complexity and Resource Trade-offs – Efficient Neural Network Architectures – Model Compression Techniques – Low Power Training and Inference Strategies – Hardware-Aware AI –Efficient Data Handling and Reduced Training Costs – Benchmarking AI Energy Usage –Case Study: Implement a Lightweight ML Model for Edge Sustainability Use Case										CO2	
UNIT-III	Sustainable Data Engineering and Green AI Pipelines						Periods:9				
Sustainable Data Collection and Storage Practices – Efficient Data Preprocessing and Feature Engineering – Streaming vs Batch Processing Energy Considerations – Green AI Pipelines –Federated Learning for Privacy and Reduced Data Transfer – Cloud Sustainability and Carbon Aware Scheduling – Lifecycle Assessment of AI Systems – Evaluation Metrics										CO3	
UNIT-IV	Ethical, Fair, and Socially Sustainable AI						Periods:9				
Transparency, Accountability, Trust – Bias and Fairness in Machine Learning Models – Explainable AI (XAI) for Sustainable Decision Making – Responsible AI Governance Frameworks – Human-Centered AI Design – Privacy-Preserving AI – AI for Social Good – Risk Mitigation and Safe AI Deployment.										CO4	
UNIT-V	Future of Sustainable AI Systems and Climate Innovation						Periods:9				
AI for Climate Change – Sustainable Smart Cities and IoT-Based Environmental Monitoring – Green Generative AI – AI Policy, Regulations, and Corporate Sustainability Standards – Monitoring and Auditing AI Sustainability in Production –Carbon-Neutral AI, Circular AI Economy										CO5	
Lecture Periods:45			Tutorial Periods:-			Practical Periods:-			TotalPeriods:45

					L	T	P	C	CAM	ESE	TM	
Course Name	AI in Finance				3	-	-	3	25	75	100	
Prerequisite	Basic knowledge of probability and statistics, Python programming, machine learning fundamentals, and introductory concepts of financial markets.											
Course Outcome	On completion of the course, the students will be able to									BT Mapping (Highest Level)		
	CO1	Understand applications in finance									K2	
	CO2	Understand various quantitative techniques in finance									K3	
	CO3	Understand the techniques for financial data analysis									K2	
	CO4	To study the real-world applications of AI in Finance Services									K3	
	CO5	To study the compliance aspects of AI in Finance									K2	
UNIT-I	Introduction to AI in finance							Periods: 9				
Overview of AI and its applications in finance - Basics of financial markets and instruments - Data sources and pre processing for financial data - Time series analysis and feature engineering											CO1	
UNIT-II	Quantitative Techniques In Finance							Periods:9				
Financial data analysis and visualization - Hypothesis testing and statistical inference in finance - financial risk measurement and management - Portfolio theory and optimization											CO2	
UNIT-III	AI Techniques for Financial Data Analysis							Periods:9				
Supervised learning for financial forecasting - Unsupervised learning in financial applications - Model evaluation and validation in finance - Dimensionality reduction and feature selection											CO3	
UNIT-IV	Use Cases of AI In Finance Services							Periods:9				
AI-driven trading and investment strategies - Credit risk assessment and loan approval - financial fraud detection and prevention - AI-powered financial advisory services											CO4	
UNIT-V	Ethical And Compliance Aspects of Ai In Finance							Periods:9				
Data privacy and security in financial AI applications - Ethical considerations in AI-driven financial decision -making - Regulatory requirements and AI compliance - Explainable AI and financial model transparency											CO5	
Lecture Periods:45			Tutorial Periods:-			Practical Periods:-			TotalPeriods:45

Course Code	U23ADE825				Periods/Week		Credit	Maximum Marks			
					L	T	P	C	CAM	ESE	TM
Course Name	Modern Cryptography				3	0	0	3	25	75	100
Prerequisite	Basics of Discrete Mathematics, Programming Fundamentals, Computer Networks										
Course Outcome	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Explain the fundamental concepts, goals, and mathematical foundations of modern cryptography.									K2
	CO2	Analyze and apply symmetric key cryptographic algorithms and modes of operation.									K3
	CO3	Understand and implement public key cryptographic techniques and key exchange mechanisms.									K2
	CO4	Apply cryptographic hash functions, message authentication codes, and digital signature schemes.									K3
	CO5	Evaluate cryptographic protocols and applications used in real-world secure communication systems.									K3
UNIT-I	Introduction to Cryptography							Periods: 9			
Security goals and services - cryptographic attacks - classical vs modern cryptography - mathematical foundations (number theory, modular arithmetic) - probability and complexity basics - security definitions.											CO1
UNIT-II	Symmetric Key Cryptography							Periods:9			
Symmetric encryption concepts - stream and block ciphers - DES and AES - modes of operation - cryptanalysis techniques - key management issues.											CO2
UNIT-III	Public Key Cryptography							Periods:9			
Public key concepts – RSA - Diffie–Hellman key exchange – ElGamal - elliptic curve cryptography - security and performance comparison.											CO3
UNIT-IV	Hash Functions and Authentication							Periods:9			
Cryptographic hash functions - SHA family - message authentication codes (MAC, HMAC) - digital signatures (RSA, DSA, ECDSA) - authentication protocols.											CO4
UNIT-V	Cryptographic Protocols and Applications							Periods:9			
Key management and PKI, SSL/TLS - secure email (PGP, S/MIME) - network security applications - emerging trends and post-quantum cryptography - ethical and legal aspects.											CO5
Lecture Periods:45			Tutorial Periods:-			Practical Periods:-			TotalPeriods:45

					L	T	P	C	CAM	ESE	TM
Course Name	AI in Automobile Industry				3	0	0	3	25	75	100
Prerequisite	Programming Fundamentals, Linear Algebra, Probability and Statistics, Fundamentals of Artificial Intelligence, Machine Learning Basics, and Introduction to Automobile Systems										
	On completion of the course, the students will be able to										BT Mapping (Highest Level)
Course Outcome	CO1	Understand the fundamentals of Artificial Intelligence and its role in autonomous vehicles and ADAS									K2
	CO2	Apply computer vision techniques for perception in autonomous driving systems									K3
	CO3	Understand sensor fusion and perception algorithms used in modern vehicles									K2
	CO4	Apply localization and planning techniques for autonomous vehicle navigation									K3
	CO5	Understand vehicle control systems and implement ADAS applications using simulators and open-source platforms									K3
UNIT-I	Introduction to AI and Autonomous Vehicles							Periods: 9			
Introduction to Artificial Intelligence and autonomous vehicles – Need for AI in Advanced Driver Assistance Systems (ADAS) – Machine learning workflow – Linear regression – Gradient descent – Backpropagation – Feedforward neural networks – Deep learning concepts and techniques											CO1
UNIT-II	Computer Vision for Autonomous Vehicles							Periods:9			
Role of computer vision in autonomous driving – Sensor and camera calibration – Image classification using Convolutional Neural Networks – Object detection in images – Semantic segmentation in images – Applications of vision systems in ADAS											CO2
UNIT-III	Sensor Fusion and Perception Systems							Periods:9			
Introduction to perception and sensor fusion – LiDAR sensors and working principles – Object detection using LiDAR – Kalman filters – Extended Kalman filters – Camera–LiDAR external calibration – multi-sensor fusion – multi-object tracking											CO3
UNIT-IV	Localization and Planning in Autonomous Vehicles							Periods:9			
Introduction to localization – Markov localization – Scan matching algorithms – 3D scan matching – Simultaneous Localization and Mapping (SLAM) – Behavior planning – Trajectory generation – Motion planning- <i>AI-based path planning algorithms (Dijkstra, A, RRT with learning enhancements)</i>											CO4
UNIT-V	Control Systems and Hands-on ADAS Applications							Periods:9			
Vehicle control fundamentals – PID control – CARLA simulator – Open-source ADAS and autonomous driving stacks such as Autoware and Apollo – 2D and 3D object detection – Semantic segmentation – Camera–LiDAR fusion – multi-object tracking – Trajectory generation – Critical scenario identification-AI-driven scenario testing and validation in simulators											CO5

Course Name	AI in E-Commerce				3	0	0	3	25	75	100
Prerequisite	Discrete Mathematics, Programming Fundamentals, Database Management Systems, Fundamentals of Artificial Intelligence, and Basics of E-Commerce										
Course Outcome	On completion of the course, the students will be able to										BT Mapping (Highest Level)
	CO1	Understand the fundamentals, evolution, and applications of Artificial Intelligence in E-Commerce									K2
	CO2	Understand AI-driven E-Commerce strategies and their role in business growth									K2
	CO3	Apply machine learning and natural language processing techniques in E-Commerce									K3
	CO4	Apply deep learning models such as CNN and RNN in E-Commerce applications									K3
	CO5	Understand and apply AI concepts to assess business impact, ethical concerns, and future trends in E-Commerce									K3
UNIT-I	Introduction to AI in E-Commerce							Periods: 9			
AI in E-Commerce Overview – History and Evolution of E-Commerce – Role of AI in E-Commerce -Specialised prompting for E-commerce– AI applications in online retail – Customer data analytics – Personalization – Recommendation systems – Chatbots and Intelligent customer service										CO1	
UNIT-II	Artificial Intelligence in E-Commerce Strategy							Periods:9			
AI-driven E-Commerce strategies – Target audience analysis – Customer profiling – Market segmentation – AI-enhanced digital marketing – Customer retention – Loyalty programs – Data-driven decision making										CO2	
UNIT-III	Machine Learning in E-Commerce							Periods:9			
Machine learning applications in E-Commerce – Supervised learning for sales and customer prediction – Unsupervised learning for product clustering and recommendations – Natural language processing fundamentals – Sentiment analysis of reviews – Fraud detection in E-Commerce										CO3	
UNIT-IV	Deep Learning in E-Commerce							Periods:9			
Deep learning applications in E-Commerce – Convolutional Neural Networks for product image analysis – Recurrent Neural Networks and LSTM for customer behaviour prediction – Demand forecasting – Dynamic pricing using neural networks										CO4	
UNIT-V	Case Studies and Ai-Powered E-Commerce							Periods:9			
Personalized product recommendation systems – AI-based chatbots and virtual assistants – Predictive inventory and supply chain management – Voice-enabled shopping systems – Ethical issues, privacy, and security – Future trends in AI-driven E-Commerce										CO5

	CO5	Understand the chatbots and virtual assistants							K3	
UNIT-I	INTRODUCTION TO AI IN SMART CITIES					Periods: 9				
Overview of AI in smart cities - Role of AI in transforming urban infrastructure - Benefits and challenges of implementing AI in smart cities - AI-powered sensors and Internet of Things (IoT) - Data analytics and predictive modelling								CO1		
UNIT-II	AI APPLICATIONS IN URBAN MOBILITY					Periods: 9				
AI-driven traffic management - congestion prediction - Intelligent transportation systems - smart traffic lights - AI-powered public transportation optimization - Autonomous vehicles and self-driving technology - Smart parking solutions using AI								CO2		
UNIT-III	AI FOR ENERGY EFFICIENCY AND SUSTAINABILITY					Periods: 9				
AI-based energy demand forecasting and optimization - Smart grid management - AI-enabled energy distribution - Energy consumption analytics and smart metering - AI in renewable energy integration and optimization - Sustainable waste management and recycling with AI								CO3		
UNIT-IV	AI FOR PUBLIC SAFETY AND SECURITY					Periods: 9				
AI-powered video surveillance and facial recognition - Predictive policing and crime pattern analysis - Emergency response systems using AI and IoT - AI in disaster management - early warning systems - Cybersecurity and AI-enabled threat detection in smart cities								CO4		
UNIT-V	AI FOR CITIZEN ENGAGEMENT AND SERVICES					Periods: 9				
AI-powered smart city platforms and citizen portals - AI-enabled personalized citizen services and recommendations - Chatbots and virtual assistants for citizen support - Social media analytics and sentiment analysis - AI in smart governance								CO5		
Lecture Periods: 45		Tutorial Periods: -		Practical Periods: -		Total Periods: 45

ANNEXURE - II
OPEN ELECTIVE COURSE
SYLLABUS

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Name of the Programme: B.Tech							
Semester	V/VI			Course Category: OE			*End Semester Exam Type: TE				
Course Code	U23ADOC01			Periods / Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	INTRODUCTION TO DATA SCIENCE			3	0	0	3	25	75	100	
Common to EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics, CSEBS											
Prerequisite	Python Programming, Microsoft Excel										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Explain fundamental concepts of Data Science.								K2	
	CO2	Explain basic probability and statistical methods used in data science.								K2	
	CO3	Demonstrate data visualization using various tools.								K3	
	CO4	Identify industrial opportunities for Data Science applications.								K2	
	CO5	Discuss ethical concerns related to data privacy and sharing.								K2	
UNIT – I	INTRODUCTION TO DATA SCIENCE						Periods:9				
Definition – Big Data and Data Science Hype – Why data science – Getting Past the Hype – The Current Landscape – Who is Data Scientist - Data Science Process Overview – Defining goals – Retrieving data – Data preparation – Data exploration – Data modeling – Presentation.										CO1	
UNIT – II	MATHEMATICAL PRELIMINARIES						Periods: 9				
Probability: Probability vs. Statistics – Compound Events and Independence – Conditional Probability – Probability Distribution. Descriptive Statistics: Centrality Measures – Variability Measures - Interpreting Variance – Characterizing Distributions. Correlation Analysis: Correlation Coefficient – The Power and Significance – Detection Periodicities.										CO2	
UNIT – III	DATA SCIENCE TOOLS						Periods: 9				
Introduction to Data Science Tool – Data Cleaning Tools – Data Munging and Modelling Tools – Data Visualization Tools – Tools for Data Science.										CO3	
UNIT – IV	INDUSTRIALIZATION, OPPORTUNITIES AND APPLICATIONS						Periods: 9				
Data Economy and Industrialization – Introduction: Data Economy, Data Industry, Data Services – Data Science Application: Introduction, General Application Guidance - Different Domain – Advertising – Aerospace and Astronomy – Arts, Creative Design and Humanities – Bioinformatics – Consulting Services – Ecology and Environment – Ecommerce and Retail - Education – Engineering – Finance and Economy – Gaming.										CO4	
UNIT – V	ETHICS AND RECENT TRENDS						Periods: 9				
Data Science Ethics – Doing good data science – Owners of the data - Valuing different aspects of privacy - Getting informed consent - The Five Cs – Diversity – Inclusion – Future Trends.										CO5	
Lecture Periods:45			Tutorial Periods: -			Practical Periods: -		Total Periods: 45

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Name of the Programme: B.Tech						
Semester	V/VI			Course Category: OE		*End Semester Exam Type: TE				
Course Code	U23ADDC02			Periods / Week		Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM
Course Name	PRINCIPLE OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING			3	0	0	3	25	75	100
Common to EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics, CSEBS										
Prerequisite	Solid understanding of basic machine learning concepts and neural network architectures, Proficiency in Python Programming									
Course Outcomes	On completion of the course, the students will be able to									BT Mapping (Highest Level)
	CO1	Explain the foundational principles of Artificial Intelligence.								K2
	CO2	Explain different knowledge representation techniques.								K2
	CO3	Summarize reasoning methods applied in AI systems.								K2
	CO4	Interpret mathematical concepts used in Machine Learning algorithms.								K2
	CO5	Apply basic AI programming models to solve real-world problems.								K3
UNIT – I	INTRODUCTION						Periods:9			
Introduction to Artificial Intelligence - Artificial Intelligence Problems -Timelines of Artificial Intelligence - Production Systems - State Space Representation - Branches of Artificial Intelligence - Application of Artificial Intelligence.										CO1
UNIT – II	KNOWLEDGE REPRESENTATION						Periods:9			
Knowledge Management - Types of Knowledge - Knowledge representation - Approaches to Knowledge representation - Issues in Knowledge representation - Knowledge base. First order Logic – Frames — Conceptual Dependency.										CO2
UNIT – III	REASONING						Periods:9			
Types of reasoning - reasoning with Fuzzy Logic - Rule based Reasoning - Diagnosis Reasoning.										CO3
UNIT – IV	LEARNING						Periods:9			
Types of Learning - Machine Learning - Intelligent agents - Association Learning: Apriori Algorithm - Case Study: Customer Sequence and SCADA Application – k-Means Clustering - Fuzzy Clustering - Cluster Similarity										CO4
UNIT – V	REINFORCEMENT AND STATISTICAL LEARNING						Periods:9			
Markov Decision Problem - Hidden Markov Model - Linear Classifier - decision Trees: Random forest - Bayesian Network – ANN - ANN Learning process - Types of Network – Perceptron - RBF Network - Case studies: Character recognition										CO5
Lecture Periods:45			Tutorial Periods: -			Practical Periods: -		Total Periods:45

Academic Curriculum and Syllabi R-2023

Department	Artificial Intelligence and Data Science			Name of the Programme: B.Tech						
Semester	VII			Course Category:OE		*End Semester Exam Type: TE				
Course Code	U23ADOC03			Periods / Week			Credit	Maximum Marks		
				L	T	P	C	CAM	ESE	TM
Course Name	ARTIFICIAL INTELLIGENCE APPLICATIONS			3	0	0	3	25	75	100
Common to EEE, ECE, CSE, IT, ICE, MECH, CIVIL, CCE, BME, Mechatronics, CSEBS										
Prerequisite	Basic image processing concepts, knowledge of Machine Learning and Deep Learning fundamentals									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Apply data science concepts in AI applications.							K3	
	CO2	Explain Machine Learning algorithms and their real-world use cases.							K2	
	CO3	Explain Deep Learning models and their advantages.							K2	
	CO4	Apply Robotic Process Automation concepts to industrial processes.							K3	
	CO5	Apply Natural Language Processing techniques to develop chatbots.							K3	
UNIT I	INTRODUCTION					Periods: 9				
Introduction – Alan Turing and Turing test - The rise and fall of expert system - technological drivers of modern AI -Structure of AI - Data: types of Data - Big Data - Database and other tools - Data Process - Ethics and Governance - Data terms.										CO1
UNIT II	MACHINE LEARNING					Periods: 9				
Machine learning - Standard deviation - the normal distribution - Naive Bayes Classifier - K-Nearest Neighbor - Linear regression - K-Means Clustering.										CO2
UNIT III	DEEP LEARNING					Periods: 9				
Deep Learning - Difference between Deep Learning and Machine learning – ANN – Backpropagation – RNN – CNN – GAN - Deep Learning Applications - Use Case: detecting Alzheimer’s Disease - Deep Learning Hardware - When to use Deep Leaning? - Drawbacks of deep learning.										CO3
UNIT IV	ROBOTIC PROCESS AUTOMATION					Periods: 9				
RPA - pros and cons of RPA - Determine the right function to automate - assess the processes - RAP and AI - RPA in the real world.										CO4
UNIT-V	NATURAL LANGUAGE PROCESSING					Periods: 9				
Challenges of NLP - Understanding How AI translated Language - NLP in real World - Voice Commerce - Virtual assistants – Chatbot - Future of NLP - The Future of AI.										CO5
LecturePeriods:45		TutorialPeriods: -			PracticalPeriods: -			Total Periods:45

Honour / Minor in Artificial Intelligence and Machine Learning

Department	Artificial Intelligence and Data Science			Name of the Programme: B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning						
Semester	IV			Course Category: PC			*End Semester Exam Type: TE			
Course Code	U23MXT401			Periods / Week			Credit	Maximum Marks		
Course Name	PARALLEL PROGRAMMING AND HIGH PERFORMANCE COMPUTING			L	T	P	C	CAM	ESE	TM
				3	0	0	3	25	75	100
Common to all Branches except AI & DS										
Prerequisite	Basics of Programming (C, C++), Linux Operating Systems									
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)	
	CO1	Apply MPI framework for passing message parallelly across processes							K3	
	CO2	Apply Pthreads for creating shared memory parallel programs							K3	
	CO3	Apply OpenMP paradigms to create shared memory parallel programs							K3	
	CO4	Apply either OpenMP, MPI for parallel algorithms for searching and sorting							K3	
	CO5	Apply CUDA programming for configuring hardware and transfer data across GPU and CPU							K3	
UNIT – I	Message Passing Paradigm						Periods:9			
Basic MPI programming – MPI_Init and MPI_Finalize – MPI communicators – SPMD programs – Message passing – MPI_Send and MPI_Recv – Message matching – MPI I/O – Parallel I/O – Collective communication – MPI_Reduce - MPI_Allreduce, broadcast, scatter, gather, allgather – Derived types – Remote Memory Access – Performance evaluation of MPI programs										CO1
UNIT – II	Shared Memory Paradigm: Pthreads						Periods: 9			
Basics of Pthreads – Thread synchronization – Critical sections – Busy waiting – Mutex – Semaphores – Barriers and condition variables – Read write locks with examples - Caches, cache coherence and false sharing – Pthreads case study										CO2
UNIT – III	Shared Memory Paradigm: OpenMP						Periods: 9			
Basic OpenMP constructs – scope of variables – Reduction clause – Parallel For directive – loops in OpenMP – Scheduling loops – Synchronization in OpenMP – Case Study: Producer-Consumer problem – Cache issues – Threads safety in OpenMP – OpenMP best practices										CO3
UNIT – IV	Parallel Algorithms						Periods: 9			
Elementary parallel algorithms: Reduction – Broadcast - Prefix sum. Matrix multiplication: Algorithm for processor array - Algorithm for multiprocessors and multicomputer. Sorting: Odd even transposition sort - Bitonic merge - Quick sort algorithms.										CO4
UNIT – V	GPU Programming with CUDA						Periods: 9			
GPUs and GPGPU - GPU architectures - Heterogeneous computing – Simple CUDA program - Threads, blocks, and grids - Vector addition – CUDA trapezoidal rule – improvements - Implementation of trapezoidal rule with warp Size thread blocks – block with more than one warp										CO5
Lecture Periods:45			Tutorial Periods: -			Practical Periods: -			Total Periods: 45	
Textbooks

Assessment	Continuous Assessment Marks (CAM)					End Semester Examination (ESE) Marks##	Total Marks
	CAT 1	CAT 2	Model Exam##	Assignment#	Attendance##		
Test Marks	50*	50*	75*	20*	5	75	100
Weightage for CAM	5	5	5	5	5	75	
CAM / ESE Marks	CAM Marks = 25					ESE Marks = 75	

#Open Book Analytical Exam/Analyse Real world problems and propose solutions/ Tool or Subject Proficiency Analysis – Test the Students skill by giving individual task/ Paper Presentation/Micro Project Presentation/Idea Presentation for the Societal Problem;
Distribution of Marks for Attendance, the Question Paper Pattern for Model and ESE are same as given in B. Tech. Regulations R2023 for Theory Courses.

5.15/1-

Department	Artificial Intelligence and Data Science		Name of the Programme: B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning							
Semester	V		Course Category: PC				*End Semester Exam Type: TE			
Course Code	U23MXB501		Periods / Week			Credit	Maximum Marks			
Course Name	ADVANCED DEEP LEARNING		L	T	P	C	CAM	ESE	TM	
			3	0	2	4	50	50	100	
Common to all Branches except AI & DS										
Prerequisite	Solid understanding of basic machine learning concepts and neural network architectures, Proficiency in Python Programming									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Apply different Convolutional Neural Network for processing images effectively, and to apply generative models for image synthesis, style transfer, and data augmentation tasks							K3	
	CO2	Apply advanced sequence models for NLP tasks like text generation, summarization, and multimodal learning and apply reinforcement learning concepts in AI, robotics, and autonomous systems.							K3	
	CO3	Apply techniques such as neural architecture search and meta-learning to optimize models for edge devices and energy-efficient AI systems.							K3	
	CO4	Implement practical solutions for real-world problems using deep learning and RL							K3	
	CO5	Implement practical solutions for real-world problems using optimization Tools							K3	
UNIT – I	Artificial Neural Networks and Convolution Neural Networks					Periods:10				
Basics of Neural Networks: Perceptron, activation functions (Sigmoid, ReLU, Softmax), backpropagation, loss functions, Convolutional Neural Networks (CNNs): Convolution, pooling, architectures of VGG, ResNet, DenseNet, Inception, and their architectures. Transfer Learning: EfficientNet: Pre-trained models, fine-tuning, domain adaptation.									CO1	
UNIT – II	Sequence Models, NLP					Periods:10				
Recurrent Neural Networks (RNNs): Advanced concepts in LSTMs, GRUs, and bidirectional RNNs. Transformers: Architecture, self-attention mechanism, positional encoding. BERT, GPT, T5 Models: Pre-training, fine-tuning, masked language models. Multimodal Learning: Combining text, images, and audio for richer representations.									CO2	
UNIT – III	Neural Architecture Search and Model Optimization					Periods:10				
Neural Architecture Search (NAS): ENAS, AutoML, Model Pruning and Quantization, Knowledge Distillation: Transfer of knowledge from large to smaller models, Meta-Learning: Few-shot learning, model adaptation, Applications: Optimizing models for edge devices, mobile AI, energy-efficient deep learning									CO3	
UNIT – IV	Laboratory Exercises					Periods:15				
- Implement CNNs for image classification and object detection. - Train and evaluate GANs for image synthesis and style transfer. - Apply transfer learning with pre-trained models. - Build and train RNNs and Transformers for NLP tasks. - Multimodal Sentiment Analysis Using Text and Audio									CO4	
UNIT – V	Laboratory Exercises					Periods:15				
- Experiment with NAS tools to design optimized architectures. - Apply pruning, quantization, and knowledge distillation. - Develop models for mobile AI applications. - Implement a NAS algorithm for image classification. - Apply meta-learning techniques for few-shot learning.									CO5	
Lecture Periods:30			Tutorial Periods: -		Practical Periods: 30		Total Periods:60

Evaluation Methods

Assessment	Continuous Assessment Marks (CAM) – Maximum 50 Marks										End Semester Examination (ESE) Marks (Theory)	Total Marks (CAM+ ESE)
	Continuous Assessment (Theory)					Continuous Assessment (Practical)						
	CAT 1	CAT 2	Model ##	Attendance##	Total	Conduction of Practical	Report	Viva	Total	End Semester Examination (ESE) Marks (Practical)		
Marks	50	50	75	5		15	10	5	30*	30	75 (To be weighted for 50 Marks)	
Weightage of CAM	2.5	2.5	2.5	2.5	10	*To be weighted for 10 Marks			10	30		
CAM / ESE Marks	CAM Marks =10+10+30=50										ESE Marks = 50	100

Distribution of Marks for Attendance, the Question Paper Pattern for Model and ESE are same as given in B. Tech. Regulations R2023 for Theory cum practical Courses

5.8/1

Department	Artificial Intelligence and Data Science			Name of the Programme: B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning							
Semester	VI			Course Category: PC			*End Semester Exam Type: TE				
Course Code	U23MXB602			Periods / Week			Credit	Maximum Marks			
				L	T	P	C	CAM	ESE	TM	
Course Name	REINFORCEMENT LEARNING			3	0	2	4	50	50	100	
Common to all Branches except AI & DS											
Prerequisite	Machine Learning, Programming in Python, knowledge of Probability and statistics										
Course Outcomes	On completion of the course, the students will be able to								BT Mapping (Highest Level)		
	CO1	Apply reinforcement learning algorithms to real-world problem								K3	
	CO2	Apply advanced techniques for building models								K3	
	CO3	Apply, train, and evaluate RL models								K3	
	CO4	Implement practical solutions for sequential decision-making problems								K3	
	CO5	Implement practical solutions using advanced techniques								K3	
UNIT-I	Foundations of Reinforcement Learning						Periods: 10				
RL Framework, Intelligent Agents, Problem-Solving, Searching, Probability Axioms, Random Variables, PMF, PDF, Agent-Environment Interface, Goals, Rewards, Returns, Policies, Value Function, Notation for episodic and continuing tasks.									CO1		
UNIT-II	Dynamic Programming and Monte Carlo Methods						Periods: 10				
Policy Evaluation, Policy Improvement, Policy Iteration, Value Iteration, Monte Carlo Methods: Prediction, Estimation of Action Values, Control with and without Exploring Starts, Model-Free Prediction and Control: Monte Carlo Control in unknown environments.									CO2		
UNIT-III	Temporal-Difference Learning and Advanced Techniques						Periods: 10				
Temporal-Difference (TD) Learning: TD Prediction, TD (0) Method, Sarsa (on-policy), Q-learning (off-policy), Eligibility Traces: Forward and Backward View, Planning and Learning: Dyna-Q, Prioritized Sweeping, Real-time DP, Monte Carlo Tree Search (MCTS): Planning at Decision Time.									CO3		
UNIT-IV	Laboratory Exercises						Periods: 15				
- Implement a basic RL environment with OpenAI Gym. - Develop a simple agent for a grid-world environment. - Analyze agent behavior with different reward settings. - Build and analyze MDP models. - Implement Monte Carlo Prediction and Control									CO4		
UNIT-V	Laboratory Exercises						Periods: 15				
- Develop Q-learning agents for maze navigation. - Experiment with policy evaluation and improvement - Develop a TD learning agent. - Implement Monte Carlo Tree Search for game playing. - Explore Dyna-Q with planning and learning components									CO5		
LecturePeriods:30			TutorialPeriods:-			PracticalPeriods: 30			Total Periods:60

2.1.1.1

Department	Artificial Intelligence and Data Science		B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning						
Semester	VII		Course Category: PC			*End Semester Exam Type: TE			
Course Code	U23MXT702		Periods / Week			Credit	Maximum Marks		
			L	T	P	C	CAM	ESE	TM
Course Name	IMAGE AND VIDEO ANALYTICS		3	0	0	3	25	75	100
Common to all Branches except AI & DS									
Prerequisite	Basic image processing concepts, knowledge of Machine Learning and Deep Learning fundamentals								
Course Outcomes	On completion of the course, the students will be able to						BT Mapping (Highest Level)		
	CO1	Interpret Digital image and video processing techniques for processing image and video files						K2	
	CO2	Interpret the concepts of Image and Video enhancement and restoration for effective image analysis						K2	
	CO3	Apply various concepts of Image analysis and video analysis.						K3	
	CO4	Apply multifarious feature detection and description techniques for image analytics						K3	
	CO5	Apply various object detection and recognition techniques for tracking objects in videos						K3	
UNIT-I	Introduction to Digital Image and Video Processing				Periods: 9				
Digital image representation - Sampling and Quantization - Types of Images - Basic Relations between Pixels – Neighbors – Connectivity - Distance Measure, Introduction to Digital Video - Sampled Video - Video Transmission. Gray-Level Processing: Image Histogram, Arithmetic Operations between Images - Geometric Image Operations. Binary Image Processing, Binary Image Morphology.								CO1	
UNIT-II	Image and Video Enhancement and Restoration				Periods: 9				
Spatial domain - Linear and Non-linear Filtering - Morphological filtering, Homomorphic Filtering, Blotch Detection - Motion Vector Repair and Interpolating Corrupted Intensities - Intensity Flicker Correction – Flicker Parameter Estimation - Wavelet based image denoising - Basic methods for image restoration using deconvolution filters.								CO2	
UNIT-III	Image and Video Analysis				Periods: 9				
Image Compression: Huffman coding - Run length coding - LZW coding - Lossless Coding - Wavelets based image compression. Video Compression: Basic Concepts and Techniques of Video Coding and the H.264 Standard - MPEG-1 and MPEG-2 Video Standards.								CO3	
UNIT-IV	Feature Detection and Description				Periods: 9				
Introduction to feature detectors - descriptors - matching and tracking - Basic edge detectors– canny – sobel - prewitt etc. - Image Segmentation - Region Based Segmentation – Region Growing and Region Splitting and Merging - Thresholding– Basic global thresholding - optimum global thresholding using Otsu's Method								CO4	
UNIT-V	Object Detection and Recognition				Periods: 9				
Object detection and recognition in image and video - basic texture descriptors - GLCM - LBP and its applications in image and video analysis - object tracking in videos.								CO5	
LecturePeriods:45		TutorialPeriods: -		PracticalPeriods: -			Total Periods:45

2.1.1/1

Department	Artificial Intelligence and Data Science		B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning							
Semester	VIII		Course Category: PC			*End Semester Exam Type: TE				
Course Code	U23MXT803		Periods / Week			Credit	Maximum Marks			
			L	T	P	C	CAM	ESE	TM	
Course Name	PROMPT ENGINEERING		3	0	0	3	25	75	100	
Common to all Branches except AI & DS										
Prerequisite	Strong understanding of Natural Language Processing, familiarity with Machine Learning models and techniques.									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Interpret the basic concepts and importance of prompt engineering, including various types of prompts and their applications.							K2	
	CO2	Apply skills in designing effective prompts with clear structure and contextual relevance, avoiding common pitfalls.							K3	
	CO3	Apply various metrics and feedback, and improve prompt effectiveness.							K3	
	CO4	Apply advanced techniques in prompt engineering for handling different types of prompts							K3	
	CO5	Apply prompt engineering concepts in various for building interactive systems.							K3	
UNIT-I	Introduction to Prompt Engineering					Periods: 9				
Introduction – Importance and Applications – Types of Prompts – Components of Effective Prompts – Challenges and Solutions – Case Studies in Prompt Engineering.								CO1		
UNIT-II	Designing Effective Prompts					Periods: 9				
Principles of Prompt Design – Structuring Prompts – Contextual Relevance – Clarity and Precision – Examples and Best Practices – Common Pitfalls and How to Avoid Them.								CO2		
UNIT-III	Evaluating Prompt Performance					Periods: 9				
Metrics for Prompt Effectiveness – User Feedback and Iteration – Testing and Validation Methods – Analyzing User Engagement – Improving Prompt Responsiveness – Tools for Evaluation and Optimization.								CO3		
UNIT-IV	Advanced Techniques in Prompt Engineering					Periods: 9				
Adaptive Prompting Techniques – Leveraging Machine Learning for Prompt Improvement – Multi-turn Prompts and Conversations – Personalization and Customization – Integrating Prompts with AI Systems – Ethical Considerations and Bias Mitigation.								CO4		
UNIT-V	Case Studies and Applications					Periods: 9				
Industry-Specific Prompt Engineering Applications – Healthcare, Finance, Education, and Customer Service – Building Interactive Systems with Prompts – Real-world Case Studies and Success Stories – Future Trends in Prompt Engineering – Capstone Project: Designing a Prompt System.								CO5

5.15/1

Department	Artificial Intelligence and Data Science		B.Tech / (Honour / Minor) – Artificial Intelligence and Machine Learning							
Semester	VI		Course Category Code: PA			End Semester Exam Type: PA				
Course Code	U23MXW801		Periods / Week			Credit	Maximum Marks			
			L	T	P	C	CAM	ESE	TM	
Course Name	PROJECT		0	0	4	2	50	50	100	
Common to all Branches except AI & DS										
Prerequisite	Artificial Intelligence, Machine Learning, Deep Learning, Programming in C, Python									
Course Outcomes	On completion of the course, the students will be able to							BT Mapping (Highest Level)		
	CO1	Identify and define a real-world problem relevant to their field of study.							K2	
	CO2	Develop and implement the proposed solution using appropriate tools and technologies.							K3,K5	
	CO3	Present the project findings effectively through a structured report and oral presentation.							K6	
The project work involves developing a solution to a real-world problem using emerging technologies and engineering principles. Students will work individually to analyze, design, develop, and evaluate a functional prototype or software application. The project must demonstrate the application of theoretical knowledge to practical challenges, integrating concepts from the core areas of the curriculum. The project spans an academic term and includes multiple reviews to assess progress, quality, and implementation. Students are expected to conduct literature reviews, define clear objectives, apply suitable methodologies, perform data collection and analysis, and present their findings in a comprehensive report.
